#### IMPORTANT SAFETY INSTRUCTIONS

##### CAUTION: RETAIN THIS MANUAL FOR FUTURE REFERENCE

This unit has been designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated in this unit will protect you if you observe the following procedures for installation, use and servicing. This unit does not contain any parts that can be repaired by the user.

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades, one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

##### Cleaning Disc

Picture freezing, sound skipping or repeating can occur if the disc inside the player is dirty.

- When a disc becomes dirty, clean it with a cleaning cloth. Wipe the disc from the center out.
- Do not wipe in a circular motion. Circular scratches can cause picture distortion or render the disc unplayable.

##### CAUTION!

Do not use solvents, commercially available cleaners, or antistatic spray intended for analog disc.

Your THOMSON product is designed and manufactured with high quality materials and components which can be recycled and reused.

- Power Cord**

#### CONNECTIONS

The following connections show the different video and audio connections to TV, VCR or CD Recorder.  
**Important:** Make sure that the AC Voltage matches your local voltage. Connect the AC cord only after the speakers, antenna, and all optional equipment have been connected.

##### (1) Connecting TV

To view the video from DVD disc on your TV set, connect the TV SCART OUT jack of this unit to the SCART jack of your TV set using a scart cable.

##### (2) Connecting VCR or Satellite Receiver (Optional)

To listen the sound from your VCR, TV or Satellite Receiver through the speakers of this unit, only connect the Left / Right audio output of these equipments to the Left / Right audio input jack of this unit.

##### (3) Speaker Connection

###### Before Connecting

This DVD Home Cinema System is designed to reproduce optimum sound quality when the supplied speakers are used. If you wish to connect other speakers to the system instead of the supplied speakers, they should be 4 ohms impedance for the speakers and 3 ohms impedance for subwoofer. Ensure correct polarity when connecting speakers (colored wire for matched colour terminal clip). To prevent damage to circuits, never short-circuit the speaker output terminals.

Press the speaker terminal clip down & insert the wire, then release the clip.

Connection of all speakers are the same.

##### Note :

- Do not remove excessive amount of insulation on the wire cords to avoid the stripped portion from touching each other. The optimal length for the stripped part should be around 1/3 inch (or 1cm).
- Do not push the stripped part too far into the speaker connectors.
- Do not connect more than one speaker to any one pair of speaker terminals.
- Do not connect speakers with an impedance lower than the speakers supplied.

#### SPEAKER PLACEMENT

Placement of speakers play an important role in the reproduction of surround sound effect.  
Particular attention should be taken when designing the speaker layout. For the best surround effects, all speakers should be installed.

- Please place the front left and right speakers to the left hand side and right hand side of your TV.
- Place the center speaker above the TV so that the centre channel sound is located.
- Place the surround left and surround right speakers in line with your listening position or behind your listening position. Ideally they should be placed slightly above your ear level while you seat in your normal listening location.
- The subwoofer can be installed for powerful bass sounds when it is placed on the floor. Place the subwoofer on the floor near the TV.
- All speakers should approximately be at the same distance from your listening position and must be visible.

#### GETTING START

##### Before Beginning

- Finish the connection for the DVD Home Cinema System as shown in the previous section.
- Connect Power to the DVD Home Cinema System.
- Turn on the TV and set to the correct video-in channel.
- Insert the batteries in the remote control.

##### Start Playback

- Press the **Play** key (either on the unit front panel or the remote control). The unit display should light.
- Press DVD on the remote control, the unit will switch to the DVD mode. After a few seconds the panel will show [NO DISC].

  - Press **▲** or **▼** to highlight a rating level for the disc inserted and press **OK**.
  - Press **▲** or **▼** to highlight Password and press **OK**. Use the numeric key (0-9) to enter the four-digit password.
- If you make a mistake before pressing **OK**, press the **CLEAR** button and enter your 4-digit security code again.  
DVD discs that are rated above the level you selected will not play unless you enter correct four-digit password.

- Indicates Parental lock is NOT active.
- The Parental lock is active.

##### Note :

- Only when the parental lock is active the rating level will function.
- Only when the parental lock is not active the rating level can be changed.

##### 1.4 SOURCE

Select the source files that you want to play between Disc and USB. To access files in a USB device, make sure your USB devices is connected to the USB jack on the front panel.

##### 2. LANGUAGE SETUP

You can select different languages for OSD shown on TV screen Setup Menu operation. You can also select different languages for Audio, Subtitle and Menu which are recorded on the DVD disc.

**OSD LANG** : Select the unit All Setup Menu language.  
**AUDIO LANG** : Select the audible language to play.  
**SUBTITLE LANG** : Select the subtitle displayed on the TV screen.  
**DISC MENU** : Select the disc menu language.  
**Note :** If the selected language is not recorded on the disc, the disc own fault language is selected automatically.

