SAMSUNG

TX-R2779H

COLOR TELEVISION

Owner's Instructions

Important Warranty Information Regarding Television Format Viewing

Standard screen format televisions (4:3, the aspect ratio of the screen width to height) are primarily designed to view standard format full-motion video. The images displayed on them should primarily be in the standard 4:3 ratio format and constantly moving. Displaying stationary graphics and images on screen, such as the dark top and bottom letterbox bars (wide screen pictures), should be limited to no more than 15% of the total television viewing per week.

Wide screen format televisions (16:9, the aspect ratio of the screen width to height) are primarily designed to view wide screen format full-motion video. The images displayed on them should primarily be in the wide screen 16:9 ratio format, or expanded to fill the screen if your model offers this feature, and constantly moving. Displaying stationary graphics and images on screen, such as the dark side-bars on non-expanded standard format television video and programming, should be limited to no more than 15% of the total television viewing per week.

Additionally, viewing other stationary images and text such as stock market reports, video game displays, station logos, web sites or computer graphics and patterns, should be limited as described above for all televisions. *Displaying any stationary images that exceed the above guidelines can cause uneven aging of picture tubes (CRTs) that leave subtle, but permanent burned-in ghost images in the television picture. To avoid this, vary the programming and images, and primarily display full screen moving images, not stationary patterns or dark bars.* On television models that offer picture sizing features, use these controls to view the different formats as a full screen picture.

Be careful in the selection and duration of television formats used for viewing. Uneven CRT aging as a result of format selection and use, as well as other burned-in images, is not covered by your Samsung limited warranty.

A Guide to Digital TV

What is Digital Television?

Digital television (DTV) is a new way of transmitting high quality video and audio to your TV set. Using DTV, broadcasters can transmit high definition TV (HDTV) images, Dolby digital surround audio, and new services such as multicasting (transmitting more than one program on the same TV channel) and datacasting (providing electronic program guides and interactive television).
Several of these services can be combined into a single digital broadcast.

Digital Television Services

Digital Picture Quality

DTV programs are transmitted in two different formats. The first is Standard Definition Television (SDTV) and the second is High Definition Television (HDTV).

SDTV program formats include 480-line interlaced (480i) and 480-line progressive (480p) video. 480i programs are essentially a digital version of our current analog TV programs, while the 480p format offers improved image detail over 480i. Some 480p programs are broadcast in widescreen and are comparable to progressive-scan DVD movies in image quality.

HDTV program formats include 1080-line interlaced (1080i) and 720-line progressive (720p). Both HDTV formats are always broadcast in widescreen, and offer much higher picture quality than SDTV.

Dolby Surround Sound

With DTV, you can listen to a variety of Dolby digital audio formats from Dolby Surround 2.0 to Dolby Digital 5.1 surround, using your home audio system. Many HDTV programs are now broadcast with DD 5.1 soundtracks.

Interactive Communications and Datacasting

DTV will allow you to interact with your television; choosing programs from a detailed program guide, ordering products on-line while watching TV, and accessing ancillary data about a program.

How to View Digital Television

There are three ways to watch DTV. The first is to use an integrated digital TV; one with a built-in digital television tuner. The second is to connect an external DTV set-top receiver to a DTV-ready television or monitor. This type of TV or monitor will have wideband component video and stereo audio inputs. You can also watch DTV signals with personal computer (PC) tuner cards and computer monitors.

1. Integrated TVs versus DTV-ready TVs and monitors

The advantage of an integrated DTV set is that it can tune both analog and digital TV channels at the same time. All you need to do is add an external antenna and you are ready to watch DTV.

However, integrated DTV sets are not as common as DTV-ready TVs and monitors. If you already own a DTV-ready TV with component video inputs, you can enjoy DTV broadcasts by simply adding a low-cost DTV set-top receiver and antenna.

2. Using a personal computer and monitor

There are plug-in cards available that will receive and display DTV broadcasts on your computer monitor. In addition, many computer monitors will display one or more of the DTV program formats directly. The most compatible format is 480p, which is similar to the VGA (640x480 pixel) computer display standard. You may be able to watch DTV broadcasts by connecting a computer monitor to the 15-pin jack on the rear of a set-top DTV receiver.

NOTE

This television receiver supports the copy protection system regulated by DTLA (Digital Transmission Licensing Administrator). It should be noted that copy protected content may not be viewable depending on your particular connections.

Q&A

1. Is the antenna I use for existing TV reception good enough for DTV?

Over-the-air (OTA) digital TV broadcasting uses the same channels as analog TV and works well with many existing TV antennas. However, DTV broadcast channel assignments are different than analog channels. You should find out whether your local DTV broadcasts are on VHF (channels 2-13) or UHF (channels 14-69) to see if you need a different antenna.

If your DTV channels are on UHF and you already get good UHF reception, your present antenna may work fine. The same holds true for VHF DTV reception. Note that in some markets, both VHF and UHF channels are used for DTV broadcasts.

You can find out the latest DTV channel assignments for your area by browsing selected Internet web sites such as www.titantv.com , www.10000watts.com, and www.fcc.gov.

2. How difficult is it to receive DTV signals indoors?

This depends on whether your local DTV stations are running full power or not and how close your location is to the transmission tower. DTV receivers do not require as much signal as analog TV receivers to produce high-quality images and sound.

