**Connection of rearview camera possible via optional
adapter cable CA 1205**

Auto-switch to camera image when reverse gear activated

MM 2100

Rearview Mirror with integrated 4" Colour TFT-Display

Application

MM 2100 is a rearview mirror, which includes a 4" TFT-Monitor to display the image of a connected Navigation Computer (PC54xx and higher).

Navigation Display

All information is clearly visible on the unit's 4:3 TFT-Screen. It's position close to the driver's eye supports the usage of a smaller display. Brightness and Volume of the Navigation Guidance can be adjusted manually for the most convenient setting.

Installation

Simply by connecting the 7m cable to the Navigation Computer and fixing the MM 2100 over the vehicle's rearview mirror, the full featured Colour Navigation System is ready for use - no dashboard damage, no additional cables and / or accessories required!

Integration & Anti-Theft Protection

MM 2100 is perfectly integrated into the car-interior since it does not occupy any space in the dashboard-area. An important side-effect: The unit is hardly visible from outside the car and therefore does not attract unwanted attention.

Full-Automatic Power-Supply

The display of MM 2100 is powered by the Navigation Computer which makes additional cables unnecessary. Of course, the display can be switched off manually if needed.

Note:

For optimal usage of MM 2100, the following selections should be activated in the Settings-Menu of the Navigation-Computer:

- "4:3 Monitor"
- "Sync in Green"

In case of questions, please contact your dealer.

Technical Data MM 2100

- Display size: 4"
- Aspect ratio: 4:3
- Resolution: 480(H) x 234(V) Delta type
- Brightness: 250 cd/cm²
