Operating Instructions

Progressive Wide Plasma Display

Model No. **TH-37PWD6**
TH-42PWD6

High Definition Plasma Display

Model No. **TH-42PHD6**
TH-50PHD6

Before connecting, operating or adjusting this product, please read these instructions completely. Please keep this manual for future reference.

English

	WARNING RISK OF ELECTRIC SHOCK DO NOT OPEN	
WARNING: To reduce the risk of electric shock, do not remove cover or back. No user-serviceable parts inside. Refer servicing to qualified service personnel.		

The lightning flash with arrow-head within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

WARNING: To prevent damage which may result in fire or shock hazard, do not expose this apparatus to rain or moisture. Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)

WARNING: 1) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
2) Do not remove the grounding pin on the power plug. This apparatus is equipped with a three pin grounding-type power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the grounding plug.

Important Safety Instructions

- 1) Read these instructions.
All the safety and operating instructions should be read before the appliance is operated.
- 2) Keep these instructions.
The safety and operating instructions should be retained for future reference.
- 3) Heed all warnings.
All warnings on the appliance and in the operating instructions should be adhered to.
- 4) Follow all instructions.
All operating and use instructions should be followed.
- 5) Do not use this apparatus near water.
For example, near a bathtub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.
- 6) Clean only with dry cloth.
Do not use liquid cleaners or aerosol cleaners. Use a dry cloth for cleaning.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
Slots and Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments / accessories specified by the Manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over.
Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
This will prevent damage to the product due to lightning and power-line surges.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- 15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected.

Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt as well, and record the model number and serial number of your set in the space provided on the rear cover of these instructions.

FCC STATEMENT

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC CAUTION:

Pursuant to 47CFR, Part 15.21 of the FCC rules, any changes or modifications to this monitor not expressly approved by Matsushita Electric Corporation of America could cause harmful interference and would void the user's authority to operate this device.

Attach the ferrite core:

The ferrite cores provided as a supplied accessory must be used when connecting this Plasma Display to video equipment. (see page 10, 11)

FCC CAUTION:

To assure continued compliance and possible undesirable interference, the provided ferrite cores must be used when connecting this plasma display to video equipment; and maintain at least 40 cm of spacing from other peripheral devices. Refer to instructions on pages 10, and 11.

CANADIAN NOTICE:

This Class A digital apparatus complies with Canadian ICES-003.

Note:

Do not allow a still picture to be displayed for an extended period, as this can cause permanent after-image to remain on the Plasma Display.

Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

Trademark Credits

- VGA is a trademark of International Business Machines Corporation.
- Macintosh is a registered trademark of Apple Computer, USA.
- S-VGA is a registered trademark of the Video Electronics Standard Association.

Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.

Safety Precautions

WARNING

Set up

Do not place the Plasma Display on sloped or unstable surfaces.

- The Plasma Display may fall off or tip over.

Do not place any objects on top of the Plasma Display.

- If water spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult an Authorized Service Center.

Do not cover the ventilation holes.

- Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

If using the pedestal (optional accessory), leave a space of 3 ¹⁵/₁₆" (10 cm) or more at the top, left and right, 2 ³/₈" (6 cm) or more at the bottom, and 2 ³/₄" (7 cm) or more at the rear. If using some other setting-up method, leave a space of 3 ¹⁵/₁₆" (10 cm) or more at the top, bottom, left and right, and ³/₄" (1.9 cm) or more at the rear.

Avoid installing this product near electronic equipment that easily receives electromagnetic waves.

- It may cause interference in image, sound, etc. In particular, keep video equipment away from this product.

AC Power Supply Cord

The Plasma Display is designed to operate on 120 V AC, 50/60 Hz.

Securely insert the power cord plug as far as it will go.

- If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket plate is loose, they should not be used.

Do not handle the power cord plug with wet hands.

- Doing so may cause electric shocks.

Do not do anything that might damage the power cable. When disconnecting the power cable, hold the plug, not the cable.

- Do not make any modifications, place heavy objects on, place near hot objects, heat, bend, twist or forcefully pull the power cable. Doing so may cause damage to the power cable which can cause fire or electric shock. If damage to the cable is suspected, have it repaired at an Authorized Service Center.

If the Plasma Display will not be used for a long period of time, unplug the power cord from the wall outlet.

If problems occur during use

If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odor is detected from the Plasma Display, unplug the power cord immediately.

- Continuous use of the Display under these conditions might cause fire or permanent damage to the unit. Have the Display evaluated at an Authorized Service Center. Services to the Display by any unauthorized personnel are strongly discouraged due to its high voltage dangerous nature.

If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damaged, disconnect the power cord plug immediately.

- A short may occur, which could cause fire. Contact an Authorized Service Center for any repairs that need to be made.

CAUTION

This Plasma Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Matsushita Electric Industrial Co., Ltd.)

- Speakers TY-SP37P5W-K (TH-37PWD6),
TY-SP42P5W-K (TH-42PWD6, TH-42PHD6),
TY-SP50P5W-K (TH-50PHD6)
- Pedestal TY-ST05-K
- Wall stand TY-ST42PW1
- Mobile stand TY-ST42PF3 (TH-42PWD6, TH-42PHD6, TH-50PHD6)
- Wall-hanging bracket (vertical) TY-WK37PV3 (TH-37PWD6),
TY-WK42PV1 (TH-42PWD6, TH-42PHD6, TH-50PHD6)
- Wall-hanging bracket (angled) TY-WK42PR1 (TH-42PWD6, TH-42PHD6, TH-50PHD6)
- Wall-hanging bracket (drawer type) TY-WK42DR1 (TH-42PWD6, TH-42PHD6, TH-50PHD6)
- Ceiling unit TY-CE42PS1
- BNC Component Video Terminal Board TY-42TM6A
- BNC Composite Video Terminal Board TY-42TM6B
- RCA Component Video Terminal Board TY-42TM6Z
- RCA Composite Video Terminal Board TY-42TM6V
- RGB (Digital) Terminal Board TY-42TM6D
- RGB Active Through Terminal Board TY-42TM6G
- PC Input Terminal Board TY-42TM6P

Always be sure to ask a qualified technician to carry out set-up.

When using the Plasma Display

Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.

- Top of the Plasma Display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries can happen if any body parts are brought too close. Placing any object near the top of the display could also result in heat damages to the object as well as to the Display if its ventilation holes are blocked.

Be sure to disconnect all cables before moving the Plasma Display.

- Moving the Display with its cables attached might damage the cables which, in turn, can cause fire or electric shock.

Disconnect the power plug from the wall outlet as a safety precaution before carrying out any cleaning.

- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it from becoming dusty.

- Built-up dust on the power cord plug can increase humidity which might damage the insulation and cause fire. Unplug the cord from the wall outlet and clean it with a dry cloth.

This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment.

Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.

- If the surface is particularly dirty, soak a soft, lint-free cloth in a weak detergent solution and then wring the cloth to remove excess liquid. Use this cloth to wipe the surface of the display panel, then wipe it evenly with a dry cloth, of the same type, until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.

- If the cabinet is particularly dirty, soak the cloth in a weak detergent solution and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

Note:

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent after-image to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

Requires two AA batteries.

1. Turn the transmitter face down. Press and slide off the battery cover.

2. Install two AA batteries (Positive (+) and Negative (-) terminals).

3. Replace the cover and slide in reverse until the lock snaps.

Helpful Hint:

For frequent remote control users, use Alkaline batteries for longer life.

Replace old batteries with

⚠ Precaution on battery use

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter.

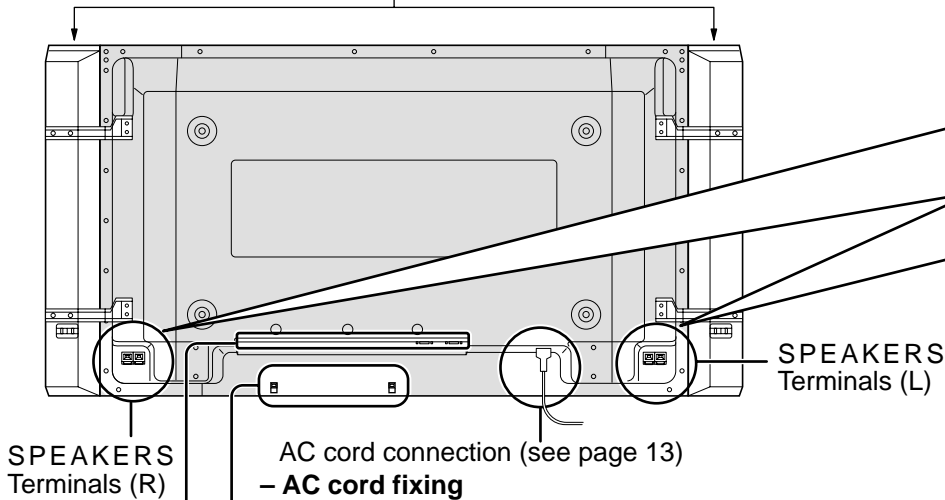

Observe the following precautions:

1. Batteries should always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when the remote control acts sporadically or stops operating the Plasma Display.

