

2-1/2 HP / 12" PLANER WITH DUST COLLECTOR

Model 95082

SET UP AND OPERATING INSTRUCTIONS

Visit our website at: http://www.harborfreight.com

Read this material before using this product. Failure to do so can result in serious injury. SAVE THIS MANUAL.

Copyright[©] 2010 by Harbor Freight Tools[®]. All rights reserved. No portion of this manual or any artwork contained herein may be reproduced in any shape or form without the express written consent of Harbor Freight Tools. Diagrams within this manual may not be drawn proportionally. Due to continuing improvements, actual product may differ slightly from the product described herein. Tools required for assembly and service may not be included.

For technical questions or replacement parts, please call 1-800-444-3353.

SAVE THIS MANUAL

Keep this manual for the safety warnings and precautions, assembly, operating, inspection, maintenance and cleaning procedures. Write the product's serial number in the back of the manual near the assembly diagram (or month and year of purchase if product has no number). Keep this manual and the receipt in a safe and dry place for future reference.

IMPORTANT SAFETY INFORMATION

In this manual, on the labeling, and all other information provided with this product:

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

▲ DANGER

DANGER indicates a hazardous

situation which, if not avoided, will result in death or serious injury.

AWARNING

WARNING indicates a

hazardous situation which, if not avoided, could result in death or serious injury.

ACAUTION

CAUTION, used with the safety

alert symbol, indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE

NOTICE is used to address practices not related to personal injury.

CAUTION

CAUTION, without the safety alert

symbol, is used to address practices not related to personal injury.

General Power Tool Safety Warnings

WARNING Read all safety warnings and instructions.

Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. Save all warnings and instructions for future reference. The term "power tool" in the warnings refers to your mains-

operated (corded) power tool. Work area safety

- a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. **Electrical safety**

a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with grounded power tools.

- Unmodified plugs and matching outlets will reduce risk of electric shock.
- b. Avoid body contact with grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is grounded.
- c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
- f. If operating a power tool in a damp location is unavoidable, use a Ground Fault Circuit Interrupter (GFCI) protected supply. Use of a GFCI reduces the risk of electric shock.

3. Personal safety

- a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- b. Use personal protective equipment. Always wear ANSI-approved eye protection. Safety equipment

- such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- c. Prevent unintentional starting.
 Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energizing power tools that have the switch on invites accidents.
- d. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- e. Do not overreach. Keep proper footing and balance at all times.

 This enables better control of the power tool in unexpected situations.
- f. Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewelry or long hair can be caught in moving parts.
- g. If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of these devices can reduce dustrelated hazards.
- h. Only use safety equipment that has been approved by an appropriate standards agency. Unapproved safety equipment may not provide adequate protection. Eye protection must be ANSI-approved and breathing protection must be NIOSH-approved for the specific hazards in the work area.

- 4. Power tool use and care
 - a. Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
 - b. Do not use the power tool if the switch does not turn it on and off.

 Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
 - c. Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
 - d. Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
 - e. Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
 - f. Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control
 - g. Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into

account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

Service

a. Have your power tool serviced by a qualified repair person using only identical replacement parts.

This will ensure that the safety of the power tool is maintained.

Specific Safety Warnings

- impact eye goggles and heavy-duty work gloves when using Planer.
 Using personal safety devices reduce
 the risk for injury. Safety impact eye
 goggles and heavy work gloves are
 available from Harbor Freight Tools.
 Dust mask, non skid safety shoes,
 hard hat, or hearing protection must
 be used for appropriate conditions.
- 2. Use a platform, or other practical way, to support a long workpiece as it enters the Planer. Holding the work by hand or against your body is unstable and may lead to loss of control.
- 3. **Avoid unintentional starting.** *Make* sure you are prepared to begin work before turning on the Planer.
- 4. **Do not force the Planer.** This tool will do the work better and safer at the speed and capacity for which it was designed.
- 5. Always unplug the Planer from its electrical outlet before changing blades or performing any inspection, maintenance, or cleaning procedures.

