Maintenance and Service Guide

**Compaq Evo Notebook N1005 Series
and Compaq Presario 900 Series
Mobile PC**

Document Part Number: 272638-001

July 2002

This guide is a troubleshooting reference used for maintaining and servicing the notebook. It provides comprehensive information on identifying computer features, components, and spare parts, troubleshooting computer problems, and performing computer disassembly procedures.

1.2 Features

The notebook has the following features:

- AMD Athlon XP+ 1.53-, 1.47-, 1.40-, 1.30-, or 1.20-GHz processors, or AMD Duron 1.30-GHz processor, varying by notebook model
- ATI P7 graphics accelerator with 32 MB of shared Synchronous DRAM (SDRAM) and 4X AGP graphics card
- 256-MB high-performance SDRAM, expandable to 1.0 GB
- Microsoft Windows XP Home or Windows XP Professional, varying by computer model
- 15.0- or 14.1-inch XGA (1024 × 768), TFT display with over 16.7 million colors, varying by computer model
- Full-size Windows 98 keyboard with TouchPad pointing device
- Network interface card (NIC) integrated on the system board, with a mini PCI V.92 modem
- Integrated wireless support of 802.11b and Bluetooth devices through MultiPort

- Support for one Type I or II PC Card slot with support for both 32-bit CardBus and 16-bit PC Cards
- External 90 W AC adapter with power cord
- 8-cell Li ion battery pack
- 40-, 30-, or 20-GB high-capacity hard drive, varying by computer model
- 1.44-MB diskette drive
- Support for the following drives through the fixed optical drive:
 - 24X Max CD-ROM drive
 - 16X Max CD-RW drive
 - 8X Max DVD-ROM drive
 - 8X Max DVD-ROM/CD-RW combination drive
- Connectors for:
 - 1394 digital input
 - Stereo line out/headphone
 - Mono microphone
 - AC power
 - Universal serial bus
 - External monitor
 - S-video
 - External keyboard/mouse
 - Parallel devices
 - RJ-45 network
 - RJ-11 modem
- JBL Pro stereo speakers with bass reflex
- Dolby Digital certified sound

1.3 Clearing a Password

If the notebook you are servicing has an unknown password, follow these steps to clear the password. These steps also clear CMOS:

1. Prepare the computer for disassembly (refer to Section 5.3, “Preparing the Computer for Disassembly,” for more information).
2. Remove the RTC battery (refer to Section 5.7, “Disk Cell RTC Battery”).
3. Wait approximately five minutes.
4. Replace the RTC battery and reassemble the computer.
5. Connect AC power to the computer. Do **not** reinsert any battery packs at this time.
6. Turn on the computer.

All passwords and all CMOS settings have been cleared.

1.4 Power Management

The notebook comes with power management features that extend battery operating time and conserve power. The notebook supports the following power management features:

- Standby
- Hibernation
- Setting customization by the user
- Hotkeys for setting level of performance
- Smart battery that provides an accurate battery power gauge
- Battery calibration
- Lid switch suspend/resume
- Power/Suspend button
- Advanced Configuration and Power Management (ACP) compliance

1.5 Computer External Components

The external components on the front and right side of the computer are shown in Figure 1-2 and described in Table 1-4.

Figure 1-2. Front and Right Side Components

Table 1-4
Front and Right Side Components

Item	Component	Function
1	Stereo speakers (2)	Produce stereo sound.
2	Power/Standby light	On: Power is turned on. Off: Power is turned off. Blinking: Computer is in Standby mode.

Table 1-4
Front and Right Side Components (*Continued*)

Item	Component	Function
3	Display release latch	Opens the computer.
4	Battery light	On: A battery pack is charging. Blinking: A battery pack that is the only available power source has reached a low-battery condition.
5	Battery bay	Accepts an 8-cell Li ion battery pack.
6	Optical drive bay	Accepts a CD-ROM, CD-RW, DVD-ROM, or DVD/CD-RW combination drive.
7	1394 jack	Connects IEEE 1394-compliant products, such as digital camcorders, video editing equipment, VCRs, cameras, and audio players. A 1394 firewire cable is required for use with this jack.

The computer rear panel and left side components are shown in Figure 1-3 and described in Table 1-5.

Figure 1-3. Rear Panel and Left Side Components

**Table 1-5
Rear Panel and Left Side Components**

Item	Component	Function
1	Stereo speaker/headphone jack	Connects stereo speakers, headphones, headset, or television audio.
2	Mono microphone jack	Connects a mono microphone, disabling the built-in microphone.
3	DC power jack	Connects any one of the following: <ul style="list-style-type: none">■ AC adapter■ Optional automobile power adapter/charger■ Optional aircraft power adapter
4	USB connectors (2)	Connect USB devices.

Table 1-5
Rear Panel and Left Side Components (*Continued*)

Item	Component	Function
5	Fan	Provides airflow to cool internal components.
6	S-Video connector	Connects a television, VCR, camcorder, or overhead projector.
7	External monitor connector	Connects an external monitor or overhead projector.
8	External keyboard/mouse connector	Connects an optional full-sized keyboard or mouse. An optional splitter/adaptor allows both an external keyboard and mouse to be used at the same time.
9	Parallel connector	Connects a parallel device.
10	Vents	Allow airflow to cool internal components.
	 CAUTION: To prevent damage, the computer shuts down if an overheating condition occurs. Do not block the cooling vent. Avoid placing the computer on a blanket, rug, or other flexible surface that may cover the vent area.	
11	RJ-45 network jack	Connects the network cable. A network cable is not included with the computer.
12	RJ-11 modem jack	Connects the modem cable to an internal modem. A modem cable is included with internal modem models.
13	Security cable slot	Attaches an optional security cable to the computer.
14	PC Card eject button	Ejects a PC Card from the PC Card slot.
15	PC Card slot	Supports a 32-bit (CardBus) or 16-bit PC Card.
16	Diskette drive	Accepts diskettes.

The computer keyboard components are shown in Figure 1-4 and described in Table 1-6.

Figure 1-4. Keyboard Components

Table 1-6
Keyboard Components

Item	Component	Function
1	F1 through F12 function keys	Perform preset functions.
2	Fn key	Used with hotkeys to perform preset hotkey functions.

Table 1-6
Keyboard Components (*Continued*)

Item	Component	Function
3	Windows logo keys	Display the Windows Start menu.
4	Windows application key	Displays a menu when using a Microsoft application. The menu is the same one that is displayed by pressing the right mouse button.
5	Cursor control keys	Move the cursor around the screen.
6	Embedded numeric keypad	Converts keys to numeric keypad.
7	Num lock key	Turns on the numeric lock function. On: Num lock is on and the embedded numeric keypad is enabled.

The computer top components are shown in Figure 1-5 and described in Table 1-7.

Figure 1-5. Top Components

**Table 1-7
Top Components**

Item	Component	Function
1	Power light	On: Power is turned on. Blinking: Computer is in Standby. The power light also blinks if a battery pack that is the only available power source reaches a low-battery condition.
2	Num lock light	On: Num lock is on and the embedded numeric keypad is enabled.
3	Easy Access Buttons (3)	Provide quick access to the Internet. Refer to the Hardware Guide that ships with the computer for information about these buttons.

