REGULATORY INFORMATION

Before operating the monitor, please read this manual thoroughly. This manual should be retained for future reference.

FCC Class B Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference; and (2) this device must accept any interference received, including interference that may cause undesired operations.

CANADA

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulation.

This device complies with requirement of EMC directive 89/336/EEC with regard to Electromagnetic Compatibility, and 73/23/EEC and 93/68/EEC with regard to Low Voltage directive.

Socket-outlet shall be near the equipment and shall be accessible.

TCO'03 (TCO'03 applied model only)

Congratulations!

The display you have just purchased carries the TCO'03 Displays label. This means that your display is designed, manufactured and tested according to some of the strictest quality and environmental requirements in the world. This makes for a high performance product, designed with the user in focus that also minimizes the impact on our natural environment.

Some of the features of the TCO'03 Display requirements:

Ergonomics

- Good visual ergonomics and image quality in order to improve the working environment for the user and to reduce sight and strain problems. Important parameters are luminance, contrast, resolution, reflectance, colour rendition and image stability.

Energy

- Energy-saving mode after a certain time – beneficial both for the user and the environment
- Electrical safety

Emissions

- Electromagnetic fields
- Noise emissions

Ecology

- The product must be prepared for recycling and the manufacturer must have a certified environmental management system such as EMAS or ISO 14 001
- Restrictions on
 - chlorinated and brominated flame retardants and polymers
 - heavy metals such as cadmium, mercury and lead.

The requirements included in this label have been developed by TCO Development in cooperation with scientists, experts, users as well as manufacturers all over the world. Since the end of the 1980s TCO has been involved in influencing the development of IT equipment in a more user-friendly direction. Our labelling system started with displays in 1992 and is now requested by users and IT-manufacturers all over the world.

RECYCLING INFORMATION

HANNspree Inc. cares about environmental protection strategies and in using manufacturing methods and treatments that lend themselves to conservation and recycling devices at the end-of-life.

Our products, whenever possible, contain recyclable materials which can be recycled into new devices. When necessary for operation, other materials may be classified as hazardous or poisonous substances. We strongly encourage you to research the provided information about recycling this device.

SAFETY NOTICE

1. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
2. Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
3. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibilities of the user to correct such interference.

WARNING:

To prevent fire or shock hazard, do not expose the monitor to rain or moisture. Dangerously high voltages are present inside the monitor. Do not open the cabinet. For all service issues, please refer to qualified personnel only.

PRECAUTIONS

- Do not use the monitor near water, e.g. near a bathtub, washbowl, kitchen sink, laundry tub, swimming pool or in a wet basement.
- Do not place the monitor on an unstable cart, stand, or table. If the monitor falls, it can injure a person and cause serious damage to the appliance. Use only a cart or stand recommended by the manufacturer or sold with the monitor. If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the monitor and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the monitor on a bed, sofa, rug, or similar surface. Do not place the monitor near or over a radiator or heat register. Do not place the monitor in a bookcase or cabinet unless proper ventilation is provided.
- The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- Unplug the unit during a lightening storm or when it will not be used for long period of time. This will protect the monitor from damage due to power surges.
- Do not overload power strips and extension cords. Overloading can result in fire and / or electric shock.
- Never push any object into the slot on the monitor cabinet. It could short circuit parts causing a fire or electric shock. Never spill liquids on the monitor.
- Do not attempt to service the monitor by yourself; opening or removing covers can expose you to dangerous voltages and other hazards. Please refer all service issues to qualified service personnel.
- To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100 - 240V AC, Min. 5A.
- The wall socket shall be installed near the equipment and shall be easily accessible.

SPECIAL NOTES ON LCD MONITORS

The following symptoms are normal with LCD monitor and do not indicate a problem.

- Due to the nature of the fluorescent light, the screen may flicker during initial use. Turn off the Power Switch and then turn it on again to make sure the flicker disappears.
- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- The LCD screen has effective pixels of 99.99% or more. It may include blemishes of 0.01% or less such as a missing pixel or a pixel lit all of the time.
- Due to the nature of LCD screens, an after image of the previous displayed content may remain if this image has been the displayed for several hours. The LCD screen should recover if the image is changed or powered off for several hours.
- If the screen suddenly flashes erratically or the backlighting fails, please contact your dealer or service center for repair. Do not attempt to repair the monitor yourself.

PREFACE

Thank you for purchasing a Hannspree Liquid Crystal Display Monitor (LCD Monitor).

