

EQUIPMENT APPROVAL INFORMATION

Your telephone equipment is approved for connection to the Public Switched Telephone Network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone ferminal Equipment published by ACTA.

Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your The REN is useful in determining the number of devices you may connect to your telephone line and still

have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack hat is also compliant. See installation instructions for details

- This equipment may not be used on coin service provided by the telephone company.
- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone
 equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent disconnection of your telephone from
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installat of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where rior notice is not practicable and the circumstances warrant such action, the telephone company may emporarily discontinue service immediately. In case of such temporary discontinuance, the telephone compuses: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set orth in Subpart E of Part 68, FCC Rules and Regulations. The telephone company may make changes in its communications facilities, equipment, operations or procedures

where such action is required in the operation of its business and not inconsistent with ECC Rules and ations. If these changes are expected to affect the use or performance of your telephone equipment, the elephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

Congratulations on purchasing this Call Waiting Caller ID phone system with UVMI. This phone has been designed to be simple to use, however, you can reach its full potential more quickly by taking a few minutes to read this User's Guide.

This system is a multifunction product for use with the Call Waiting Caller ID and Universal Voice Mail (UVMI) services available from your local telephone company. To use all of the features of this system, you must subscribe to the following services

- the standard name/number Caller ID service to identify and screen callers when the phone rings or know who called while you were away
- Call Waiting Caller ID service to view the name and telephone number of an incoming call while you are on the phone
- Universal Voice Mail Indicator (UVMI) to receive voice mail messages The system allows you to:
- view the name and number of each incoming call

available from your local telephone company

- view the time and date of each call
- eliminate harassment from annoying calls, or get prepared before answering a call record up to 40 Caller ID messages seguentially

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out

BEFORE YOU BEGIN

Parts Checklist

Make sure your package includes the items shown here.

Wall plate

TELEPHONE JACK REQUIREMENTS

To use this phone, you need an RJ11C type modular telephone jack, which might look like the one pictured here, installed in your home. If you don't have a modular jack, call your local phone company to find out how to get one installed.

telephone

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause interference to nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference continues, move the cordless telephone farther away from these appliances.

DIGITAL SECURITY SYSTEM

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code.

IMPORTANT INSTALLATION INFORMATION

- · Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations

posts and slide the unit down into place. (Wall plate not included.)

- Never touch uninsulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface
- Use caution when installing or modifying telephone lines.
- Temporarily disconnect any equipment connected to the phone such as faxes, other phones, or modems.

INSTALLING THE BATTERY

- 1. Remove the battery compartment door on the handset. 2. Insert the battery pack, and connect the cord into the
- iack inside the compartment. 3. Put the battery compartment door back on and set the
- handset aside.

INSTALLING THE PHONE

Your telephone should be placed on a level surface such as a desk or table top, or you can mount it on a wall. A wall mounting pedestal is packaged with your phone.

NOTE: For desktop charging only, the handset may be charged facing up.

CONNECTING THE TELEPHONE LINE

- Plug the one end of the telephone line cord into the jack marked TEL LINE on the back of the base and the other end into a modular wall phone jack.
- Set the RINGER switch (on the handset) to ON, and place the handset in the cradle on the base.

NOTE: The phone is shipped from the manufacturer in tone dialing mode.

CONNECTING THE AC (ELECTRICAL) POWER

- Plug the power supply cord into the power lack on the back of the base and the other end into an electrical outlet. The IN USE/CHARGE/V-MAIL indicator turns on to indicate the battery is charging when the handset is placed on the base cradle.
- · Place the handset in the cradle on the base.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance is compromised

CAUTION: Use only the ATLINKS USA, Inc. 5-2558 (white) power supply that came with this unit. Using other power supplies may damage the unit.

WALL MOUNTING

NOTE: For best results, before you hang the phone on the wall, charge the phone on a flat surface.

Receiving a Call

- 1. Check the display to see who is calling.
- 2. Press the TALK/CALLBACK button.

Making a Call.

To make a call, press the TALK/CALLBACK button before you dial and press it again to hang up. Or you may dial a number, and then press the TALK/CALLBACK button.

REDIAL

While the phone is on, press the REDIAL button to guickly redial the last number you dialed (up to 32 digits). If you get a busy signal, and want to keep dialing the number, just press REDIAL again (you don't have to turn the phone off and back on). Or you may press the REDIAL button, and then press the TALK/CALLBACK button.

FLASH

If you subscribe to the combined Call Waiting Caller ID service from your local telephone company, you will receive Caller ID information (if available) on Call Waiting calls. During a phone call, you will hear a beep to indicate another call is waiting on the line and Caller ID information for the waiting call shows on the handset display. To connect to the waiting call, press the flash button on the handset and your original call is put on hold. You may switch back and forth between the two calls by pressing the flash button.

TIP: Don't use the TALK/CALLBACK button to activate custom calling services such as call waiting, or you'll hang up the phone.

IN USE/CHARGE/V-MAIL INDICATOR

The IN USE/CHARGE/V-MAIL indicator is lit when the handset is charging in the cradle on the base or when the phone is ON. It flashes when you receive an incoming call or when the PAGE button is pressed.

VOICE MESSAGING

Provided your phone company offers voice messaging service (voice mail) and you have subscribed to it, the IN USE/CHARGE/V-MAIL indicator on the base flashes when the phone is not in use to indicate there is a message waiting. The indicator stops flashing when the message is reviewed.

CHANNEL BUTTON

While talking, you might need to manually change the channel in order to get rid of static. Press and release the CHANNEL/DELETE button to advance to the next clear channel.

TEMPORARY TONE

This feature is useful only if you have pulse dialing service. Temporary Tone Dialing enables pulse (rotary) service phone users to access touch-tone services offered by banks, credit card companies, etc. For example, when you call your bank you may need to enter your bank account number. Temporarily switching to Touch Tone mode 1. Press the FLASH/PROGRAM button until *DEFAULT* shows in the display. 1 NO is allows you to send your number.

- 1. Dial the telephone number and wait for the line to connect.
- 2. When your call is answered, press the TONE*/CANCEL button on the handset number pad to temporarily change from PULSE dialing to TONE dialing.
- 3. Follow the automated instructions to get the information you need.
- 4. Hang up the handset and the phone automatically returns to PULSE (rotary) dialing mode.

CANCEL

Press the TONE*/CANCEL button to cancel any command you initiated.

FINDING THE HANDSET

This feature helps to locate a misplaced handset

Press the PAGE button on the base. The handset beeps continuously for about 2 minutes or until you press the TALK/CALLBACK on the handset or the page button on

NOTE: The ringer does not have to be on for this feature to work.

RINGER SWITCH

The RINGER switch must be ON for the handset to ring during incoming calls.

VOLUME

While the phone is ON, use the CID/VOL (< or >) button to adjust the receiver volume. Press the > button to increase the volume and the < button to decrease the volume.

Caller ID Features

Caller ID (CID) is a service available from your local telephone company. For Caller ID to work on this system, you must subscribe to Caller ID service. To receive Caller ID nformation for a Call Waiting call, you must subscribe to the combined Call Waiting Caller ID service.

When your telephone rings, and you are subscribed to Call Waiting Caller ID service. you will receive information (if available) transmitted by your local telephone company. You will also receive Caller ID information from Call Waiting calls. If you receive an incoming call and you are already on the phone, a beep indicates

the presence of a Call Waiting Call on the line, and Caller ID information for the Call available formats are as follows. Waiting call shows on the display. This information may include the phone number, date and time; or the name, phone number, and date and time. The unit stores up to **10-digit** 3-digit area code + 7-digit telephone number. 40 calls for later review

answer the incoming call.

RECEIVING AND STORING CALLS

When you receive a call, the information is transmitted by the phone company to your Caller ID telephone between the first and second ring.

Press the PROGRAM/FLASH button to put the current call on hold so you can

When the memory is full, a new call automatically replaces the oldest call in memory. NEW appears in the display for calls received that have not been reviewed. REPT indicates that a new call from the same number was received more than once.

NOTE: Check with your local phone company regarding name service availability.

REVIEWING RECORDS

As calls are received and stored while the phone is **OFF** (not in TALK mode), the display is updated to let you know how many calls have been received.

- Press the CID/VOL < button to scroll through the call records from the most recent to the oldest.
- Press the CID/VOL > button to scroll through the call records from the oldest to

Transferring CID Records to Memory

You may transfer a Caller ID record to your phone's memory.

NOTE: It is important that you format CID records correctly before storing in memory. It is not possible to re-format CID records stored in memory.

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the CID/VOL (< or >) button to scroll to the desired record.
- 3. Press the MEMORY button.
- 4. Press the desired memory location. Example, press the number 1 key to store the record in memory location 1. You will hear a confirmation tone.

To Replace an Old Memory with a New CID Record

- 1. Repeat steps 1 through step 4 in Transferring CID Records To Memory.
- 2. After entering the memory location, REPLACE MEMO? shows in the display.
- 3. Press the MEMORY button again, and the new CID record replaces the old memory in that location. You will hear a confirmation tone.

DELETING RECORDS

Use the CHANNEL/DELETE button to erase the record currently shown in the display

DELETING THE CURRENT RECORD

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the CID/VOL (< or >) buttons to display the desired Caller ID record.
- 3. Press CHANNEL/DELETE. The display shows DELETE CALL ID?
- 4. Press CHANNEL/DELETE again to erase the record and the next Caller ID record shows in the display. You will hear a confirmation tone.

DELETING ALL RECORDS

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the CID/VOL (< or >) buttons to display any Caller ID record.
- 3. Press and hold CHANNEL/DELETE button until DELETE ALL? shows in the display.
- 4. Press CHANNEL/DELETE again to erase all records. You will hear a confirmation tone. The display shows NO CALLS.

DIALING A CALLER ID NUMBER

- 1. Make sure the phone is **OFF** (not in TALK mode)
- 2. Use the CID/VOL (< or >) buttons to display the desired Caller ID record.
- 3. Press TALK/CALLBACK. The number dials automatically.

CHANGING THE CID NUMBER FORMAT The FORMAT button lets you change the format of the displayed CID number. The

7-digit 7-digit telephone number.

11-digit long distance code "1" + 3-digit area code + 7-digit telephone number.

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the CID/VOL (< or >) buttons to scroll to the number you want to call back. 3. If the CID format does not appear as desired, press the FORMAT button, Repeat if
- 4. PressTALK/CALLBACK. The number dials automatically.

necessary, until the correct number of digits are shown.

MEMORY

Store up to ten 24-digit numbers in memory for guick dialing. This memory feature is in addition to the 40 Caller ID records that can be stored in the Caller ID memory log.

STORING A NAME AND NUMBER IN MEMORY

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Press the MEMORY button.
- 3. Press the desired memory location (0 through 9).
- 4. Press the MEMORY button again. The display shows ENTER NAME.

NOTE: If you don't want to enter the name, skip step 5.

5. Use the touch-tone pad on the handset to enter the name (up to 15 characters) and press the memory button to save. More than one letter is stored in each of the number keys. For example, to enter the name Bill Smith, press the 2 key twice for the letter B. Press the 4 key 3 times for the letter I. Press the 5 key 3 times for the letter L. Wait for 1 second, and then press the 5 key 3 times for the second letter L. Press the 1 key to insert a space between the L and the S. Press the 7 key 4 times for the letter S: press the 6 key once for the letter M; press the 4 key 3 times for the letter I; press the 8 key for the letterT; press the 4 key twice for the letter H.

NOTE: The cursor will automatically move to the next position if another number key is pressed.

6. Press the MEMORY button to save the name. The display shows *ENTER NUMBR*. 7. Use the touch-tone pad to enter the telephone number you want to store (up to

8. Press MEMORY again to store the number. You will hear a confirmation tone.

CHANGING A STORED NUMBER

- 1. Repeat steps 1 through 7 in Storing a Name and Number in Memory. 2. Press the MEMORY button, and "REPLACE MEMO?" shows in the display.
- 3. Press the MEMORY button to store the number. You will hear a confirmation tone.

STORING A REDIAL NUMBER

- 1. Repeat steps 1 through 6 in Storing a Name and Number in Memory.
- 2. Press the REDIAL button.
- 3. Press the MEMORY button to store the number. You will hear a confirmation tone. To Replace an Old Memory with a New Redial Number:

- 1. Repeat steps 1 through 6 in Storing a Name and Number in Memory.
- 2. Press the REDIAL button.
- 3. Press the MEMORY button, and REPLACE MEMO? shows in the display.
- 4. Press the MEMORY button to replace the old number with the new redial number. You will hear a confirmation tone.

DIALING A STORED NUMBER

- 1. Make sure the phone is **ON** by pressing the TALK/CALLBACK button.
- 2. Press the MEMORY button.
- 3. Press the number (0-9) for the desired memory location. The number dials automatically.

- 1. Make sure the phone is **OFF** (not in talk mode)
- 2. Press MEMORY button.
- 3. Use the CID/VOL (< or >) buttons to scroll through the numbers stored in memory until the desired number is shown.
- 4. Press TALK/CALLBACK. The numbers dial automatically.

IMPORTANT: If you make test calls to emergency numbers stored in memory, remain on the line and briefly explain the reason for the call to the dispatcher. Also, it's a good idea to make these calls in off-peak hours, such as early morning

INSERTING A PAUSE IN THE DIALING SEQUENCE

Press the PAUSE# button twice to insert a delay in the dialing sequence of a stored telephone number when a pause is needed to wait for a dial tone (for example after you dial 9 for an outside line, or to wait for a computer access tone). PAUSE shows on the display as a "P." Each pause counts as 1 digit in the dialing sequence.

REVIEWING AND DELETING STORED NUMBERS

NOTE: When the stored telephone number is over 15 characters long, you may press the FORMAT button to view the remaining numbers.

- 1. Press mem, then use the CID/VOL (< or >) buttons to view the entry. Or use the touch tone pad on your handset to enter the memory location.
- 2. While the entry is displayed, press CHANNEL/DELETE to delete the entry. The display shows DELETE?
- 3. Press CHANNEL/DELETE a second time to delete the entry. The display shows DELETED. You will hear a confirmation tone.

CHAIN DIALING FROM MEMORY

Use this feature to make calls which require a sequence of numbers such as using a calling card for a frequently called long distance number. You dial each part of the sequence from memory. The following example shows how you can use chain dialing to make a call through a long distance service:

The Number For	Memory Location		
Long distance access number		7	
Authorization code		8	
Frequently called long distance	number	9	

- 1. Make sure the phone is **ON**
- 2. Press MEMORY and then press 7.
- 3. When you hear the access tone, press MEMORY, and then press 8.
- 4. At the next access tone, press MEMORY and then 9.
- TIP: Wait for the access tones before pressing the next memory button, or your call might not go through.

HEADSET AND BELT CLIP OPERATION

CONNECTING AN OPTIONAL HEADSET TO THE HANDSET

The handset can be used with an optional headset for hands free operation

- 1. Connect the headset to the HEADSET jack on the side of the handset The handset receiver and microphone are disabled when the headset is connected.
- 2. Adjust the headset to rest comfortably on top of your head and over your ear. Move the microphone to approximately two to three inches from your mouth.

- 3. Press the TALK/CALLBACK button to answer a call or make calls using the headset.
- 4. To return to normal operation, unplug the headset from the jack.

CONNECTING THE BELT CLIP

To attach the belt clip, insert the sides of the belt clip into the slots on each side of the handset. Snap the ends of the belt clip into place.

CHANGING THE BATTERY

Make sure the telephone is **OFF** before you replace battery.

- 1. Remove the battery compartment door
- 2. Disconnect the battery plug from the lack inside the battery compartment and remove the battery pack from the handset.
- 3. Insert the new battery pack and connect the cord to the jack
- 4. Put the battery compartment door back on.
- 5. Place handset in the base to charge.

use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised.

BATTERY SAFETY PRECAUTIONS

- Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury.
- To reduce the risk of fire or personal injury, use only the battery listed in the
- Keep batteries out of the reach of children.
- · Remove batteries if storing over 30 days.

GENERAL PRODUCT CARE

To keep your telephone working and looking good, follow these guidelines:

- Avoid putting the phone near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose to direct sunlight or moisture.
- Avoid dropping and other rough treatment to the phone.
- · Clean with a soft cloth.
- Never use a strong cleaning agent or abrasive powder because this will damage the finish.
- Retain the original packaging in case you need to ship the phone at a later date.
