- VIP outgoing message
- Call screening
- Answerphone remote access

Memory Capacity

- Name & number shared phonebook: 65
- Melody download capacity: 3
- SMS storage capacity: 25
- Call log entries: 40

Product highlights

Ringtone download

This function offers the possibility to personalise your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as you would any other ringtones (country and network dependent).

Eatoni text editor

Eatoni's LetterWise is an easy to use text entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Downloadable outgoing messages

This function gives you the possibility to download specific outgoing messages for your answering machine. Simply call the dedicated service provider and select your favourite outgoing message. This message will be recorded on the answering machine by the service provider (country and network dependent).

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom of communication from your home. Now you can combine text with images or numbers.

Backlight on screen

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green colour, while EL panels are smooth with blue, white or green shades.

Polyphonic ringtones

A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.

Base and handset TAM control

Just look at the base station to know instantly whether you have received any messages. Listening or deleting messages then become as simple as pressing one key on the base station - for those who never remember where they left their handset.

Alarm clock

Keypad lock

In your pocket your DECT phone can be jolted and a key might be accidentally pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill

Pilot key & carousel menu

The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Do not disturb function

Tired of your children's friends calling just when you're about to serve dinner? The "Do-not-Disturb" function lets you screen unwanted calls and mute the ringer when you do not wish to be disturbed, but keeps the line open to the family.