Connections

When connecting the speakers, be sure to use only the optional accessory speakers. Refer to the speaker's Installation Manual for details on speaker installation.

(Example : TH-42PWD6) Speakers (Optional accessories)

- AC cord fixing

1. Open the clamber.

2. Insert the AC cord and close the clamber securely.

3. Slide up the clamber and fix the AC cord plug securely.

Note: The power plug in the illustration may not be the type fitted to your set.

- Cable fixing bands

Secure any excess cables with bands as required.

Pass the attached cable fixing band through the clip as shown in the figure.

To secure cables connected to Terminals, wrap the cable fixing band around them then pass the pointed end through the locking block, as shown in the figure.

While ensuring there is sufficient slack in cables to minimize stress (especially in the power cord), firmly bind all cables with the supplied fixing band.

Optional Terminal Board Insert Slot (covered)

AV Terminals (see page 12)

COMPONENT/RGB IN and Audio IN Terminals (see page 12)

From EXTERNAL monitor terminal on Computer (see page 10)

From SERIAL Terminal on Computer (see page 11)

Note: At factory shipment, Terminal boards are installed in SLOT 2 and SLOT 3. TH-37PWD6 has 2 SLOTS only.

SERIAL Terminals connection

The SERIAL terminal is used when the Plasma Display is controlled by a computer.

Notes:

- (1) Use the RS-232C cable to connect the computer to the Plasma Display.
- (2) The computer shown is for example purposes only.
- (3) Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal.

The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

Communication parameters

Signal level	RS-232C compliant
Synchronization method	Asynchronous
Baud rate	9600 bps
Parity	None
Character length	8 bits
Stop bit	1 bit
Flow control	-

RS-232C Conversion cable	
D-sub 9-pin female	Details
②	R X D
③	T X D
⑤	GND
④ • ⑥	Non use
⑦	Shorted
⑧	
① • ⑨	NC

Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

Notes:

- (1) If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- (2) If an incorrect command is sent by mistake, this unit will send an "ER401" command back to the computer.

Command

Command	Parameter	Control details
PON	None	Power ON
POF	None	Power OFF
AVL	**	Volume 00 - 63
AMT	0	Audio MUTE OFF
	1	Audio MUTE ON
IMS	None	Input select (toggle)
	SL1	Slot1 input
	SL2	Slot2 input
	SL3	Slot3 input
	PC1	PC input
DAM	None	Screen mode select (toggle)
	NORM	NORMAL (4:3)
	ZOOM	ZOOM
	FULL	FULL
	JUST	JUST
	SELF	Panasonic AUTO

With the power off, this display responds to PON command only.

Connections

Power ON/OFF

AC cord connection

Connecting the AC cord plug to the Plasma Display.

Fix the AC cord plug securely to the Plasma Display with the clamber. (See page 9)

Power ON/OFF

Connecting the plug to the Wall Outlet

Press the POWER switch on the Plasma Display to turn the set on : POWER-ON.

Power Indicator : Green

Example: The screen below is displayed for a while after the Plasma Display is turned on. (setting condition is an example.)

When the POWER is turned on for the first time, the LANGUAGE selection screen is displayed.

From the second time on, language selection can be done from the setup menu. (see page 18)

Select the desired language using the ▲ and ▼ keys and press the ACTION button.

From the second time on, the screen shown below is displayed for a while (setting condition is an example).

Press the  button on the remote control to turn the Plasma Display off.

Power Indicator: Red (STAND-BY)

Press the  button on the remote control to turn the Plasma Display on.

Power Indicator: Green

To turn the power for the Plasma Display off, press the  switch on the Plasma Display, when the Plasma Display is on or in standby mode.

Note: During operation of the power management function, the power indicator turns orange in the power off state.

Basic Controls

Power Indicator

The Power Indicator will light.

