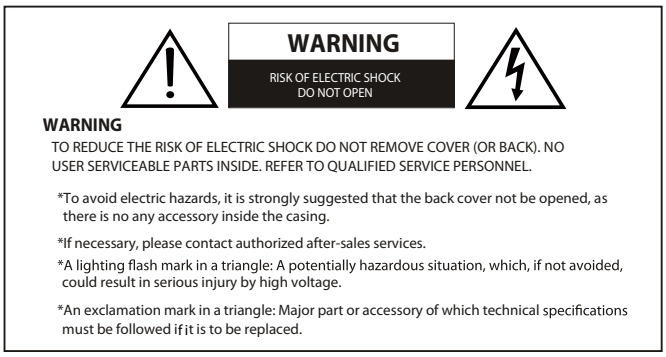
- 32"/39"/42"/46" Full HD Digital LED LCD TV
- Remote control
- AAA battery ×2
- Instruction Manual
- Warranty
- TV Stand
- Screws for TV stand
- Component audio adapter
- Cover bottom

Now you can get started!

Important Information

READ ALL INSTRUCTIONS BEFORE USE AND KEEP FOR FUTURE REFERENCE.



WARNING: To avoid fire or electric hazards, never place your television receiver in an area with heavy moisture. Attention should be paid to avoid accidental scratches or impacts onto the screen. The ventilation should not be impeded by covering the ventilation openings with items, such as newspaper, table-cloths, curtains, etc.

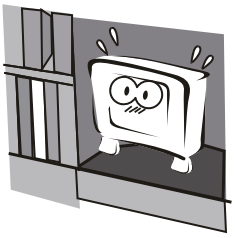
CAUTION:
- ▲The main plug is used as disconnect device which shall remain readily operable.
- ▲Please read this manual carefully before using your television and keep this manual in a good place for future reference.
- ▲ To achieve the best performance of your television, read this User's Manual carefully and properly store it for future reference.
- ▲ Information of screen displays and figures in the User's Manual may vary due to technical innovations.
- ▲ Unauthorized disassembly of this product is prohibited.

TruSurround XT, SRS and the symbol are trademarks of SRS Labs, Inc. TruSurround XT technology is incorporated under license from SRS Labs, Inc.

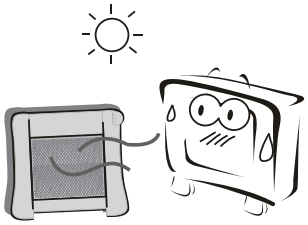
TruSurround XT® creates a truly immersive surround sound experience with rich bass and clear dialog from only two speakers.

WARNING To prevent the spread of fire,keep candles or other open flames away from this product at all times.

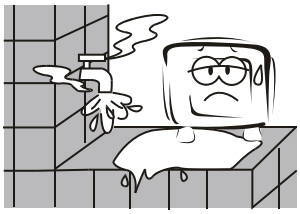
The product should be tightly fixed to avoid drop damages and even fire.



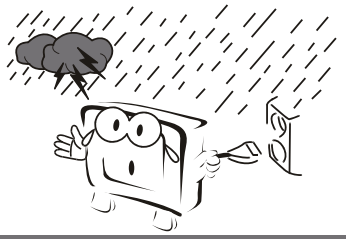
To avoid fire hazards, do not use this product under direct sunlight or closely to heat sources.



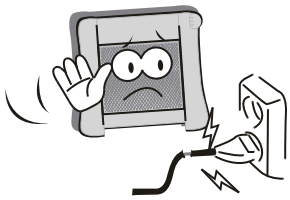
Do not locate the product close to water or oil(ie, cooking oil or lubricating oil), which may cause fire hazards.



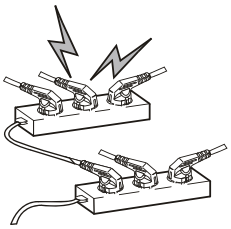
Unplug the power supply and antenna of the product when there is a rainstorm, especially Thunderstorm.



