

JET®

BUILT BETTER TO BUILD BETTER™

Remote Dust Collectors

Our latest addition to our complete line of dust collectors is the convenience of a remote control and a built in timer. The remote will operate these dust collectors from anywhere in the shop. The timer will automatically shut the unit off at any predetermined time from 1 to 99 minutes. This great feature is available on all JET® dust collectors with bag filters and canister filters.

MODEL 650 REMOTE DUST COLLECTORS

- **Hook up one to three machines** for optimum dust cleaning
- **Quick-install collection bag** makes emptying and re-attaching a snap
- **Includes four casters** for maneuverability and total portability
- **Remote Control is programmable from 1 to 99 minutes** to collect dust even while you are away from your workshop

MODEL 1100 REMOTE DUST COLLECTORS

- **Industrial-quality construction** effectively handles collection of wood chips and sawdust
- **Single-stage design** for economical and quiet operation
- **Industrial controls** designed for years of trouble-free use
- **Quick-connect collection bags with elastic band** for fast, easy installation and removal
- **High air velocity (CFM) design** stands up to any competitive specifications
- **Permanently lubricated, totally enclosed, fan-cooled motors** are rated for continuous-duty
- **Includes four casters** for maneuverability and total portability
- **Remote Control is programmable from 1 to 99 minutes** to collect dust even while you are away from your workshop
