

METRO MANTEL™

FOR THE BOSTONIAN™ ELECTRIC FIREPLACE

Brushed Nickel Wilmington Face

Introducing the Metro Mantel™, a new contemporary cabinet for the Lopi Bostonian™ Electric Fireplace. This cabinet-style mantel is constructed of brushed nickel sheet metal with a textured black, powder-coated base. The Metro Mantel is designed to be used with the brushed nickel or black painted Wilmington™ face. Don't forget to consider adding the optional nickel Arabesque grills to either face for a completely unique look! The mantel is nicely proportioned for average size rooms with an overall height of 36-3/4" and base dimensions of 50-1/8" wide by 18-3/8" deep.

One of the features of the Bostonian Electric Fireplace is the Purifire™ filter system that will continuously pull the air in a room through a filter, removing dust, pollen and other impurities. When the Bostonian E is installed in a Metro Mantel, access to the filter is always fast and easy because the top of the mantel lifts off. View the new Metro Mantel and Bostonian Electric Fireplace at a Lopi dealer near you.
