## Product Highlights

### Black Matrix

The Black Matrix picture tube improves the contrast of images even when viewing in daylight conditions.

### Contrast Plus

A special circuitry has been incorporated into this receiver to enhance the darker portions of the picture for added realism and overall picture quality.

### RMS

The standard professional measure of sound output power. All our Tv's are measured in RMS with 10% Distortion. There are other terms than RMS which often show higher numbers but are not comparable.

### Smart Picture

A touch of the SMART PICTURE button on the remote control provides the option of selecting one of four pre-set positions (Rich, Natural, Soft, Personal, Multimedia) to enhance enjoyment of video games, sports and movies, also based upon the room lighting condition. By selecting the desired option, all important picture elements are instantly adjusted to optimize viewing pleasure.

### Smart Sound

A touch of the SMART SOUND button on the remote control provides the option of selecting one of four pre-set positions (Theatre, Music, Voice, Personal) to suit each individual sound preference when viewing different programs or sources.

### Plug and Play

No problem anymore to install your new TV. You choose the language you are more familiar with, the country you are in and the TV will install automatically all available programs.

### 1 page Teletext

Teletext information available.

### Sleeptimer

The Sleeptimer automatically turns the TV off at a pre-set time of up to 240 minutes from the time the feature is activated. Sleeptimer settings are programmed in 15, 30, and 60-minute increments.