Table 1-7
Top Components (*Continued*)

Item	Component	Function
4	Power button	Turns on the computer. Use the operating system Shut Down command to turn off the computer.
5	Digital audio button	Launches Windows Media Player to play MP3 music.
6	Volume control buttons	Adjust the volume of the stereo speakers.
7	Caps lock light	On: Caps lock is on.
8	Drive indicator light	Turns on when the hard drive, CD-, or DVD-ROM drive is accessed.
9	Display lid switch	Turns off the computer display if the computer is closed while on.
10	TouchPad	Moves the mouse cursor, selects, and activates.
11	TouchPad buttons	Function like the left and right mouse buttons on an external mouse.
12	Power/Standby light	On: Power is turned on. Off: Power is turned off. Blinking: Computer is in Standby mode.
13	EasyScroll	Scrolls the screen left, right, up, and down.
14	Battery power light	On: A battery pack is charging. Blinking: A battery pack that is the only available power source has reached a low-battery condition.

The external components on the bottom of the computer are shown in Figure 1-6 and described in Table 1-8.

Figure 1-6. Bottom Components

**Table 1-8
Bottom Components**

Item	Component	Function
1	Hard drive retention screw	Secures the hard drive to the computer.
2	Hard drive bay	Supports the primary hard drive. The hard drive is secured to the computer by one screw.
3	Mini PCI communications compartment	Contains the mini PCI modem card.

Table 1-8
Bottom Components (*Continued*)

Item	Component	Function
4	RJ-11 modem jack	Connects the modem cable to an internal modem. A modem cable is included with internal modem models.
5	RJ-45 network jack	Connects the network cable. A network cable is not included with the computer.
6	Connector cover	Protects the parallel, external monitor, external keyboard/mouse, and USB connectors.
7	Certificate of Authenticity label	Contains the Product Key, which may need to be entered before using some Windows operating systems.
8	Memory expansion compartment	Covers the memory expansion compartment that contains two memory expansion slots for memory expansion boards.
9	Battery pack release switch	Releases the battery pack from the battery compartment.
10	Battery bay	Accepts an 8-cell Li ion battery pack.
11	Serial number	Identifies the computer; needed when you call Compaq customer support.

1.6 Design Overview

This section presents a design overview of key parts and features of the computer. Refer to Chapter 3, “Illustrated Parts Catalog,” to identify replacement parts and Chapter 5, “Removal and Replacement Procedures,” for disassembly steps. The system board provides the following device connections:

- Memory expansion board
- Hard drive
- Display
- Keyboard/TouchPad or pointing stick
- Audio
- AMD Athlon and Duron processors
- Fan
- PC Card
- Modem or modem/NIC

The computer uses an electrical fan for ventilation. The fan is controlled by a temperature sensor and is designed to turn on automatically when high-temperature conditions exist. These conditions are affected by high external temperatures, system power consumption, power management/battery conservation configurations, battery fast charging, and software applications. Exhaust air is displaced through the ventilation grill located on the left side of the computer.

CAUTION: To properly ventilate the computer, allow at least a 3-inch (7.6-cm) clearance on the left and right sides of the computer.

Troubleshooting

WARNING: Only authorized technicians trained by Compaq should repair this equipment. All troubleshooting and repair procedures are detailed to allow only subassembly/module level repair. Because of the complexity of the individual boards and subassemblies, no one should attempt to make repairs at the component level or make modifications to any printed wiring board. Improper repairs can create a safety hazard. Any indication of component replacement or printed wiring board modification may void any warranty or exchange allowances.

2.1 Computer Setup and Diagnostics Utilities

Selecting Computer Setup or Compaq Diagnostics

The computer features two Compaq system management utilities:

- **Computer Setup**—A system information and customization utility that can be used even when your operating system is not working or will not load. This utility includes settings that are not available in Windows.

- **Compaq Diagnostics**—A system information and diagnostic utility that is used within your Windows operating system. Use this utility whenever possible to:

- ☐ Display system information.
- ☐ Test system components.
- ☐ Troubleshoot a device configuration problem in Windows 2000, Windows XP Professional, or Windows XP Home.

Using Computer Setup

Information and settings in Computer Setup are accessed from the File, Security, or Advanced menus:

1. Turn on or restart the computer. Press **F10** while the F10 = ROM Based Setup message is displayed in the lower-left corner of the screen.
 - ☐ To change the language, press **F2**.
 - ☐ To view navigation information, press **F1**.
 - ☐ To return to the Computer Setup menu, press **esc**.
2. Select the File, Security, or Advanced menu.
3. To close Computer Setup and restart the computer:
 - ☐ Select File > Save Changes and Exit and press **enter**.
 - or
 - ☐ Select File > Ignore Changes and Exit and press **enter**.
4. When you are prompted to confirm your action, press **F10**.

Selecting from the File Menu

Table 2-1
File Menu

Select	To Do This
System Information	<ul style="list-style-type: none"> ■ View identification information about the computer, a docking base, and any battery packs in the system. ■ View specification information about the processor, memory and cache size, and system ROM.
Save to Floppy	Save system configuration settings to a diskette.
Restore from Floppy	Restore system configuration settings from a diskette.
Restore Defaults	Replace configuration settings in Computer Setup with factory default settings. (Identification information is retained.)
Ignore Changes and Exit	Cancel changes entered during the current session, then exit and restart the computer.
Save Changes and Exit	Save changes entered during the current session, then exit and restart the computer.

Selecting from the Security Menu

Table 2-2
Security Menu

Select	To Do This
Setup Password	Enter, change, or delete a setup password. (The setup password is called an administrator password in Compaq Computer Security, a program accessed from the Windows Control Panel.)
Power-on Password	Enter, change, or delete a power-on password.
DriveLock Passwords	Enable/disable DriveLock; change a DriveLock User or Master password.  Drive Lock Settings are accessible only when you enter Computer Setup by turning on (not restarting) the computer.
Password Options Password options can be selected only when a power-on password has been set.	Enable/disable: <ul style="list-style-type: none"> ■ QuickLock ■ QuickLock on Standby ■ QuickBlank  To enable QuickLock on Standby or QuickBlank, you must first enable QuickLock.
Device Security	Enable/disable: <ul style="list-style-type: none"> ■ Ports or diskette drives* ■ Diskette write* ■ CD-ROM or diskette startup  Settings for a DVD-ROM can be entered in the CD-ROM field.
System IDs	Enter identification numbers for the computer, a docking base, and all battery packs in the system.
*Not applicable to SuperDisk LS-120 drives.	

Selecting from the Advanced Menu

Table 2-3
Advanced Menu

Select	To Do This
Language (or press F2)	Change the Computer Setup language.
Boot Options	<p>Enable/disable:</p> <ul style="list-style-type: none"> ■ QuickBoot, which starts the computer more quickly by eliminating some startup tests. (If you suspect a memory failure and want to test memory automatically during startup, disable QuickBoot.) ■ MultiBoot, which sets a startup sequence that can include most bootable devices and media in the system.
Device Options	<ul style="list-style-type: none"> ■ Enable/disable the embedded numeric keypad at startup. ■ Enable/disable multiple standard pointing devices at startup. (To set the computer to support only a single, usually nonstandard, pointing device at startup, select Disable.) ■ Enable/disable USB legacy support for a USB keyboard. (When USB legacy support is enabled, the keyboard works even when a Windows operating system is not loaded.) ■ Set an optional external monitor or overhead projector connected to a video card in a docking base as the primary device. (When the computer display is set as secondary, the computer must be shut down before undocking from a docking base.)

Table 2-3
Advanced Menu (*Continued*)

Select	To Do This
Device Options (<i>continued</i>)	<ul style="list-style-type: none"> ■ Change the parallel port mode from Enhanced Parallel Port (EPP, the default setting) to standard, bidirectional, EPP or Enhanced Capabilities Port (ECP). ■ Set video-out mode to NTSC (default), PAL, NTSC-J, or PAL-M.* ■ Enable/disable all settings in the SpeedStep window. (When Disable is selected, the computer runs in Battery Optimized mode.) ■ Specify how the computer recognizes multiple identical docking bases that are identically equipped. (Select Disable to recognize the docking bases as a single docking base; select Enable to recognize the docking bases individually, by serial number.) ■ Enable/disable the reporting of the processor serial number by the processor to the software.
HDD Self Test Options	Run a quick comprehensive self test on hard drives in the system that support the test features.

* Video modes vary even within regions. However, NTSC is common in North America; PAL, in Europe, Africa, and the Middle East; NTSC-J, in Japan; and PAL-M, in Brazil. Other South and Central American regions may use NTSC, PAL, or PAL-M.

2.2 Using Compaq Diagnostics

When you access Compaq Diagnostics, a scan of all system components is displayed on the screen before the Compaq Diagnostics window opens.

You can display more or less information from anywhere within Compaq Diagnostics by selecting Level on the menu bar.

Compaq Diagnostics is designed to test Compaq components. If non-Compaq components are tested, the results may be inconclusive.

Obtaining, Saving, or Printing Configuration Information

1. Access Compaq Diagnostics by selecting Start > Settings > Control Panel > Compaq Diagnostics.
2. Select Categories, then select a category from the drop-down list.
 - ☐ To save the information, select File > Save As.
 - ☐ To print the information, select File > Print.
3. To close Compaq Diagnostics, select File > Exit.

Obtaining, Saving, or Printing Diagnostic Test Information

1. Access Compaq Diagnostics by selecting Start > Settings > Control Panel > Compaq Diagnostics.
2. Select the Test tab.
3. In the scroll box, select the category or device you want to test.
4. Select a test type:
 - ☐ **Quick Test**—Runs a quick, general test on each device in a selected category.
 - ☐ **Complete Test**—Performs maximum testing on each device in a selected category.
 - ☐ **Custom Test**—Performs maximum testing on a selected device.
 - ◆ To run all tests for your selected device, click Check All.
 - ◆ To run only the tests you select, click Uncheck All, then select the checkbox for each test you want to run.

5. Select a test mode:

- ☐ **Interactive Mode**—Provides maximum control over the testing process. You determine whether the test was passed or failed, and you may be prompted to insert or remove devices.
- ☐ **Unattended Mode**—Does not display prompts. If errors are found, they are displayed when testing is complete.

6. Click Begin Testing.

7. Select a tab to view a test report:

- ☐ **Status tab**—Summarizes the tests run, passed, and failed during the current testing session.
- ☐ **Log tab**—Lists tests run on the system, the number of times each test has run, the number of errors found on each test, and the total run time of each test.
- ☐ **Error tab**—Lists all errors found in the computer with their error codes.

8. Select a tab to save the report:

- ☐ **Log tab**—Select Save.
- ☐ **Error tab**—Select Save.

9. Select a tab to print the report:

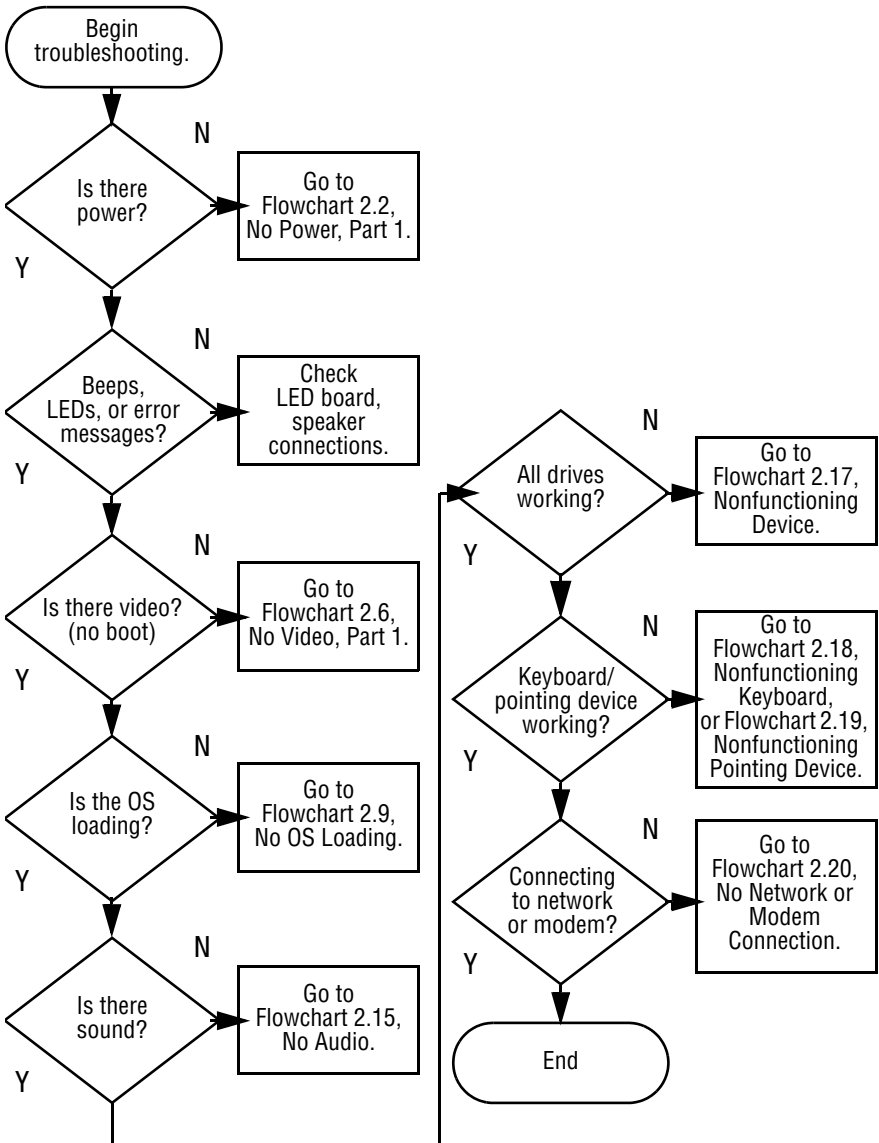

- ☐ **Log tab**—Select File > Save As, then print the file from your folder.

2.3 Troubleshooting Flowcharts

Italian	170513-061	U.S. English	170513-001	

Removal and Replacement Preliminaries

This chapter provides essential information for proper and safe removal and replacement service.

4.1 Tools Required

You will need the following tools to complete the removal and replacement procedures:

- Magnetic screwdriver
- Phillips P0 screwdriver
- Torx T8 screwdriver
- Tool kit (includes connector removal tool, loopback plugs, and case utility tool)

4.2 Service Considerations

The following sections include some of the considerations that you should keep in mind during disassembly and assembly procedures.

As you remove each subassembly from the computer, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

Plastic Parts

Using excessive force during disassembly and reassembly can damage plastic parts. Use care when handling the plastic parts. Apply pressure only at the points designated in the maintenance instructions.

Cables and Connectors

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Ensure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.

CAUTION: When servicing the computer, ensure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.

4.3 Preventing Damage to Removable Drives

Removable drives are fragile components that must be handled with care. To prevent damage to the computer, damage to a removable drive, or loss of information, observe the following precautions:

- Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, then shut it down.
- Before removing a diskette drive or optical drive, ensure that a diskette or disc is not in the drive. Ensure that the optical drive tray is closed.
- Before handling a drive, ensure that you are discharged of static electricity. While handling a drive, avoid touching the connector.
- Handle drives on surfaces that have at least one inch of shock-proof foam.
- Avoid dropping drives from any height onto any surface.
- After removing a hard drive, CD-ROM drive, or a diskette drive, place it in a static-proof bag.
- Avoid exposing a hard drive to products that have magnetic fields, such as monitors or speakers.
- Avoid exposing a drive to temperature extremes or to liquids.
- If a drive must be mailed, place the drive in a bubble-pack mailer or other suitable form of protective packaging and label the package "Fragile: Handle With Care."

