

▶ Polycom® KIRK® Wireless Server 1500

Analogue and IP Telephony for Large
Businesses

With its choice of analogue or IP interface, the KIRK Wireless Server 1500 is the ideal add-on telephony solution for a wide range of large businesses with a need for up to 700 wireless users

Empty desks and employees on the move - two signs that let you know you need a wireless telephony solution. With more and more time spent away from workstations, employees need the flexibility and mobility provided by a wireless handset in order to stay in touch with colleagues, customers and contacts. Without it, valuable time is wasted and calls are lost - the same could be the case for contracts and orders.

Cost-Effective Business Wireless

The basic version of the KIRK Wireless Server 1500 registers 64 wireless users with analogue interface and 350 wireless users with IP. When your business evolves and your telephony needs change your KIRK solution can easily be expanded to fit these changing needs. The KIRK Expansion Board and the KIRK Link Card make it possible to double the solution capacity to reach registration of up to 128 and 700 wireless users depending on interface technology.

With a KIRK solution, a smooth migration is assured for customers wishing to move from analogue to IP. There is no need to invest in a new solution - a simple exchange of the KIRK Interface Card to fit the new PBX is enough.

The KIRK Wireless Server 1500 also comes in a rack version.

About Polycom

Polycom, Inc. (NASDAQ: PLCM) is the global leader in telepresence, video, and voice solutions and a visionary in communications that empower people to connect and collaborate everywhere.

