## Getting to know the buttons on the remote control

Names of the buttons on the remote control are presented in different colors to represent the available functions.

### Button color

- Black ..... Press to select the component you want to control; e.g. VTR (VCR)/MDP/DVD Player, SAT (Satellite Antenna)/CABLE, or TV
- Green ..... Buttons relevant to power operations, like turning the TV, SAT/CABLE, or VTR (VCR)/MDP/DVD Player on or off

### Label color

- White ..... TV/VTR (VCR)/MDP/DVD Player/SAT/CABLE operation buttons
- Yellow ..... PIP operation buttons
- Blue ..... SAT (Satellite Antenna) operation buttons
- Green ..... System off operation button
- Pink ..... DVD Player operation buttons

For a detailed explanation of most buttons, see "Watching the TV" on page 15.

All references to buttons on the remote control will be highlighted with **bold text**.

## WARNING

To reduce the risk of fire or shock hazard, do not expose the TV to rain or moisture.

	<b>CAUTION</b> RISK OF ELECTRIC SHOCK DO NOT OPEN	
<b>ATTENTION</b> RISQUE DE CHOC ELECTRIQUE, NE PAS OUVRIR		
<b>PRECAUCION</b> RIESGO DE CHOQUE ELECTRICO NO ABRIR		
CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.		

This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

## CAUTION

TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OR PLUG TO WIDE SLOT, FULLY INSERT.

## CAUTION

When using TV games, computers, and similar products with your TV, keep the brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high brightness or contrast setting, the image can be permanently imprinted onto the screen. Continuously watching the same program can cause the imprint of station logos onto the TV screen. These types of imprints are not covered by your warranty because they are the result of misuse.

### Note on Caption Vision

This television receiver provides display of television closed captioning in accordance with §15.119 of the FCC rules.

### Note on cleaning the TV

Clean the TV with a soft dry cloth. Never use strong solvents such as thinner or benzene, which might damage the finish of the cabinet.

### Note to CATV system installer

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Use of this television receiver for other than private viewing of programs broadcast on UHF or VHF or transmitted by cable companies for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

## NOTIFICATION

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful

interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antennas.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

This document is for the remote control RM-Y170.

## Important Safeguards

For your protection, please read these instructions completely, and keep this manual for future reference.

Carefully observe and comply with all warnings, cautions and instructions placed on the set, or described in the operating instructions or service manual.

### WARNING

To guard against injury, the following basic safety precautions should be observed in the installation, use, and servicing of the set.

### Use

#### Power Sources

This set should be operated only from the type of power source indicated on the serial/model plate. If you are not sure of the type of electrical power supplied to your home, consult your dealer or local power company. For those sets designed to operate from battery power, refer to the operating instructions.

#### Grounding or Polarization

This set is equipped with a polarized AC power cord plug (a plug having one blade wider than the other), or with a three-wire grounding type plug (a plug having a third pin for grounding).

Follow the instructions below:

#### For the set with a polarized AC power cord plug

This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.

### Alternate Warning

#### For the set with a three-wire grounding type AC plug

This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the grounding plug.

#### Overloading

Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.

Always turn the set off when it is not to be used. When the set is left unattended and unused for long periods of time, unplug it from the wall outlet as a precaution against the possibility of an internal malfunction that could create a fire hazard.

#### Object and Liquid Entry

Never push objects of any kind into the set through the cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

#### Attachments

Do not use attachments not recommended by the manufacturer, as they may cause hazards.

#### Cleaning

Unplug the set from the wall outlet before cleaning or polishing it. Do not use liquid cleaners or aerosol cleaners. Use a cloth lightly dampened with water for cleaning the exterior of the set. If a snapping or popping sound from a TV set is continuous or frequent

while the TV is operating, unplug the TV and consult your dealer or service technician. It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off.

### Installation

#### Water and Moisture

Do not use power-line operated sets near water — for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

#### Accessories

Do not place the set on an unstable cart, stand, table or shelf. The set may fall, causing serious injury to a child or an adult, and serious damage to the set. Use only a cart or stand recommended by the manufacturer for the specific model of TV. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

#### Ventilation

The slots and openings in the cabinet and in the back or bottom are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.

- Never cover the slots and openings with a cloth or other materials.
- Never block the slots and openings by placing the set on a bed, sofa, rug or other similar surface.