### 3. AUDIO SETUP

#### 3.1 VOLUME SETUP

- Once you select the Volume Setup and press OK, you will hear the calibrating sound from the front left speaker for a few seconds. Then this sound will move from speaker to speaker as follows: Front Left -> Center -> Front Right -> Subwoofer -> Rear Right -> Rear Left. If the calibrating sound is either too small or too loud, exit the Volume Setup and then adjust the volume control until the calibrating sound is more clear. Let the calibrating sound cycle through all the speakers at least once.
- If the calibrating sound level from all speakers is approximately the same, no further adjustment is necessary.
- If any speaker sound level appears unbalance to the rest, you can increase or decrease the level of the speaker by pressing ▲ or ▼ to increase or decrease the speaker level when that speaker is highlighted.
- When you have completed the level adjustments, press OK to exit the Volume Setup and return to the previous menu.

Note : We recommend to set Volume = 30 before entering this Volume Setup to further calibrating any unbalance speaker level output.

#### 3.2 DYNAMIC RANGE

Dynamic Range Control enables you to control the dynamic range so as to achieve a suitable sound for your equipment.  
**ON:** Loud sound such as explosion is toned down slightly when playback.  
**OFF:** It plays back at the recording level on the disc.

#### 3.3 PROLOGIC II

The Dolby Pro Logic II Surround System is a specially encoded 2 channels analog format which will reproduce 5 channels output when a Dolby Pro Logic II Decoder is used.

**MOVIE MODE :** The Movie mode is for use with stereo television shows and all programs encoded in Dolby Surround. The result is enhanced soundfield directionality that approaches the quality of discrete.

**MUSIC MODE :** The Music mode is for use with any stereo music recordings, and provides a wide and deep sound stage. The Music mode includes different controls that allow the sound to be tailored to individual listening preferences.

#### 3.4 PANORAMA/CENTER WIDTH / DIMENSION

The above options are available only when the player is in Music Mode. These options let you to customize the ProLogic II Music Mode Sound Effect.  
**PANORAMA:** Extends the front stereo image to include the surround speakers for an exciting "wraparound" effect with side-wall imaging.  
**CENTER WIDTH:** With Pro Logic decoding, dominant center signals can come only from center speaker. If no center speaker is present, the decoder splits the center signals equally to the left and right speakers to create a "phantom" center image. The Center Width allows variable adjustment of the center image so it may be heard only from the center speaker, only from the leftright speakers as a phantom image, or from all three front speakers to varying degrees.  
**DIMENSION:** A simple control that alters the ratio of L+R to L-R for the two-channel input signals. It allows the user to gradually adjust the sound field either towards the front or towards the rear. If a recording is too spacious or strong from the surrounds, it can be adjusted "forward" to get a better balance. Likewise, if a stereo recording is somewhat too "mono" or "narrow" sounding, it can be adjusted toward the rear to get a more enveloping, immersing result.

### 4. VIDEO SETUP

#### 4.1 TV SYSTEM

This player supports different TV output, including NTSC and PAL system. You may change the setting of the unit to match your TV.  
**NTSC :** Select this if your TV supports NTSC colour system.  
**PAL :** Select this if your TV supports PAL colour system.  
**PAL 60 :** Select this if your TV supports PAL 60 colour system.  
**AUTO :** Select this if your TV supports Multi-colour system.  
Note : If you TV supports only NTSC or PAL and had you inadvertently selected the wrong tv type, the TV screen will become flickering and/or black-and-white.

#### 4.2 VIDEO

Choose the type of video output that matches the video connection between the unit and TV.  
**TV RGB :** The RGB signal is enabled from TV Scart Output to TV.  
**RGB OFF :** The RGB signal is disabled from TV Scart Output to TV.

### 4.3 TV TYPE

- 4:3 PS** This is selected when the unit is connected with a normal TV. Wide-screen images are shown on the screen, but with some parts cut automatically.
  - 4:3 LB** This is selected when the unit is connected with a normal TV. Wide-screen images are shown on screen, with black belts on the top and bottom.
  - 16:9** This is selected when the unit is connected with a wide-screen TV.
- Notes:
- The factual effect of playing rely on the picture recorded in disc. Some disc could not be played according to your selection.
  - As for the disc recorded in 4:3 mode, the disc will only be played in 4:3.
  - The TV TYPE should be set correspondingly with the TV screen.

### 5. SPEAKER SETUP

#### 5.1 CENTER / REAR DISTANCE

- If the Center speaker is placed close to the Front speakers, choose CENTER DIST. to set the Center distance value minimum to achieve the best listening effect.
- If the Surround speakers are placed close to the listening position than the Front speakers, choose REAR DIST. to set the Rear distance value larger to achieve the best listening effect.
