READ AND SAVE THESE INSTRUCTIONS!

- ALWAYS place the humidifier in an area that is out of the reach of children.
- Before using the humidifier, extend the cord and inspect for any signs of damage. DO NOT use the product if the cord has been damaged.
- ALWAYS UNPLUG AND EMPTY the humidifier when it is not in operation or while it is being cleaned.
- Do not use water bottles greater than 22 oz.
- This product is intended for residential use only. DO NOT use outdoors.
- This device complies with part 18 of the FCC Rules.

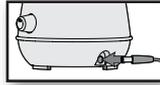

Initial Setup:

1. Unravel and straighten the cord before use.
2. Set the unit on a flat, waterproof surface.
3. Drop one demineralization tablet into your water bottle. (note: The tablet will remove minerals from the water to prevent dust accumulation. The benefits of each tablet will last up to one week between humidifier cleanings.)
4. Use the water cap that came with your humidifier and press it down over the mouth of your water bottle firmly.
5. Turn your water bottle upside down and insert into the water reservoir.

Failure to ensure the tank is seated correctly could cause the unit to leak water from the tank.

6. Insert the power adapter into the bottom right side of the unit, then plug the adapter into a wall outlet.

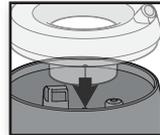

Operation:

To turn the humidifier on, turn the humidity adjustment knob clockwise until you feel the knob click. At this time the unit should be on and you can adjust the amount of mist the unit outputs by continuing to turn the knob clockwise. To turn the unit off, turn the humidity adjustment knob counter-clockwise until it clicks.

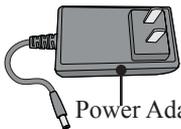

Maintenance:

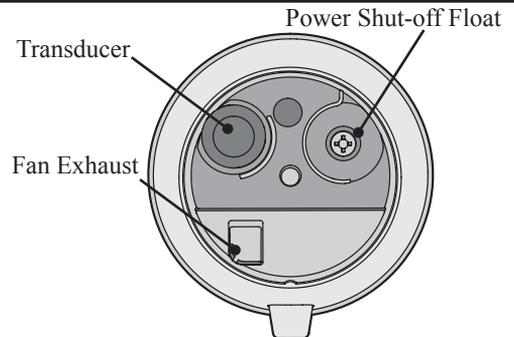

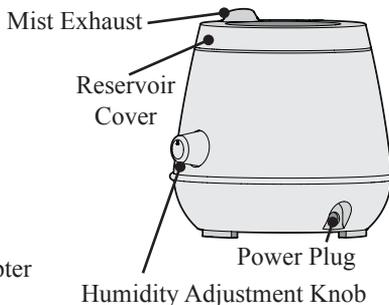

1. Turn off the humidifier and unplug the power adapter from the wall and the unit.
2. Remove the water bottle from the unit and remove the cap.
3. Empty the water from the bottle.
4. Rinse the humidifier cap thoroughly with warm water. Replace the water bottle if necessary.
5. Remove the reservoir cover from the humidifier and empty any remaining water.
6. Wipe any mineral deposits from the cover and base with a soft cloth.
7. Replace the cover onto the base. Align the notch on the cover with the groove on the base. The mist exhaust should be 45° to the right of the humidity adjustment knob.

Troubleshooting:

Problem:

Humidifier not working

Solution:

1. Make sure the humidity knob is not set to OFF.
2. Ensure the power supply is firmly plugged into the unit.

Problem:

Humidity output and water usage decreased

Solution:

1. Check the humidity knob to make sure it is set to the desired humidity level and speed.
2. Check the water bottle to make sure there are no bubbles when the water bottle is full and running. If there are bubbles, turn the unit OFF until the bubbling stops. When the bubbling has stopped, set the unit to the desired speed.
3. Clean any components that have mineral build-up.