- Power-OFF .. Indicator not illuminated (The unit will still consume some power as long as the power cord is still inserted into the wall outlet.)
- Stand-by ϕ Red
- Power-ON Green
- DPMS Orange [With PC input signal and during operation of PC's screensaver.]

C.A.T.S sensor

Plasma C.A.T.S (Contrast Automatic Tracking System)

Plasma C.A.T.S automatically senses the ambient light conditions and adjusts the brightness and gradation accordingly, to optimise contrast. (Effective when Picture mode is set to Auto.)

MENU Screen ON/OFF

Each time the MENU button is pressed, the menu screen will switch. (see page 16)

INPUT button

(INPUT1, INPUT2, INPUT3 and PC IN Selection) (see page 18)

Volume Adjustment

Volume Up "+" Down "-"

When the menu screen is displayed.

"+": press to move the cursor up

"-": press to move the cursor down

(see page 16)

Status button

Press the "Status" button to display the current system status.

N button

(see page 20, 21, 22, 23)

PICTURE button

(see page 22)

MULTI PIP

Each time pressing this button main picture and sub picture will be displayed as follows bellow.

SELECT

Press the SELECT button

Under the main Picture and sub picture display, select the picture which you would like to change input modes.

INPUT

Press to change input signal.

ZOOM MOVE

Press the MOVE button

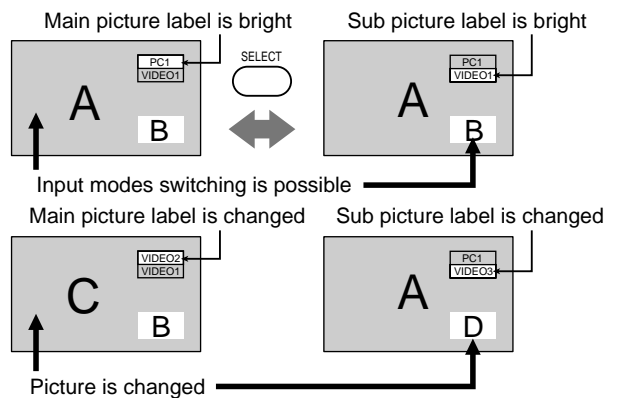

Each time the location of the sub picture will be moved.

Notes: (1) This button is effective only in the picture in picture.

(2) The sub picture may be hidden by the on screen display, depending on its position.

Note: Sound output is from the main picture.

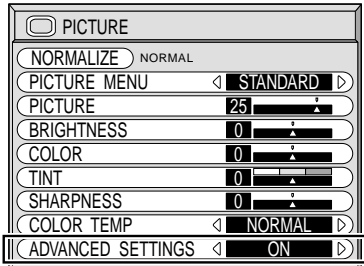

[Example]

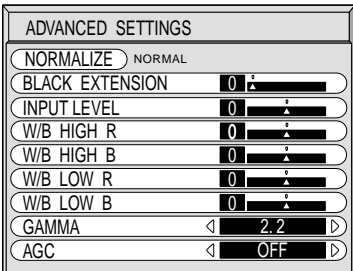

On-Screen Menu Displays

To PICTURE adjust menu
(see page 22)

Press to select
"ON".
Press to enter
ADVANCED
SETTINGS.

To ADVANCED SETTINGS
(see page 22, 23)

"COMPONENT" input signal.

During "RGB/PC" and "DVI"
input signal .

The MENU button on the unit can also
be pressed.

Each time the MENU button is pressed,
the menu screen will switch.

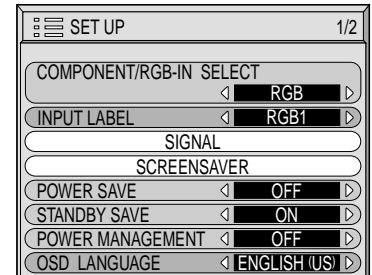

Normal Viewing → PICTURE → SET UP
SOUND ← PICTURE POS./ SIZE ←

[from the unit]

① Press to select.
② Press to access each adjust
screen.

On-Screen Menu Display from Remote Control

② Press to access each adjust screen.

Press the R button to return to previous menu.