4.4 Preventing Electrostatic Damage

Many electronic components are sensitive to electrostatic discharge (ESD). Circuitry design and structure determine the degree of sensitivity. Networks built into many integrated circuits provide some protection, but in many cases the discharge contains enough power to alter device parameters or melt silicon junctions.

A sudden discharge of static electricity from a finger or other conductor can destroy static-sensitive devices or microcircuitry. Often the spark is neither felt nor heard, but damage occurs.

An electronic device exposed to electrostatic discharge may not be affected at all and can work perfectly throughout a normal cycle. Or the device may function normally for a while, then degrade in the internal layers, reducing its life expectancy.

4.5 Packaging and Transporting Precautions

Use the following grounding precautions when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe containers, such as tubes, bags, or boxes.
- Protect all electrostatic-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep electrostatic-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a sensitive component or assembly.

- Store reusable electrostatic-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyers made of antistatic belts and roller bushings. Ensure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

4.6 Workstation Precautions

Use the following grounding precautions at workstations:

- Cover the workstation with approved static-dissipative material (refer to Table 4-2).
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screwdrivers, and vacuums.
- When using fixtures that must directly contact dissipative surfaces, only use fixtures made of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and Styrofoam.
- Handle electrostatic-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

4.7 Grounding Equipment and Methods

Grounding equipment must include either a wrist strap or a foot strap at a grounded workstation.

- When seated, wear a wrist strap connected to a grounded system. Wrist straps are flexible straps with a minimum of one megohm $\pm 10\%$ resistance in the ground cords. To provide proper ground, wear a strap snugly against the skin at all times. On grounded mats with banana-plug connectors, connect a wrist strap with alligator clips.
- When standing, use foot straps and a grounded floor mat. Foot straps (heel, toe, or boot straps) can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use foot straps on both feet with a minimum of one-megohm resistance between the operator and ground. To be effective, the conductive strips must be worn in contact with the skin.

Other grounding equipment recommended for use in preventing electrostatic damage includes:

- Antistatic tape
- Antistatic smocks, aprons, and sleeve protectors
- Conductive bins and other assembly or soldering aids
- Nonconductive foam
- Conductive tabletop workstations with ground cords of one-megohm resistance
- Static-dissipative tables or floor mats with hard ties to the ground
- Field service kits
- Static awareness labels
- Material-handling packages

- Nonconductive plastic bags, tubes, or boxes
- Metal tote boxes
- Electrostatic voltage levels and protective materials

Table 4-1 shows how humidity affects the electrostatic voltage levels generated by different activities.

Table 4-1
Typical Electrostatic Voltage Levels

Event	Relative Humidity		
	10%	40%	55%
Walking across carpet	35,000 V	15,000 V	7,500 V
Walking across vinyl floor	12,000 V	5,000 V	3,000 V
Motions of bench worker	6,000 V	800 V	400 V
Removing DIPS from plastic tube	2,000 V	700 V	400 V
Removing DIPS from vinyl tray	11,500 V	4,000 V	2,000 V
Removing DIPS from Styrofoam	14,500 V	5,000 V	3,500 V
Removing bubble pack from PCB	26,500 V	20,000 V	7,000 V
Packing PCBs in foam-lined box	21,000 V	11,000 V	5,000 V
 A product can be degraded by as little as 700 V.			

Table 4-2 lists the shielding protection provided by antistatic bags and floor mats.

Table 4-2
Static-Shielding Materials

Material	Use	Voltage Protection Level
Antistatic plastic	Bags	1,500 V
Carbon-loaded plastic	Floor mats	7,500 V
Metallized laminate	Floor mats	5,000 V

Removal and Replacement Procedures

This chapter provides removal and replacement procedures.

There are 57 screws, in seven different sizes, that must be removed and replaced when servicing the computer. Make special note of each screw size and location during removal and replacement.

Refer to Appendix C, “Screw Listing,” for detailed information on screw sizes, locations, and usage.

5.1 Serial Number

Report the computer serial number to Compaq when requesting information or ordering spare parts. The serial number is located on the bottom of the computer as indicated in Figure 5-1.

Figure 5-1. Serial Number Location

5.2 Disassembly Sequence Chart

Use the following chart to determine the section number to be referenced when removing computer components.

Disassembly Sequence Chart

Section	Description	# of Screws Removed
5.3	Preparing the computer for disassembly	
	Battery pack	0
	Optical drive	2
	Hard drive	1 to remove the hard drive 4 to remove the hard drive from hard drive bracket
5.4	Computer feet	0
5.5	Memory expansion board	1
5.6	Mini PCI communications board	1
5.7	Disk cell RTC battery	0
5.8	Connector cover	2
5.9	LED cover	2
5.10	Keyboard	0
5.11	Heat spreader	7
5.12	Processor	0

Disassembly Sequence Chart (*Continued*)

Section	Description	# of Screws Removed
5.13	Display	6
5.14	Palm rest	6
5.15	Diskette drive	3
5.16	TouchPad components	4
5.17	Display release assembly	2
5.18	Charger board	3
5.19	Speaker assembly	0
5.20	Top cover	5
5.21	Fan	0
5.22	System board	7
5.23	Modem cable	1

5.3 Preparing the Computer for Disassembly

Perform the following steps before disassembling the computer:

1. Turn off the computer.
2. Disconnect the AC adapter and all external devices.

Battery Packs
Spare Part Number Information

8 cell, 58 W hour, 3.6 Ah, Li ion

281766-001

3. Remove the battery pack by following these steps:
 - a. Turn the computer bottom side up with the left side facing forward.
 - b. Slide and hold the battery release latch ❶ toward the back of the computer (Figure 5-2).
 - c. Use the notch in the battery bay to slide the battery pack out of the battery bay ❷.
 - d. Remove the battery pack.

Figure 5-2. Releasing the Battery Pack

Reverse the preceding procedures to install the battery pack.

4. To remove the battery bezel, slide the bezel straight down (Figure 5-3).

Figure 5-3. Removing the Battery Bezel

Battery bezels are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

Reverse the preceding procedures to install the battery bezel.

Optical Drives
Spare Part Number Information

24X Max CD-ROM drive	285526-001
16X Max CD-RW drive	285528-001
8X Max DVD-ROM drive	285527-001
8X Max DVD-ROM/CD-RW combination drive	285529-001

5. Remove the optical drive by following these steps:
 - a. Turn the computer bottom side up with the left side facing forward.
 - b. Remove the two TM2.5 × 5.0 screws that secure the optical drive to the base enclosure (Figure 5-4).

Figure 5-4. Removing the Optical Drive Screws

- c. Turn the computer top side up with the right side facing forward.
- d. Insert a paper clip or similar thin metal rod into the manual release hole on the front bezel of the optical drive ❶ (Figure 5-5). Press firmly.
- e. Grasp the drive bezel and slide the drive out of the optical drive bay ❷.

Figure 5-5. Removing an Optical Drive

Reverse the preceding procedures to install a optical drive.

Hard Drives
Spare Part Number Information

40 MB	273491-001
30 MB	192406-001
20 MB	288291-001

6. Remove the hard drive by following these steps:
- a. Turn the computer bottom side up with the right side facing forward.
 - b. Remove the TM2.5 ×8.0 hard drive retention screw ❶ (Figure 5-6).
 - c. Slide the hard drive forward ❷ to unseat the hard drive connector from the system board.

Figure 5-6. Removing the Hard Drive Screw

- d. Lift the front edge of the hard drive ❶ until it rests at an angle (Figure 5-7).
- e. Remove the hard drive from the hard drive bay ❷.

