

MODEL G8987 DELUXE TOOL REST FOR G1036 GRINDER INSTRUCTION SHEET

!WARNING
Read all of the mounting and operations information included in this instruction sheet. Failure to correctly mount and operate the Model G8987 tool rest may result in personal injury and property damage.

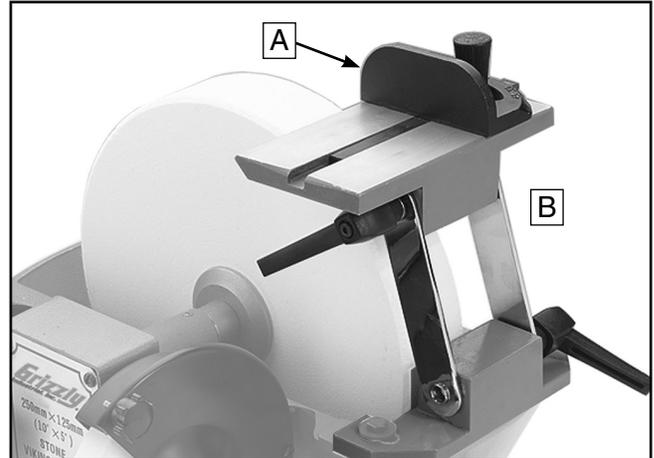

Figure 1. Model G8987.

Introduction

This heavy-duty Deluxe Tool Rest for the Model G1036 Grinder is ideal for holding and guiding all types of woodturning and carving tools during sharpening. It will help produce hollow-ground bevels which can be simply and quickly honed to razor sharpness using an oilstone or diamond whetstone.

!WARNING

For your own protection, read and follow all safety instructions for your grinder before mounting the Model G8987 tool rest. Failure to do so may result in personal injury and property damage.

Mounting Instructions

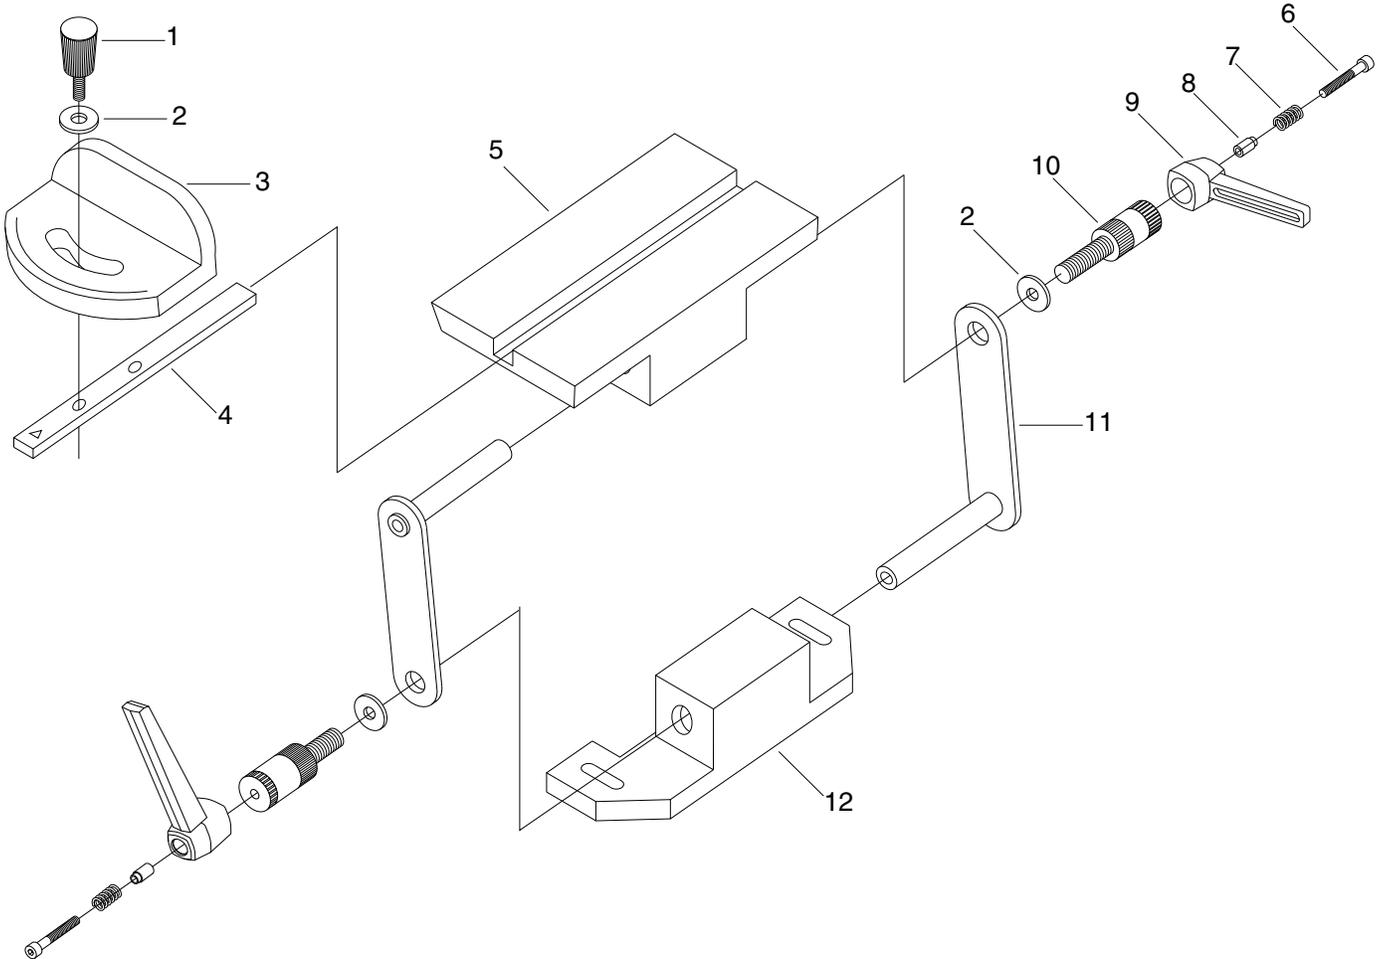

1. Remove the existing tool rest from the Model G1036 grinding wheel.
2. Use these same hex bolts and washers to securely mount the Model G8987 tool rest as shown in **Figure 1**.
3. Use the adjustable handles to position the tool rest table as necessary.
4. Make sure that the grinding wheel is not making contact with any part of the tool rest.
5. Make sure all lock levers are tight so that the tool rest assembly will not fall into the grinding wheel during operation.

If you need help with your new tool rest, call our Tech Support at: (570) 546-9663.
