

SD5300

DVD Player with 1080p Upconversion

Sleek design and 1080p upconversion to near HD picture quality combined with the flexibility of multiple playback options make the SD5300 perfect for movie night at home.

Advantages

Video upconversion up to 1080p¹ resolution via HDMI™ takes your current DVDs to a new level, for an amazing viewing experience on today's HDTVs.

HDMI™ is a convenient, single cable AV connection. It transfers pure digital video and multi-channel audio to compatible home theater components and high definition televisions without scaling down or compressing the signal, keeping sound and picture quality pristine.

Multiformat playback capability² supports DVD-/+R, DVD-/+RW, DVD-R DL, DVD+R DL, VCD, SVCD, CD, CD-R, CD-RW, MP3, JPEG and DivX playback for true viewing flexibility.

Official DivX® Certified Product plays all version of DivX® video (including DivX® 6) with standard playback of DivX® Media files.

JPEG Photo Viewer enables users to view digital photographs from CD and DVD discs on their televisions.

Slim (40mm) chassis height is combined with a stylish black front panel with silver accents, and a display designed to compliment today's TVs.

SD5300 Progressive Scan DVD Player

¹Some DVD-R/DVD-RW and CD-R/CD-RW discs may be incompatible due to laser pick up and disc design. CD-R/CD-RW discs must be recorded using CD-DA method for CD audio playback. The DVD player may not support some MP3/JPEG/DivX recordings due to differences in recording formats, disc structure, or condition of the disc (use of CD-RW for MP3 files is not recommended). See owner's manual for more information.

DivX Certified products are officially tested by the creators of DivX and guaranteed to play all versions of DivX video.
Certified products qualify for one of several DivX Profiles that designate the type of video the product supports, from compact portable video to high-definition video. DivX, DivX Certified and associated logos are registered trademarks of DivX, Inc. and are used under license.
