

755 SERIES SINGLE-DISPLAY TIMERS

Model
755-HS4

Model
755-HS10

The 755 Series Single-Display Timers includes four and eight channel models.

These easy-to-use timers count down in minutes and seconds, or hours and minutes. Each channel has its own display, and can be programmed independently. Slide in replaceable menu strips identify the product being timed on each channel, and are replaceable as restaurant menus change.

Prince Castle timers are easy to program and simple to use. The push of a button activates each channel; an audible alarm and flashing channel button alert the operator when timing is complete.

Prince Castle timers are standard 120V and are backed by a one-year parts and labor warranty.

STANDARD FEATURES

- Each channel counts down in minutes and seconds, or hours and minutes
- Channels share a single display - the channel with the least time remaining shows
- Toggles between countdown time and duty function
- Multiple programmable data functions
- Features an Alert alarm to warn, "The end is near"
- Removable identification strips can be easily changed to accommodate new menu items
- Transformer built into housing (no fat plug)
- One-year parts and labor warranty
