

ORION:T3290

# Classic European Design

## Technology of the Future

### 32" Real-flat Widescreen Format with Stereo, Teletext and more...

The Orion T3290 is designed and manufactured in Italy with classic styling and advanced technology that delivers state of the art performance and a wealth of features.

Manufactured under strict European quality control standards, this model has been designed and built with the new widescreen, digital format in mind, offering magnificent stereo sound, teletext and automatic tuning. The Orion T3290 offers the engineering, looks and features found only in other brands costing considerably more.

Orion offers a full 2 year in home warranty with an additional 1 year warranty on the picture tube. Compare this to other brands and you will see that Orion is prepared to back up its world-wide reputation for quality and reliability.
