

ML640 Digital Media Player

V:1713-0628-10

Introduction

MENU

- Press to select an item from the main menu.
- Press to access the sub-menu of the current mode.
- Press and hold to return to the main menu.

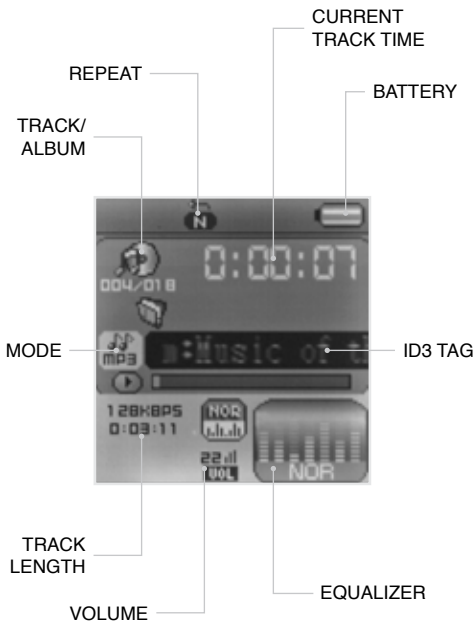

VOLUME

- Press to activate the volume adjust mode, then press the **SKIP/SEARCH** buttons to adjust the volume.

Charging

- 1 Connect the digital media player to a computer to charge its internal battery.

Music Player

Loading Files

- 1 Connect the unit to a computer (Windows, Apple, or Linux) using the **MINI-USB** connection and the included USB cable.
- 2 Once connected, the unit will show up on the connected computer as if it were a connected USB thumb drive, external hard drive, or memory card.
- 3 Drag and drop the desired audio, video, photo, or ebook files into the unit's drive location on the connected computer.

File Compatibility:

MUSIC: MP3, WMA
VIDEO: MTV
VOICE: WAV
PHOTOS: JPEG, BMP
EBOOK: TXT

- 4 After the files are loaded onto the unit, right-click on the drive and eject it from the computer, then disconnect the USB cable.

Music

- 1 Power the digital media player on.
- 2 Navigate to the Music icon on the main menu and press the **MENU** button.
- 3 Press the **PLAY** button to begin playing music from your digital media player.

- 1 Power the digital media player on.
- 2 Navigate to the Voice icon on the main menu and press the **MENU** button.
- 3 Press the **SKIP/SEARCH** buttons to cycle through the available recordings.
- 4 Press the **PLAY** button to begin playing the selected recording.
- 5 Press and hold the **MENU** button to return to the Main Menu.

Video

File-type Requirements: MTV

Use the included Video Conversion Software to convert video files to the MTV format so that they can play on the digital media player.

- 1 Power the digital media player on.
- 2 Navigate to the Video icon on the main menu and press the **MENU** button.
- 3 Press the **SKIP/SEARCH** button to navigate through the file browser, and press the **MENU** button to select an MTV video file.
- 4 Press and hold the **MENU** button to return to the Main Menu.

Running Video Conversion Software

System Requirements: Windows 2000, ME, or XP

- 1 Connect the digital media player to a computer (Windows, Apple, or Linux) using the **MINI-USB** connection and the included USB cable.

- 2 Once connected, the unit will show up on the connected computer as if it were a connected USB thumb drive, external hard drive, or memory card.
- 3 Open the drive for the connected digital media player on your computer to view the file and folder contents
- 4 Double-click on the "VideoConvert" file to open the Video Conversion software.

- 4 Click on "Output Video" to select a destination for the converted video file.
- 5 Click "Start Conversion" to begin converting the selected video file.

This video conversion software may be blocked by some anti-virus applications. If you are experiencing issues when attempting to run this program, please disable your anti-virus software or try using another computer. Re-enable your anti-virus software immediately after you finish using the video conversion software.

Please note, disabling your anti-virus software exposes your computer to potential threats. Disable at your own risk.

Using the Video Conversion Software

System Requirements: Windows 2000, ME, or XP

- 1 Follow the "Running Video Conversion Software" directions on the previous page.
- 2 After the program opens, click on the "Input Video" button in the Video Converter software.
- 3 Browse to and double-click on any of the following video file types:

AVI, WMV, ASF, MPG, MOV, QT, VOB, RM, RMVB, MPEG4, 3GP

FCC Warnings

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

WARNING: Lithium ion batteries, like all rechargeable batteries are recyclable and should be recycled or disposed of in normal household waste. Contact your local government for disposal or recycling practices in your area. They should never be incinerated since they might explode.

Battery shall not be exposed to excessive heat such as sunshine, fire or the like.

GREEN INITIATIVE

Environmental Commitment to 'Protect for Today and Sustain for Tomorrow'

2009 marks the official launch of DPI, Inc.'s corporate campaign for a greener and cleaner world. DPI and its four brands, iLive, WeatherX, Capri, and GPX, are building upon environmental initiatives introduced at all of their facilities to help formulate and sustain significant and important conservation efforts within its manufacturing and marketing communities. In addition to targeting and selecting energy efficient product features, and structuring 'green office' procedures, other initial program efforts include:

Reduction of all packaging sizes

Recyclable plastics for clamshell packages, with a plan to eventually replace plastic with recyclable paper

Recycled fiber board in place of the polyfoam in packing boxes

Recycled plastics in place of the virgin material in product construction
