XL-18 Tri-Axial Activity Monitor

LifeSource® an A&D Medical brand introduces the Tri-axial Activity Monitor. **Put it on.** Place the XL-18 Activity Monitor in your pocket, purse or bag. **Get moving!** The XL-18 records your steps, distance and calories burned. **Get results.** The XL-18 Activity Monitor is designed to keep you informed and motivated with up-to-the minute results. **Packed with features;** the XL-18 Tri-axial Activity Monitor boasts a 14-day memory and a motion indicator that shows you the intensity of your movements. A detachable lanyard, internal clock, power save mode, and battery life indicator also come standard.

Tri-axial Technology gives you the most accurate measure of your steps. It uses a digital accelerometer to track movement in all directions. So whether you are walking, running, exercising or even dancing, Tri-axial Technology is precisely tracking your activity.

Want to know what your real step count is or how many calories that walk to the library actually burned? Ever feel that your pedometer isn't accurate enough? The XL-18 Tri-axial Activity Monitor has the ability to discern between accidental movement and intentional exercise. You'll get an extremely accurate measure of your motion. You can feel confident that what you see on the screen is a true indicator of your efforts.

The XL-18 Tri-axial Activity Monitor comes in an ultra slim form factor, 3" long by 1-3/8" wide and less than 1/2" thick. Weighing in at only 1 ounce, you'll barely notice you're carrying such a powerful tool. The LCD display spans over two-thirds of the product, giving you a large and easy-to-read screen. Powered by a replaceable CR2032 lithium battery, and backed by a two-year warranty you'll be ready to get moving as soon as you open the box.

Put it on. Get moving! Get Results.
