

The DW410 Dishwasher

The latest in the Glem Range

Reliable, economical and indispensable

a new dishwasher for the way we live today

 **GLEM**

Safety

A flooded kitchen can be a reality if a dishwasher does not have the necessary protective features. The Glem dishwasher DW410 includes an AQUA STOP safety valve which automatically shuts off the water if the hose splits, preventing water damage to cabinetry and floors.

Energy + water

- 3 star energy rating
- 3 star water rating
- Energy Consumption of 227 kWh per year, based on cold water connection using the Normal program setting seven times per week
- Water consumption of only 14.1 litres per wash using the Normal program
- Half load setting to save energy when you don't have a full load

Flexibility

A choice of 8 wash programmes and 4 wash temperatures, matched with a 12 place-setting capacity, makes light work of the dinner party clean up. An adjustable upper basket allows for differing dish sizes and an under floor drying element prevents damage to items that might fall during the wash cycle.

DW410 DISHWASHER

- Stainless Steel
- Freestanding or built-in
- 12 place settings
- 8 wash programs
- 4 wash temperatures – 40, 45, 50, 60
- Residual heat hot air drying

- Hot or cold water connection
- AQUA STOP safety valve
- Half load feature
- Collapsible plate racks
- Self cleaning micro filter
- Concealed heating element
- Adjustable feet

The Glem dishwasher DW410 is specified to suit the Australian kitchen, with features to ensure it is user friendly and efficient to operate.

AQUASTOP is a safety valve that we fit on the inlet hose to the dishwasher. If the hose ruptures for any reason a solenoid is activated and shuts the water off at the tap. Imagine what happens to your kitchen if a hose ruptures without AQUASTOP - especially if you are not home at the time.