Once the DTV signal level exceeds a certain threshold at the receiver, the digital video and audio data is decoded at the same quality it was originally encoded for broadcast. This is a big advantage for DTV over analog TV - there is no noise, ghosting, static, or scratchy audio.

3. How can I connect an antenna in my townhouse, co-operative apartment, condominium, or apartment?

The Federal Communications Commission's OTARD Rule (part of the Telecommunications Act of 1996) allows residents of condominiums, townhouses, or members of neighborhood associations to put up outside antennas for reception of broadcast TV signals as long as those antennas are not located in common areas and are no more than 12" in height.

Residents of rental units (apartments, etc) are not covered by the OTARD rules and will have to use indoor antennas to receive DTV broadcasts. It is possible that the landlord of an apartment complex can provide broadcast DTV signals via a master TV antenna system to each apartment.

4. Can I connect my DTV set-top receiver to my cable TV service?

Cable TV systems use a different method for transmitting digital TV programs that is currently incompatible with broadcast DTV set-top receivers. So you will still need to use an outdoor or indoor antenna to receive OTA broadcast DTV programs.

The good news is that you won't have to pay a monthly or per-program charge to watch OTA DTV and HDTV programs. They're free, unlike subscription satellite TV or premium cable TV. All you need is an antenna and a DTV set-top receiver to enjoy clear, sharp widescreen images and high-quality audio.

List of Features

Your Samsung TV is designed with the latest technology. This TV is a high-performance unit that includes the following special features:

- Easy-to-use remote control
- Easy-to-use on-screen menu system
- Automatic timer to turn the TV on and off
- Adjustable picture and sound settings that can be stored in the TV's memory
- A special filter to reduce or eliminate reception problems
- Fine tuning control for the sharpest picture possible
- A built-in multi-channel sound decoder for stereo and bilingual listening
- Built-in, dual channel speakers
- A special sleep timer
- Component Video Input jacks to obtain a sharper image from external sources
- Digital Input (**HDMI-H**igh **D**efinition **M**ultimedia **I**nterface) jack
- Digital Audio Output (OPTICAL) jack

Accessories

Once you have unpacked your TV, check to make sure that you have all the parts shown here. If any piece is missing or broken, call your dealer.

Remote Control (AA59-00356H) / AAA Batteries

Owner's Instructions / Safety Guide Manual

Warranty Card / Registration Card

Familiarizing Yourself with the TV

Control Buttons

You can control your TV's basic features, including the on-screen menu. To use the more advanced features, you must use the remote control.
❶ **SOURCE**
Press to change between viewing TV programs and signals from other components.

❷ **MENU**
Press to see an on-screen menu of your TV's features.

❸ **+ VOL −**
Press to increase or decrease the volume. Also used to select items on the on-screen menu.

❹ ⌃ **CH** ⌄
Press to change channels. Also press to move between items on the on-screen menu.

❺ **Remote Control Sensor**
Aim the remote control towards this spot on the TV.

❻ **Stand-By Indicator**
Lights up when you turn the power off.
- Power Off ; Red
- Power On ; Off

❼ **POWER**
Press to turn the TV on and off.

Connection Jacks (Side)

You can connect an A/V component that is used only occasionally, such as a camcorder or video game. (For information on connecting equipment, see page 22.)
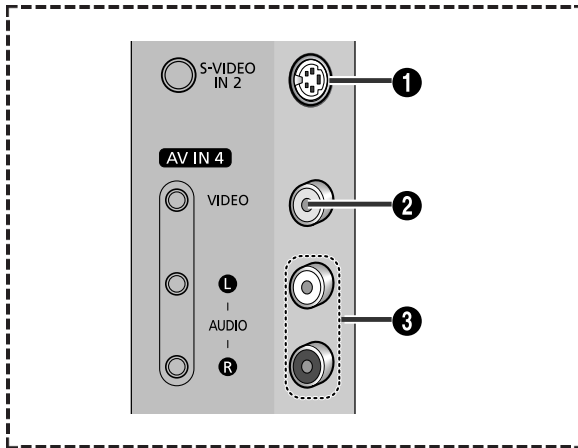

❶ S-VIDEO Input
Connect an S-Video signal from a camcorder or video game.

❷ VIDEO Input
Connect a video signal from a camcorder or video game.

❸ AUDIO Input
Connect audio signals from a camcorder or video game.

• Please be sure to match the color coded input terminals and cable jacks.

Connection Jacks (Rear)

Use the rear panel jacks to connect an A/V component that will be connected continuously, such as a VCR or a DVD player.

For more information on connecting equipment, see pages 14 – 24.
❶ **S-Video Input jack**
Connect to S-Video output jack of an S-VHS VCR or DVD player.

❷ **Video Input jacks**
Connect to the video output jacks of VCRs, DVD players and similar devices.

• The Y Component video 1 and 2 input jacks also function as the regular (composite) video 2 and 3 input jacks.

❸ **Audio Input jacks**
Connect to the audio output jacks of VCRs, DVD players and similar devices.

• The component audio 1 and 2 input jacks also function as the audio 2 and 3 input jacks for regular (composite) video.

❹ **Audio-Video Output jacks**
Connect to the audio/video input jacks of a recording VCR.