To SIGNAL screen for VIDEO (S VIDEO) (see page 33, 34)

To SIGNAL screen for COMPONENT (see page 34)

To SIGNAL screen for RGB and DVI (see page 35)

Note: "SIGNAL" setup menu displays a different setting condition for each input signal. (see page 18)

Input Signal Selection

Select the Input Signal

Press the INPUT button to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

Input signals will change as follows:

Notes:

- (1) Input terminal will not be selected if the terminal board is not installed into the SLOT.
- (2) Select to match the signals from the source connected to the component/RGB input terminals. (see page 33)
- (3) In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.

Selecting the On-Screen Menu Language

press to display the SET UP menu.

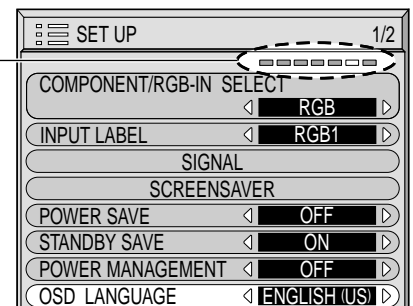

press to select OSD LANGUAGE.

press to select your preferred language.

- Español
- ENGLISH(US)
- 中文(Chinese)

Adjusting PICTURE POSITION/SIZE

Adjusting screen

1

PICTURE POS./SIZE

Press to display the PICTURE POS./SIZE menu.

2

Press to select H-POS/H-SIZE/V-POS/V-SIZE/CLOCK PHASE.

During "VIDEO (S VIDEO)" and "COMPONENT" input signal.

During "RGB/PC" and "DVI" input signal.

3

Press to adjust POS./SIZE.

Press to exit from adjust mode.

Notes:

- Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/DVI signals are memorized for each frequency.)
- If a "Cue" or "Rew" signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the PICTURE POS./SIZE function.

H-POS	When the Position Left "◀" button is pressed 	When the Position Right "▶" button is pressed 
H-SIZE	When the Position Left "◀" button is pressed 	When the Position Right "▶" button is pressed 
V-POS	When the Position Left "◀" button is pressed 	When the Position Right "▶" button is pressed 
V-SIZE	When the Position Left "◀" button is pressed 	When the Position Right "▶" button is pressed 
CLOCK PHASE (RGB/PC in Mode)	Flickering and distortion can be eliminated by using the Position Left "◀" or Right "▶" button to carry out adjustment.	

Helpful Hint (/ Normalization)

While the PICTURE POS./SIZE display is active, if either the N button on the remote control is pressed at any time or the  (ACTION button) is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

SOUND Adjustment

1  Press to display the Sound menu.

2 Select to adjust each item.

• To end adjustments

Note:

Press the SURROUND button to directly turn the surround effect ON and OFF. (see page 15)
BASS, TREBLE and SURROUND settings are memorized separately for each SOUND mode (STANDARD, AUTO).

Helpful Hint (/ Normalization)

While the "SOUND" menu is displayed, if either the N button on the remote control is pressed at any time or the  (ACTION button) is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

MUTE

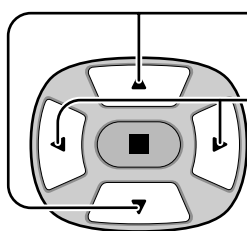

Useful when answering the phone or receiving visitors.

PICTURE Adjustments

1  Press to display the PICTURE menu.

2 Select to adjust each item.

 Press to select the menu to adjust.
Select the desired level by looking at the picture behind the menu.

Press the left ◀ or right ▶ button to switch between modes.

AUTO

Automatically selects the mode that best suits the brightness of the environment.

STANDARD

For viewing in standard (evening lighting) environments. This menu selects the normal levels of BRIGHTNESS and PICTURE.

DYNAMIC

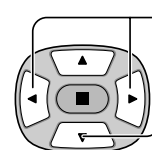

For viewing in brighter environments. This menu selects higher than normal levels of BRIGHTNESS and PICTURE.

CINEMA

Ideal for movies.

Note:

If you would like to change the picture and color of the selected PICTURE menu to something else, adjust using the items in the PICTURE menu. (see next page)

 Press to select "ON".
Press to enter Advanced Settings.

ADVANCED SETTINGS ON
Enables fine picture adjustment at a professional level (see next page).

ADVANCED SETTINGS OFF
Displays images with settings of the PICTURE menu.

Press the left ◀ or right ▶ button to switch between modes.