## Important Safeguards (continued)

- Never place the set in a confined space, such as a bookcase, or built-in cabinet, unless proper ventilation is provided.
- Do not place the set near or over a radiator or heat register, or where it is exposed to direct sunlight.

### Power-Cord Protection

Do not allow anything to rest on or roll over the power cord, and do not place the set where the power cord is subject to wear or abuse.

### Antennas

#### Outdoor Antenna Grounding

If an outdoor antenna is installed, follow the precautions below.

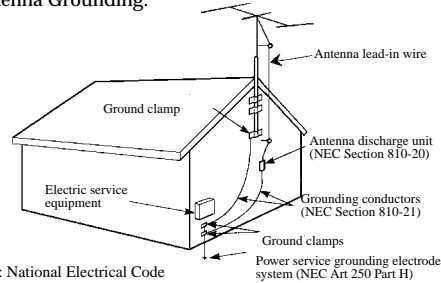

An outdoor antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can come in contact with such power lines or circuits.

**WHEN INSTALLING AN OUTDOOR ANTENNA SYSTEM, EXTREME CARE SHOULD BE TAKEN TO KEEP FROM CONTACTING SUCH POWER LINES OR CIRCUITS AS CONTACT WITH THEM IS ALMOST INVARIABLY FATAL.**

Be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code (NEC) in USA and Section 54 of the Canadian Electrical Code in Canada provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

**Antenna Grounding According to the NEC**  
Refer to section 54-300 of Canadian Electrical Code for Antenna Grounding.

NEC: National Electrical Code

### Lightning

For added protection for this television receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the receiver due to lightning and power-line surges.

### Service

#### Damage Requiring Service

Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power cord or plug is damaged or frayed.
- If liquid has been spilled into the set.
- If the set has been exposed to rain or water.

- If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.
- If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.
- When the set exhibits a distinct change in performance — this indicates a need for service.

### Service

Do not attempt to service the set yourself since opening the cabinet may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

### Replacement Parts

When replacement parts are required, be sure the service technician certifies in writing that he has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

### Safety Check

Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition, and to so certify. When the set reaches the end of its useful life, improper disposal could result in a picture tube implosion. Ask a qualified service technician to dispose of the set.

## Welcome!

Thank you for purchasing the Sony Trinitron® Color TV. This manual is for models KV-32XBR250 and KV-36XBR250.

The features you will enjoy include:

- A flat CRT, for optimal picture quality
- Component video (Y, Pb, Pr) input for the highest quality DVD Player connection
- Three A/V inputs, for easy connection of all your audio and video components
- “Vertical Compression” provides a more detailed, higher resolution picture for widescreen sources, such as DVD
- Two S VIDEO inputs, for high quality image
- Dual tuner PIP, which allows you to watch two programs, one embedded in the other
- Wireless stereo headphones, which allow you to listen privately to your television broadcasts

## Precautions

### **Safety**

- Operate the TV only with 120 V AC.
- The plug is designed, for safety purposes, to fit in the wall outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- If any liquid or solid object should fall inside the cabinet, unplug the TV immediately and have it checked by qualified personnel before operating it further.

### **Installing**

- To prevent internal heat build-up, do not block the ventilation openings.
- Do not install the TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.
- The AC power cord is attached to the rear of the TV with hooks. Do not attempt to remove the cord from these hooks. Doing so could cause damage to the TV.

## Using This Manual

This manual is divided into five major sections. We recommend that you review the contents before you begin to use your new TV.

### **1 Connecting and Installing the TV**

This section guides you through your initial set up. It shows how to connect to your antenna or cable, and connect any accessories.

### **2 Basic Set Up**

This section teaches you the basic skills needed to operate your new TV.

### **3 Using your New TV**

This section shows the initial setup screen and how to use your remote control.

### **4 Using your Menus**

This section teaches you how to access on-screen menus and adjust your TV's settings.

### **5 Troubleshooting**

This section helps you to correct problems you may encounter with your TV.

## **Making Connections**

Refer to the table below, it will direct you to the diagram suitable to the equipment you will be connecting.

## Note about the AC Power Cord

The AC power cord is attached to the rear of the TV with hooks. Use caution when removing the AC plug from its holder. Gently slide the cord in the upward direction, without removing the cord from the two lower hooks.