- 6. **Never leave the Planer unattended while running.** *Turn power off if you* have to leave the Planer.
- 7. Turn off Planer when jammed.
- 8. Before each use, check all nuts, bolts, and screws for tightness.
- 9. Keep extension cord off the ground and away from water.
- 10. **Install this product on a proper surface**. Locate on a flat, level, and solid surface that is capable of supporting the weight of the Planer and the stock being planed.
- 11. Maintain labels and nameplates on the tool. These carry important safety information. If unreadable or missing, contact Harbor Freight Tools for a replacement.
- 12. **This product is not a toy.** Keep it out of reach of children.
- 13. People with pacemakers should consult their physician(s) before use. Electromagnetic fields in close proximity to heart pacemaker could cause pacemaker interference or pacemaker failure. In addition, people with pacemakers should:
 - Avoid operating alone.
 - Do not use with power switch locked
 - Properly maintain and inspect to avoid electrical shock.
 - Any power cord must be properly grounded. Ground Fault Circuit Interrupter (GFCI) should also be implemented it prevents sustained electrical shock.
- 14. Some dust created by power sanding, sawing, grinding, drilling, and other construction activities,

- contains chemicals known [to the State of California] to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:
- · Lead from lead-based paints
- Crystalline silica from bricks and cement or other masonry products
- Arsenic and chromium from chemically treated lumber
 Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles. (California Health & Safety Code § 25249.5, et seq.)
- 15. The warnings, precautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

GROUNDING

AWARNING

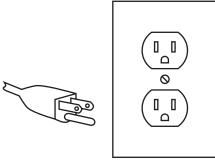

TO PREVENT ELECTRIC SHOCK

AND DEATH FROM INCORRECT GROUNDING WIRE CONNECTION:

Check with a qualified electrician if you are in doubt as to whether the outlet is properly grounded. Do not modify the power cord plug provided with the tool. Never remove the grounding prong from the plug. Do not use the tool if the power cord or plug is damaged. If damaged, have it repaired by a service facility before use. If the plug will not fit the outlet, have a proper outlet installed by a qualified electrician.

Grounded Tools: Tools with Three Prong Plugs

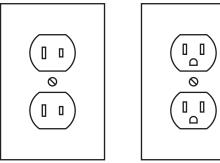

3-Prong Plug and Outlet

1. Tools marked with "Grounding Required" have a three wire cord and three prong grounding plug. The plug must be connected to a properly grounded outlet. If the tool should electrically malfunction or break down, grounding provides a low resistance path to carry electricity away from the user, reducing the risk

- of electric shock. (See 3-Prong Plug and Outlet.)
- 2. The grounding prong in the plug is connected through the green wire inside the cord to the grounding system in the tool. The green wire in the cord must be the only wire connected to the tool's grounding system and must never be attached to an electrically "live" terminal. (See 3-Prong Plug and Outlet.)
- 3. The tool must be plugged into an appropriate outlet, properly installed and grounded in accordance with all codes and ordinances. The plug and outlet should look like those in the preceding illustration. (See 3-Prong Plug and Outlet.)

Double Insulated Tools: Tools with Two Prong Plugs

Outlets for 2-Prong Plug

 Tools marked "Double Insulated" do not require grounding. They have a special double insulation system which satisfies OSHA requirements and complies with the applicable standards of Underwriters Laboratories, Inc., the Canadian Standard Association, and the National Electrical Code. (See Outlets for 2-Prong Plug.) Double insulated tools may be used in either of the 120 volt outlets shown in the preceding illustration. (See Outlets for 2-Prong Plug.)

Extension Cords

- Grounded tools require a three wire extension cord. Double Insulated tools can use either a two or three wire extension cord.
- 2. As the distance from the supply outlet increases, you must use a heavier gauge extension cord. Using extension cords with inadequately sized wire causes a serious drop in voltage, resulting in loss of power and possible tool damage.

(See Table A.)

- 3. The smaller the gauge number of the wire, the greater the capacity of the cord. For example, a 14 gauge cord can carry a higher current than a 16 gauge cord. (See Table A.)
- 4. When using more than one extension cord to make up the total length, make sure each cord contains at least the minimum wire size required. (See Table A.)
- 5. If you are using one extension cord for more than one tool, add the nameplate amperes and use the sum to determine the required minimum cord size. (See Table A.)
- 6. If you are using an extension cord outdoors, make sure it is marked with the suffix "W-A" ("W" in Canada) to indicate it is acceptable for outdoor use.
- 7. Make sure the extension cord is properly wired and in good electrical con-

- dition. Always replace a damaged extension cord or have it repaired by a qualified electrician before using it.
- 8. Protect the extension cords from sharp objects, excessive heat, and damp or wet areas.