Helpful Hint (/ Normalization)

While the "PICTURE" menu is displayed, if either the N button on the remote control is pressed at any time or the  (ACTION button) is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

Item	Effect	Adjustments
PICTURE	 Less More	Adjusts the proper picture contrast.
BRIGHTNESS	 Darker Brighter	Adjusts for easier viewing of dark pictures such as night scenes and black hair.
COLOR	 Less More	Adjusts color saturation.
TINT	 Reddish Greenish	Adjust for natural flesh tones.
SHARPNESS	 Less More	Adjusts picture sharpness.

Notes:

- (1) "COLOR" and "TINT" settings cannot be adjusted for "RGB/PC" and "DVI" input signal.
- (2) You can change the level of each function (PICTURE, BRIGHTNESS, COLOR, TINT, SHARPNESS) for each PICTURE menu.
- (3) The setting details for STANDARD, DYNAMIC and CINEMA respectively are memorized separately for each input mode (INPUT1, INPUT2, INPUT3 and PC IN).
- (4) The "TINT" setting can be adjusted for NTSC signal only during "VIDEO (S VIDEO)" input signal.

Note:

In PICTURE, there is nor a noticeable change even when contrast is increased with a bright picture or reduced with a dark picture.

ADVANCED SETTINGS

Item	Effect	Details
BLACK EXTENSION	 Less More	Adjusts the dark shades of the image in gradation. (This cannot be adjusted when the input signal is RGB or DVI.)
INPUT LEVEL	 Less More	Adjustment of parts which are extremely bright and hard to see.
W/B HIGH R	 Less More	Adjusts the white balance for light red areas.
W/B HIGH B	 Less More	Adjusts the white balance for light blue areas.
W/B LOW R	 Less More	Adjusts the white balance for dark red areas.
W/B LOW B	 Less More	Adjusts the white balance for dark blue areas.
GAMMA	 Down Up	S CURVE \longleftrightarrow 2.0 \longleftrightarrow 2.2 \longleftrightarrow 2.5
AGC	 OFF ON	Increases the brightness of dark signal automatically.

Notes:

- (1) Carry out "W/B" adjustment as follows.
 - A** Adjust the white balance of the bright sections using the "W/B HIGH R" and "W/B HIGH B" settings.
 - B** Adjust the white balance of the dark sections using the "W/B LOW R" and "W/B LOW B" settings.
 - C** Repeat steps **A** and **B** to adjust.

Steps **A** and **B** affect each other's settings, so repeat each step in turn to make the adjustment.
- (2) The adjustment values are memorized separately for each input mode (INPUT1, INPUT2, INPUT3 and PC IN).
- (3) The adjustment range values should be used as an adjustment reference.

Helpful Hint (/ Normalization)

On the remote control unit, while the "ADVANCED SETTINGS" menu is displayed, if either the N button is pressed at any time or the (ACTION button) is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

PRESENT TIME SETUP/SET UP TIMER

The timer can switch the Plasma Display ON or OFF.

Before attempting Timer Set, confirm the PRESENT TIME OF DAY and adjust if necessary. Then set POWER ON TIME/POWER OFF TIME.

1

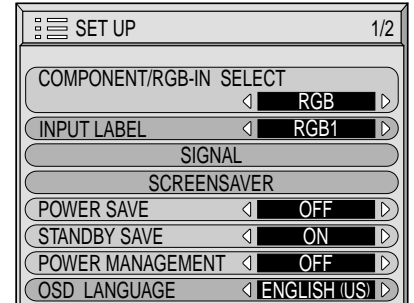

Press to display the SETUP menu screen.

2

Press to select SET UP TIMER or PRESENT TIME SETUP.

Press to display the SET UP TIMER screen or PRESENT TIME SETUP screen.

PRESENT TIME SETUP

Display the PRESENT TIME SETUP screen.

To set up PRESENT TIME, follow the procedure described below.

1

Press to select PRESENT TIME OF DAY.

Press to set up PRESENT TIME OF DAY.
▶ button: Forward
◀ button: Back

Notes:

- Pressing "◀" or "▶" button once changes PRESENT TIME OF DAY 1minute.
- Pressing "◀" or "▶" button continuously changes PRESENT TIME OF DAY by 15 minutes.

2

Press to select Set.

Press to store PRESENT TIME SETUP.

Note:

Set cannot be selected unless PRESENT TIME OF DAY is set.

Press to exit from PRESENT TIME SETUP.

SET UP TIMER

Display the SET UP TIMER SCREEN.

1

Press to select
POWER ON TIME/POWER OFF TIME.