❺ **Component Input jacks (Y, PB, PR, AUDIO-L/R)**
Connect to the Component audio and video outputs of a DVD or DTV set-top box. 480i/480p/720p/1080i Y, PB, and PR video signal inputs are available.

❻ **UPGRADE PORT**
For service only

❼ **HDMI** (**H**igh **D**efinition **M**ultimedia **I**nterface) **Input jack**
Connect to the HDMI jack for device with HDMI output.

❽ **Digital Audio Output jack (OPTICAL)**
Connect to a Digital Audio component.

❾ **ANTENNA terminals**
Two independent cables or antennas can be connected to these terminals. Use "ANT 1 IN (Air)" and "ANT 2 IN (Cable)" terminals to receive a signal from VHF/UHF antennas or your cable system.

Remote Control

You can use the remote control up to about 23 feet from the TV. When using the remote, always point it directly at the TV.

You can also use your remote control to operate your VCR, DVD, Cable box, and some Samsung Set-top boxes. See pages 76~77 for details.

❶ POWER
Turns the TV on and off.

❷ TV/COMP.
Press to switch the TV between Component 1, 2 or HDMI mode.

❸ ANTENNA
Press to select "Air" or "Cable".

❹ Number buttons
Press to select channels directly on the TV.

❺ +100
Press to select channels over 100. For example, to select channel 121, press "+100", then press "2" and "1".

❻ VOL +, VOL -
Press to increase or decrease the volume.

❼ MUTE
Press to temporarily cut off the sound.

❽ GUIDE
Press to display the on-screen Electronic Program Guide (EPG).

❾ MENU
Displays the main on-screen menu.

❿ ▲/▼/◄/►
Controls the cursor in the menu.

⓫ P.SIZE
Press to change the screen size.

⓬ P.MODE
Adjust the TV picture by selecting one of the preset factory settings (or select your personal, customized picture settings).
⓭ MODE
Selects a target device to be controlled by this remote control (i.e., TV, Samsung STB, VCR, Cable box, or DVD).

⓮ PRE-CH
Tunes to the previous channel.

⓯ SOURCE
Press to display all of the available video sources.

⓰ CH∧, CH ∨
Press to change channels.

⓱ INFO
Press to display information on the TV screen.

⓲ EXIT
Press to exit the menu.

⓳ ENTER
While using the on-screen menus, press ENTER to activate (or change) a particular item.

⓴ S.MODE
Adjust the TV sound by selecting one of the preset factory settings (or select your personal, customized sound settings).

㉑ FAV. CH (Favorite Channel)
Press to switch between your favorite channels.

continued...

Remote Control

㉒ ADD/DEL
Press to add or erase channels in the TV's memory.

㉓ AUTO.PROG
Press to display the memorized channels menu.

㉔ BBE
BBE is a built-in effect that adds clarity, punch and dynamics to the sound.

㉕ CAPTION
Controls the caption decoder.

㉖ VCR/DVD Controls
Controls VCR/DVD functions: Rewind, Stop, Play/Pause, Fast Forward.

㉗ SET
Used during set up of this remote control, so that it will work compatibly with other devices (some Samsung Set-top boxes, VCR, Cable box, DVD, etc.)
㉘ SLEEP
Press to select a preset time interval for automatic shut off.

㉙ MTS
(Multi-channel Television Sound) Press to choose "Stereo", "Mono", or "SAP" (Secondary Audio Program).

㉚ R.SURF
Press to automatically return to a preferred channel after a user-preset time delay.

㉛ RESET
If your remote control is not functioning properly, take out the batteries and press the **RESET** button for about 2~3 seconds. Re-insert the batteries and try using the remote control again.

Connecting VHF and UHF Antennas

If your antenna has a set of leads that look like this, see "Antennas with 300-ohm Flat Twin Leads" below.

If your antenna has one lead that looks like this, see "Antennas with 75-ohm Round Leads" on page 15.
If you have two antennas, see "Separate VHF and UHF Antennas" on page 15.

Antennas with 300-ohm Flat Twin Leads

If you are using an off-air antenna (such as a roof antenna or "rabbit ears") that has 300-ohm twin flat leads, follow the directions below.

1

Place the wires from the twin leads under the screws on the 300-75 ohm adaptor (not supplied). Use a screwdriver to tighten the screws.
2

Plug the adaptor into the "ANT 1 IN (Air)" terminal on the rear panel.
Antennas with 75-ohm Round Leads

1

Plug the antenna lead into the "ANT 1 IN (Air)" terminal on the rear panel.
Separate VHF and UHF Antennas

If you have two separate antennas for your TV (one VHF and one UHF), you must combine the two antenna signals before connecting the antennas to the TV. This procedure requires an optional combiner-adaptor (available at most electronics shops).

1

Connect both antenna leads to the combiner.
2

Plug the combiner into the "ANT 1 IN (Air)" terminal on the rear panel.
Connecting Cable TV

To connect to a cable TV system, follow the instructions below.

Cable without a Cable Box

1

Plug the incoming cable into the "ANT 2 IN (Cable)" terminal on the rear panel.
Connecting to a Cable Box that Descrambles All Channels

1
Find the cable that is connected to the ANTENNA OUT terminal on your cable box.

◀ This terminal might be labeled "ANT OUT", "VHF OUT" or simply, "OUT".