## Cable or Antenna Connections

### Connecting directly to cable or an antenna

The connection you choose will depend on the cable found in your home. Newer homes will be equipped with standard coaxial cable (see **A**); older homes will probably have 300-ohm twin lead cable (see **B**); still other homes may contain both (see **C**).

## Cable and antenna

If your cable provider does not feature local channels, you may find this set up convenient.

Select CABLE or antenna (ANT) mode by pressing ANT on the remote control.

## Note

In order to receive channels with an antenna, you will need to turn your CABLE to OFF and perform the AUTO PROGRAM function, (see page 26).

## Connecting and Installing the TV (continued)

### Cable Box Connections

Some pay cable TV systems use scrambled or encoded signals that require a cable box to view all channels.

#### Cable box

- 1 Connect the coaxial connector from your cable to the IN on your cable box.
- 2 Using a coaxial cable, connect OUT on your cable box to VHF/UHF on your TV.

*If you will be controlling all channel selection through your cable box, you should consider using the CHANNEL FIX feature, (see page 26).*

### Cable box and cable

For this set up, you can switch between scrambled channels (through your cable box), and normal (CATV) channels by pressing ANT on your remote control.

#### Notes

- Your Sony remote control can be programmed to operate your cable box, (see page 34).
- When using PIP, you cannot view the AUX input in the window picture.

#### Tip

Pressing ANT switches between these inputs.

*If you are connecting a cable box through the AUX input and would like to switch between the AUX and normal (CATV) input you should consider using the CHANNEL FIX feature, (see page 26).*

## VCR Connections

### Connecting an antenna/cable TV system with a VCR

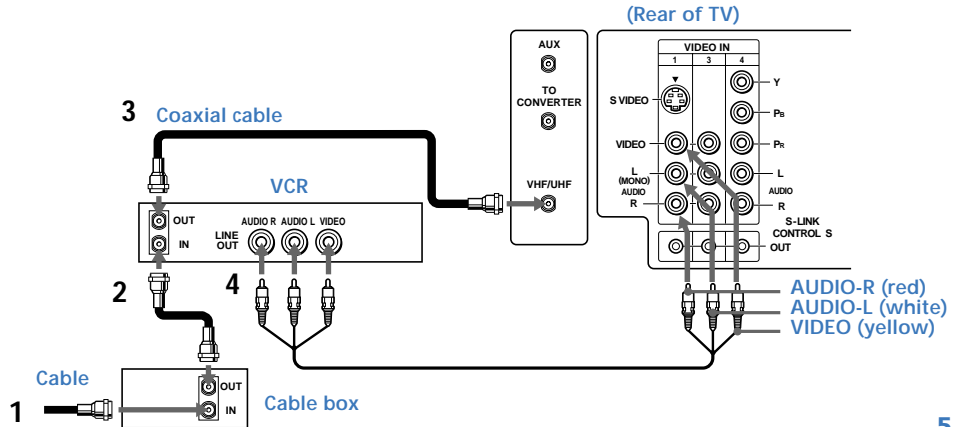

- 1 Attach the coaxial connector from your cable or antenna to IN on your VCR.
- 2 Using A/V connectors, connect AUDIO and VIDEO OUT on your VCR to AUDIO and VIDEO IN on your TV.
- 3 Using a coaxial connector, connect OUT on your VCR to VHF/UHF on your TV.

#### Tip

If you are connecting a monaural VCR, connect only the single white audio output to the left input on your TV.

### Connecting a VCR and TV with a cable box

- 1 Connect the coaxial cable from the wall to IN on your cable box.
- 2 Using a coaxial connector, connect OUT on your cable box to IN on your VCR.
- 3 Connect a coaxial cable (not supplied) from the OUT jack on your VCR to VHF/UHF on your TV.
- 4 Using A/V connectors, connect AUDIO and VIDEO OUT on your VCR to AUDIO and VIDEO IN on your TV.

