WARNING

CALIFORNIA — Proposition 65 Warning

Engine exhaust and some of its constituents, and some dust created by power sanding, sawing, grinding, drilling and other construction activities contains chemicals known to the State of California to cause cancer, birth defects and other reproductive harm. Some examples of these chemicals are:

- Lead from lead-based paints.
- Crystalline silica from bricks.
- Cement and other masonry products.
- Arsenic and chromium from chemically treated lumber.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: **ALWAYS** work in a well ventilated area, and work with approved safety equipment, such as dust masks that are specially designed to filter out microscopic particles.

Terms and Conditions Of Sale — Parts 30

*NOTE: Specification and part number
are subject to change without notice.*

- Dealer account number
- Dealer name and address
- Shipping address (if different than billing address)
- Return fax number
- Applicable model number
- Quantity, part number and description of each part
- Specify preferred method of shipment:
 - UPS Ground
 - UPS Second Day or Third Day*
 - UPS Next Day*
 - Federal Express Priority One (please provide us with your Federal Express account number)*
 - Airborne Express*
 - Truck or parcel post

**Normally shipped the same day the order is received, if prior to 2PM west coast time.*

Earn Extra Discounts when you order by FAX!

All parts orders which include complete part numbers and are received by fax qualify for the following extra discounts:

<u>Number of line items ordered</u>	<u>Additional Discount</u>
1-9 items	3%
10+ items**	5%

Get special freight allowances when you order 10 or more line items via FAX!**

- UPS Ground Service at no charge for freight
- PS Third Day Service at one-half of actual freight cost

No other allowances on freight shipped by any other carrier.

**Common nuts, bolts and washers (all items under \$1.00 list price) do not count towards the 10+ line items.

RULES FOR SAFE OPERATION & SAFETY DECALS

■ Do not operate or service this equipment before reading the operating and maintenance instructions manual or serious injury may result.

■ Do not operate this equipment unless all guards and safety devices are attached and in place.

■ Stop the engine when leaving the equipment.

■ Block the unit when leaving or when using on a slope

■ Maintain this equipment in a safe operating condition at all times.

■ Caution must be exercised while servicing this equipment. Rotating and moving parts can cause injury if contacted.

■ Stop the engine before servicing, adding fuel and oil.

■ When towing, an adequate safety chain must be fastened to the frame, refer to page 9.

■ Keep all inexperienced and unauthorized people away from the equipment at all times.

■ Unauthorized equipment modifications will void all warranties.

■ Check all fasteners periodically for tightness. Also check towing tongue bolt, lock nut and wheel lug nuts for wear.

■ Wear safety glasses at all times when working around machinery.

■ Stop the engine and disconnect the spark plug before allowing anybody's hands in the mixing drum.

■ Never pour or spray water over the engine or electric motor.

■ Always stand clear of dump handle when mixer is in operation. Any binding of material between the mixer blades and drum will cause drum and handle to quickly move in the discharge position.

The safety instruction decals shown must be on all Essick Mixers

CAUTION!
SHUT OFF ENGINE BEFORE
PUTTING HANDS IN MIXING DRUM

A MULTIQUIP COMPANY

SAFETY INSTRUCTIONS

1. Do not operate or service this machine before reading the operating and maintenance manual.
2. Keep all inexperienced and/or unauthorized people away from equipment at all times.
3. Do not operate this equipment unless all guards and safety devices are attached and in place.
4. Keep this equipment in safe operating condition at all times.
5. Caution must be exercised while servicing this equipment.
Rotating and moving parts can cause injury if contacted.
6. Stop engine and allow to cool before adding fuel or oil.
7. Stop engine when leaving equipment.
8. Block unit when parking on a slope.
9. Unauthorized equipment modifications will void all warranties.

ESSICK CONSTRUCTION PRODUCTS — A MULTIQUIP COMPANY — CARSON, CALIFORNIA

The safety instruction decal is **P/N EM948501**

There are no warranties, express or implied, made by **Multiquip Inc.** hereunder on Products manufactured or distributed by it except the warranty against defects in material and workmanship on new Products to the original purchaser, as hereinafter set forth.

Multiquip Inc. warrants Products manufactured by it to be free from defects in material and workmanship under normal and proper use and servicing for the periods specified on the bottom of this page. Warranty on the engines supplied with the Products is limited to the warranty extended by the engine manufacturer. Multiquip Inc.' sole obligation under this warranty is limited to the replacement or repair, at its Carson, California facility, or such authorized facility, of only such part or parts thereof as shall appear to Multiquip Inc. upon inspection at such facility, to have been defective in material and workmanship.