2
Connect the other end of this cable to the "ANT 2 IN (Cable)" terminal on the rear panel.
Connecting to a Cable Box that Descrambles Some Channels

If your cable box descrambles only some channels (such as premium channels), follow the instructions below. You will need a two-way splitter, an RF (A/B) switch, and four lengths of coaxial cable. (These items are available at most electronics stores.)

1
Find and disconnect the cable that is connected to the ANTENNA IN terminal on your cable box.
◀ This terminal might be labeled "ANT IN", "VHF IN" or simply, "IN".

2
Connect this cable to a two-way splitter.
3
Connect a coaxial cable between an OUTPUT terminal on the splitter and the IN terminal on the cable box.
4

Connect a coaxial cable between the ANTENNA OUT terminal on the cable box and the B–IN terminal on the RF (A/B) switch.

Incoming Cable

Splitter

IN   CABLE   OUT

Cable Box
RF (A/B) Switch

5

Connect another cable between the other OUT terminal on the splitter and the A–IN terminal on the RF (A/B) switch.

Incoming Cable

Splitter

IN   CABLE   OUT

Cable Box
RF (A/B) Switch

6

Connect the last coaxial cable between the OUT terminal on the RF (A/B) switch and the "ANT 2 IN (Cable)" terminal on the rear panel.

Incoming Cable

Splitter

IN   CABLE   OUT

Cable Box

RF (A/B) Switch

TV Rear
After you've made this connection, set the A/B switch to the "A" position for normal viewing. Set the A/B switch to the "B" position to view scrambled channels. (When you set the A/B switch to "B", you will need to tune your TV to the cable box's output channel, which is usually channel 3 or 4.)

Connecting a VCR

These instructions assume that you have already connected your TV to an antenna or a cable TV system (according to the instructions on pages 14~17).

• Please be sure to match the color coded input terminals and cable jacks.

1
Connect a coaxial cable between the "ANT 1 IN (Air)" terminal on the TV and the antenna out terminal on the VCR.
A coaxial cable is usually included with a VCR. (If not, check your local electronics store).

2
Connect a set of audio cables between the "AV IN 1 (L, R)" (or "AV IN 2/3 (L, R)") jacks on the TV and AUDIO OUT jacks on the VCR.
If you have a mono VCR, connect L(mono) to VCR audio out using only one audio cable.

3
Connect a video or S-video cable between the "AV IN 1 (VIDEO)" ("AV IN 2/3 (VIDEO)" or "S-VIDEO IN 1") jack on the TV and the VIDEO OUT jack on the VCR.

Refer to your VCR's instructions for more information about how to view your VCR tape.

TV Rear Panel

VCR Rear Panel
• Also, you can connect to "AV IN 4" on the side panel of TV.

Connecting a Second VCR to Record from the TV

Your TV can send out signals of its picture and sound to be recorded by a second VCR. To do this, connect your second VCR as follows:

1

Connect a set of audio cables between the AUDIO OUT jacks on the TV and the AUDIO IN jacks on the VCR. (The VCR input jacks might be either on the front or on back of the VCR.)

2

Connect a video cable between the VIDEO OUT jack on the TV and the VIDEO IN jack on the VCR.

Refer to your VCR's instructions for more information about how to record using this kind of connection.

TV Rear Panel

VCR Rear Panel

Connecting a DVD Player

The rear panel jacks on your TV make it easy to connect a DVD player to your TV.

• Please be sure to match the color coded input terminals and cable jacks.

Connecting to Y, P_B, P_R

1
Connect a set of audio cables between the "COMPONENT IN 1 (L, R)" (or "COMPONENT IN 2 (L, R)") jacks on the TV and the AUDIO OUT jacks on the DVD player.

2
Connect a set of video cables between the "COMPONENT IN 1 (Y, P_B, P_R)" (or "COMPONENT IN 2 (Y, P_B, P_R)") jacks on the TV and the COMPONENT VIDEO OUT (Y, P_B, P_R) jacks on the DVD player.

For an explanation of Component video, see your DVD player's owner's instruction.

TV Rear Panel

• Also, you can connect to "AV IN 4" on the side panel of TV.

Connecting a Digital TV Set-Top Box

The rear panel jacks on your TV make it easy to connect a set-top box to your TV.

• Please be sure to match the color coded input terminals and cable jacks.

Connecting to Y, P$_B$, P$_R$

TV Rear Panel

1
Connect a coaxial cable to the ANTENNA IN terminal on the set-top box.

2
Connect a set of audio cables between the "COMPONENT IN 1 (L, R)" (or "COMPONENT IN 2 (L, R)") jacks on the TV and the AUDIO OUT jacks on the set-top box.

3
Connect a set of video cables between the "COMPONENT IN 1 (Y, P$_B$, P$_R$)" (or "COMPONENT IN 2 (Y, P$_B$, P$_R$)") jacks on the TV and the VIDEO OUT (Y, P$_B$, P$_R$) jacks on the set-top box.

The connections for a typical set-top box are shown.
For detailed information, refer to the set-top box instruction manual.
DTV Set-Top Box

Connecting to HDMI (High Definition Multimedia Interface)

TV Rear Panel

Connect an HDMI cable between the "HDMI IN" jack on the TV and the HDMI OUT jack on the set-top box.

