# Tips

## Poor Picture

Have you selected the correct TV system ?  
Is your TV set or house aerial located too close to loudspeakers, non-earthed audio equipment or neon lights, etc. ?  
Mountains or high buildings can cause double pictures or ghost images.  
Sometimes you can improve the picture quality by changing the direction of the outside aerial.  
Is the picture unrecognisable ? Check if you have entered the correct frequency or adjust the frequency by fine tuning. See Installation, p. 7.  
Are brightness and contrast out of adjustment ? Press the **PP** key.  
Switch off your TV overnight with **Ⓛ** on the left side of the TV.

## No picture

Is the aerial connected properly ? Are the plugs tightly connected in the aerial socket ?  
Is the aerial cable in good condition and does it have suitable plugs ? Are the connection facilities to a possible secondly installed TV in good condition ? If in doubt, consult your dealer.  
**NO PICTURE** means that the selected peripheral equipment is transmitting no picture.  
Did you press the correct keys on the remote control ? Try it once more.  
Did you press **Ⓛ** again after switching on teletext ?  
Has the child lock been switched off ? See Special Features, p. 18.

## Sound

Did you perhaps interrupt the sound with the **ⓧ** key ?  
Were the internal loudspeakers perhaps switched off by the switch on the back of your TV set ? See Extra loudspeakers, p. 31.  
Is the sound coming out of only one loudspeaker ? Was the balance perhaps set to one extreme ? See **SOUND** menu, p. 16.  
Select **SPATIAL ON** in the Sound menu if there is no sound coming out of the extra loudspeakers in back. See Spatial and Surround Sound, p. 16.

## Remote control

Does your TV no longer respond to the remote control ? Check whether the indication **TV** appears in a grey block. Perhaps the batteries are empty. See Preparation, p. 3.

## Menu

Did you select the wrong menu ? Once more press **MENU** or **off** to exit from the menu.

## Connections

Check whether your peripheral equipment is in fact properly connected. See p. 29.  
Have you switched on the peripheral equipment ?

## No solution ?

Switch your TV set off and then on again.

**Never attempt to repair a defective TV yourself.**

Check with your dealer or call a TV technician when nothing helps.

## End of life directives

Your new TV contains materials which can be recycled and reused.

At end of life specialised companies can dismantle the discarded TV to concentrate the reusable materials and to minimise the amount of materials to be disposed of.

Please inform yourself on local regulations on disposal of your old tv set.
