Dimensions

- **Set dimensions (W x H x D):** 757 x 582 x 493 mm
- **Set weight:** 45.5 kg
- **Weight incl. Packaging:** 50.8 kg
- **Box dimensions (W x H x D):** 867 x 668 x 590 mm
- **Color cabinet:** Silver Frost

Product highlights

Real Flat picture tube

The flatter tube provides a wider viewing angle while minimizing reflections for the best picture possible.

Crystal Clear

Combining picture enhancements like Contrast plus and color improvement, Crystal Clear improves picture depth.

Component Video Input (YPbPr)

Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video.

Digital Clear Vision

DCV is a unique, intelligent, and proactive control system, which measures and analyzes the incoming analog signal to automatically adjust settings for optimal picture quality.

Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

Integrated subwoofer with wOOx

The integrated subwoofer with wOOx technology creates a superior bass sound from a compact enclosure. It captures and enhances low-frequency bass for a deeper sound experience in music and movies.

Smart Picture and Smart Sound

Philips preset modes for Smart Picture and Smart Sound provide you with direct access via a single key on the remote control. You can select optimized picture and sound settings for the various picture and sound modes.

Side Stereo AV & headphone

Side stereo AV & headphone makes it more convenient to connect external devices like audio equipment, games and video cameras. It's the easy way to enjoy an extra audio sensation or a totally immersive gaming experience.