Please check that the HDMI source is powered on. If not, you can not select "HDMI" in the "Source List" on-screen menu.

DTV Set-Top Box
Connecting a Camcorder

The side panel jacks on your TV make it easy to connect a Camcorder to your TV. They allow you to view the Camcorder tapes without using a VCR.

• Please be sure to match the color coded input terminals and cable jacks.

TV Side Panel

1
Locate the A/V output jacks on the Camcorder. They are usually found on the side or rear of the Camcorder.

2
Connect a set of audio cables between the "AV IN 4 (L, R)" jacks on the TV and the AUDIO OUT jacks on the Camcorder.
If you have mono Camcorder, connect L(mono) to Camcorder audio out using only one audio cable.

3
Connect a video or S-video cable between the "AV IN 4 (VIDEO)" (or "S-VIDEO IN 2") jack on the TV and the VIDEO OUT jacks on the Camcorder.

The audio-video cables shown here are usually included with a Camcorder. (If not, check your local electronics store.) If your Camcorder is stereo, you need to connect a set of two cables.

Connecting to a Digital Audio System

There are many types of digital audio systems on the market today.
A simplified illustration of an audio system is shown below. For more information, see your audio system owner's manual.

TV Rear Panel

If your audio system has an optical digital audio input, connect to the "DIGITAL AUDIO OUT (OPTICAL)" jack on the TV.

Be certain to remove the black cover from the optical output before inserting the cable.

Optical Cable

Digital Audio Input
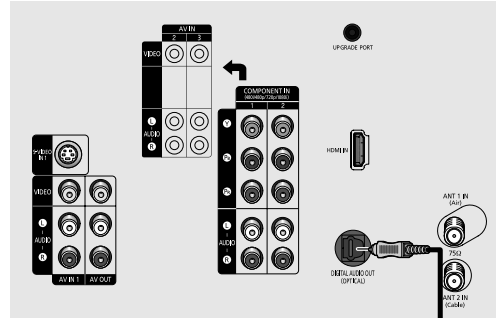

Digital Audio

- OPTICAL: Converts the electric signal into an optical light signal, and transmits it through glass fibers. S/PDIF is a transmission system of digital audio in the form of a light wave that uses a glass conductor.

Connecting to an Analog Amplifier

• Please be sure to match the color coded input terminals and cable jacks.

TV Rear Panel

The "AUDIO OUT" terminals cannot be used for external speakers. You must hook them up to an amplifier.

When an audio amplifier is connected to the "AUDIO OUT" terminals: Decrease the gain (volume) of the audio amplifier, and adjust the volume level with the volume control on the TV.

Audio Cable

Speaker A   Amplifier   Speaker B
Installing Batteries in the Remote Control

1
Slide the cover out completely.
2
Install two AAA size batteries.
◄ Make sure to match the "+" and "−" ends of the batteries with the diagram inside the compartment.

3
Replace the cover.
◄ Remove the batteries and store them in a cool, dry place if you won't be using the remote control for a long time.

The remote control can be used up to about 23 feet from the TV.

(Assuming typical TV usage, the batteries last for about one year.)

Turning the TV On and Off

Press the **POWER** button on the remote control.
You can also use the **POWER** button on the front panel.

Plug & Play Feature

When the TV is initially powered On, basic customer settings proceed automatically and subsequently: Setting the language, Antenna input check, Channel Memorize and Time Setting.

• The Plug & Play function operates after plugging in the TV for the first time.

1

Press the **POWER** button on the remote control.

The message "Menu language, Channels, and Time will be set" is displayed.
Press the **ENTER** button to start, then "Select the language of the OSD" is displayed.

> ⓘ **Menu language, Channels, and Time will be set**
> **Start**
◄ Plug & Play feature doesn't work in the AV mode.

◄ Even if **ENTER** button is not pressed, the "Select the language of the OSD" will be displayed automatically.

2

Press the **ENTER** button to enter the language.
Press the ▲ or ▼ button to select language, then the **ENTER** button.
"Select the antennas to memorize" is displayed.

> **Plug & Play**
> Select the language of the OSD
> Language   : English
>   Spanish
>   French
> ⬍ Move   ↵ Enter   ⅲ Skip
> Selects English as the menu language.

◄ When you view the "Select the language of the OSD" the mode "Function Help" will turn "On". (refer to page 69).

3

Press the ▲ or ▼ button to select the desired connection.
Press the **ENTER** button to select "Start" to memorize the channels of the selected connection.

> **Plug & Play**
> Select the antennas to memorize
> Air   Start
> Cable   Start
> Air + Cable Start
> ⬍ Move   ↵ Enter   ⅲ Skip
> Selects Air to execute the Auto Program function.

When selecting Cable TV :
Press the ▲ or ▼ button to select "Cable", then press the **ENTER** button.
Press the ▲ or ▼ button to select "STD", "HRC", or "IRC", then press the **ENTER** button.

> **Plug & Play**
> Select the cable system
> STD
> HRC
> IRC
> ⬍ Move   ↵ Enter   ⅲ Skip
> Selects STD as a signal type for your location.
◄ STD, HRC, and IRC identify various types of cable TV systems. Contact your local cable company to identify the type of cable system that exists in your particular area.