Figure 5-7. Removing the Hard Drive

7. Remove the four PM3.0 × 3.0 screws ❶ that secure the hard drive to the hard drive bracket (Figure 5-8).
8. Slide the hard drive out of the hard drive bracket ❷.

Figure 5-8. Removing the Hard Drive Bracket

Hard drive brackets are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

Reverse the preceding procedures to install the hard drive and hard drive bracket.

5.4 Computer Feet

The computer feet are adhesive-backed rubber pads. The computer feet are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001. The computer feet attach to the base enclosure as illustrated in Figure 5-9.

Figure 5-9. Replacing the Computer Feet

5.5 Memory Expansion Board

**Memory Expansion Boards
Spare Part Number Information**

512 MB	285524-001
256 MB	285523-001
128 MB	285222-001

1. Prepare the computer for disassembly (Section 5.3).
2. Turn the computer bottom side up with the front facing forward.

3. Remove the PM2.5 × 4.0 screw ❶ that secures the memory expansion compartment cover to the base enclosure (Figure 5-10).
4. Slide the cover to the right ❷.
5. Lift the right edge of the cover and swing it to the left ❸.
6. Remove the cover ❹.

Figure 5-10. Removing the Memory Expansion Compartment Cover

Memory expansion compartment covers are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

- 7. Spread the memory expansion slot retaining tabs ❶ to release the memory expansion board. The board tilts up at a 45-degree angle (Figure 5-11).
- 8. Remove the board by pulling it away from the connector at a 45-degree angle ❷.

Figure 5-11. Removing a Memory Expansion Board

Reverse the preceding procedures to install a memory expansion board.

5.6 Mini PCI Communications Board

Mini PCI Communication Boards Spare Part Number Information

U.S. modem	248776-001
International modem	248777-002
	and
	285545-001

1. Prepare the computer for disassembly (Section 5.3).
2. Turn the computer bottom side up with the rear panel facing forward.
3. Remove the PM2.5 × 4.0 screw ❶ that secures the mini PCI compartment cover to the base enclosure (Figure 5-12).
4. Slide the cover to the left ❷.
5. Lift the left edge of the cover and swing it to the right ❸.
6. Remove the cover ❹.

Figure 5-12. Removing the Mini PCI Communications Slot Cover

Mini PCI compartment covers are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

7. Disconnect the modem cable from the mini PCI communications board ❶ (Figure 5-13).
8. Spread the retaining tabs ❷ on each side of the mini PCI communications board. The board releases and rests at an angle.
9. Remove the board by pulling it away from the socket at an angle ❸.

Figure 5-13. Removing a Mini PCI Communications Board

Reverse the preceding procedures to install a mini PCI communications board.

5.7 Disk Cell RTC Battery

Disk Cell RTC Battery Spare Part Number Information

Disk cell RTC battery

279769-001

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the mini PCI compartment cover (Section 5.6).
3. Remove the RTC battery from its socket on the system board (Figure 5-14).

Figure 5-14. Removing the Disk Cell RTC Battery

The computer uses a CR1220 lithium disk cell battery. When replacing the RTC battery, insert the battery with the “+” sign facing up.

5.8 Connector Cover

Connector covers are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

1. Prepare the computer for disassembly (Section 5.3).
2. Turn the computer bottom side up with the rear panel facing forward.
3. Remove the two TM2.5 × 5.0 screws ❶ that secure the connector cover to the base enclosure (Figure 5-15).
4. Open the connector cover ❷.
5. Remove the connector cover from the base enclosure ❸.

Figure 5-15. Removing the Connector Cover

Reverse the preceding procedures to install the connector cover.

5.9 LED Cover

LED Cover Spare Part Number Information

LED cover

285536-001

1. Prepare the computer for disassembly (Section 5.3).
2. Turn the computer bottom side up with the rear panel facing forward.
3. Remove the two TM2.5 × 8.0 screws that secure the LED cover to the base enclosure (Figure 5-16).

Figure 5-16. Removing the LED Cover Screws

4. Turn the computer top side up with the front facing forward.
5. Open the computer.

6. Press down and hold the **F1** and **F2** keys.
7. Insert a pointed tool into the notch in the LED cover ❶ between the **F1** and **F2** keys and lift up (Figure 5-17).
8. Press down and hold the **Pause** and **Scroll** keys.
9. Insert a pointed tool into the notch in the LED cover ❷ between the **Pause** and **Scroll** keys and lift up.
10. Remove the LED cover ❸.

Figure 5-17. Removing the LED Cover

Reverse the preceding procedures to install the LED cover.

5.10 Keyboard

Keyboards Spare Part Number Information

For use only with TouchPad notebook models

Arabic	285530-171	Korean	285530-AD1

Japanese	285530-291		

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the LED cover (Section 5.9).

3. Lift the back edge of the keyboard and swing it forward until it rests on the palm rest (Figure 5-18).

Figure 5-18. Releasing the Keyboard

4. Release the ZIF connector ❶ to which the keyboard cable is connected and disconnect the keyboard cable ❷ from the system board (Figure 5-19).

Figure 5-19. Disconnecting the Keyboard Cable

5. Remove the keyboard.

Reverse the preceding procedures to install the keyboard.

5.11 Heat Spreader

Heat Spreaders Spare Part Number Information	
---	--

For use with AMD Athlon XP processors	291594-001
For use with AMD Duron processors	291595-001

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the LED cover (Section 5.9).
3. Remove the keyboard (Section 5.10).

4. Remove the following screws:

- ❑ One TM2.5 × 5.0 screw ❶ next to the fan (Figure 5-20)
- ❑ Four spring-loaded TM2.5 × 14.0 shoulder screws ❷

The four spring-loaded shoulder screws should be removed and installed in the “1,” “2,” “3,” “4” sequence stamped on the heat spreader adjacent to each screwhole.

- ❑ One TM2.5 × 8.0 screw ❸ next to the keyboard and TouchPad ZIF connectors

Figure 5-20. Removing the Heat Spreader Screws

5. Remove the TM2.5 × 5.0 screw ❶ that secures the display video cable ground loop (Figure 5-21).
6. Remove the display video cable ❷ from the routing channel in the heat spreader.

Figure 5-21. Removing the Display Video Cable Ground Cable

7. Lift the right side of the heat spreader until it rests at an angle ❶ (Figure 5-22).
8. Slide the heat spreader to the right at an angle ❷.

Figure 5-22. Removing the Heat Spreader

9. Disconnect the fan cable from the system board (Figure 5-23).

Figure 5-23. Disconnecting the Fan Cable

10. Remove the heat spreader from the base enclosure.
- Reverse the preceding procedures to install the heat spreader.

5.12 Processor

Processors	
Spare Part Number Information	

AMD Athlon XP 1800+ 1.53-GHz processor	301644-001
AMD Athlon XP 1700+ 1.47-GHz processor	291592-001
AMD Athlon XP 1600+ 1.40-GHz processor	291591-001
AMD Athlon XP 1500+ 1.30-GHz processor	291590-001
AMD Athlon XP 1400+ 1.20-GHz processor	293664-001
AMD Duron 1.30-GHz processor	291589-001

1. Prepare the computer for disassembly (Section 5.3) and remove the following components:
 - a. LED cover (Section 5.9)
 - b. Keyboard (Section 5.10)
 - c. Heat spreader (Section 5.11)

2. Slide the front end of the processor release bar ❶ to the right until it clears the clip on the processor bracket (Figure 5-24).
3. Swing the processor release bar up and back ❷ until it rests in an upright position.
4. Lift the processor straight up ❸ and remove it from the processor socket.

