

Jo-Beau Chipper/Shredder (CS6120)

The Jo-Beau Chipper/Shredder Attachment (P/N CS6120) is now available for the Walker Mower. Mounting on the Walker GHS tractor like other Walker attachments, this handy attachment uses the GHS blower to discharge chipped material into the grass catcher for clean, easy debris removal. Matched with the Walker Tractor, the chipper/shredder delivers excellent mobility and productivity for small arborist jobs . . . "Move the Walker to the trimmings instead of dragging trimmings to the chipper".

Key Features

OPERATION

Large opening with protective flap (flap not shown in operating position for illustration only)

Heavy duty right angle drive gearbox

Mounts on tractor like Walker decks and other attachments

MAINTENANCE

Greaseable PTO drive shaft connection

Intake chute tilts back for access to chipping blades

SAFETY

Safety shut-off button

WALKER MOWERS™

Walker Manufacturing Company • 5925 E. Harmony Road, Fort Collins, CO 80528 • 970-221-5614 • www.walkermowers.com

How Does It Work?

A - Operator feeds material up to 3 inches (80 mm) into opening. A protective flap shields the operator from moving debris, and an emergency shut-down button is located above the opening.

B - PTO-driven drum blades feed and chip material.

C - Chipped material moves through blower chute.

D - GHS blower (working with the PTO system) draws material from the chute and into the catcher box.

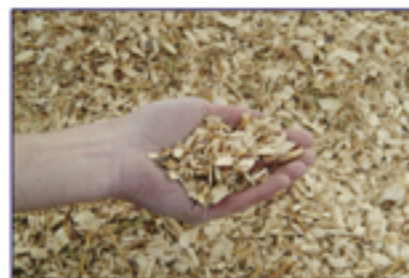

E - Oscillating spout in catcher box evenly distributes material in the box and Powerfil® full signal lets the operator know when the box is full.

Catcher box fills completely with chipped material

Maneuverable Walker Tractor allows material to be transported from job site

Chipped material is useful as mulch and soil additive

Specifications

PERFORMANCE	
Minimum Required Horsepower	20.9 Diesel (MD) or 26 EFI (MTEFI)
Maximum RPM	2900
Maximum Wood Diameter	3 in. (80 mm)
Number of Drum Blades	2
DIMENSIONS (ATTACHMENT ONLY)	
Weight	198 lbs. (90 kg)
Overall Width	39.5" (1000 mm)
Overall Length	51 in. (130 cm)
Input Height (Opening from Ground)	29.5 in. (750 mm)
Opening Dimensions	15-3/4" W x 11-3/4" H (40 cm x 30 cm)