4

The TV will begin memorizing all of the available channels. Press the **ENTER** button to stop.

After all the available channels are stored, the "Auto Program" menu reappears. Press the **MENU** button when channel memorization is complete.

"Set to daylight savings time" is displayed.

```
        Auto Program

Memorizing the Channels

Your TV can memorize and store all of the available channels for both "off-air" (antenna) and cable channels. After the available channels are memorized, use the **CH ∧** and **CH ∨** buttons to scan through the channels. This eliminates the need to change channels by entering the channel digits. There are three steps for memorizing channels: selecting a broadcast source, memorizing the channels (automatic) and adding and deleting channels (manual).

Selecting the Video Signal Source

Before your television can begin memorizing the available channels, you must specify the type of signal source that is connected to the TV (i.e., an antenna or a cable system).

1
Press the **MENU** button.

Press the ▲ or ▼ button to select "Channel", then press the **ENTER** button.

TV	Channel

Changing Channels

Using the Channel Buttons

Press the **CH** ⌃ or **CH** ⌄ button to change channels.

When you press **CH** ⌃ or **CH** ⌄, the TV changes channels in sequence. You will see all the channels that the TV has memorized. (The TV must have memorized at least three channels.) You will not see channels that were either erased or not memorized.

Using the Number Buttons

Use the number buttons to quickly tune to any channel.

Press the number buttons to go directly to a channel.
For example, to select channel 27, press "2" then "7".
The TV will change channels when you press the second number.

When you use the number buttons, you can directly select channels that were either erased or not memorized.

To select a channel over 100, press the **+100** button.
(For channel 122, press "+100" then "2" then "2".)

To change to single-digit channels (0–9) faster, press "0" before the single digit.
(For channel "4" press "0" then "4".)

Using the PRE-CH Button to Select the Previous Channel

Press the **PRE-CH** button.
The TV changes to the last channel you were watching.
◄ To quickly switch between two channels that are far apart, tune to one channel, then use the number buttons to select the second channel. Then, use the **PRE-CH** button to quickly alternate between them.

Selecting Your Favorite Channels

You can store your favorite channels for each available input source (such as TV and CATV). Then, when you press the **FAV.CH** button on the remote control, the TV displays only the favorite channels you previously stored, allowing you to quickly and easily find frequently watched channels.

To Store Your Favorite Channels:

1
Press the **MENU** button.

Press the ▲ or ▼ button to select "Channel", then press the **ENTER** button.

TV	Channel	
Input	Antenna : Air	▶

Analog ## Fine Tuning Analog Channels

The Fine Tuning function lets you manually adjust the TV's tuner if you have difficulty tuning channels.

1

Press the **MENU** button.

Press the ▲ or ▼ button to select "Channel", then press the **ENTER** button.

TV	Channel
Input	Antenna : Air ▶
Picture	Auto Program ▶
	Add / Delete ▶
Sound	Favorite Channels ▶
	Name ▶
Channel	Fine Tune ▶
Setup	Signal Strength ▶
Guide	LNA : On ▶

‡ Move   Enter   Return

2
Press the ▲ or ▼ button to select "Fine Tune", then press the **ENTER** button.

Press the ◄ or ► button to adjust the fine tuning. To store the fine tuning setting in the TV's memory, press the **ENTER** button.

To reset the fine tuning to "0", press the ▲ or ▼ button to select "Reset", then press the **ENTER** button.

Press the **EXIT** button to exit.

```
                Fine Tune
Air 7      Auto Fine Tuned
  |                          0
            Reset
‹› Adjust      Enter    Return
```

```
                Fine Tune
Air 7    Manually Fine Tuned
         |                   3
            Reset
‹› Adjust      Enter    Return
```

```
                Fine Tune
Air 7      Auto Fine Tuned
         |                  0
            Reset
‡ Move        Enter    Return
```
• Only analog TV channels can be fine tuned.

Digital | Checking the Digital-Signal Strength

Unlike analog channels, which can vary in reception quality from "snowy" to clear, digital (HDTV) channels have either perfect reception quality or you will not receive them at all. So, unlike analog channels, you cannot fine tune a digital channel.
You can, however, adjust your antenna to improve the reception of available digital channels.

1
Press the **MENU** button.

Press the ▲ or ▼ button to select "Channel", then press the **ENTER** button.

TV	Channel
Input	Antenna : Air ▶

Using the R.Surf Feature

This feature allows you to set the TV to return to a particular channel after a certain amount of time. For example, you may be watching a channel when commercials start. You can set the R.Surf to "5 minutes", then switch channels. After 5 minutes, the TV will return to the original channel. To use the R.Surf feature:

1
While you are watching the channel to which you want to return, press the **R.SURF** button. The on-screen display will read "SURF Off".

SURF Off
2
Press the **R.SURF** button again to set the timer in thirty second intervals, up to five minutes.

SURF 1:30

◄ The time will start decreasing while you are setting up the timer, and will reset after 5 minutes has passed or you turn it off.

3
The time you set will begin counting down on the screen. When the time runs out, the TV will return to the channel you were watching when you set the timer.

Digital Choosing a Multi-Channel Sound (MTS) track

The digital-TV transmission system is capable of simultaneous transmission of many audio tracks (for example, simultaneous translations of the program into foreign languages). The availability of these additional "multitracks" depends upon the program.

1
Press the **MENU** button.

Press the ▲ or ▼ button to select "Sound", then press the **ENTER** button.

Alternate method:
Press the **MTS** button on the remote control repeatedly to select one of the settings.