RECOMMENDED MINIMUM WIRE GAUGE FOR EXTENSION CORDS* (120/240 VOLT)					
NAMEPLATE	EXTENSION CORD LENGTH				RD
AMPERES (at full load)	25'	50,	75'	100′	150'
0 – 2.0	18	18	18	18	16
2.1 – 3.4	18	18	18	16	14
3.5 – 5.0	18	18	16	14	12
5.1 – 7.0	18	16	14	12	12
7.1 – 12.0	18	14	12	10	1
12.1 – 16.0	14	12	10	1	-
16.1 – 20.0	12	10	-	-	-
* Based on limiting the line voltage drop to five volts at 150% of the rated amperes.					

Symbology

	Double Insulated
	Canadian Standards Association
UL	Underwriters Laboratories, Inc.
V~	Volts Alternating Current
Α	Amperes
n ₀ xxxx/min.	No Load Revolutions per Minute (RPM)

SPECIFICATIONS

Electrical Requirements	120 V~ / 60 Hz / 11.8 A
Motor (Cutter head) Speed	2-1/2 HP, 18,800 cuts per minute
Maximum Cutting Depth	3/32"
Stock Capacity	4-1/2" x 12" lumber
Feed Speed	20 Feet per Minute
Included Accessories	1 Hex Wrench (4mm) 2 Magnets, 1 Dust Bag,

UNPACKING

When unpacking, check to make sure item is intact and undamaged. If any parts are missing or broken, please call Harbor Freight Tools at the number shown on the cover of this manual as soon as possible.

INSTRUCTIONS FOR PUTTING INTO USE

Read the ENTIRE IMPORTANT SAFETY INFORMATION section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

AWARNING

TO PREVENT SERIOUS INJURY FROM ACCIDENTAL

OPERATION: Turn the Power Switch of the tool to its "OFF" position and unplug the tool from its electrical outlet before assembling or making any adjustments to the tool.

Note: For additional information regarding the parts listed in the following pages. refer to the Assembly Diagram near the end of this manual.

Assembly

- 1. **NOTE:** This should always be mounted to a workbench before use.
- 1. Select an area with enough room to fit the chosen dust collection system. Select a workbench to mount the Planer. Place the Planer on a workbench able to support the weight of the Planer and the wood stock being planed. The orientation of the Planer should enable the easy entry and exit of long pieces of wood stock.
- 2. Using a pencil, mark through the mounting holes of the Planer, onto the workbench. Slide the Planer aside and drill four 3/8 inch mounting holes into the workbench.

AWARNING

Before drill-

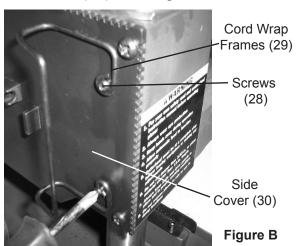

ing, verify that there are no utility wires or other obstructions under the workbench.

- Slide the Planer back over the mounting holes in the workbench, and secure the Planer to the workbench with bolts, washers, spring washers and nuts (not included). Securely tighten.
- 4. Mount the height (thickness) adjustment Handle (10) to the Right Cap (11). See Figure A.

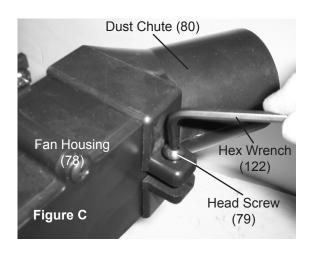

Figure A

- 5. Place Rubber Cap (5) on the Handle and tighten Bolt (6) into the Right Cap (11).
- 6. Using a screwdriver (not included), fasten the two Cord Wrap Frames (29) to the Side Cover (30) using four Screws (28). See Figure B.

7. Use included Hex Wrench (122) to loosen Head Screw (79) on the frame of the Dust Chute (80). Slide Dust Chute over Fan Housing (78). Fasten Dust Chute in place by tightening Head Screw. See Figure C.