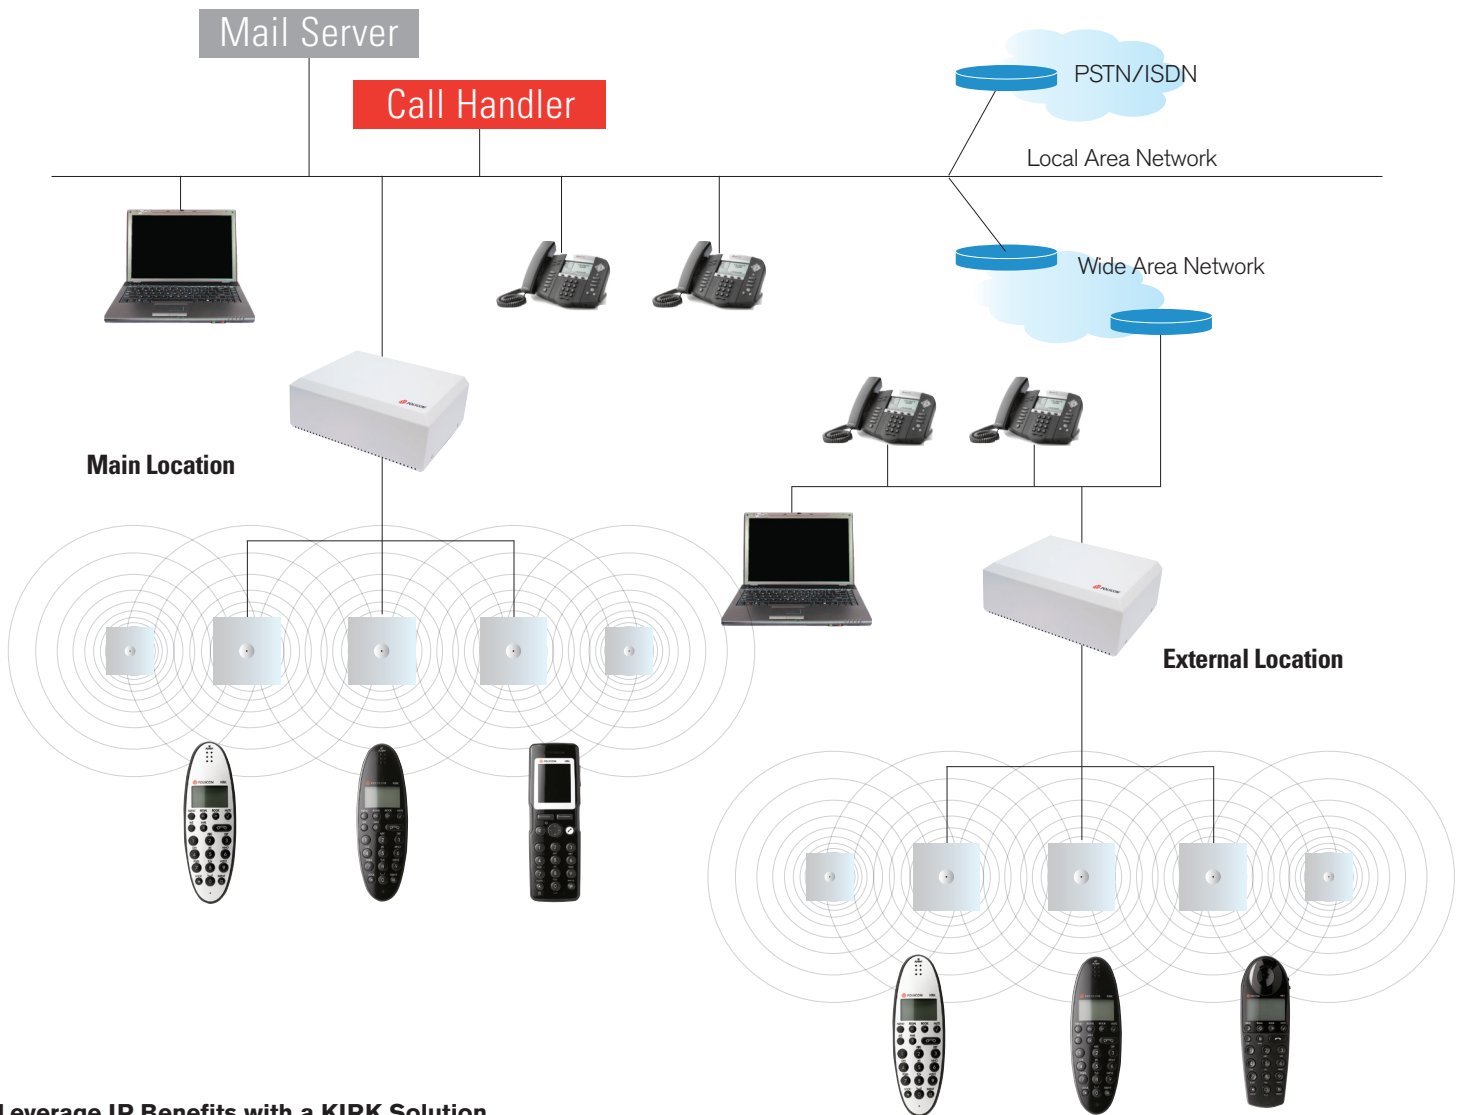

Companies choose Polycom solutions because they allow geographically dispersed workforces to communicate more effectively and productively over distances. Using Polycom voice, video, and telepresence products and services, people connect and collaborate with one another from their desktops, meeting rooms, class rooms, and mobile settings rather than travelling to one place to solve problems.

Find out how your workers can quickly collaborate "face-to-face" wherever they are. Visit www.polycom.com.

Benefits

- ▶ Improve responsiveness and productivity of mobile workers dramatically
- ▶ Deliver high-quality and secure voice communications across all enterprise environments
- ▶ Leverage investment in circuit-switched and IP PBX features throughout the workplace
- ▶ Increase business efficiency by integrating with application systems and business processes
- ▶ Maximise employee availability using simple, reliable and durable devices

Polycom® KIRK® Wireless Server 1500 Configuration

Leverage IP Benefits with a KIRK Solution

Above is an illustration of how the KIRK Wireless Server 1500 with IP interface is implemented in a business with two company locations, where the existing data network has been expanded to also include telephony. An IP-based call handler and a KIRK Wireless Server 1500 are installed at the main location, whereas the other is equipped with a KIRK Wireless Server 1500. Benefits of the solution include elimination of redundant

infrastructure, simplification of administration and maintenance, cost reductions and improved employee mobility and remote connectivity.

For information on supported PBX platforms, see interoperability list on www.polycom.com