## Connecting and Installing the TV (continued)

### Connecting two VCRs for tape editing

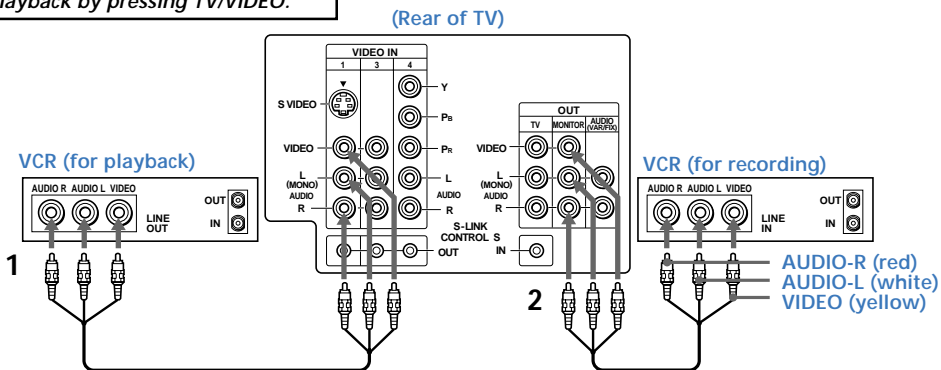

MONITOR OUT gives you the ability to use a second VCR to record a program being played by the primary VCR or to perform tape editing and dubbing.

- 1 Connect the VCR intended for playback using the connection instructions on page 5 of this manual.
- 2 Using A/V connectors, connect AUDIO and VIDEO IN on your VCR intended for recording to MONITOR AUDIO and VIDEO OUT on your TV.

#### Note

You cannot record signals from equipment connected to the Y, Pb, Pr input.

*To perform tape editing: set the TV to the video input intended for playback by pressing TV/VIDEO.*

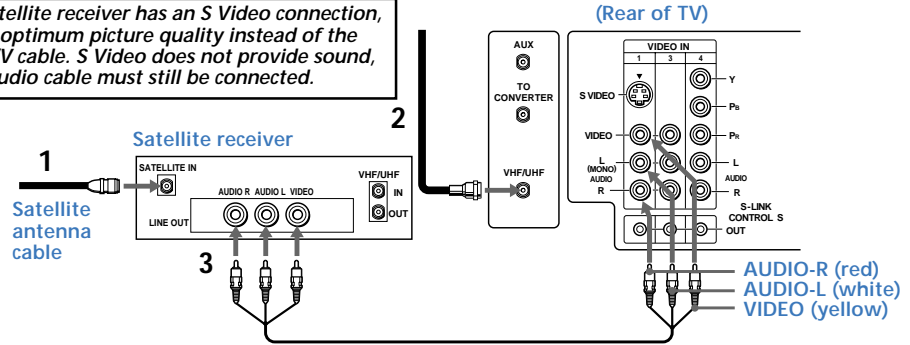

## Satellite Connections

### Connecting a satellite receiver

- 1 Connect the cable from your satellite antenna to SATELLITE IN on your receiver.
- 2 Attach the coaxial connector from your cable or antenna to VHF/UHF on your TV.
- 3 Using A/V connectors, connect AUDIO and VIDEO OUT on your receiver to AUDIO and VIDEO IN on your TV.

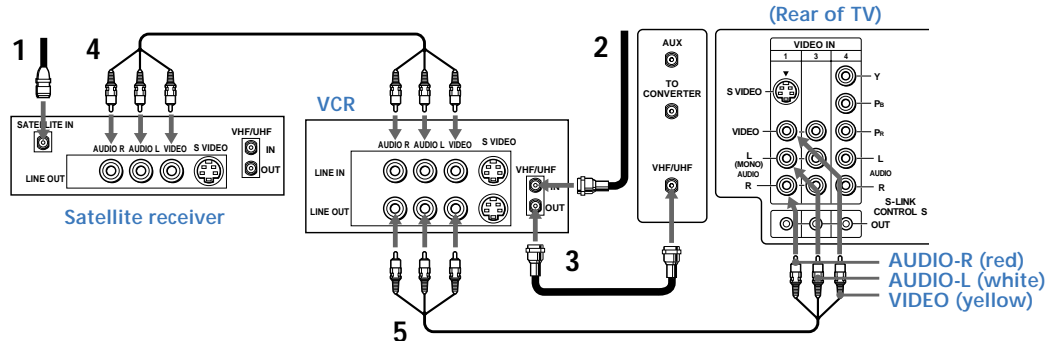

*If your satellite receiver has an S Video connection, use it for optimum picture quality instead of the yellow A/V cable. S Video does not provide sound, so your audio cable must still be connected.*

### Connecting a satellite receiver and a VCR

- 1 Connect the cable from your satellite antenna to SATELLITE IN on your receiver.
- 2 Attach the coaxial connector from your cable or antenna to IN on your VCR.
- 3 Using a coaxial connector, connect OUT on your VCR to VHF/UHF on your TV.
- 4 Using A/V connectors, connect AUDIO and VIDEO OUT on your receiver to AUDIO and VIDEO IN on your VCR.
- 5 Using A/V connectors, connect AUDIO and VIDEO OUT on your VCR to AUDIO and VIDEO IN on your TV.