When installing the processor, make sure the gold triangle ❹ is in the right rear corner.

Figure 5-24. Removing the Processor

Reverse the preceding procedures to install the processor.

5.13 Display

Displays Spare Part Number Information

For use only with Evo Notebook N1005 models	
15.0-inch, TFT, SXGA+	291643-001
15.0-inch, TFT, XGA	291642-001
14.1-inch, TFT, XGA	291641-001
For use only with Presario 900 models	
15.0-inch, TFT, SXGA+	286754-001
15.0-inch, TFT, XGA	285521-001
14.1-inch, TFT, XGA	285520-001
Display Inverter Board Kit (not illustrated)	293348-001

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the LED cover (Section 5.9).
3. Remove the keyboard (Section 5.10).

4. Remove the TM2.5 × 5.0 screw ❶ that secures the display inverter cable ground loop to the heat spreader (Figure 5-25).
5. Disconnect the display inverter cable ❷ from the system board.
6. Remove the TM2.5 × 5.0 screw ❸ that secures the display video cable ground loop to the heat spreader.
7. Disconnect the display video cable ❹ from the system board.
8. Remove the display video cable from the routing channels in the heat spreader and the top cover ❺.

Figure 5-25. Removing the Display Screws and Disconnecting the Display Cables

CAUTION: Make sure the display is supported when removing the following screws. The display is secured to the computer only by these screws and will fall if not supported during screw removal.

9. Remove the four TM2.5 × 9.0 screws ❶ that secure the display to the base enclosure (Figure 5-26).
10. Remove the display from the base enclosure ❷.

Figure 5-26. Removing the Display

11. If necessary, remove the display hinge covers by pressing up on the bottom of the covers from behind the display assembly (Figure 5-27). Note that the hinge covers are not interchangeable.

Figure 5-27. Removing the Display Hinge Covers

The display hinge covers are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

When installing the display, install the screws in the “1,” “2,” “3,” “4” sequence shown in the Figure 5-28.

Figure 5-28. Installing the Display Screws

5.14 Palm Rest

Palm Rests

Spare Part Number Information

Palm rests

For use only with Evo Notebook N1005 models	291645-001
For use only with Presario 900 models	285533-001

When replacing the palm rest, ensure that the following components are removed from the old palm rest and installed on the new palm rest:

- Diskette drive (Section 5.15)
 - TouchPad components (Section 5.16)
 - Display release assembly (Section 5.17)
-

1. Prepare the computer for disassembly (Section 5.3).
2. Close the computer.
3. Turn the computer bottom side up with the front facing forward.

4. Remove the five TM2.5 × 8.0 screws ❶ that secure the palm rest to the base enclosure (Figure 5-29).
5. Remove the TM2.5 × 5.0 screw ❷ that secures the palm rest to the base enclosure in the battery bay.

Figure 5-29. Removing the Palm Rest Screws

6. Turn the computer top side up with the front facing forward.
7. Open the computer.

8. Lift the front edge of the palm rest and swing it up and back ❶ until it rests on the top cover (Figure 5-30).
9. Release the ZIF connector to which the diskette drive cable is attached ❷ and disconnect the diskette drive cable ❸ from the system board.
10. Release the ZIF connector to which the system board-to-TouchButton board cable is attached ❹ and disconnect the cable ❺ from the TouchButton board.

Figure 5-30. Removing the Palm Rest

11. Remove the palm rest from the base enclosure.
- Reverse the preceding procedures to install the palm rest.

5.15 Diskette Drive

Diskette Drives Spare Part Number Information

Diskette drive

285539-001

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the palm rest (Section 5.14).
3. Turn the palm rest bottom side up with the speaker grilles facing away from you.
4. Remove the three TM2.5 × 5.0 screws ❶ that secure the diskette drive to the palm rest (Figure 5-31).
5. Remove the diskette drive ❷ from the palm rest.

Figure 5-31. Removing the Diskette Drive

6. Release the ZIF connector ❶ to which the diskette drive cable is connected and disconnect the diskette drive cable ❷ from the drive (Figure 5-32).
7. Remove the diskette drive cable.

Figure 5-32. Removing the Diskette Drive Cable

Reverse the preceding procedures to install the diskette drive.

5.16 TouchPad Components

TouchPad Components Spare Part Number Information

The TouchPad components consist of the TouchPad, TouchPad bracket, TouchButton board, system board-to-TouchButton board cable, and TouchButton board-to-TouchPad cable. These components are included with the palm rest.

The system board-to-TouchButton board cable and TouchButton board-to-TouchPad cable are also included in the Miscellaneous Cable Kit, spare part number 285540-001

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the palm rest (Section 5.14).
3. Remove the diskette drive (Section 5.15).
4. Turn the palm rest bottom side up with the speaker grilles facing away from you.

5. Disconnect both ends of the TouchPad-to-TouchButton board cable ❶ from the low insertion force (LIF) connectors on the TouchPad ❷ and TouchButton board ❸ (Figure 5-33).
6. Remove the TouchPad-to-TouchButton board cable.

Figure 5-33. Removing the TouchPad-to-TouchButton Board Cable

7. Remove the four TM2.5 × 5.0 screws ❶ that secure the TouchPad, TouchButton board, and TouchPad bracket to the palm rest (Figure 5-34).
8. Remove the TouchPad bracket ❷, TouchButton board ❸, and TouchPad ❹ from the palm rest.

Figure 5-34. Removing the TouchPad Components

5.17 Display Release Assembly

Display release assemblies are available with carbon finish for Evo Notebook N1005 models and silver finish for Presario 900 models, and are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the palm rest (Section 5.14).
3. Turn the palm rest bottom side up with the speaker grilles facing forward.

4. Remove the two TM2.5 × 5.0 screws ❶ that secure the display release assembly to the palm rest (Figure 5-35).
5. Remove the assembly ❷ from the palm rest.

Figure 5-35. Removing the Display Release Assembly

Reverse the preceding procedures to install the display release assembly.

5.18 Charger Board

Charger Board Spare Part Number Information

Charger board	285525-001
The charger board shield is included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.	

1. Prepare the computer for disassembly (Section 5.3).
2. Remove the palm rest (Section 5.14).

3. Remove the three TM2.5 × 5.0 screws ❶ that secure the charger board to the base enclosure (Figure 5-36).
4. Lift the front edge of the charger board shield ❷ until it clears the base enclosure, then slide the shield forward to remove it.
5. Lift up on the back edge of the charger board ❸ to disconnect it from the system board.
6. Remove the charger board from the base enclosure.

Figure 5-36. Removing the Charger Board

Reverse the preceding procedures to install the charger board.

5.19 Speaker Assembly

Speaker Assembly
Spare Part Number Information

Speaker assembly	285538-001
------------------	------------

- 1. Prepare the computer for disassembly (Section 5.3).
- 2. Remove the palm rest (Section 5.14).
- 3. Remove the charger board (Section 5.18).

4. Disconnect the speaker cable ❶ from the system board (Figure 5-37).
5. Swing the battery bay support bracket ❷ to the right until it clears the right edge of the speaker assembly.
6. Lift the front edge of the speaker assembly until it rests at an angle ❸.
7. Slide the speaker assembly forward and remove it ❹ from the base enclosure.

Figure 5-37. Removing the Speaker Assembly

Reverse the preceding procedures to install the speaker assembly.

5.20 Top Cover

Top Cover Spare Part Number Information	
Top cover	285535-001

1. Prepare the computer for disassembly (Section 5.3) and remove the following components:
 - a. LED cover (Section 5.9)
 - b. Keyboard (Section 5.10)
 - c. Heat spreader (Section 5.11)
 - d. Display (Section 5.13)
 - e. Palm rest (Section 5.14)
2. Turn the base enclosure bottom side up with the rear panel facing forward.

