

MIL-S24002TGxx

24-port 10/100/1000 TX

2 Combo SFP Slots

Unmanaged Switch

User Guide

Regulatory Approval

- FCC Class A
- UL 1950
- CSA C22.2 No. 950
- EN60950
- CE
- EN55022 Class A
- EN55024

Canadian EMI Notice

This Class A digital apparatus meets all the requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

European Notice

Products with the CE Marking comply with both the EMC Directive (89/336/EEC) and the Low Voltage Directive (73/23/EEC) issued by the Commission of the European Community. Compliance with these directives imply conformity to the following European Norms:

- EN55022 (CISPR 22) - Radio Frequency Interference
- EN61000-X - Electromagnetic Immunity
- EN60950 (IEC950) - Product Safety

Five-Year Limited Warranty

MiLAN Technology warrants to the original consumer or purchaser that each of its products, and all components thereof, will be free from defects in material and/or workmanship for a period of five years from the original factory shipment date. Any warranty hereunder is extended to the original consumer or purchaser and is not assignable.

MiLAN Technology makes no express or implied warranties including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose, except as expressly set forth in this warranty. In no event shall MiLAN Technology be liable for incidental or consequential damages, costs, or expenses arising out of or in connection with the performance of the product delivered hereunder. MiLAN Technology will in no case cover damages arising out of the product being used in a negligent fashion or manner.

Trademarks

The MiLAN logo and MiLAN Technology trademarks are registered trademarks of MiLAN Technology in the United States and/or other countries.

To Contact MiLAN Technology

For prompt response when calling for service information, have the following information ready:

- Product serial number and revision
- Date of purchase
- Vendor or place of purchase

You can reach MiLAN Technology technical support at:

1. Introduction

The 24-port 10/100/1000 TX plus 2 combo SFP Slots Switch is an ideal solution for solving traffic block at the core of the network. It offers 24 x auto-negotiating 10/100/1000Base-T Gigabit Ethernet ports that can significantly improve your network backbone performance. This Switch will fit into any enterprise level network to act as an exit to the backbone switch. It also provides 2 SFP Gigabit port for gigabit network connection.

The 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch features **Auto MDI/MDIX** function for each port. [In general, MDI means connecting to another Hub or Switch while MDIX means connecting to a workstation or PC. Therefore, Auto MDI/MDIX means that you can connect to another Switch or workstation without changing non-crossover or crossover cabling. The switch also features a store-and-forward switching and can auto-learn and store source address on a 8K MAC address table.

Features

- Compatible with IEEE 802.3 10Base-T, IEEE802.3u 100Base-TX, IEEE802.3z gigabit fiber and IEEE802.3ab 1000Base-T
- 24 ports gigabit switch with two COMBO SFP SLOTS
- Automatic MDIX for all ports
- 8K entry MAC address table
- 9K Jumbo Frame support
- 2Mbits Memory buffer
- IEEE802.3x flow control:
 - Pause frame for 10/100/1000Mbps full duplex
 - Backpressure for 10/100 Mbps half duplex
- 2 COMBO SFP SLOTS for SFP transceiver
- Store-and-Forward architecture support
- One DC fan for good ventilation and to increase system heat sink performance
- 19 inch Rack mount design

Package Contents

- The 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch
- Power Cord
- Four Rubber Feet
- User Manual

Figure 1-1. Package Contents

Compare the contents of your 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch package with the standard checklist above. IF any item is missing or damaged, please contact your local dealer for service.

2. Hardware Description

This Section describes the hardware of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch.

The physical dimensions of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch is:
440 x 224 x 44 mm (W x D x H)

Front Panel

The Front Panel of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch consists of 24 x auto-negotiation 10/100/1000Mbps Ethernet RJ-45 connectors (support **Automatic MDI/MDIX** function), two Combo SFP Slots slot, and LED-indicators (100/1000, Link/Activity, Full duplex/Collision) for each Gigabit port and power LED-indicator for unit.

Figure 2-1. The Front Panel of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch

- **RJ-45 Ports (Auto MDI/MDIX):** 24 x auto-negotiation 10/100/1000 Mbps Ethernet RJ-45 connectors

[**Auto MDI/MDIX** means that you can connect to another switch or workstation without changing straight through or crossover cabling.]

- **Combo SFP Slots ports:** It is port 23 and 24 and support 3.3V. It auto detects between Giga copper and Combo SFP Slots. Combo SFP Slots module is optional. There are 2 LED indicators for Combo SFP Slots port – LNK and ACT. When the Combo SFP Slots module is not installed, the port 23 and 24 is the 10/100/1000 copper only.

[**Note**] When the Combo SFP Slots module is installed, Combo SFP Slots have a default priority over 10/100/1000 copper port. It doesn't matter whether copper port has a valid link. When SFP is in the slot copper ports are disabled.

Rear Panel

The 3-pronged power plug, on/off switch, and Ventilation fan are located at the rear Panel of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch as shown in Figure 2-2. The Switch will work with AC in the range 100-240V AC, 50-60Hz.

Figure 2-2. Rear panel of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch

LED Indicators

The LED Indicators gives a real-time indication of system operating statuses. There are 3 LED-indicators (1000, LNK/ACT, FDX/COL) for each Gigabit port and one Power LED for unit. The following table provides descriptions of LEDs status and their meaning.

