# About this Guide

The Outdoor Base Station is designed to withstand environmental hazards such as rain and excessive heat and cold. The outdoor enclosure is mounted into position and the Base Station is then installed within it. The entire unit is then referred to as an Outdoor Base Station.

This document covers the installation of the Outdoor Base Station in a variety of situations. It supplements the installation documentation for the SpectraLink 6000 System using either the SpectraLink 6300 MCU or the SpectraLink 6100 MCU.

## Polycom Corporation Model Numbers

This document covers the following registered model numbers:  
RCO400, RCO410, RHO400

# Installing Flush Against a Wall or Hard Ceiling

Items provided: Outdoor enclosure, Base Station

Items needed: 4 anchor bolts (length and type depends on wall or ceiling material Base Station is being mounted to)

1. Mark and drill four holes into the wall or ceiling, using the mounting flanges of the outdoor enclosure as a guide.
2. Mount outdoor enclosure to wall or ceiling using anchor bolts. The outdoor enclosure can be mounted with the compression fitting in any direction.

3. Slide the Base Station cable through the compression fitting and tighten fitting.

4. Crimp an RJ45 onto the Base Station cable using the same wiring guide as the indoor Base Station.
5. Plug the RJ45 into the RJ48C connector.

6. Place the Base Station into the enclosure with the side of the Base Station with the mounting hole facing the wall or ceiling. The Base Station should fit tightly into the foam blocks.
7. Screw the outdoor enclosure lid back onto the enclosure.

## Installing on an I-Beam

Items provided : Outdoor enclosure, Base Station

Items needed : 4 - "Caddy" or "B-Line" 3/8" Beam Clamps  
4 - 1/2" long 1/4" x 20 bolts  
4 - 2" long 1/4" x 20 bolts  
4 - 1/4" x 20 nuts

1. Attach a beam clamp to the center of the top and bottom flanges on the outdoor enclosure.
2. Attach a second beam clamp to each of the beam clamps on the enclosure using a 1/2" long 1/4" x 20 bolt and a nut. (See figure below.)
3. Attach the outdoor enclosure to I-beam using the beam clamps attached in step 2.

See figures in Chapter 1 for pictorial data for the remaining steps:

4. Slide the Base Station cable through the compression fitting and tighten the fitting.
5. Crimp on RJ45 onto the Base Station cable using the same wiring guide as the indoor Base Station.
6. Plug the RJ45 into the RJ48C connector.

7. Place the Base Station into the enclosure with the side of the Base Station with the mounting hole facing the I-beam. The Base Station should fit tightly between the foam blocks.
8. Screw the outdoor enclosure lid back onto the enclosure.

# Installing on a Light Pole or Electrical Pole

Items provided: Outdoor enclosure, Base Station

Items needed: 4 - "Caddy" or "B-Line" 3/8" beam clamps  
2 - EOG 100 or equivalent band clamps

1. Attach one band to the top flange of the outdoor enclosure using two beam clamps (see the figure below).

2. Attach the second band to the bottom flange of the enclosure using the remaining two beam clamps.
3. Wrap the band clamps around the pole and tighten using the screw on the band clamps.

See figures in Chapter 1 for pictorial data for the remaining steps:

4. Slide the Base Station cable through the compression fitting and tighten the fitting.
5. Crimp an RJ45 onto the Base Station cable using the same wiring guide as the indoor Base Station.
6. Plug the RJ45 into the RJ48C connector.

7. Place the Base Station into the enclosure with the side of the Base Station with the mounting hole facing the pole. The Base Station should fit tightly between the foam blocks.
8. Screw the outdoor enclosure lid back onto the enclosure.