3. Remove the two TM2.5 × 8.0 screws that secure the top cover to the base enclosure (Figure 5-38).

Figure 5-38. Removing the Top Cover Screws

4. Turn the base enclosure top side up with the front facing forward.

5. Remove the three TM2.5 × 5.0 screws ❶ that secure the top cover to the base enclosure (Figure 5-39).
6. Remove the top cover from the base enclosure ❷.

Figure 5-39. Removing the Top Cover

After the top cover is removed, the system board-to-TouchButton board cable can be removed. The system board-to-TouchButton board cable is included in the Miscellaneous Cable Kit, spare part number 285540-001.

7. Release the ZIF connector **1** to which the system board-to-TouchButton board cable is attached and disconnect the cable **2** from the system board (Figure 5-40).

Figure 5-40. Removing the System Board-to-TouchButton Board Cable

Reverse the preceding procedures to install the top cover.

5.21 Fan

Fan

Spare Part Number Information

Fan	285543-001
-----	------------

1. Prepare the computer for disassembly (Section 5.3) and remove the following components:
- a. LED cover (Section 5.9)

b. Keyboard (Section 5.10)

c. Heat spreader (Section 5.11)

d. Display (Section 5.13)

e. Palm rest (Section 5.14)

f. Top cover (Section 5.20)

2. Disconnect the fan cable ❶ from the system board (Figure 5-41).
3. Remove the fan ❷ from the base enclosure.

Figure 5-41. Removing the Fan

Reverse the preceding procedures to install the fan.

5.22 System Board

System Board Spare Part Number Information

System board (does not contain memory)

291588-001

When replacing the system board, ensure that the following components are removed from the old system board and installed on the new system board:

- Memory expansion boards (Section 5.5)
 - Mini PCI communications board (Section 5.6)
 - Disk cell RTC battery (Section 5.7)
 - Processor (Section 5.12)
 - Modem cable (Section 5.23)
-

1. Prepare the computer for disassembly (Section 5.3) and remove the following components:
 - a. LED cover (Section 5.9)
 - b. Keyboard (Section 5.10)
 - c. Heat spreader (Section 5.11)
 - d. Display (Section 5.13)
 - e. Palm rest (Section 5.14)
 - f. Charger board and shield (Section 5.18)
 - g. Speaker assembly (Section 5.19)
 - h. Top cover and TouchPad cable (Section 5.20)
 - i. Fan (Section 5.21)

2. Remove the two TM2.5 × 5.0 screws ❶ that secure the optical drive rear alignment rail to the base enclosure (Figure 5-42).
3. Remove the two TM2.5 × 5.0 screws ❷ that secure the optical drive rear alignment rail to the base enclosure.
4. Remove the rear alignment rail ❸ from the base enclosure.
5. Remove the rear alignment rail ❹ from the base enclosure.

Figure 5-42. Removing the Optical Drive Alignment Rails

The optical drive alignment rails are included in the Miscellaneous Plastics/Hardware Kit, spare part number 285541-001.

6. Remove the following screws:

- ☐ TM2.5 × 5.0 screw ❶ next to the PC Card assembly (Figure 5-43)
- ☐ TM2.5 × 5.0 screw ❷ next to the RJ-11 and RJ-45 connectors
- ☐ TM2.5 × 5.0 screw ❸ next to the audio connectors

Figure 5-43. Removing the System Board Screws

7. Lift the front edge of the system board until it rests at an angle ❶ (Figure 5-44).
8. Slide the system board forward ❷ and remove it from the base enclosure.

Figure 5-44. Removing the System Board

Reverse the preceding procedures to install the system board.

5.23 Modem Cable

The modem cable is included in the Miscellaneous Cable Kit, spare part number 285540-001.

1. Prepare the computer for disassembly (Section 5.3) and remove the following components:
 - a. LED cover (Section 5.9)
 - b. Keyboard (Section 5.10)
 - c. Heat spreader (Section 5.11)
 - d. Display (Section 5.13)
 - e. Palm rest (Section 5.14)
 - f. Top cover (Section 5.20)
 - g. Fan (Section 5.21)
 - h. System board (Section 5.22)

2. Turn the system board bottom side up with the rear panel facing forward.
3. Remove the PM2.0 \times 4.5 screw ❶ that secures the modem ground cable to the system board (Figure 5-45).
4. Disconnect the modem cable ❷ from the system board.
5. Remove the cable from the clips ❸ on the system board.

Figure 5-45. Removing the Modem Cable

Reverse the preceding procedures to install the modem cable.

Specifications

This chapter provides physical and performance specifications.

Table 6-1
Notebook

Dimensions

Height	3.94 cm	1.55 in
Width	32.74 cm	12.89 in
Depth	26.75 cm	10.53 in

Weight (varies by notebook configuration)

with 15.1-inch display	3.22 kg	7.09 lb
with 14.1-inch display	3.09 kg	6.82 lb

Stand-alone power requirements

Nominal operating voltage	14.4 V (8 cell)
Average operating power	29.7 W desktop
Peak operating power	80 W on AC, 55 W on DC
Power in Suspend mode	< 1000 mW
Power in Hibernation mode	< 100 mW

Temperature

Operating	10° to 35° C	50° to 95° F
Nonoperating	-10° to 60° C	14° to 140° F

Table 6-1
Notebook (Continued)

Relative humidity (noncondensing)

Operating	10% to 90%
Nonoperating	5% to 90%, 38.7° C (101.6° F) maximum wet bulb temperature

Altitude (unpressurized)

Operating	0 to 3,048 m	0 to 10,000 ft
Nonoperating	0 to 9,144 m	0 to 30,000 ft

Shock

Operating	10 G, 11 ms, half-sine
Nonoperating	60 G, 11 ms, half-sine

Vibration

Operating	0.5 G zero-to-peak, 10 to 500 Hz, 0.25 oct/min sweep rate
Nonoperating	1.0 G zero-to-peak, 10 to 500 Hz, 0.5 oct/min sweep rate

Applicable product safety standards specify thermal limits for plastic surfaces. The computer operates well within this range of temperatures.

Dimensions		
Length	12.57 cm	4.95 in
Width	8.79 cm	3.46 in
Depth	2.03 cm	0.80 in
Weight	.44 kg	0.96 lb
Energy		
Voltage	14.8 V	
Amp-hour capacity	minimum 3.7 Ah, typical 3.9 Ah	
Watt-hour capacity	minimum 53.2 Ah, typical 56.1 Ah	
Temperature		
Operating	0 to 42° C	32 to 108° F
Nonoperating	0 to 60° C	32 to 140° F

Table 6-12
System DMA

Hardware DMA	System Function
DMA0	Available for audio
DMA1	Entertainment audio (default; alternate = DMA0, DMA3, none)
DMA2	Diskette drive
DMA3	ECP parallel port LPT1 (default; alternate = DMA0, none)
DMA4	DMA controller cascading (not available)
DMA5	Available for PC Card
DMA6	Not assigned
DMA7	Not assigned
 PC Card controller can use DMA 1, 2, or 5.	

Table 6-13
System Interrupts

Hardware IRQ	System Function
IRQ0	System timer
IRQ1	Keyboard controller
IRQ2	Cascaded
IRQ3	COM2
IRQ4	COM1
IRQ5	Audio (default)*
IRQ6	Diskette drive
IRQ7	Parallel port
IRQ8	Real time clock (RTC)
IRQ9	Infrared
IRQ10	System use
IRQ11	System use
IRQ12	Internal point stick or external mouse
IRQ13	Coprocessor (not available to any peripheral)
IRQ14	IDE interface (hard drive and optical drive)
IRQ15	System use

PC Cards may assert IRQ3, IRQ4, IRQ5, IRQ7, IRQ9, IRQ10, IRQ11, or IRQ15. Either the infrared or the serial port may assert IRQ3 or IRQ4.

