# *INSTALLATION INSTRUCTIONS*

## 598-00
### EIGHT BUTTON DRY CONTACT KEYPAD

- The 598 is an eight button, momentary, dry contact keypad. It is normally used in conjunction with the Xantech 590 Programmable Controller as shown in the illustration below.
- Requires 9-conductor cable, as shown. Use 24 gauge, stranded or solid wire, up to lengths of 5000'.
- Two 598's may be used to provide momentary switch closures for all 16 of the 590 input terminals.
- Two or more 598's may also be wired in parallel to the same terminals on the 590 where control from more than one room or area is required.
- The 598 fits into a standard single-gang J-box. 598's may also be used side-by-side in two (or more) gang J-boxes.
- A legend cutout sheet (included) contains typical component function command icons for button identification.