Figure 2-3. LED Indicators

LED	Status	Description
Power	Green	Power On
	Off	Power is not connected
1000	Green	The port is operating at the speed of 1000Mbps.
	Off	No device attached or in 10/100Mbps mode
LNK/ACT	Green	The port is connecting with the device.
	Blinking	The port is receiving or transmitting data.
	Off	No device attached.
FDX/COL	Orange	The port is operating in Full-duplex mode.

	Blinking	Packet collision occurred on this port.
	Off	No device attached or in half-duplex mode.

Table 2-1. The Descriptions of LED Indicators

Combo SFP Slots LED

2 Combo SFP Slots ports have two LED indicators – LNK and ACT. The following table provides descriptions of LEDs status and their meaning.

Figure 2-4. Combo SFP Slots port LED Indicators

LED	Status	Description
LNK	Green	The port is connecting with device.
	Off	No device attached.
ACT	Green (Blinking)	The port is transmitting or receiving the data.
	Off	No data transmitting or receiving.

Table 2-2. The Descriptions of Combo SFP Slots LED Indicators

3. Installation

This section shows the installation procedures of the switch.

Set the Switch on a sufficiently large flat space with a power outlet nearby. The surface where you put your Switch should be clean, smooth, level, and sturdy. Make sure there is enough clearance around the Switch to allow attachment of cables, power cord and air circulation.

Attaching Rubber Feet

- Make sure mounting surface on the bottom of the Switch is grease and dust free.
- Remove adhesive backing from your Rubber Feet.
- Apply the Rubber Feet to each corner on the bottom of the Switch. These footpads can prevent the Switch from shock/vibration.

Power On

Connect the cord of power adapter to the power socket on the rear panel of the Switch. The other side of power cord connects to the power outlet. Check the power indicator on the front panel to see if power is properly supplied.

4. Network Application

This section provides you one sample of network topology in which the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch is used. In general, the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch is designed as a high-bandwidth backbone switch.

You can use the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch to connect servers, switches, workstation, and PCs to each other by connecting these devices directly to the Switch. The Switch automatically learns node address, which are subsequently used to filter and forward all traffic based on the destination address. You can use Gigabit fiber port to connect with fiber network that extend the Ethernet network to fiber network.

For enterprise networks where large data broadcast are constantly processed, this switch is an ideal suitable for departmental switches to connect to the Core Switch. All ports can connect to departmental switches, and the departmental switches can be connected to the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch. Then all the devices in this network can communicate with each other. Connecting servers to the Core Switch allow each end station to access the server's data. This switch is an ideal solution for backbone connectivity.

5. Troubleshooting

The Switch can be easily monitored through panel indicators to assist in identifying problems. This section describes common problems you may encounter and where you can find possible solutions.

■ Diagnosing LED Indicator

If Link indicator does not light up after connection, you may check whether network interface (e.g., a network adapter card on the attached device), network cable, or switch port is defective or not. Verify that the switch and attached device are power on. Be sure the cable is plugged into both the switch and corresponding device. Verified the proper cable type is used and its length does not exceed specified limits.

■ Power

IF the power indicator does turn on when the power cord is plugged in, you may have a problem with power outlet, or power cord. However, if the Switch powers off after running for a while check for loose power connections, power losses or surges at power outlet. IF you still cannot resolve the problem, contact your local dealer for assistance.

■ Transmission Mode

Verify that each port is set to the same transmission mode used by the attached device (i.e., half or full duplex). RJ-45 port uses auto-negotiation to set the transmission mode. If the attached device operates at half duplex, the default when auto-negotiation fails, then it does not have to support auto-negotiation.

■ Cabling

RJ-45 ports: Use unshielded twisted-pair (UTP) or shield twisted-pair (STP) cable for RJ-45 connections: 100Ω Category 3,4 or 5 cable for 10Mbps connections or 100Ω Category 5 cable for 100Mbps connections or 4-pair Category 5 copper cabling for 1000Mbps connection. Also be sure that the length of any twisted-pair connection does not exceed 100 meters (328 feet).

6. Technical Specification

The following table provides the technical specification of the 24-port 10/100/1000 TX plus 2 Combo SFP Slots Switch.

Standard	IEEE802.3 10BASE-T IEEE802.3u 100BASE-TX IEEE802.3z Gigabit fiber IEEE802.3ab 1000Base-T
Protocol	CSMA/CD
Technology	Store-and-Forward switching architecture
Transfer Rate	14880 Packets per Second for 10Mbps 148800 Packets per second for 100Mbps 1488000 Packets per second for 1000Mbps
Connector	RJ-45: 24 ports COMBO SFP SLOTS: 2 x 3.3V SFP SLOTS
MAC Address	8K
Memory Buffer	2Mbits
Network Cable	10BASE-T: 2 pairs UTP/STP CAT.3, 4, 5 cable EIA/TIA 568 100Ohm(100M) 100BASE-TX: 2 pairs UTP/STP CAT. 5 cable EIA/TIA 568 100Ohm(100M) Gigabit Copper: 4 pairs UTP/STP CAT. 5 cable EIA/TIA 568 100Ohm(100M)
LED	System: Power Per RJ-45 port: 1000Mbps, Link/Activity, Full duplex/ collision Combo SFP Slots slot: Link, Activity
Power Supply	Internal power supply, AC 100~240VAC, 50/60 Hz
Power	47Watts(maximum)

Consumption	
Operation Temperature	0° to 45° (32° to 113°)
Operation Humidity	10% to 90% (Non-condensing)
Dimension	440mm(W) x 224mm(D) x 44mm (H)
EMI & Safety	FCC Class A, CE, UL, CE/EN60950
