26 Before calling for service

Please make these simple checks before calling for service as problems pertaining to TV installation and adjustment are not covered under your warranty.

Symptoms	What you should do
Colour patch (unevenness)	• Switch off the TV with the mains power button and wait for at least 20 minutes before switching on again. • Keep your TV away from any speakers or magnetic objects.
"Ghosts" or double images or Teletext garbled (for sets with Teletext only)	• Use of a highly directional antenna may improve the picture as this symptom may be due to obstruction by high rise buildings or hills.
No picture	• Check that the antenna at the back of the TV is properly connected. • Possible TV station problem. Try another channel.
Good picture but no sound	• Increase the volume. • Check that the TV is not muted. If it is, press the  key on the remote control to cancel mute.
Good sound but poor colour or no picture	• Adjust the contrast and brightness setting.
Snowish picture and noise	• Check the antenna connection.
Horizontal dotted lines	• Switch off any nearby electrical appliances e.g. hairdryer, vacuum cleaner etc. as these may have caused interference.
One white line across	• Switch off the TV immediately and call for after sales service.
TV not responding to remote control	• Check batteries and replace them if necessary. • Check that the remote control is operating within the recommended range.
Message "LOCKED ALL" or "LOCKED n" (where n is your current channel number)	• The child lock function is switched on. Refer to the section on "Child Lock-To unlock channels" to switch off the function.