A statement giving model and serial number of the Product, date of sale to original purchaser and date and description of failure shall accompany all parts.

Any part or parts determined by Multiquip Inc. to be defective will be replaced free of charge, F.O.B. Carson, California. Returned parts subject to warranty must be shipped prepaid to Multiquip Inc. within 30 days from the date the defective part or parts were removed. This warranty does not apply to any part or parts which have been subject to abuse or unauthorized repairs

Warranty with respect to Products, components and accessories not manufactured by Multiquip Inc. is limited to the warranty extended by the manufacturer of those items.

There are no warranties, express or implied, in addition to the above except as may be provided in writing by Multiquip Inc. MULTIQUIP INC. SHALL NOT BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

THE FOREGOING WARRANTIES ARE IN PLACE AND IN LIEU OF ALL WARRANTIES OF MERCHANTABILITY AND FITNESS AND SETS FORTH THE ENTIRE OBLIGATION OF MULTIQUIP INC.

To avoid misrepresentations with respect to Products sold hereunder, the Dealer agrees that no warranties, or other operating guaranties on any Products covered by this Agreement shall be made in excess of those made by Multiquip Inc.

Multiquip Inc. Warranty Periods:

EM-900 12 months

EM-900S & 900P — OPERATIONS

GENERAL

The Essick EM-700 and EM-900 Series plaster and mortar mixers are quality mixers that have a batch capacity of 2.5 and 3.5 bags respectively. With proper care, they will give continuous service year-after-year.

GASOLINE ENGINE CARE

For care and operation of the gasoline engine, refer to the engine manufacturer's operating instructions furnished with the engine. We recommend draining and refilling the engine crankcase at least every thirty hours of operation. Check the engine oil level daily.

ELECTRIC MOTOR CARE

For lubrication care and operation of the electric motor, refer to your electric motor instruction booklet furnished with the motor.

Protect the electric motor from dust as much as possible and keep ventilating openings clean. Do not spray water on the electric motor.

Refer to the following chart. For recommend plug sizes.

MOTOR	115 VOLT 1Ø EM 700		230 VOLT 1Ø EM 900	
	PIGTAIL CAP NEMA/ ESSICK	CONN BODY NEMA/ ESSICK	PIGTAIL CAP NEMA/ ESSICK	CONN BODY NEMA/ ESSICK
1½ & 3 HP	L5-30P/940545	L5-30R/940546	L6-15P/940550	L6-15R/940551

CONTROLS

KILL SWITCH: (Gasoline Engine Only) Located on the side of the engine cover.

ENGINE THROTTLE AND CHOKE CONTROLS: Please refer to the engine owners manual for specific instructions. The electric motor switch (electric motor only) located on the motor — is used to start and stop the mixer.

DUMP LATCH: To dump the tub, grasp the dump handle and lift the dump latch, then rotate the tub to discharge the mix. After, discharge, return the tub to the vertical mixing position.

CLUTCH

The paddle shaft and mixing blades are engaged and disengaged by tightening and loosening the drive belts with a spring loaded idler pulley. To engage the clutch, rotate the lever locates at the front of the mixer counterclockwise. The spring maintains the correct belt tension. To disengage the clutch, rotate the lever clockwise against the lever stop. The engine base is slotted to adjust for belt wear and to bring the idler pulley into operating range.

CAUTION: Stop the engine before allowing anybody to put their hands in the mixing drum.

WHEEL BEARINGS

After every 3 months of operation, remove the hub dust cap and inspect the wheel bearings. Once a year, or when required, disassemble the wheel hubs remove the old grease and repack the bearings forcing grease between rollers, cone and cage with a good grade of high speed wheel bearing grease (never use grease heavier than 265 A.S.T.M. penetration "No. 2.") Fill the wheel hub with grease to the inside diameter of the outer races and also fill the hub grease cap. Reassemble the hub and mount the wheel. Then tighten the adjusting nut, at the same time turn the wheel in both directions, until there is a slight bind to be sure all the bearing surfaces are in contact. Then back-off the adjusting nut 1/6 to 1/4 turn or to the nearest locking hole or sufficiently to allow the wheel to rotate freely within limits of .001" to .010" end play. Lock the nut at this position. Install the cotter pin and dust cap, and tighten all hardware.

PADDLE SHAFT BEARING

The paddle shaft in the Essick Mixer rotates in sealed ball bearings requiring no additional lubrication.

BEARING BRACKET

Grease the bearing bracket every month.

COUNTERSHAFT

The countershaft rotates on two self-aligned pillow block bearings. Grease these every 40 hours using grade #1 Lithium Base grease.