```
Stereo
```

- Choose "**Mono**" for channels that are broadcasting in mono, or if you are having difficulty receiving a stereo signal.
- Choose "**Stereo**" for channels that are broadcasting in stereo.
- Choose "**SAP**" to listen to the Separate Audio Program, which is usually a foreign-language translation.

Auto Volume

Each broadcasting station has its own signal conditions, and it is inconvenient to adjust the volume every time the channel is changed. "Auto Volume" automatically adjusts the volume of the desired channel by lowering the sound output when the modulation signal is high or by raising the sound output when the modulation signal is low.

1
Press the **MENU** button.

Press the ▲ or ▼ button to select "Sound", then press the **ENTER** button.

   TV-G : General audience
   TV-PG : Parent Guidance
   TV-14 : Viewers 14 and over
   TV-MA : Mature Audience

• These categories consist of two separate groups: "TV-Y" and "TV-Y7" (young children through age 7), and "TV-G" through "TV-MA" (everybody else).

• The restrictions for these two groups work independently: If a household includes very young children as well as young adults, the TV parental guidelines must be set up separately for each age group. (See page 62)

How to Set up Restrictions using the Movie Ratings:
G, PG, PG-13, R, NC-17, X

The Movie rating system uses the Motion Picture Association of America (MPAA) system, and its main application is for movies.
When the Rating Control is on, the TV will automatically block any programs that are coded with objectionable ratings (either MPAA or TV-Ratings).

1
Press the **MENU** button.

Important Notes About Parental Locks

Explanation of the MPAA and TV (FCC) Rating Systems:

TV (FCC) Age-Based Ratings

TV-Y
All children. The themes and elements in this program are specifically designed for a very young audience, including children from ages two to six.

TV-Y7
Directed to older children. Themes and elements in this program may include mild physical or comedic violence, or may frighten children under the age of seven.

TV-G
General audience. It contains little or no violence, no strong language, and little or no sexual dialog or situations.

TV-PG
Parental guidance suggested. The program may contain infrequent coarse language, limited violence, some suggestive sexual dialog and situations.

TV-14
Parents strongly cautioned. This program may contain sophisticated themes, sexual content, strong language and more intense violence.

TV-MA
Mature audiences only. This program may contain mature themes, profane language, graphic violence and explicit sexual content.

TV (FCC) Content Category

FV	Fantasy violence
V	Violence
S	Sexually Suggestive Dialog
L	Adult Language
D	Sexual situation

MPAA Rating System (Movies)

G	General audience (no restriction).
PG	Parental guidance suggested.
PG-13	PG-13 (Parents strongly cautioned).
R	R (Restricted. Children under 17 should be accompanied by an adult).
NC-17	No children under age 17.
X	X (Adults only).
NR	Not rated.

- TV (FCC) ratings: The particular rating that you have selected will be locked (and indicated as a red "L" on a blue background). Also, all of the age-based ratings will be locked within the particular group (i.e., "group 1" or "group 2").
  Suppose that the TV-G rating and all of its contents (V, S, L, and D) are locked. In that case, more restrictive ratings (TV-PG, TV-14, and TV-MA) and all of their contents (V, S, L, and D) are automatically locked as well.

- MPAA ratings: The particular rating that you have selected will be locked. In addition, more restrictive ratings will be locked as well.

- Neither TV (FCC) ratings nor MPAA ratings apply to news programs.

		Text4
	◆ Move ⊕ Enter ▥ Return	

- The default is "CC1".

  CC1 : The Primary Synchronous Caption Service. These are captions in the primary language that must be in sync with the sound, preferably matched to a specific frame.

  CC2 : The Special Non-Synchronous Use Captions. This channel carries data that is intended to augment information carried in the program.

  CC3 : Secondary Synchronous Caption Service. Alternate program-related caption data, typically second language captions.

  CC4 : Special Non-Synchronous Use Captions. Similar to CC2.

  Text1 : First Text Service. This may be various non-program related data.

  Text2 : Second Text Service. Additional data, usually not program related.

  Text3/Text4 : Third Text Service. These data channels should be used only if Text1 and Text2 are not sufficient.

- The availability of captions depends on the program being broadcast.

Digital Electronic Program Guide

Your TV has an "Electronic Program Guide" to help you navigate through all the possible viewing options. The EPG supplies information, such as program lists, start and end times of all available channels.

In addition, detailed information about the program is often available in the EPG. (The availability and the amount of program details will vary depending on the broadcaster.)

Viewing the Electronic Program Guide

A Displays which channel is currently selected to show program information in the Channel Guide.

B Press to view detailed information for the selected digital program.

C Switches to the mini program guide. The mini guide shows the titles of the available programs of one channel. Press the Red button on the remote control. The set default guide is Mini Guide.

D Scrolls backwards quickly (2 hours). Press the Green button on the remote control.

E Displays titles and other details about upcoming programs of particular channels. Highlight the program and press the **INFO** button

to see additional and detailed information. (The availability of additional details depends on the broadcaster.) Use the ▲/▼/◄/► buttons to search information about another channel.

