

Information for Owners of SD-P2800 Portable DVD Players

Posted: July 12th, 2007

To ensure the satisfaction of our customers and to maintain the integrity and quality of our products, Toshiba Gulf FZE is issuing an important product update.

We have identified an issue related to the car adaptor included with portable DVD player model SD-P2800. Although we have not received any reports of this issue occurring, theoretically, it is possible that the car adaptor, **when used to power the player for playback**, may become hot to the touch, the car adaptor casing may become deformed, and the car adaptor may cease to function.

If you own portable DVD player model SD-P2800, please contact Toshiba Customer Solutions at +97148817789 to obtain a new, improved car adaptor free of charge. Replacement car adaptors will be available beginning on July 25th, 2007.

Please note that the car adaptor should never be used to charge the battery pack. Always remove the battery pack from the player before using the car adaptor to power the player for playback. Please see the owner's manual for this product for additional safety and operational instructions.

With reference from Owner's Manual, pg 62, "Using the automobile / vehicle adapter or power port.

WARNING

- NEVER operate the DVD player or view a DVD Video while operating an automobile or other vehicle. Note: doing so is illegal in many jurisdictions.
NEVER place a DVD player within the eyesight of a driver while he/she is driving an automobile/vehicle. Note: A DVD player located in the front seating section of a vehicle is illegal in many jurisdictions.
Failure to observe the above instructions could result in the driver's inattention to and/or distraction from road hazards.
- NEVER place a DVD player in a location where it could interfere with the proper deployment and/or performance of an air bag.
Failure to observe this instruction could result in the prevention of an air bag to properly and/or effectively deploy.
- Do not use an adapter other than the model supplied, to power the player. Do not use the supplied vehicle adapter to power an apparatus other than this player. Neglecting these may cause smoke, fire or electrical shock to human body.
- This adapter is intended for exclusive use in automobiles/vehicles with a DC 12V negative ground electrical system. NEVER use this adapter with a DC 24V configured automobile/vehicle.
Consult your vehicle owner's manual before using this adapter.
- ALWAYS use caution when touching the adapter, cigarette lighter socket or power port. The adapter, lighter socket and power port may become heated after prolonged use.
- Do not charge the battery pack which is attached to the DVD player by the adapter. Doing so may cause smoke, fire or electrical shock to human body. Whenever you use the adapter, be sure to remove the battery pack from the DVD player to prevent it being charged by the adapter.
- Do not touch the adapter with wet hands. Do not get liquid on the adapter.