8. Mount a trash bag (not included) to the Dust Chute (80) to collect the dust.

WARNING! Make sure Blade is fastened and tightened down securely before beginning any work. Refer to "Changing Cutting Blades" section of this manual to tighten blade properly).

OPERATING INSTRUCTIONS

Read the ENTIRE IMPORTANT SAFETY INFORMATION section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

Tool Set Up

AWARNING

TO PREVENT SERIOUS INJURY

FROM ACCIDENTAL OPERATION:

Turn the Power Switch of the tool to its "OFF" position and unplug the tool from its electrical outlet before performing any inspection, maintenance, or cleaning procedures.

Work Piece and Work Area Set Up

- Designate a work area that is clean and well-lit. The work area must not allow access by children or pets to prevent injury and distraction.
- Route the power cord extension along a safe path to reach the Planer without creating a tripping hazard or exposing the power cord to possible damage.
- 3. There must not be hazardous objects, such as utility lines or foreign

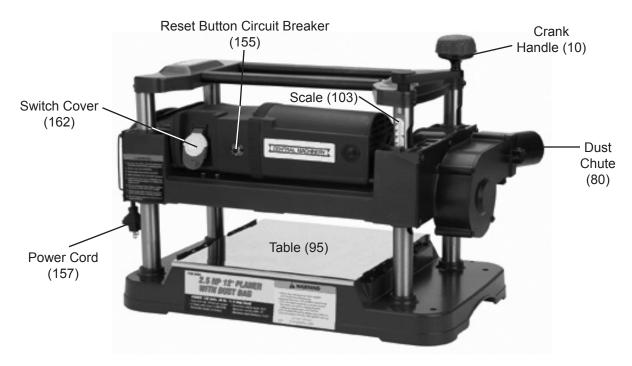

Figure C

objects, that will present a hazard while working.

General Operating Instructions

Note: Before operating, remove foam backing material from the Table (95).

- 1. Measure the thickness of the wood stock to be planed.
- 2. Turn the Adjustment Knob (10) to set the thickness of the cut, using the Scale (103) as a guide. See Figure C, above. Each complete turn of the Knob equals about 1/16 inch, up or down. Set the thickness to 1/16 inch less than the thickness of the wood stock. Make thin cuts at first, then increase the cut depth as required, up to 3/32 inch (maximum).
- 3. Place the end of the wood stock in front of the Planer (wood grain facing forward).

If the wood stock is long, support the full length using a roller platform (not supplied) or other device which is the same height of the Planer Table (95).

- 5. Plug the Power Cord (157) into a 20 amp, 120V electrical outlet.
- 6. Lift the Switch Cover (162) and push the Switch (161) to start. Allow the planer to come up to full speed before beginning a job.
- 7. When the motor is turning at full speed, carefully guide the front of the wood stock onto the Table (95), and into the turning Blades. To turn off Planer, press the Switch Cover (162) to turn the Planer off.

WARNING! Keep hands well clear of blades.

The auto-feed action will pull wood stock through the Planer. Support the wood stock exiting the Planer.

- 8. **Note:** Do not stand behind the end of the board during planing. Plane dry, unwarped, clean boards only. Avoid planing boards that have knots; loose knots can jam the machine or become a projectile. Do not plane boards that have foreign objects (nails, staples, etc.) in them.
- 9. Do not plane material:
 - thinner than 1/8"
 - narrower than 3/4",
 - wider than 12"
 - shorter than 15"
- 10. The planer has a maximum depth cut of 3/32" per pass. The Planer will operate best when the depth of cut is less than 1/16". It is recommended to make a series of shallow cuts rather than a single deep cut.
- Note: Always keep the boards being planed level. Support long boards at both ends.
- 11. Plane along the grain of the wood.
- 12. Plane alternating sides of the board until the desired thickness is achieved.
- 13. When planing multiple boards to same thickness, place ends so they are touching (butting) for best results.
- 14. An assistant can return the boards to the operator using the Rollers (13) on top of the Planer.
- 15. When finished planing, press the Switch Cover (162) to turn the Planer off. **WARNING!** Wait until the motor comes to a complete stop and disconnect the power supply before readjusting the Planer.

