Key Technologies

**16:9 Full HD 1080p Resolution Panel (1920x1080)** 16:9 Full HD 1080p resolution panel (1920x1080) accepts any HDTV signal and renders it with optimum resolution, so you can take full advantage of Blu-ray Disc™ players and Sony® PLAYSTATION®<sup>3</sup> entertainment systems that can deliver 1080p content.

**Dynamic contrast (30,000:1)** Advanced Contrast Enhancer (ACE) creates a dynamic contrast level by working in real time to produce deep blacks in darker scenes, as well as fine details in shadows and other dark areas of the picture for a difference you can truly see.

**BRAVIA Engine™ 2 fully digital video processor** The BRAVIA Engine 2 fully digital video processor uses a collection of unique Sony technologies to significantly reduce noise, enhance overall image detail, and optimize contrast so every scene produces sharp, vibrant, life-like images and color.

**HDMI™ connection x 3 (1080/60p capable)** Get versatile HDMI connection options with three HDMI inputs (up to 1080/60p input capable)<sup>1</sup>. Connect a Sony® PLAYSTATION® 3 entertainment system, Blu-ray Disc™ player, or any other HDMI-capable equipment and get uncompressed digital video and multi-channel digital audio on a single cable.

**HD Component x 2 (1080/60p capable)** Two YPbPr Component inputs (1080/60p capable) provide added HD-capable connectivity, and a PC input<sup>3</sup> (HD-15 pin) offers the added versatility to use your HDTV as a computer monitor.

**BRAVIA® Link compatibility** BRAVIA Link compatibility expands your HDTV's capabilities by letting you connect optional BRAVIA Link modules, including the BRAVIA DVD Link, BRAVIA Wireless Link, and BRAVIA Input Link (all sold separately).

**BRAVIA® Sync™ capable** BRAVIA Sync capability combines the one-touch access and control functionality of BRAVIA Theatre Sync™ with the ability to control CEC-enabled Sony® Handycam® camcorders and Cyber-shot® digital still cameras using the TV's remote and an on-screen display via HDMI connector<sup>1, 2</sup>.

**24p True Cinema™** 24p True Cinema support provides a direct connection to 24p video sources, avoiding conversions and allowing users to enjoy films at their intended 24 fps (frames per second) cinematic picture quality when using a 24p-capable output device, such as a Blu-ray Disc™ player or Sony® PLAYSTATION®3 entertainment system.