*Pressing TV/VIDEO on the remote control will allow you to view from the satellite receiver or VCR.*

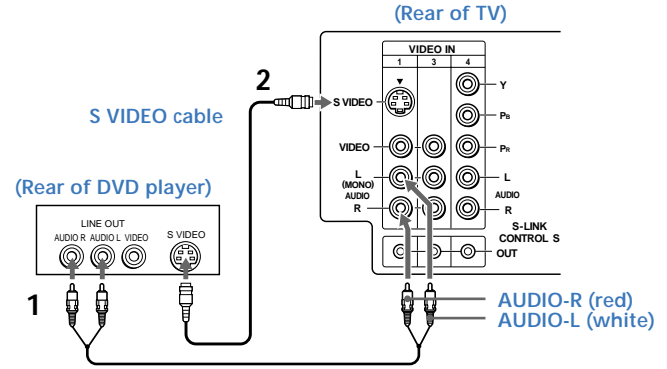

# Connecting and Installing the TV (continued)

## DVD Player Connections

### Connecting a DVD Player

- 1 Using audio connectors, connect AUDIO OUT on your DVD player to AUDIO IN on your TV.
- 2 Using an S VIDEO cable, connect S VIDEO on your DVD player to S VIDEO on your TV.

### Connecting a DVD Player with component video output connectors

This connection option offers the highest quality DVD picture.

- 1 Using AUDIO connectors, connect AUDIO R and L of the LINE OUT on your DVD player to AUDIO R and L on the VIDEO IN 4 panel at the rear of your TV.
- 2 Using three VIDEO connectors, connect Y, Pb, and Pr on the COMPONENT VIDEO OUT on your DVD player to Y, Pb, and Pr on the VIDEO IN 4 panel at the rear of your TV.

### Note

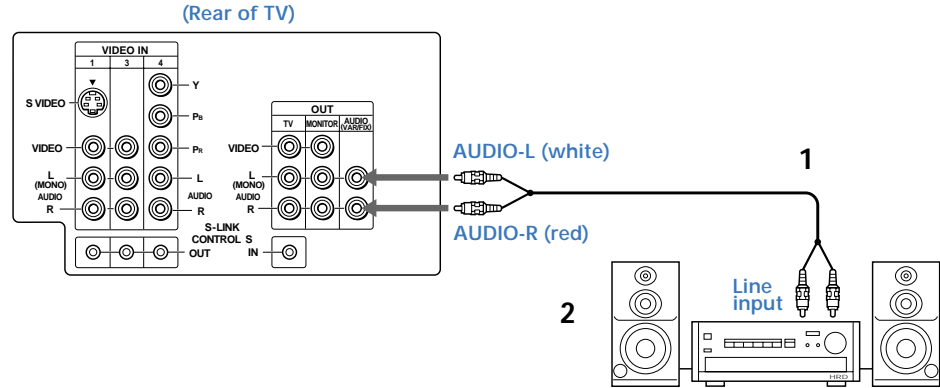

Some DVD player terminals may be labeled Y, CB, and CR, or Y, B-Y, and R-Y. If so, connect them by matching the colors.

## Additional Connections

### Connecting an audio system

For an enhanced sound, connect your audio system to your TV.

- 1 Using AUDIO connectors, connect AUDIO OUT on your TV to one of the unused Line inputs (e.g. Tape-2, AUX1, etc.) on your stereo.
- 2 Set your stereo to the chosen Line input and use the AUDIO menu to set your audio output, (see page 23).