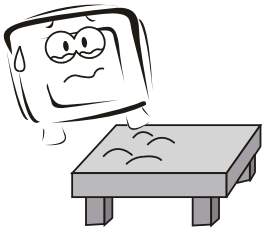
Do not use damaged or worn electric plugs，and keep electric cord away from heat sources to avoid electric shocks or fire hazards.



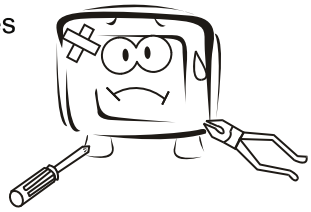
Do not connect excessive sockets in parallel or share the same socket by multiple plugs to avoid fire hazards.



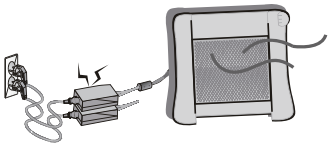
The product must be placed on a solid and stable surface to avoid collapse.

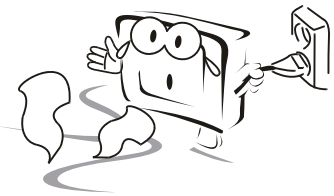


Unauthorized disassembly of the television is prohibited to avoid electric shocks or fire hazards. Contact authorized after-sales service if technical service is needed.



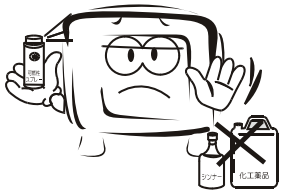
Keep the product away from a transformer or heat source to avoid fire hazards.



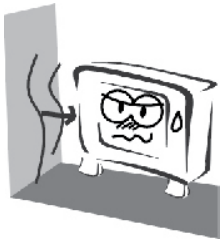


Disconnect the product from power supply and contact authorized after-sales service if abnormal sound is heard in the product.

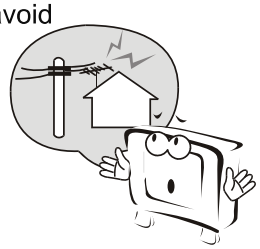
Don't use or store inflammable materials near the product to avoid explosion or fire hazards.



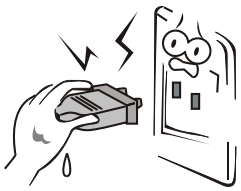
Don't place the product in a humid area to avoid fire hazards.



The antenna of the product should be away from electric cable to avoid electric shocks.



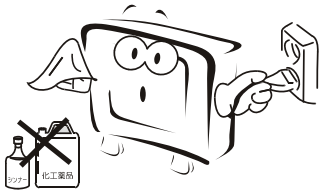
Never touch the plug when your hand is wet as this might cause electric shocks.



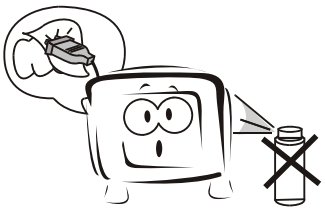
Always make sure that the televisionis well plugged as poor electric connection might cause fire.

When antenna is used, measures should be taken to prevent water from flowing down along the cable into the television.

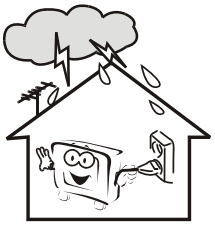
Unplug the television, use soft fabric, never chemicals, if you are going to make cleaning of the product. Make sure that no water drops in the product.



The plug and electric cable must be kept clean to avoid electric shocks or fire hazards.



Disconnect the television from power supply and antenna when there is a rainstorm or thunderstorm to avoid electric shocks or fire hazards.



Disconnect the television from power supply to avoid electric shocks or fire hazards in a long vocation.

Connecting Your TV

Antenna Connection

Connect your aerial to the back of the TV into the ANTENNA IN socket.

Improve Your Signal

To improve picture quality in a poor signal area, use a signal amplifier (not supplied).

Connect Your PC to the TV

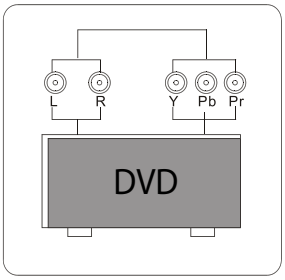
You can use your TV as a monitor for your personal computer by connecting it with a VGA cable (not supplied).