Please carefully read this manual in its entirety before setting up, using or operating your Monitor. To ensure the safe and correct installation and operations of the Monitor, it is important that the safety and operation instructions in this manual are followed.

This instruction manual is designed to assist you in setting up and using the Monitor. The information in this manual has been carefully checked for accuracy; however, no guarantee is given to the correctness of the contents. The information in this manual is subject to change without notice.

To the extent allowed by applicable law, Hannspree, Inc. (“Hannspree”) shall not be liable for direct, indirect, special, exemplary, incidental or consequential damages arising from any defect or omission in this manual, even if advised of the possibility of such damages in advance.

BEFORE YOU OPERATE THE MONITOR

FEATURES

- 19" screen TFT Color LCD Monitor
- Crisp, Clear Display
- Recommended Resolutions:
19" Wide (16:10)1440 X 900
19"(5:4)1280 X 1024
- EPA ENERGY STAR®
- Ergonomic Design
- Space Saving, Compact Case Design

CHECKING THE CONTENTS OF THE PACKAGE

The product package should include the following items:

LCD Monitor

Screen

Base

* Note : The screen and base design may vary on different models. For more information, please refer to the Quick Start Guide of your Monitor model.

Cables and User manual

Power Cord

VGA Cable

Audio Cable

User's manual

Warranty and Service Manual

DVI-D Cable (Optional)

* Note : Images are for illustration only and may vary by model or region.

POWER

POWER SOURCE:

1. Make sure that the power cord is the correct type required in your area.
2. This LCD monitor has an Internal universal power supply that allows operation in either 100/120V AC or 220/240V AC voltage area (No user adjustment is required.)
3. Plug one end of the AC-power cord into the LCD monitor's AC input socket and the other into a surge protection power strip or device.

CONTROLS AND CONNECTORS

CABLE CONNECTIONS:

Turn off your computer before performing the procedure below.

1. Connect one end of the 15-pin D-Sub cable to the back of the monitor and connect the other end to the computer's D-Sub port.
-or-
2. Connect one end of a 24-pin DVI-D to the back of the monitor. Connect the other end to the computer's DVI-D port.
note: This monitor is capable of operating in 'Dual input' mode. Only one of either the 15-pin D-sub or the 24-pin DVI-D connections is needed for normal operation.
3. Connect the audio cable between the monitor's audio input and the PC's audio output (green port). This connection is optional and not required for normal operation of the monitor.
4. Plug one end of the AC-power cord into the LCD monitor's AC input socket and the other into a surge protection power strip or device.
5. Turn on your monitor and computer.

Figure.2. Connecting Cables

1.	D-Sub Input	2.	DVI-D Input
3.	Audio Input	4.	Power AC Input

ADJUSTING THE VIEWING ANGLE

- For optimal viewing it is recommended to look at the full face of the monitor, then adjust the monitor's angle to your own preference.
- Hold the stand so you do not topple the monitor when you change the monitor's angle.
- You are able to adjust the monitor's angle at 20° alternative from -5° to 15° or 0° to 20° .
- For more information, please refer to the Quick Start Guide of your Monitor model.

Figure.3. monitor's angle

NOTES:

- Avoid touching the LCD screen when changing the viewing angle as it may cause damage.
- Be careful not to place fingers or hands near the hinges when tilting the monitor, otherwise pinching can result.

OPERATING INSTRUCTIONS

GENERAL INSTRUCTIONS

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor (See Figure 4). By changing these settings, the picture can be adjusted to your personal preferences.

- The power cord should be connected.
- Connect the Signal cable from the monitor to the computer.
- Press the power button to turn on the monitor. The LED will turn green.

Figure.4. External Control Button

EXTERNAL CONTROLS:

1.	MENU	2.	VOL + ►
3.	POWER	4.	◀ VOL -
5.	AUTO	6.	Power Indicator (LED)

FRONT PANEL CONTROL

- **Power Button:**
Press this button to switch the monitor on and off.
- **Power Indicator (LED):**
Green — Power On mode.
Orange — Power saving mode
- **MENU / ENTER:**
 1. Activate the OSD menu or adjust the function settings and confirmation.
 2. Exit OSD menu when in volume OSD status.
- **◀ VOL - / VOL + ▶ :**
 1. Activates the volume control when the OSD is OFF.
 2. Navigate through adjustment icons when OSD is ON or adjust a function when function is activated.
- **Auto Adjust button:**
When OSD menu is in off status, press this button to activate the Auto Adjustment function.
(The Auto Adjustment function is used to optimized the H-Position, V-Position, Clock and Phase.)