F Scrolls forward quickly (2 hours). Press the Yellow button on the remote control.

G Exits from the Program Guide and returns to normal viewing mode. Press the Blue button on the remote control.

H Displays the program times (arranged in 1 hour time blocks)

I Displays the current time and date.

• You can use the **GUIDE** button on the remote control to display the Electronic Program Guide. The EPG begins its list with the channel that is currently active. The EPG will only work when you are receiving digital channels.

Using the Electronic Program Guide

Customizing Your Remote Control

Your TV comes equipped with a universal remote control. In addition to controlling the TV, the universal remote control can also operate a VCR, Cable box, DVD, and some Samsung Set-top boxes (even if your VCR, Cable box and DVD are made by manufacturers other than Samsung).

Setting Up Your Remote Control to Operate Your VCR (Cable box or DVD player)

1
Turn off your VCR (Cable box or DVD player).

2
Press the **MODE** button to switch the remote control to the **VCR** (**CABLE** or **DVD**) mode.

◄ The remote control has five modes: **TV**, **STB**, **VCR**, **CABLE**, and **DVD**.

3
On your Samsung remote control, press the **SET** button.

4
Enter 3 digits of the VCR (Cable box or DVD player) code listed on next page for your brand of VCR (Cable box or DVD player).

◄ Make sure you enter 3 digits of the code, even if the first digit is a "0". (If more than one code is listed, try the first one.)

5
Press the **POWER** button on the remote control. Your VCR (Cable box or DVD player) should turn on. If your VCR (Cable box or DVD player) turns on, your remote control is now set correctly.

◄ If your VCR (Cable box or DVD player) does not turn on, repeat steps 2, 3, and 4, but try one of the other codes listed for the brand of your particular VCR (Cable box or DVD player).

6
Once your remote control is set up, press the **MODE** button any time you want to use the remote to operate your VCR (Cable box or DVD player).

- When your remote is in the **TV** mode, the VCR (or DVD player) control buttons (**REW**, **STOP**, **PLAY/PAUSE**, and **FF**) will still operate your VCR (or DVD player).
- When your remote control is in the **STB**, **VCR**, **CABLE**, or **DVD** mode, the volume buttons still control your TV's volume.

If the TV seems to have a problem, first try this list of possible problems and solutions. If none of these troubleshooting tips apply, then call your nearest Samsung authorized service center.

Identifying Problems

Problem	Possible Solution
Poor picture.	Try another channel. Adjust the antenna. Check all wire connections.
Poor sound quality.	Try another channel. Adjust the antenna.
No picture or sound.	Try another channel. Press the **SOURCE** button. Make sure the TV is plugged in. Check the antenna connections. Make sure the **MUTE** button is off.
No color, wrong colors or tints.	Make sure the program is broadcast in color. Adjust the picture settings.
Picture rolls vertically.	Adjust the antenna. Check all wire connections. If you are using a VCR, check the tracking.
The TV operates erratically.	Unplug the TV for 30 seconds, then try operating it again.
Your remote control does not operate your TV.	Press the **MODE** button to put your remote control in the "TV" mode. Make sure the remote has batteries. Check that the "+" and "-" ends of the batteries are inserted correctly. Check that the batteries are drained.
The TV won't turn on.	Make sure the wall outlet is working. Make sure the TV is plugged in. Make sure the remote has batteries.
Digital broadcasting screen problem	Please check the digital signal strength and input antenna.
The visual qualities of digital channels vary.	The visual qualities of digital channels may vary depending on the original production method (analog or digital). • If the original production method is digital: High visual quality program. • If the original production method is analog: The digital program displayed on the screen is originally an analog program which has been converted to digital. The visual quality is of an SD grade.
Although the TV caption shows HD, the visual quality is not satisfactory.	The HD caption that appears when switching channels or when pressing the Information button on the remote control means the selected channel is a digital channel. If the broadcasting station converts an analog signal into digital and transmits the signal, the visual quality may not be perfect. (Applied to Set Top Box built-in model only.)

Appendix

Cleaning and Maintaining Your TV

Please follow these guidelines to get the maximum performance from your TV.

Placement

- Do not place the TV near extremely hot, cold, humid or dusty places.
- Do not place the TV near appliances with electric motors that create magnetic fields, such as vacuum cleaners.
- Keep the ventilation openings clear; do not place the TV on a soft surface, such as cloth or paper.
- Place the TV in a vertical position only.

Liquids

- Do not handle liquids near or on the TV. Liquids that spill into it can cause serious damage.

Cabinet

- Never open the cabinet or touch the parts inside.
- Wipe your TV with a clean, dry cloth. Never use water, cleaning fluids, wax, or chemicals.
- Do not put heavy objects on top of the cabinet.

Temperature

- If your TV is suddenly moved from a cold to a warm place, unplug the power cord, and allow at least two hours for moisture that may have formed inside the unit to dry completely.

Using Your TV in Another Country

If you plan to take your TV with you to a foreign country, please be aware of the different television systems that are in use around the world. A TV designed for one system may not work properly with another system due to differences in the TV channel frequencies.

Specifications

Model	TX-R2779H
Voltage	AC110 - 120 V
