SEP-C1 Professional Software Entertainment Controller

FEATURES

Control Pioneer's DJ Software (DJS¹) and Other PC Applications

The SEP-C1 includes Pioneer's DJS all-in-one DJ software application for playback from a Windows based computer (PC not included). When connected to DJS, no mouse or keyboard is required for navigation and DJ performance. Furthermore, the SEP-C1 supports control of other software, such as SERATO Scratch LIVE², without need of the control discs. The SEP-C1 is also a full MIDI controller for any MIDI-compatible PC application.

4.3-Inch Color LCD & Intelligent Graphical User Interface

In addition to the high-visibility 4.3-inch color LCD panel, an intelligent graphic user interface and rotary selector enables rapid track search through large collections of digital audio. A play list function also speeds the track selection process for recalling frequently played songs.

Industry's First³ Bright Organic Electroluminescence (OEL)

Two high-visibility OEL displays give the SEP-C1 outstanding visibility for the pitch, playback time and position information. Together with its main 4.3-inch color LCD, the OEL display ensures smooth DJ play regardless of lighting conditions.

DJS Auto Mix Function

An Auto Mix function automatically mixes playback of the tracks registered on the play list in four modes such as ECHO or ZIP. Audio is seamlessly beat matched and mixed on the fly.

DJS Effects Enhance DJ Performance

Eight effects within Pioneer DJS (Delay, Echo, Auto Pan, Auto Trance, Auto Filter, Flanger, Reverb and Pitch Shifter) add versatility to mixing performances. The effects can be synchronized with the music tempo (BPM) at the click of a button.

Other Functions

- Tempo Control Range: Choose among four pitch ranges available for the tempo slider: $\pm 6\%$, $\pm 10\%$, $\pm 16\%$, and WIDE⁴.
- Pitch Bend Button: Enables fine adjustment of the track speed by simply pressing a button.
- Seamless Loop: Repeats looped audio without interruption. A loop can be set from as small as one frame up to an entire CD's length.
- Hot Loop: Restarts the loop seamlessly from its entry without interruption of the music.
- Auto BPM Counter: Measures and digitally displays a track's tempo.
- Rack-Mount Ready: Ready for rack-mount which is useful for club/studio installations.

For more information and streaming demo videos, visit www.pioneerdj.com/gear_SEPC1

¹Using software version 1.6000, the MEP-7000 can control Pioneer DJS. Further software and firmware updates will be available online. ²Support for more DJ software applications pending from other companies but Pioneer does not guarantee the performance of software on users' computers. Scratch LIVE is a registered trademark of Serato Audio Research. ³As of January 16, 2008, according to Pioneer. ⁴WIDE mode not available on MP3/AAC/WAV/AIFF.

SPECIFICATIONS

Control Unit

Power Requirements USB bus power

DJ Software DJS System Requirements

Compatible OS Windows Vista/XP/2000
Compatible File MP3
CPU Pentium-M 1.5GHz or better

Memory 512 MB or more (Windows Vista: 1GB or more)
HDD 250MB or more