NOTES:

- Do not install the monitor in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, or excessive dust or mechanical vibration or shock.
- Save the original carton and packing materials, as they will come in handy if you ever have to ship your monitor.
- To ensure problem-free shipping, pack your monitor in the same packing materials and carton as it was shipped from the factory.
- To keep the monitor looking new, periodically clean it with a soft cloth. Stubborn stains may be removed with a cloth lightly dampened with a mild detergent solution. Never use strong solvents such as paint thinners, benzene, or abrasive cleaning products. These and other harsh cleaning agents will damage the cabinet of the monitor.

HOW TO ADJUST A SETTING

OSD Diagram	OSD Description
<p style="text-align: center;">Main Menu</p> 	<p>Brightness adjustment: Select the 「Brightness」 option on the 「Main Menu」. Press enter and adjust the level.</p>
<p style="text-align: center;">Main Menu</p> 	<p>Contrast adjustment: Select the 「Contrast」 option on the 「Main Menu」. Press enter and adjust the level.</p>

PLUG AND PLAY (Plug & Play DDC2B Feature)

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the computer or host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities. The DDC2B is a bidirectional data channel based on the I²C protocol. The host can request EDID information over the DDC2B channel.

If your computer, video card, and operating system support DDC2B, your monitor should automatically be set to its optimal configuration. Some computer systems may not have the capability to properly detect this information. In addition, some computer systems will require manually configuring the video options. In most cases, software and/or driver updates will correct this issue. Please contact your computer or video card manufacturer for more details.

THIS MONITOR WILL APPEAR TO BE NON-FUNCTIONAL IF THERE IS NO VIDEO INPUT SIGNAL. IN ORDER FOR THIS MONITOR TO OPERATE PROPERLY, THERE MUST BE A VIDEO INPUT SIGNAL.

This monitor meets the Green monitor standards as set by the Video Electronics Standards Association (VESA) and/or the United States Environmental Protection Agency (EPA) and The Swedish Confederation Employees (NUTEK). This feature is designed to conserve electrical energy by reducing power consumption when there is no video-input signal present. When there is no video input signal this monitor, following a time-out period, will automatically switch to an OFF mode. This reduces the monitor's internal power supply consumption. After the video input signal is restored, full power is restored and the display is automatically redrawn. The appearance is similar to a "Screen Saver" feature except the display is completely off. The display is restored by pressing a key on the keyboard, or clicking the mouse.

TECHNICAL SUPPORT (FAQ)

Q & A FOR GENERAL DEFECTS

PROBLEM & QUESTION	POSSIBLE SOLUTION
Power LED is not on	*Check the power cord.
No Plug & Play or screen image is stretch or seems out of proportion	*Check if the PC system is Plug & Play compatible. *Check if the Video Card is Plug & Play compatible. *Check if the D-15 plug pin of Video Cable is bent or broken.
Picture is dim, too bright or fuzzy	*Adjust the Clock, Phase or Contrast and Brightness Controls. *Manually set resolution to 1440 X 900 (for 19" Wide models) or 1280 X1024 for 19" models. Please consult your operating system manual for specific instructions. *Update Video Card driver
Picture bounces or a wave pattern is present in the picture	*Reposition electrical devices that may cause electrical interference.
The power LED is ON (orange) but there's no video or no picture.	*Computer Power Switch should be in the ON position. *Computer Video Card should be snugly seated in its slot. *Make sure monitor's video cable is properly connected to the computer. *Inspect monitor's video cable and make sure none of the pins are bent. *Make sure computer is operational by hitting the CAPS LOCK key on the keyboard while observing the CAPS LOCK LED. The LED should either turn ON or OFF after hitting the CAPS LOCK key.
Missing one of the primary colors (RED, GREEN, or BLUE)	*Inspect the monitor's video cable and make sure that none of the pins are bent.
Screen image is not centered or sized properly.	*Adjust pixel frequency CLOCK and PHASE or press hot-key (AUTO).
Picture has color defects (white does not look white)	*Adjust RGB color or select color temperature.
Horizontal or vertical disturbances on the screen	*Use win 95/98/2000/NT/ME/XP; "shut-down mode. Adjust CLOCK" and PHASE or perform hot- key (AUTO).

ERROR MESSAGE & POSSIBLE SOLUTION

■ CABLE NOT CONNECTED :

1. Check whether the signal-cable is properly connected. If the connector is loose, tighten the connector screws.
2. Check the signal-cable's connection pins for damage.

■ INPUT NOT SUPPORT :

Your computer has been set to an unsuitable display mode. Set the computer to a display mode from the table below:
