

OKIDATA®

The high-volume,
high-productivity,
highly upgradable
fax solution.

OKIFAX® 5800 PLAIN PAPER FACSIMILE

PLAIN PAPER
FACSIMILE

LOWER THE COST OF DOING BIG BUSINESS.

Okidata has taken the measure of big business — and offers *the* fax machine to meet your company's most pressing needs. The OKIFAX® 5800 Plain Paper Fax was designed for users in high-volume, high-traffic environments, offering more performance for the price than most machines in its class.

It has an arsenal of features to handle the telecommunications demands of large groups or whole departments, letting users perform their tasks with speed and efficiency, thereby improving the bottom line. What's more, its advanced design ensures that the OKIFAX 5800 can be upgraded to meet future needs, through multiple memory upgrades and connectivity options.

This machine can take your office productivity to new and higher levels. For instance, users have *multi-access* (not just dual) to fax functions: the unit can receive a fax into memory, send another, and print out a third fax simultaneously!

With the optional dual line (including a 33.6 Kbps modem), users can transmit and receive faxes *at the same time*. And the

second line, with its faster speed, can save you even more time and money.

The standard 78-page¹ document memory can be expanded to as much as 558 pages¹ for massive document storage, memory transmission and out-of-paper reception. The 650-sheet standard paper capacity can print out all the pages in the upgraded memory — and more — before the need to refill.

The unit also has a 108-hour memory back-up should the electricity in the office accidentally go out.

**Power to get
the job done
— with flexibility
for growth.**

That's enough for a long weekend. And by utilizing the optional GDI Windows® Printer Interface, the OKIFAX 5800 becomes a 6 ppm/600 dpi printer, delivering presentation-quality text and graphics. Plus, for PC faxing and scanning, there's an optional RS232C Serial Interface².

¹ Based on ITU-T Test Chart #1. ² Not available with dual line option.

THE HUB OF YOUR CORPORATE ACTIVITY.

Even without upgrading, the OKIFAX® 5800 machine is impressive.

Among its many capabilities are a 1.7-second quick scan and 6-second transmission speed¹. The former gets users back to work in a very short time, especially with the 50-sheet automatic document feeder; the latter can reduce your company's telephone bills, especially if users take advantage of the Delayed Transmission timers to fax automatically after hours, when phone rates are lower.

As a "hub" unit, it can receive a fax from another OKIFAX 5800 and automatically and cost-effectively relay it to all of the 209 locations you put into its directory.

Up to 200 frequently-called fax numbers can be set up as "speed dials" — 1-touch or 2 — and the directory is arranged like a phone book, so you can find the number you want easily and quickly. Twelve programmable keys let users carry out multi-step fax commands with a single touch.

The OKIFAX 5800 can also serve as a convenience copier, turning out 300 x 300 dpi copies — up to 99 from the same original.

The OKIFAX 5800 handles the biggest jobs — with its 650-sheet standard paper capacity and 50-sheet automatic document feeder.

Count on Okidata to help keep your OKIFAX 5800 up and running: customer service is available 7 days a week, 24 hours a day, 365 days a year² by calling 1-800-OKIDATA. There's also a comprehensive, easy-to-access faxback documentation system, and a dynamic Web site — for a depth of support unequalled in the industry.

Plus, you can depend on your Authorized OKIDATA Facsimile Dealer for productivity solutions as your business needs grow and change.

Lower your cost of doing big business. With Okidata and the OKIFAX 5800.