- 16. If the Planer turns off unexpectedly during operation; turn the Planer off and unplug it from the electrical outlet. Refer to the "Troubleshooting Section" of this manual for possible reasons. If the Circuit Breaker has tripped, remove any materials from the Planer and push the Circuit Reset button and then restart by lifting Switch Cover to start Planer again.
- 16. To prevent accidents, turn off the tool and disconnect its power supply after use. Clean, then store the tool indoors out of children's reach.

MAINTENANCE AND SERVICING

Procedures not specifically explained in this manual must be performed only by a qualified technician.

AWARNING

TO PREVENT SERIOUS INJURY

FROM ACCIDENTAL
OPERATION: Turn the Power
Switch of the tool to its "OFF"
position and unplug the tool
from its electrical outlet
before performing any
inspection, maintenance, or
cleaning procedures.

TO PREVENT SERIOUS
INJURY FROM TOOL
FAILURE: Do not use
damaged equipment. If
abnormal noise or vibration
occurs, have the problem
corrected before further use.

Cleaning, Maintenance, and Lubrication

- 1. **BEFORE EACH USE,** inspect the general condition of the tool. Check for loose screws, misalignment or binding of moving parts, cracked or broken parts, damaged electrical wiring, and any other condition that may affect its safe operation.
- 2. **AFTER USE,** clean external surfaces of the tool with clean cloth or a brush.
- 3. **PERIODICALLY,** blow the interior of the Planer out with compressed air and lubricate moving parts with white lithium grease.

4. CARBON BRUSH MAINTENANCE.

The carbon brushes may require maintenance when motor performance of tool decreases or stops working completely. To maintain brushes:

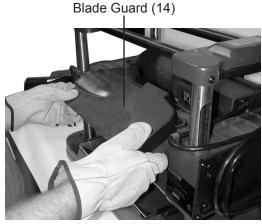

- a. Remove the brush caps on the front and back of the motor housing.
- Remove the carbon brushes from the housing. Keep track of which orientation the old carbon brushes were in to prevent needless wear if they will be reinstalled.
- If either carbon brush is worn down by more than 1/2, replace <u>both</u> carbon brushes.
- d. To clean old carbon brushes before reusing them, rub the contact areas with a pencil eraser.
- e. Reinsert the old carbon brushes in the same orientation to reduce wear.
- f. When installing the carbon brushes, make sure the carbon portions of the carbon brushes contact the motor armature, and that the springs face away from the motor. Also, make sure the springs operate freely.
- g. Replace brush caps. Do not overtighten.

Note: New carbon brushes tend to spark when first used until they wear and conform to the motor's armature.

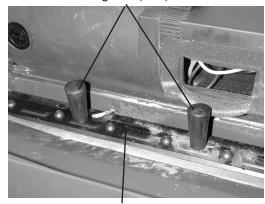

BLADE MAINTENANCE.

When cutting ability deteriorates or planed surface starts to get uneven or rough, the blades will have to be rotated. Replace blades only after both sides are dull. **WARNING!** Do not attempt to sharpen blades, only replace them.

 Unscrew and remove the Bolts (16) on the Blade Guard (14), slide Blade Guard slightly to the right, and lift it. See Figure D.

Magnets (123)

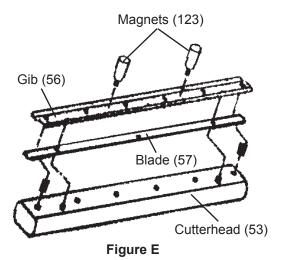

Gib (56)

Figure D

- 2. Using gloves, rotate the Cutterhead (53) so that the Screws (55) are accessible.
- Using the Hex Wrench (122), unscrew and remove the six Screws (55) securing the Gib (56). See Figure D. Place the Screws in a safe location.
- 4. Using the two tool Magnets (123), lift the Gib off and set aside.

5. Using the two Magnets (123), lift the Blade (57) off the Cutterhead (53). See Figure E.

Note: Leave Springs (58) in place.

6. Since the Blade has a double-edge, rotate the Blade using Magnets (123). **WARNING!** Do not attempt to sharpen blades, only replace them.

Use the pins located on each side to position the Blade in place.

7. Replace the Gib over the Blade and secure with the six Screws.

Securely tighten Screws using the Hex Wrench (122).

