Product highlights

Black Line

The Black Line picture tube offers excellent images with high sharpness and contrast and less reflection for brilliant colors and improved viewing in daylight conditions.

Contrast Plus

A special circuitry has been incorporated into this receiver to enhance the darker portions of the picture for added realism and overall picture quality.

RMS

The standard professional measure of sound output power. All our TV's are measured in RMS with 10% Distortion. There are other terms than RMS which often show higher numbers but are not comparable.

Smart Listening

This is the combination of Delta Volume and Automatic Volume Limiter. The former avoids undesirable changes in volume, caused by the different sound settings of different programmes. The latter avoids the rapid increase in volume which can happen in the case of different commercials.

FM Radio Built in

A radio is included capable of storing 40 FM presets. On Screen naming makes navigation simple, and a handy Clock Screensaver is also included for use while listening.

Plug & Play

Having connected the TV, it automatically searches for all channels and installs them.

Smart Clock

The ability of your TV to automatically update its internal clock for easier use of the Wake up clock function which allows you to program the TV to switch on at a certain time.

Side Connections

Connections for headphone and other inputs such as camcorder, front entry for ease of use.

NTSC Playback

Playback NTSC tapes from the USA, Japan or Canada on your PAL TV.
