Congratulations and thank you for purchasing this latest innovation from Belkin, the USB leader. The Hi-Speed USB 2.0 4-Port Lighted Hub combines a sleek design with outstanding performance, through four downstream USB ports. It lets you easily connect all your USB 1.1 and 2.0 devices to your computer, such as your iPod®, digital camera, printer, MP3 player, and more. Its compact size and top-light design seamlessly fit and complement any desktop area. Please carefully review the instructions below to be sure you get the most from your Belkin Hub.

Installation Instructions:

Step 1: Plug the power adapter into a nearby AC wall outlet or surge protector. Then, plug the round power connector into the back of the Hub.

Step 2: Plug the flat end (USB-A connector) of the provided USB device cable into the downstream port of your computer, then plug the other end (USB mini-B connector) of the device cable into the upstream port on the rear of the Hub. If your computer is on, the Hub will automatically be detected and configured. If your computer is off, turn it on for the Hub to be detected and configured.

Step 3: Attach a USB 2.0 or 1.1 device to the Hub and begin using it.