### Connecting an A/V receiver

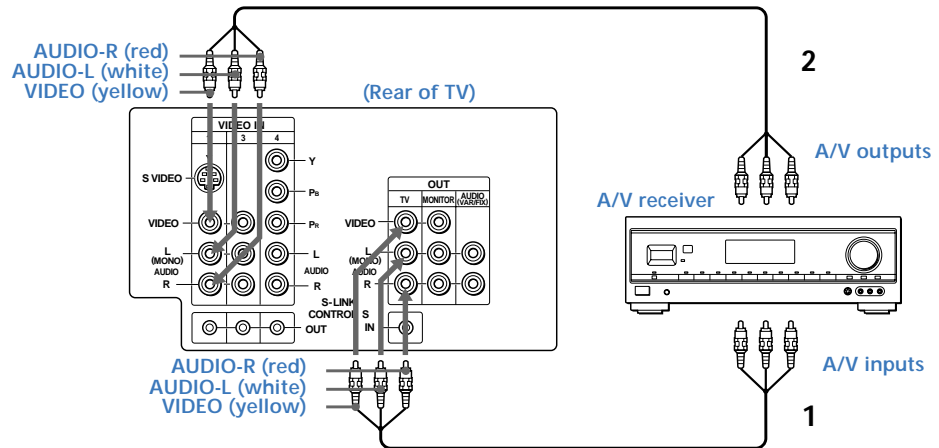

- 1 Using A/V cables, connect TV OUT on your TV to TV IN on your A/V receiver.
- 2 Using A/V cables, connect A/V OUT on your receiver to VIDEO IN on your TV.

#### Note

If you will be connecting your A/V receiver to external speakers, you do not need to connect AUDIO OUT on your A/V receiver to AUDIO IN on your TV.

You may want to use CHANNEL FIX to fix your TV's input to the A/V receiver (VIDEO 1). (see "CHANNEL SET UP" on page 26)

## Connecting and Installing the TV (continued)

### Connecting a camcorder

This connection is convenient for viewing a picture directly from your camcorder.

Using A/V connectors, connect AUDIO and VIDEO OUT on your camcorder to AUDIO and VIDEO IN on your TV.

#### Tip

*If you are connecting a monaural camcorder, connect only the single white audio output to the left input on your TV.*

*If you have an S VIDEO equipped camcorder, you can use an S VIDEO cable for optimum picture quality.*

---

## Using Special Sony Features

### Using the CONTROL S feature

CONTROL S allows you to control your TV and other Sony equipment with one remote control.

Using a CONTROL S cable, connect CONTROL S IN on your Sony equipment, (e.g. VCR) to CONTROL S OUT on your TV.

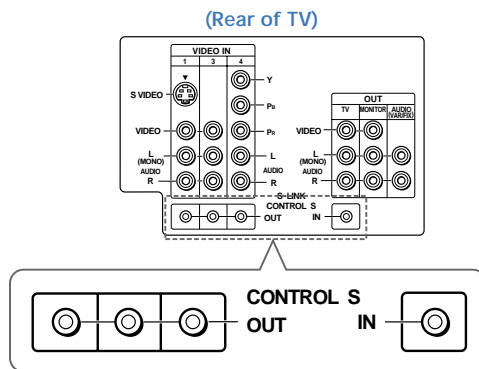

#### Tip

*You can also program your remote control to operate other equipment, (see page 34).*

### Using the Vertical Compression feature

These models use a feature called “vertical compression” to achieve maximum picture quality on widescreen sources, including selected DVDs. This feature compresses the height of each line for a higher resolution of the picture.

To enjoy this feature, set your Sony DVD player to 16:9 mode. The widescreen source will be automatically detected and displayed with maximum picture quality.

## Connecting and Installing the TV (continued)

### Connecting S-Link to a VCR

S-Link automatically powers on the TV and switches to the correct video input when a tape is inserted in the VCR.

- 1 Using A/V connectors, connect AUDIO and VIDEO OUT on your VCR to AUDIO and VIDEO IN on your TV.
- 2 Using an S-Link connector (mono mini plug), connect S-LINK on your VCR to S-LINK/CONTROL S-OUT in the same VIDEO IN column on your TV.

### Connecting S-Link to a satellite receiver

When you power on the satellite receiver, S-Link automatically powers on the TV and switches to the correct video input.

