

FLAT TV LINK 4™

Four devices connected to your TV with one cable

*Connect 4 devices to your (flat screen)
TV using only one cable.*

Switch between devices.

No need to change cables anymore.

MARMITEK®

FLAT TV LINK 4

- Create several connections for your (flat screen) TV.
- Connect it once: done! No need to change cables anymore.
- Use one cable to connect all your equipment to your (flat screen) TV, retaining quality.
- Fully RGB compatible for optimal video quality.
- 4 inputs, 1 output.
- Every input can be used for Scart RGB, RCA, S-Video and digital optical connection.
- No loss of signal thanks to SRT™ (Signal Regulator Technology).
- Long lasting electronic switch, including remote control.
- Metal housing to protect against distortion or interference.
- Stylish design, to fit in with most types of A/V equipment.

HOW DOES IT WORK?

Connect your audio/video equipment to the inputs. Then connect the TV to the output. You can select the devices connected using the remote control included or by pressing a button on the front of the Flat TV Link.

WHAT IS SRT?

SRT™ stands for Signal Regulator Technology. SRT compensates if there is a loss of signal.

PERFECT INTEGRATION WITH OTHER DEVICES!

The Flat TV Link is 43 cm wide, the format most used for audio/video equipment. It is possible to connect the output of the Flat TV Link to a Marmitek GigaVideo or MegaVideo transmitter. This means you can also watch the images elsewhere in the house.

GigaVideo 70

MegaVideo 55