Blades require no adjustment and automatically locks into place.

- 8. Using gloves, rotate the Cutterhead (53) so that the second Blade is accessible.
- 9. Repeat steps 2 through 8 on the second Blade.
- Replace the Blade Guard (14) and secure with Bolts (16). Securely tighten Bolts.

ADJUST ROLLER CASE LEVEL.

If the Roller Case (47) is not parallel to the base (104), the planer will produce cuts of uneven depth.

- 1. Use a test piece to measure the height of the taper.
- 2. Turn the Planer off and disconnect it from the power supply.
- 3. Fold both Extension Tables up and lay the planer on its back.
- 4. Loosen the Head Screw (45) and Set Screw (44). Loosen the Chain (121) by sliding the Idler Bracket (114).
- Rotate the Pan Head Screws (120) to correct the orientation of the Roller Case to Base. Each turn of the Screw will move the Roller Case by 1/16".

REPLACING THE V-BELT.

- 1. Remove the Handle (10).
- Remove the four Head Bolts (130A) and Head Washers (130B) from the Left Cap (1) and Right Cap (11). Remove both Caps.
- 3. Remove the Pan Head Screws (68) from the Fan Housing (78). Slide off Fan Housing.
- 4. Remove the V-Belt (65) from the Pulley (64) and replace with new 135J6 V-belt. Contact Harbor Freight Tool for replacement belts.
- 26. Reassemble the Planer.

AWARNING! If the supply cord of this power tool is damaged, it must be replaced only by a qualified service technician.

PLEASE READ THE FOLLOWING CAREFULLY

THE MANUFACTURER AND/OR DISTRIBUTOR HAS PROVIDED THE PARTS LIST AND ASSEMBLY DIAGRAM IN THIS MANUAL AS A REFERENCE TOOL ONLY. NEITHER THE MANUFACTURER OR DISTRIBUTOR MAKES ANY REPRESENTATION OR WARRANTY OF ANY KIND TO THE BUYER THAT HE OR SHE IS QUALIFIED TO MAKE ANY REPAIRS TO THE PRODUCT, OR THAT HE OR SHE IS QUALIFIED TO REPLACE ANY PARTS OF THE PRODUCT. IN FACT, THE MANUFACTURER AND/OR DISTRIBUTOR EXPRESSLY STATES THAT ALL REPAIRS AND PARTS REPLACEMENTS SHOULD BE UNDERTAKEN BY CERTIFIED AND LICENSED TECHNICIANS, AND NOT BY THE BUYER. THE BUYER ASSUMES ALL RISK AND LIABILITY ARISING OUT OF HIS OR HER REPAIRS TO THE ORIGINAL PRODUCT OR REPLACEMENT PARTS THERETO, OR ARISING OUT OF HIS OR HER INSTALLATION OF REPLACEMENT PARTS THERETO.

LIMITED 1 YEAR WARRANTY

Harbor Freight Tools Co. makes every effort to assure that its products meet high quality and durability standards, and warrants to the original purchaser that this product is free from defects in materials and workmanship for the period of one year from the date of purchase (90 days if used by a professional contractor or if used as rental equipment). This warranty does not apply to damage due directly or indirectly, to misuse, abuse, negligence or accidents, repairs or alterations outside our facilities, normal wear and tear, or to lack of maintenance. We shall in no event be liable for death, injuries to persons or property, or for incidental, contingent, special or consequential damages arising from the use of our product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation of exclusion may not apply to you. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

To take advantage of this warranty, the product or part must be returned to us with transportation charges prepaid. Proof of purchase date and an explanation of the complaint must accompany the merchandise. If our inspection verifies the defect, we will either repair or replace the product at our election or we may elect to refund the purchase price if we cannot readily and quickly provide you with a replacement. We will return repaired products at our expense, but if we determine there is no defect, or that the defect resulted from causes not within the scope of our warranty, then you must bear the cost of returning the product.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

3491 Mission Oaks Blvd. • PO Box 6009 • Camarillo, CA 93011 • (800) 444-3353

Note: If product has no serial number, record month and year of purchase instead.

Note: Some parts are listed and shown for illustration purposes only, and are not available individually as replacement parts.