- 1 Using A/V connectors, connect AUDIO and VIDEO OUT on your satellite receiver to AUDIO and VIDEO IN on your TV.
- 2 Using an S-Link connector (mono mini plug), connect S-LINK on your satellite receiver to S-LINK/CONTROL S-OUT in the same VIDEO IN column on your TV.

*The S-Link connector must be in the same VIDEO-IN column as the connected A/V cables.*

### Note

The S-Link feature will override the "SKIP" VIDEO LABEL input, (see page 25).

### Inserting Batteries

Insert two size AA (R6) batteries (supplied) by matching the + and - on the batteries inside the battery compartment.

### Notes

- Remove the batteries to avoid damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.
- Handle the remote control with care. Avoid dropping it, getting it wet, or placing it in direct sunlight, near a heater, or where the humidity is high.
- Your remote control can be programmed to operate most video equipment, (see page 34).

### Using the Remote Control Move & Select Buttons

The supplied remote control has a joystick which allows for movement of the on-screen cursor. Pressing up, down, left, or right on the joystick will cause the cursor to *move* in the corresponding direction. Pressing down on the center of the joystick (⊕) will *select* the item.

### Front Panel Menu Control

The front panel menu controls allow access to the on-screen menus without the use of a remote control. Pressing the MENU button will bring up the on-screen menus. The arrow buttons, (↑, ↓) move the on-screen cursor in the menus and the (⊕) button selects the menu item.

### Setting Up the TV Automatically

After you have finished connecting your TV, you will want to run AUTO PROGRAM to set up your channels.

*The AUTO PROGRAM feature does not apply for installations that use a cable box for all channel selection.*

Using the buttons on the top of the TV:

- 1 Press POWER to turn on the TV. The initial setup screen appears.

POWER

- 2 Press CH + to run AUTO PROGRAM or press CH - to exit.

- CHANNEL +

### Tip

To reset your TV to factory settings, turn the TV on. Then, while pressing the **RESET** button on your remote control, press the **POWER** button on your TV. The TV will turn itself off, then back on.

## Watching the TV

The following chart explains more advanced buttons on your remote control.

*REFER TO THE ILLUSTRATION OF THE REMOTE CONTROL ON THE INSIDE FRONT COVER OF THIS MANUAL AS YOU REVIEW THIS CHART*

Using the White Labeled Buttons for TV Operations	
	Press when you want to turn connected equipment on and off.
	Press when you want to control connected equipment with your remote control, (see pages 32-34 for instructions on programming your remote control).
	Use for direct channel selection. Press <b>0-9</b> to select a channel, the channel will change after 2 seconds, or you can press <b>ENTER</b> for immediate selection.
	Cycles through the VIDEO MODE settings: VIVID, STANDARD, MOVIE, SPORTS.
	Alternates back and forth between the last two channels selected with the <b>0-9</b> keys.
	Instantly turns off the sound. Press again or press <b>VOL +</b> to restore sound.
	Turns the TV off in approximately 30, 60, or 90 minutes. Cancel by pressing until SLEEP OFF appears.
	Press to return to factory settings while in an on-screen menu.

## Using Your New TV (continued)

Using the White Labeled Buttons for TV Operations	
<b>DISPLAY</b> 	Press once to display current time (if set) and channel number. Press again to activate current CAPTION VISION setting. To cancel, press <b>DISPLAY</b> until DISPLAY OFF appears.
<b>TV/VIDEO</b> 	Press repeatedly to cycle through available video inputs: TV, VIDEO 1, VIDEO 2, VIDEO 3 and VIDEO 4
<b>ANT</b>  <i>(AUX input)</i>	Press to change the VHF/UHF input to the AUX input.
<b>TV/VTR</b> 	Press when you are finished using a VCR and you want to switch to the TV input. Your VCR power will remain on.
<b>MTS/SAP</b> 	Cycles through the Multi-channel TV Sound (MTS) options: STEREO, SAP (Second Audio Program), MONO (see page 23).
<b>SYSTEM OFF</b> 	Powers off all Sony equipment at once. <i>This feature may not work with older Sony equipment.</i>
<b>TV/SAT</b> 	Cycles through the AUTO VOLUME settings.

## Using Picture-in-Picture – PIP

Picture-in-Picture (PIP) allows you to watch two channels simultaneously, one in the large main window and another in a small window picture.

