FUNCTIONAL AND CONSTRUCTION FEATURES

◆ Built-in atmospheric boiler with rinse booster pump guarantees all water is softened and provides constant high water temperature and pressure for rinsing.

◆ Double sized resin containers: this means many wash cycles before regeneration and longer operating hours (up to 4 hours constant use).

♦ 4 second (variable) pause after washing and before rinsing ensures that no drops of unclean water will fall on the clean items at the end of the rinsing cycle.

• Two washing cycles: 1st cycle of 120 seconds for normally soiled items and 2nd cycles of 180 seconds for heavily soiled items.

* Declared actual cycle duration times can extend when water supply temperature is lower than indicated.

UNDERCOUNTER DISHWASHERS STANDARD VERSION WITH WATER SOFTENER

◆ Washing system with endowed rotating washing arms, large capacity boiler and tank volume, all together designed for professional washing with high performance.

◆ All the machines have smooth surfaces and a wash tank with rounded corners to facilitate cleaning.

• Wash/rinse arms and filter easy to remove.

• The fully automatic self-cleaning cycle avoids the risk of bacteria proliferation.

◆ Front and side panels, door and wash tank made in heavy duty anti-corrosive AISI 304 stainless steel to guarantee appliance durability.

◆ 304L stainless steel boiler with higher welding protection increases the resistance against corrosion from chlorinated water.

 PVC water supply hose with metal connections resistant to high water pressure. • Completely closed on the reverse by a cover plate while IPX4 water protection prevents external infiltrations.

 The incorporated Soft Start feature offers additional protection to delicate items such as glassware and crockery and increases wash pump reliability.

◆ Salt loading tap externally installed and ergonomically shaped for easy opening and salt loading. N o reaching inside machine or risk of salt spillage inside washing tank (in compliance with all water authority regulations including WRAS).

◆ Simple control panel with digital display including: on/off button, regeneration button, clean cycle and/or drain (when pump installed), allows on-site personalization of washing and rinsing cycle times and temperatures as well as precise rinse aid and detergent quantities depending on the customers needs.

- Three phase or single phase electrical connection.
- ♦ All machines are pre-arranged to accept external dispensers.
- Pre-arrangement for HACCP

system implementation and Energy Management device.

- ◆ 98% recyclable by weight.
- ♦ CFC free packaging.
- ♦ In compliance with C€ requirements.
- ◆ Low noise level.

◆ Developed and produced in ISO 9001 and ISO 14001 certified factory.