GEAR ALIGNMENT

The countershaft and driven pinion are mounted on a slotted base. To align gears, loosen pillow block mounting bolts and move them until the necessary alignment has been made.

GEAR LUBRICATION

The surface of the pinion and the bull gear should be very lightly greased every 250 hours.

IMPORTANT! AVOID OVER-GREASING. EXCESS GREASE WILL ACCUMULATE CONTAMINATES AND CAUSE PREMATURE WEAR.

IMPORTANT — DRUM HEAD SEAL CARE

On each end of the mixing drum is a drum head containing self adjusting paddle shaft seals. These seals consist of packing rings, split glands and spring actuated adjusters. A properly maintained seal prevents material from working around the paddle shaft, causing excessive wear. The following is a suggested procedure of maintenance for protection of the paddle shaft and bearings:

A. Keep the drum head clean of plaster built up, so the spring adjusters will be free to work.

B. Replace with one new ring of packing and waterproof grease when split gland or pressure plate is about to bottom out against the end of the drum.

New Packing

When the old packing is to be completely replaced, coat shaft and packing generously with a good grade of waterproof grease and insert packing rings. Tighten the two spring adjuster nuts on each end until the spring is compressed to 1¼ inches or the top of the adjusting nut is even with the top of the drum head.

Also, whenever the paddle shaft is removed, new waterproof grease should be packed around the ball bearings in the drum heads before reinstalling the shaft. Fill the cavity completely.

DRUM GRILL

The drum opening is covered by a steel grill that is hinged for easy cleaning. This grill should be closed at all times when mixer is in use. Do not remove the grill or grill opening bar. Keep the grill clean by washing it down daily.

CAUTION: Stop the engine before allowing anybody to put their hands in the mixing drum.

TOWING — Before towing, check with local and state laws for proper compliance.

The tow bar and chain must be properly attached to the mixer and towing vehicle prior to towing. Refer to the following installation instruction:

Step 1. Insert the Draw Bar into the main frame. Secure, utilizing the 3/4" bolt (grade 5) and nylock nut. Tighten to 100 foot pounds.

Step 2. Install the chain through the hole located between the frame gusset and frame angle. Loop the chain together and place under the Draw Bar. Secure with connector link.

Step 3. Extend the chain along the length of the Draw Bar, remove excess chain (slack) and secure to bottom connector link. Secure the chain to the towing vehicle, using the connector link.

NOTE: It is critical that the length of chain be properly adjusted to prevent the Draw Bar and front mixer stand from dropping to the ground (contact) in the event the Draw Bar becomes disconnected from the towing vehicle.

BALL HITCH COUPLER

1. Check vehicle hitch, ball, and coupler for signs of wear or damage. Replace any parts that are worn or damaged before towing.
2. Use only the 2" ball diameter as indicated on your coupler. Use of any other ball diameter will create an extremely dangerous condition which can result in separation of the coupler and ball or ball failure.
3. Be sure the coupler is secured to the hitch ball and the lock lever is down tight and locked.

Recheck tightness again after towing about 50 miles.

4. Check that trailer safety chains are properly connected.

RECOMMENDED MAINTENANCE

1. Smear ball socket and clamp face with chassis grease. Periodically oil pivot points and solutions surfaces of coupler with SAE 30 wt. motor oil.
2. When parking or storing your trailer. Keep the coupler off the ground so dirt will not build up in the ball socket.

SAFETY CHAIN P/N 3148

CONNECTOR LINK P/N 01004

CLEANING — BLADE ADJUSTMENTS

Always disconnect the spark plug wire before cleaning the inside of the drum.

Never pour or spray water over the gasoline engine or electric motor.

For consistent performance, long life and high quality mixing, thoroughly clean the mixer inside and out at the end of each day's operation. To prevent lumps of dried mortar from forming and contamination of future batches, do not allow a buildup of materials to form on the blades or anywhere inside the drum.

The following is the recommended wiper blade adjustments:

1) STEEL DRUM MIXERS

SIDE SCRAPER

END SCRAPER

2) POLYETHYLENE DRUM MIXERS

The poly blade should come as close as possible to the surface without touching. If material builds up on the drum, you may use a rubber mallet to dislodge the material without adverse effect to the drum.

IMPORTANT NOTICE

EPOXY COMPATIBILITY — There are some epoxies and other chemicals used in certain applications that are not compatible with polyethylene tubs.

Since Whiteman Industries cannot control the end user's application of this product, we will not assume responsibility for the resulting damages when exposed to incompatible chemicals.

EXPLANATION OF CODE IN REMARKS COLUMN

How to read the marks and remarks used in this parts book.

