

CASIO®

BT-9100 Touch Screen Terminal

The All-In-One Terminal for All your PC/POS Requirements

Whether your business is grocery, hospitality or retail the BT-9100 will meet those requirements. The BT-9100 is designed to run various demanding software applications available in the market today.

The high resolution 15" flat panel screen, integrated CPU hardware focuses on minimizing space requirements in environments where space is at a premium. The BT-9100's fast/robust CPU and large available RAM provide the necessary power and speed for demanding operations. Additionally, the BT-9100's large SATA hard drive guarantees ample speed and storage space for large databases and reporting.
