Convenience Enhancements: Auto Program, Closed Captioning (analog), Menu Languages, Vchip and parental lock

Tuner/Reception/Transmission

TV system: NTSC
Video Playback: NTSC
Aerial Input: 75 ohm F-type

Connectivity

AV 1: CVBS in, CVI
AV 2: CVBS in, S-Video
AV 3: Monitor Out
Front / Side connections: CVBS in, Headphone out

Power

Power consumption: 72 W
Standby power consumption: < 1 W
Mains power: AC 90-140V, 60Hz

Dimensions

Set dimensions in inch (W x H x D):
20.94 x 18.5 x 19.1 inch
Product weight (lb): 50.83
Box dimensions in inch (W x H x D):
23.62 x 20.9 x 21.5 inch
Weight incl. Packaging (lb): 58.57

Real Flat picture tube

The flatter tube provides a wider viewing angle while minimizing reflections for the best picture possible. The special alloy invar shadow mask helps maintain sharper focus and eliminates 'color blooming' compared to standard tubes.

Stereo sound

Stereo sound is sound reproduced using two independent audio channels, through a pair of widely separated speaker systems. This creates a pleasant and natural impression of sound heard from various directions as in natural hearing.

Component Video Input (YPbPr)

Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video. Philips DVD recorders can record directly from component video (such as YPbPr) sources including satellite receivers

S-Video Input

An S-video format signal preserves the video quality better than standard video input.

Side AV Input

Headphone Jack

Smart Picture & Smart Sound

Preset modes for Smart Picture and Smart Sound provide you with direct access via a single key on the remote control. You can select the optimized picture and sound settings for the various picture and sound modes. Do refer to the user manual for the various picture and sound smart modes.