1. Read your computer user guide and check it has a VGA connector.
2. Turn the power off on your TV and PC.
3. Connect a D type 15-pin VGA interface cable to the VGA video interface connector on the PC. Connect the other end of the cable to the PC interface connector on the TV. Tighten the screws on the VGA connectors and connect the audio cable (not supplied) to the audio input socket on the back of the TV.
4. Turn on the power of the TV firstly and then the PC.
5. Press the button on the TV or TV remote control to set the video input mode to PC.
6. Once the image shows, if there is noise present, change the PC mode to another resolution, change the refresh rate to another rate or adjust the brightness and contrast on the menu until the picture is clear.

Connect a DVD Player to Your TV

Connect the DVD video outputs (Y, P_b, P_r) to the COMPONENT (Y, P_b, P_r) IN socket on your TV.

1. Turn on the DVD player and insert a DVD.
2. Press the SOURCE button to select COMPONENT mode.
3. Refer to the DVD player user guide for operating instructions.



Connect a DVD Player or VCR to Your TV

There are two ways in which you can connect a DVD player or VCR to your TV. Make sure that both the TV and DVD player or VCR are switched off before you connect them.

SCART Input

1. Connect the scart lead from the external device (DVD player, Set-top box or games console) to the TV scart socket.
2. Press the **SOURCE** button to select SCART mode.
3. Press the **PLAY** button on the external device.

HDMI Input

1. Connect the cable from the HDMI device to the TV HDMI socket.
2. Press the **SOURCE** button to select HDMI mode.
3. Refer to the HDMI device user guide for how to operate.

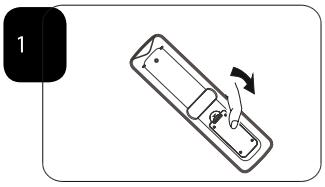
Mount Your TV onto the Wall

You can mount your TV onto the wall by using a wall bracket (not supplied). Use M6 machine screws (4 pcs) to screw the TV onto the bracket (not supplied).

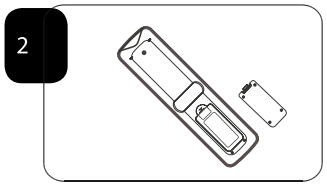
Preparation of Your Remote Control

Battery Installation

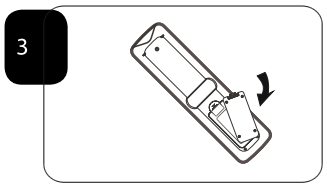
1. Place the remote control face down, then open the cover of the battery compartment.



2. Install two AAA batteries. (The + and - symbol of the battery must match with the marks on the remote).



3. Close the cover of the battery compartment.



Battery Caution

Confirm there is no object between the remote control and the remote sensor of the TV set.

Sunshine or other strong light will interfere with the signal sent by the remote control.Avoid using nearby special fluorescent light or neon signs.

Do not put the remote control in direct heat or in a damp place as you may damage the remote.

Please use two AAA 1.5V batteries. Do not mix battery types. Install the batteries at the correct polarities. Do not use rechargeable batteries. If your TV is to be stored for a period of time, remove the batteries from the remote control.

Do not throw away the battery with common domestic waste. Do not throw them in fire. Dispose of the battery according to local regulation.

Getting Started

Setting up

Location

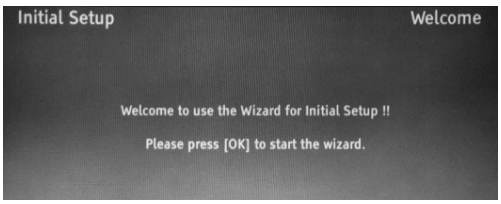
You will need to place your TV near your plug socket (so the power cable can comfortably reach) and within reach of your aerial socket or extension lead.

