- The method may be performed by a computer program that is stored in a non-transient computer readable medium.
- Each of the steps of the method is performed using a data processing system.
- Prior to the step of receiving, the method further comprises: transmitting a request for said data.

Claims, Drawings, Description

- A data processing system comprising: a processor configured to perform a method according to claim 1.
- A computer program product comprising: computer readable instructions stored on a non-transitory computer readable medium, wherein said instructions, when executed by a processor, cause said processor to perform a method according to claim 1.
- The computer program product of claim 3, wherein said instructions are configured to cause said processor to perform said method.
- A non-transitory computer readable medium storing a computer program according to claim 3, wherein said computer program is configured to cause said processor to perform said method.
- The non-transitory computer readable medium of claim 5, wherein said computer program is configured to cause said processor to perform said method.

Claim 2, or claim 3, or claim 4

- Receiving, by said at least one processor, said data.
- Receiving, by said at least one processor, said data.
- A system, wherein said at least one processor is configured to: receive, by said at least one processor, said data.

Claim 1, or claim 2, or claim 3

- Receiving, by said at least one processor, said data.
- Wherein said at least one processor is configured to: receive, by said at least one processor, said data.

Claim 1, or claim 2, or claim 3

- A system according to claim 1, wherein said at least one processor is configured to: receive, by said at least one processor, said data.
- Wherein said at least one processor is configured to: receive, by said at least one processor, said data.
- A system according to claim 1, wherein said at least one processor is configured to: receive, by said at least one processor, said data.

Claim 1

The method comprising: receiving, by said at least one processor, said data.

1. A system comprising:
2. A system according to claim 1, wherein said at least one processor is configured to: receive, by said at least one processor, said data.
3. Claim
4. Claim
