ANDROID™ "EASE OF USE" EXPERIENCE

Very easy to use device, users can enjoy a tablet-like browsing experience. Enjoy the intuitive operation of Android™ KitKat 4.4 – with thousands of productivity and entertainment apps readily downloadable from the market on a much larger touch screen than typical Android™ devices. The clear, easy-to-use user's interface helps you to browse intuitively which can be sorted by rating, category or popularity.

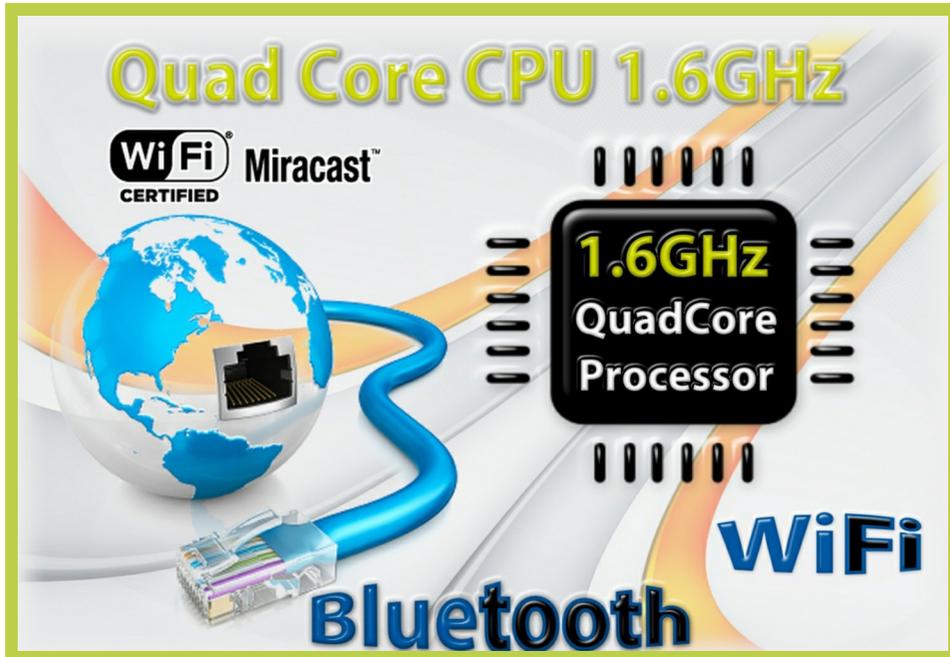

Android Box SNNPB73B

Combine the Android Box with one of the HANNspree Touch monitors and you'll have an Android™ based system with a large format LED display. Available in 23" (HT231HPB) and 27" (HT271HPB), our touch screens have 1080P Full HD resolution that can deliver great image quality with superior detail and sharpness, making them an ideal fit for graphic design, watching movies and business applications that require professional monitor performance. Your Android™ world just got a whole lot bigger.

The HANNspree Touch monitors are based on the latest 10 points projected capacitive touch technology, which gives you the same outstanding user experience as your smartphone and tablets, creating a rich and intuitive experience, allowing you to open, edit and zoom your documents without needing any additional peripherals. You can use the touch capabilities for entertainment while browsing the web or playing games making your experience even more natural, simple and enjoyable. The Android Box + HANNspree Touch monitor gives you the ultimate Android™ experience.

Android Box SNNPB73B

QUAD CORE CPU, 1.6GHZ

High speed CPU, capable of delivering fast processing capabilities for your applications and creating a smoother interaction when you're browsing, pitching or zooming your photos, videos and general documents.

SURF THE WEB

Access the cloud, keep in touch with friends and family through your social networks. Whether viewing your favourite news channels, checking your e-mail, chatting with friends and family, downloading new dinner recipes or just working on file through Google docs, the Home Tablet Box is your perfect connected device to internet.

CONNECTIVITY

The Android Box comes with integrated Wi-Fi. It is simple and quick to set-up in any environment without the need of additional cables and pre-installations, giving quick and flexible Internet access. Alternatively you can also use the Ethernet LAN connector (RJ45 port) for wired access to internet. With Bluetooth capability, you can easily transfer contents from your mobile device, or connect a wireless Bluetooth keyboard and mouse.

Wi-Fi CERTIFIED Miracast™ is a ground breaking solution for seamlessly displaying video between devices, without cables or a network connection. Users can do things like view pictures from a smartphone on a big screen display, share a laptop screen with the conference room projector in real-time, and watch live programs from a home cable box on a tablet.

Android Box SNNPB73B

PERFECT FOR EDUCATION

The HANNspree Android Box + Touch monitor are the right tool to enable young children to express their creativity with e-painting, learn their ABC's or use interactive educational apps.

The Hannspree Android Box comes with a Micro SD memory slot to expand the internal memory up to 32Gb.

TOUCH DIGITAL SIGNAGE

The HANNspree Android Box + Touch Monitor can also be used for creating public kiosks, touch digital signage, etc...Just install on the device a specific Kiosk web browser application, it locks down the user interface so that the user isn't able to adjust Android system settings. The HANNspree Home Tablet is an interesting solution for vertical applications such as interactive kiosks in schools, hotels, shopping centers and many more.

Features with you in mind

PERFECT FOR EDUCATION

Get comfortable with your touch screen. You can easily adjust the stand of the HANNspree touch monitor so you can use it in various ergonomic positions. Set your preferred viewing and touch angle, from 10 to 60 degrees, or lay the unit flat.

HANNspree tablets are updated via OTA (Over The Air). OTA (over-the-air) software update application keeps your tablet up-to-date with the latest available software. The device alerts you when new firmware becomes available and allows you to install it directly onto your tablet. Both the OTA system and the updates are developed by the HANNspree team of engineers, ensuring full integration between the updates and the firmware.
