

Philips  
Cordless telephone

CD530IS

## Welcome to the color world

The rich color screen brings the CD5 series to life by adding another dimension to making a call. Color not only facilitates navigation in the icon menu, but also adds more depth to associated features.

### Colors that bring your phone to life

- Icon-driven color menu
- Selectable wallpapers
- Great for gaming with the embedded games

### Pure convenience

- Keep in touch by SMS texting
- Identify your friends by the ringtone
- Backlit display & keypad

### Clear calls around the house

- Virtually interference free
- Speakerphone - Talk handsfree
- Polyphonic ringtones for a more natural and realistic sound

**PHILIPS**  
sense and simplicity

- Name and Caller ID
- Caller ID on call waiting

### Memory Capacity

- Call log entries: 50
- Phonebook: 50 names and numbers
- Number of SMS Boxes: 10
- SMS storage capacity: 50

## Product highlights

### Icon-driven color menu

All functions are grouped into several menu items that are symbolized by a colored icon. This facilitates navigation and use of the phone.

### Selectable wallpapers

An illustration is worth more than a thousand words. Scroll through the selection of images integrated into the handset. Select the one that best suits your mood of the day and have it displayed as a background on your screen.

### Great for gaming

Let your phone be your stress relief. Sit back, select a game and set a new high score!

### Keep in touch by SMS texting

The SMS is a simple way to exchange information over the telephone line. You first type your text off-line and when you are ready, you send it to as many people as you like.

### VIP function

Identify who's calling by the ringtone! The VIP icons and melodies indicate to which group in the phonebook the caller belongs. Phonebook entries can be divided in different VIP groups for which you can allocate a specific ringtone.

### Backlit display & keypad

Backlit display & keypad ensures easy viewing and operation in low light conditions

### Virtually interference free

Thanks to an advanced digital technology, calls are undisturbed by interferences from other devices.

### Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

### Polyphonic ringtones

A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.