Section 1: Items Found In the “Remarks” Column

Serial Numbers-Where indicated, this indicates a serial number range (inclusive) where a particular part is used.

Model Number-Where indicated, this shows that the corresponding part is utilized only with this specific model number or model number variant.

Section 2: Items Found In the “Remarks” Column

Serial Numbers-Where indicated, this indicates a serial number range (inclusive) where a particular part is used.

Model Number-Where indicated, this shows that the corresponding part is utilized only with this specific model number or model number variant.

Section 3: Items Found In the “Items Number” Column

All parts with same symbol in the number column, *, #, +, %, or ■, belong to the same assembly or kit.

Note: If more than one of the same reference number is listed, the last one listed indicates newest (or latest) part available.

NOTE

If more than one of the same reference number is listed, the last one listed indicates newest (or latest) part available.

NOTE

The contents of this catalog are subject to change without notice.

PAYMENT TERMS

Terms of payment for parts are net 10 days.

FREIGHT POLICY

All parts orders will be shipped collect or prepaid with the charges added to the invoice. All shipments are F.O.B. point of origin. Multiquip's responsibility ceases when a signed manifest has been obtained from the carrier, and any claim for shortage or damage must be settled between the consignee and the carrier.

MINIMUM ORDER

The minimum charge for orders from Multiquip is \$15.00 net. Customers will be asked for instructions regarding handling of orders not meeting this requirement.

RETURNED GOODS POLICY

Return shipments will be accepted and credit will be allowed, subject to the following provisions:

1. A Returned Material Authorization must be approved by Multiquip prior to shipment.
2. To obtain a Return Material Authorization, a list must be provided to Multiquip Parts Sales that defines item numbers, quantities, and descriptions of the items to be returned.
 - a. The parts numbers and descriptions must match the current parts price list.
 - b. The list must be typed or computer generated.
 - c. The list must state the reason(s) for the return.
 - d. The list must reference the sales order(s) or invoice(s) under which the items were originally purchased.
 - e. The list must include the name and phone number of the person requesting the RMA.
3. A copy of the Return Material Authorization must accompany the return shipment.

4. Freight is at the sender's expense. All parts must be returned freight prepaid to Multiquip's designated receiving point.
5. Parts must be in new and resalable condition, in the original Multiquip package (if any), and with Multiquip part numbers clearly marked.
6. The following items are not returnable:
 - a. Obsolete parts. (If an item is listed in the parts price book as being replaced by another item, it is obsolete.)
 - b. Any parts with a limited shelf life (such as gaskets, seals, "O" rings, and other rubber parts) that were purchased more than six months prior to the return date.
 - c. Any line item with an extended dealer net price of less than \$5.00.
 - d. Special order items.
 - e. Electrical components.
 - f. Paint, chemicals, and lubricants.
 - g. Decals and paper products.
 - h. Items purchased in kits.
7. The sender will be notified of any material received that is not acceptable.
8. Such material will be held for 5 working days from notification, pending instructions. If a reply is not received within 5 days, the material will be returned to the sender at his expense.
9. Credit on returned parts will be issued at dealer net price at time of the original purchase, less a 15% restocking charge.
10. In cases where an item is accepted for which the original purchase document can not be determined, the price will be based on the list price that was effective twelve months prior to the RMA date.
11. Credit issued will be applied to future purchases only.

PRICING AND REBATES

Prices are subject to change without prior notice. Price changes are effective on a specific date and all orders received on or after that date will be billed at the revised price. Rebates for price declines and added charges for price increases will not be made for stock on hand at the time of any price change.

Multiquip reserves the right to quote and sell direct to Government agencies, and to Original Equipment Manufacturer accounts who use our products as integral parts of their own products.

SPECIAL EXPEDITING SERVICE

A \$20.00 to \$50.00 surcharge will be added to the invoice for special handling including bus shipments, insured parcel post or in cases where Multiquip must personally deliver the parts to the carrier.

LIMITATIONS OF SELLER'S LIABILITY

Multiquip shall not be liable here under for damages in excess of the purchase price of the item with respect to which damages are claimed, and in no event shall Multiquip be liable for loss of profit or good will or for any other special, consequential or incidental damages.

LIMITATION OF WARRANTIES

No warranties, express or implied, are made in connection with the sale of parts or trade accessories nor as to any engine not manufactured by Multiquip. Such warranties made in connection with the sale of new, complete units are made exclusively by a statement of warranty packaged with such units, and Multiquip neither assumes nor authorizes any person to assume for it any other obligation or liability whatever in connection with the sale of its products. A part from such written statement of warranty, there are no warranties, express, implied or statutory, which extend beyond the description of the products on the face hereof.
