FEATURES

- All in one, pre-assembled unit drops into ceiling grids to reduce installation time and costs
- Integral E.O. box for conduit
- Attractive white mesh grille blends in with most acoustic ceiling tiles
- Standard 8" speaker with built-in 25/70.7V transformer
- External tap selector switch reduces wiring errors
- UL2043/UL1480 pending

APPLICATION

Installer friendly Atlas Sound IS125SYS provides clear paging and background music in a labor saving package. Ideal for use in shopping malls, department stores, and anywhere large quantities of loudspeakers are to be utilized.

GENERAL DESCRIPTION

The Atlas Sound IS125SYS 1' X 2' drop in speaker system simplifies loudspeaker installation by providing an all in one speaker package in acoustic ceiling grids. The system includes the speaker/transformer, enclosure and grille with an external mounted tap selector switch. The compact 2-unit master pack is designed to save warehouse space. You will enjoy clear, crisp paging, and background music from the installation friendly IS125SYS without compromising building cosmetics.

ARCHITECT & ENGINEER SPECIFICATIONS

The loudspeaker, transformer, baffle and enclosure shall be the Atlas Sound 1' X 2' drop in speaker system Model IS125SYS. The loudspeaker shall be an 8" dual cone type with an integral 25/70.7V matching transformer and externally mounted tap selector switch. Power taps to include .25, .5, 1, 2, and 4 Watt for 25V and 70.7V systems. The assembly to include a speaker enclosure mounted to a 1' X 2' white metal grille.