*Default configuration; audio possible configurations are IRQ5, IRQ7, IRQ9, IRQ10, or none.

Table 6-14
System I/O Addresses

I/O Address (hex)	System Function (shipping configuration)
000 - 00F	DMA controller no. 1
010 - 01F	Unused
020 - 021	Interrupt controller no. 1
022 - 024	Opti chipset configuration registers
025 - 03F	Unused
02E - 02F	87334 "Super IO" configuration for CPU
040 - 05F	Counter/timer registers
044 - 05F	Unused
060	Keyboard controller
061	Port B
062 - 063	Unused
064	Keyboard controller
065 - 06F	Unused
070 - 071	NMI enable/real time clock
072 - 07F	Unused
080 - 08F	DMA page registers
090 - 091	Unused
092	Port A
093 - 09F	Unused
0A0 - 0A1	Interrupt controller no. 2

Table 6-14
System I/O Addresses (*Continued*)

I/O Address (hex)	System Function (shipping configuration)
0A2 - 0BF	Unused
0C0 - 0DF	DMA controller no. 2
0E0 - 0EF	Unused
0F0 - 0F1	Coprocessor busy clear/reset
0F2 - 0FF	Unused
100 - 16F	Unused
170 - 177	Secondary fixed disk controller
178 - 1EF	Unused
1F0 - 1F7	Primary fixed disk controller
1F8 - 200	Unused
201	Joystick (decoded in ESS1688)
202 - 21F	Unused
220 - 22F	Entertainment audio
230 - 26D	Unused
26E - 26	Unused
278 - 27F	Unused
280 - 2AB	Unused
2A0 - 2A7	Unused
2A8 - 2E7	Unused
2E8 - 2EF	Reserved serial port

Table 6-14
System I/O Addresses (*Continued*)

I/O Address (hex)	System Function (shipping configuration)
2F0 - 2F7	Unused
2F8 - 2FF	Infrared port
300 - 31F	Unused
320 - 36F	Unused
370 - 377	Secondary diskette drive controller
378 - 37F	Parallel port (LPT1/default)
380 - 387	Unused
388 - 38B	FM synthesizer - OPL3
38C - 3AF	Unused
3B0 - 3BB	VGA
3BC - 3BF	Reserved (parallel port/no EPP support)
3C0 - 3DF	VGA
3E0 - 3E1	PC Card controller in CPU
3E2 - 3E3	Unused
3E8 - 3EF	Internal modem
3F0 - 3F7	"A" diskette controller
3F8 - 3FF	Serial port (COM1/default)
CF8 - CFB	PCI configuration index register (PCIDIVO-1)
CFC - CFF	PCI configuration data register (PCIDIVO-1)

Table 6-15
System Memory Map

Size	Memory Address	System Function
640 KB	00000000 - 0009FFFF	Base memory
128 KB	000A0000 - 000BFFFF	Video memory
48 KB	000C0000 - 000CBFFF	Video BIOS
160 KB	000C8000 - 000E7FFF	Unused
64 KB	000E8000 - 000FFFFFFF	System BIOS
15 MB	00100000 - 00FFFFFFF	Extended memory
58 MB	01000000 - 047FFFFFFF	Super extended memory
58 MB	04800000 - 07FFFFFFF	Unused
2 MB	08000000 - 080FFFFFFF	Video memory (direct access)
4 GB	08200000 - FFFEFFFF	Unused

Power Cord Set Requirements

3-Conductor Power Cord Set

The wide range input feature of the notebook permits it to operate from any line voltage from 100 to 120 or 220 to 240 volts AC.

The power cord set received with the computer meets the requirements for use in the country where the equipment is purchased.

Power cord sets for use in other countries must meet the requirements of the country where the computer is used. For more information on power cord set requirements, contact a Compaq authorized reseller or service provider.

General Requirements

The requirements listed below are applicable to all countries:

- The length of the power cord set must be at least 1.5 m (5.00 feet) and no more than 2.0 m (6.50 feet).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country where the power cord set will be used.
- The power cord set must have a minimum current capacity of 10 amperes and a nominal voltage rating of 125 or 250 volts AC, as required by each country's power system.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector, for mating with the appliance inlet on the back of the computer.

Country-Specific Requirements

3-Conductor Power Cord Set Requirements		
Country	Accredited Agency	Applicable Note Number
Australia	EANSW	1
Austria	OVE	1
Belgium	CEBC	1
Canada	CSA	2
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1
Italy	IMQ	1
Japan	METI	3
The Netherlands	KEMA	1
Norway	NEMKO	1
Sweden	SEMKO	1
Switzerland	SEV	1

3-Conductor Power Cord Set Requirements (Continued)

Country	Accredited Agency	Applicable Note Number
United Kingdom	BSI	1
United States	UL	2

Notes

1. The flexible cord must be <HAR> Type HO5VV-F, 3-conductor, 1.0 mm² conductor size. The power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country where they will be used.
 2. The flexible cord must be Type SPT-3 or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V) or NEMA 6-15P (15 A, 250 V) configuration.
 3. The appliance coupler, flexible cord, and wall plug must bear a “T” mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCT or VCTF, 3-conductor, 1.00 mm² conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V) configuration.
-

C

Screw Listing

This appendix provides specification and reference information for the screws used in the computer. All screws listed in this appendix are available in the Miscellaneous Screw Kit, spare part number 285542-001.

Table C-1
Torx T8 Metric 2.5 × 5.0 Screw

	Color	Qty	Length	Thread	Head Width
	Silver	30	5.0 mm	2.5 mm	5.0 mm

Where used:
Two screws that secure the optical drive to the computer
(documented in Section 5.3)

Figure C-1. TM2.5 × 5.0 Screw Locations

Table C-1
Torx T8 Metric 2.5 × 5.0 Screw (continued)

	Color	Qty	Length	Thread	Head Width
	Silver	30	5.0 mm	2.5 mm	5.0 mm

Where used:

Two screws that secure the connector cover to the base enclosure (documented in Section 5.8)

Figure C-2. TM2.5 × 5.0 Screw Locations

Table C-1
Torx T8 Metric 2.5 × 5.0 Screw *(continued)*

	Color	Qty	Length	Thread	Head Width
	Silver	30	5.0 mm	2.5 mm	5.0 mm

Where used:

- ❶ One screw that secures the heat spreader to the base enclosure (documented in Section 5.11)
- ❷ One screw that secures the display video cable ground loop to the heat spreader (documented in Sections 5.11 and 5.13)

Figure C-3. TM2.5 × 5.0 Screw Locations

Table C-1
Torx T8 Metric 2.5 × 5.0 Screw *(continued)*

	Color	Qty	Length	Thread	Head Width
	Silver	30	5.0 mm	2.5 mm	5.0 mm

Where used:

One screw that secures the display inverter cable ground loop to the heat spreader (documented in Section 5.13)

Figure C-4. TM2.5 × 5.0 Screw Locations

Table C-1
Torx T8 Metric 2.5 × 5.0 Screw (continued)

	Color	Qty	Length	Thread	Head Width
	Silver	30	5.0 mm	2.5 mm	5.0 mm

Where used:

- ① Three screws that secure the diskette drive to the palm rest (documented in Section 5.15)
- ② Four screws that secure the TouchPad components to the palm rest (documented in Section 5.16)
- ③ Two screws that secure the display release assembly to the palm rest (documented in Section 5.17)