### Notes

- You must press **TV (FUNCTION)** before you can control PIP with the yellow labeled buttons.
- The **AUX** input cannot be viewed in the window picture.

*REFER TO THE ILLUSTRATION OF THE REMOTE CONTROL ON THE INSIDE FRONT COVER OF THIS MANUAL AS YOU REVIEW THIS CHART*

Use the Yellow Labeled Buttons for PIP Operations	
<b>TV/VIDEO</b> 	Cycles through available video inputs: TV, VIDEO 1, VIDEO 2, VIDEO 3, VIDEO 4
<b>AUDIO</b> 	Alternates sound between the main picture and the window picture. A 🎵 will appear to indicate which picture is receiving sound.
<b>CH +</b>  <b>CH -</b> 	Changes the channel in the window picture.
<b>POSITION</b> 	Moves the location of the window picture.
<b>FREEZE</b> 	Press to freeze the window picture. Press again to restore the picture.
<b>SWAP</b> 	Switches the position of the main picture with the window picture.

## Using the Wireless Headphones

### Setting Up the Headphones

Install the supplied size AA (R6) battery into the headphones.

- 1 Open the battery compartment lid by pressing and sliding the lid as illustrated.

- 2 Lift the cover and insert the battery into the compartment with the positive side up and then close the lid.

#### Notes

- When used continuously, the battery will last:
  - up to 40 hours with alkaline batteries.
  - up to 20 hours with manganese batteries.
- Replace the battery with a new one when the sound becomes weak.

### Using the Headphones

- 1 Press . The  icon and channel number are displayed.

- 2 Turn the power on by placing the headphones securely on your head.

If you only want to listen to the sound from the cordless headphones, turn down the TV speaker volume, or press **MUTING**.

- 3 To turn off the headphones, remove them from your head and press .

#### Tip

For optimal sound reception, do not cover the infrared transmitter on the TV or the infrared sensors on the headphones.

#### Notes

- To help prevent possible hearing damage due to sudden or prolonged excessive volume, do not set the headphone volume too high while using them.
- To prevent possible damage to the infrared transmitter in the television, please press the  to turn off the headphone feature when the headphones are not in use.

## Listening to Sound from a Main/PIP Picture

If you want to listen to the sound from the main or window picture through your headphones, select the audio source.

1 Press  to display a window picture.

2 Press .  
The  display and channel number appears for about three seconds.

Main Picture audio

Press  again to switch the audio to the window picture.

Window Picture audio

Headphones off

### Notes

- Exiting from PIP will return the sound to the main picture.
- The audio to the headphones will be automatically turned off when the TV is powered off.

## Coverage Area of the Infrared Rays

This diagram illustrates the approximate area covered by the infrared rays emitted from the transmitter.

### Notes

- If you use the headphones too far from the TV, you may hear a hissing noise.
- If something is between the headphones and the TV, the sound may be interrupted. These problems are inherent to IR communication and do not reflect a problem with the TV.

## Learning Menu Selection

Use the **MENU** button to access a menu and move the joystick (▲ or ▼) to alter settings. Use the following example, in which we activate the **CABLE**, to learn how to modify settings.

- 1 Press the **MENU** button.

The main menu appears.

- 2 Press ▲ or ▼ to highlight the desired menu (in this case **SET UP** [SET UP]), and press ⊕ to select it.

- 3 Press ▲ or ▼ to move to the desired option and press ⊕.

- 4 Press ▲ or ▼ to move to the desired feature and press ⊕.

Options for your selection will be highlighted.

- 5 Press ▲ or ▼ to make your selection and press ⊕.

When you are finished making changes to the selected menu, choose >MENU to return to the main menu.

### Tip

Pressing **MENU** on the remote control will allow you to exit from the menus at any time.

## The Parental Guideline Rating System

This table provides a brief overview of the rating systems available for the PARENTAL CONTROL feature.

For detailed information on how to change your TV rating, see pages 30-31.

### Notes

- The content ratings will increase depending on the level of the age-based rating. For example, a program with a TV-PG V (Violence) rating may contain moderate violence, while a TV-14 V (Violence) rating may contain more intense violence.
- If you choose to block unrated TV programs, please be aware that the following programs may be blocked: emergency broadcasts, political programs, sports, news, public service announcements, religious programs and weather.
- To ensure maximum blocking capability, the age-based ratings should be blocked.