Connection

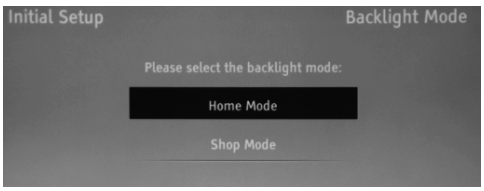
1. Insert your TV aerial lead into the Antenna input at the side of the TV.
2. Insert the batteries into the remote control. Make sure they are inserted the right way around, matching the polarity as indicated inside the battery compartment.

Switching Your TV On

1. Press the **POWER** button on the right of the TV once. A indicator light will appear in the right of the screen.
2. Press **POWER** on the remote control. The TV will turn on. This may take a few moments, and this display will appear on the screen when the TV is turned on for the first time.



3. Press **OK** button on the remote control to enter the Backlight Mode menu.



HOME MODE

Press ▲ ▼ button to select **HOME MODE** and press **OK** button to enter the Language menu.

Press ▲ ▼ button to select **language** and press **OK** button to enter the Country menu.

Press the **INDEX** button to go to the index page of teletext.

Hold

Pressing the button will stop the teletext page automatically updating. This feature is very useful where there are several teletext pages or data on the same page number.

Size

Pressing the button changes between full screen

top half bottom half full screen. This feature is very useful as it magnifies the image making the characters easier to read.

Reveal

Pressing the ? button will reveal hidden text. This feature is used to reveal information such as answers to Teletext on-line interactive puzzles.

Fast text coloured buttons

Fast text automatically displays the four most commonly used pages that the broadcaster thinks that you may want to choose next. Press the same coloured button on the remote control as the coloured link at the bottom of the teletext page to go directly to that page.

Subcode

Pressing the button by entering its 4-digit number to enter a secondary page.

USB Mode

Note

The diagrams in the following section are schematic and only for your reference. Please see the actual product if necessary.

The OSD of the USB function may be somewhat different from your product because it is just example to help the instruction.

To Use the USB Device

1. Supported file formats:
   - Photo: *. jpg;
   - Music: *. mp3 files;
   - Movie: *. avi files;
   - TEXT: *. txt

Note

Due to the particularity of file cording, some files may be unable to read.

2. Supported equipment:
   Support the equipment that supports Mass Storage Protocol and whose file system is FAT32, such as some USB disks, mobile harddisks, and MP3 player. If USB equipment could not be identified due to unsupported file system, please format the equipment to the above-mentioned file system.

3. To achieve smooth playing, ensure the following:
   - The file code rate should be lower than 300KB/S;
   - Due to the limitation of USB signal transmission distance, it is recommended not to use USB patch cord, in case of using the cord, make sure that its length is not over 1m;
   - Use high-speed USB equipment in conformity with USB2.0 full speed Interface Standard; If USB equipment does not comply with USB full speed Interface Standard, the playing may be unsmooth.

Troubleshooting

To assist in location of possible faults use the help guide below:

No picture, no sound	Verify if the television is properly plugged in. Verify if the television has a proper supplied power source. Verify if electricity is available.
Blank screen	Verify if correct signals are input. Operate the remote to change signal input to correct input. Restart the television if power supply is interrupted.
No sound	Press **MUTE** button and verify if Mute mode is set. Switch to other channel and verify if the same problem happens. Press **VOL+** button to see if the problem can be solved.
Poor sound	Verify if sound system is correct. Refer to user's manual for adjustment.
No picture in some channel	Verify if correct channel is selected. Adjust the antenna.
No color for some channel program (black and white)	Verify if the same problem exists in other channels. Check out of picture and sound systems. Refer to relative instructions in the Manual for color adjustment.
Spots with some or all pictures	Verify if the antenna is correctly connected. Verify if the antenna is in good condition. Make fine adjustment of channel.
Television out of control	Disconnect the television from power supply and 10 seconds later, connect the television to the power supply. If the problem still exists, contact authorized after-sales service for technical assistance.

Note

If the fault can not be repaired using the above guide consult with your local authorized service centre.

The TV set must only be repaired by a qualified registered service person. Never attempt to remove the back cover as the TV set has dangerous voltages in side that may cause a fatally or fire.
