**AT&T**

Quick Start Guide

5.8 GHz Cordless Telephone/Answering System 5643B/E5644B

with Caller ID & Call Waiting

Installation & setup

After battery installation, place the handsets in their base unit or charger and allow to charge for 16 hours before use. You can keep the battery charged by returning the handsets to their base unit or charger after each use. When the battery is fully depleted, a recharge takes about 12 hours. Average talk time on a fully charged battery is about eight hours depending on environmental conditions, standby time is approximately four days.

LOW BATTERY

Low battery indicator
Return handset to base or charger to recharge when this symbol flashes. (Handset will beep when battery is low.)

Plug the battery pack connector into handset.

Place the battery pack and wires in the compartment.

Press tab to open battery compartment.

⚠ **Caution:** Use only supplied rechargeable battery or AT&T replacement battery model 27910 (SKU 00102. Part number 89-0099-00-00).

Replace compartment cover.

Place handset in base or charger to charge for 16 hours before first use.

Plug power adapter into an electrical outlet not controlled by a wall switch.

ⓘ *NOTES:*
1. Use only the power cord supplied with this product. If you need a replacement, call 1 (800) 222-3111. In Canada, call 1 (866) 288-4268.

2. Be sure to use an electrical outlet not controlled by a wall switch.
