PHILIPS
sense and simplicity

Highlights

i.LINK digital input

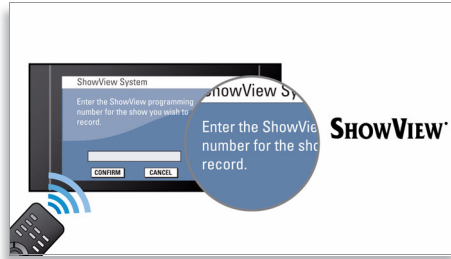

Also known as IEEE 1394 and FireWire, i.Link carries all audio and video signals via a single cable digitally, with no loss in picture and sound quality. With i.Link digital video input, you can copy your home videos in their original digital picture quality.

Direct Dubbing (VHS to DVD)

Having a Direct Dubbing button allows for the user to start recording from the video tape

without complicated menu system selection or input/output selection for separates.

ShowView

With the ShowView system, all you need to do to program your video recorder is to enter the ShowView number – a single code of up to nine digits (but usually less) that is printed next to each TV program in most TV guides.

VPS/ PDC

With 'VPS' (Video Programming System) and 'PDC' (Program Delivery Control), the TV station controls the beginning and the length of the programmed recording. This means that your recording device switches itself on and off at the right time even if a TV program you have programmed begins earlier or finishes later than expected.

Movies - VHS & DivX

Multi-format playability allows you to play most disc formats and VHS tapes for maximum compatibility and viewing pleasure.
