

K-210/K-212/K-410 setup guide and overview

Congratulations on the purchase of your K-210, K-212 or K-410 speaker cabinet(s)!

Although connecting and setting up K-210/K-212/K-410 speaker cabinets is easy and straightforward, we recommend reading this short setup guide completely before you proceed. Enjoy!

Example setups

	
<p>Two K-410s horizontally stacked The classic 8 x 10 from a combination of two K-410s. Snappy and crisp, with plenty of muscle!</p>	<p>K-212 + K-410 horizontally stacked A cool combination for full low end, precision and body.</p>
<p>Two K-210s vertically stacked Plenty of low end and power with the precise, fast and defined tone usually associated with 10" speakers.</p> <p>Two K-212s vertically stacked Get that full-bodied 4 x 12 tone from a combination of two K212 cabinets. Lots of low end, plenty of punch and a clear and defined sound that never compromises with your original tone.</p>

Safety first

For the safety of your fellow musicians and your own, please ensure the stability of stacked cabinets and take proper precautions to prevent the stack from becoming unstable or tipping over.

Only two cabinets should be stacked vertically.

Speaker connections

The SpeakOn connectors can be used both for input and linking. Connect your amp's output to one of the connectors on the first cabinet and link to a second cabinet using the other connector.

The impedance for every cab model in this series (K-210, K-212 and K-410) is 8 Ohm.

If you accidentally connect a non-valid combination of cabinets to a TC Electronic bass amplifier, the amplifier's protection mode may be invoked. However, the amplifier will not be damaged.

Important safety instructions

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

Caution

You are cautioned that any change or modifications not expressly approved in this manual could void your authority to operate this equipment.

Service

- There are no user-serviceable parts inside.
- All service must be performed by qualified personnel.