Press to set up POWER ON TIME/
POWER OFF TIME.

▶ button: Forward
◀ button: Back

Notes:

- Pressing “◀” or “▶” button once changes POWER ON TIME / POWER OFF TIME 1minute.
- Pressing “◀” or “▶” button continuously changes POWER ON TIME / POWER OFF TIME by 15 minutes.

2

Press to select POWER ON FUNCTION/
POWER OFF FUNCTION.

Press to select ON.

3

Press twice to exit from SETUP.

Note:

Timer function will not work unless “PRESENT TIME OF DAY” is set.

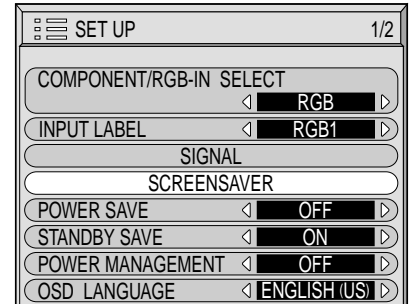

SCREENSAVER (For preventing after-images)

Do not display a still picture, especially in 4:3 mode, for any length of time.
If the display must remain on, a SCREENSAVER should be used.

1

Press to display the SETUP menu screen.

2

Press to select the SCREENSAVER.

Press to select the SCREENSAVER screen.

NEGATIVE / SCROLL selection

3

Press to select the FUNCTION.

Press to select the desired function.

WHITE BAR SCROLL ← → NEGATIVE

WHITE BAR SCROLL : A white bar will scroll from left to right.

NEGATIVE : A negative image will be displayed on the screen.

MODE selection

4

Press to select the MODE.

Press to select each mode items.

- OFF
- ↕
- INTERVAL : Operates when SHOW DURATION and SAVER DURATION are set up and those times arrive.
- ↕
- TIME OF DAY : Operates when START TIME and FINISH TIME are set up and those times arrive.
- ↕
- ON : Operates when START is selected and the (ACTION) is pressed.

START setting

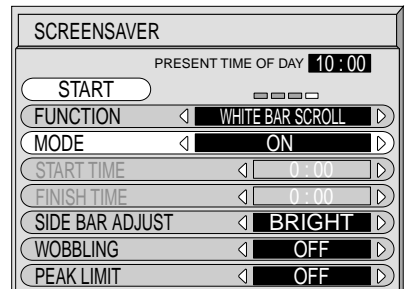

5

When the Mode is set to ON, press to select START.

Press to start SCREENSAVER.

The menu screen will disappear and the SCREENSAVER will be activated. To stop the SCREENSAVER under ON, press the button.

Setup of SCREENSAVER Time

After selecting TIME OF DAY or INTERVAL, the relevant SET UP TIME will become available for selection and the OPERATING TIME may be set. (Time cannot be set when "MODE" is "ON" or "OFF.")

Press to select START TIME/ FINISH TIME
(When TIME OF DAY is selected).
Press to select SHOW DURATION/ SAVER
DURATION (When INTERVAL is selected).

Press to set up.

▶ button: Forward
◀ button: Back

Notes:

- Pressing "◀" or "▶" button once changes the TIME 1minute.
[However, switching occurs every 15 minutes when Periodic Time is selected.]
- Pressing "◀" or "▶" button continuously changes the TIME by 15 minutes.

Note: Timer function will not work unless "PRESENT TIME OF DAY" is set.

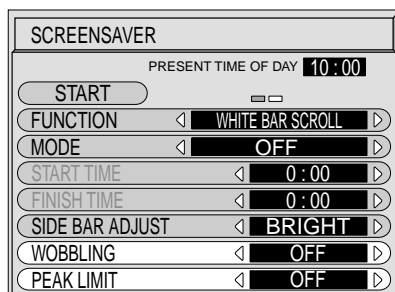

Reduces screen after-image

These functions prevent the occurrence of an "after image" on the display when turned ON.

WOBBLING : Automatically shifts the display image at a dot level pitch (therefore unnoticeable to the eye) over time to prevent after image of sharper contour of image.

PEAK LIMIT : Suppresses image contrast (peak brightness).

- 1 Press to display the SET UP menu screen.
- 2 Press to select "SCREENSAVER".
- 3 Press to display SCREENSAVER menu.
- 3 Press to select "WOBBLING" or "PEAK LIMIT".
- 3 Press to select "ON" or "OFF".

SCREENSAVER (For preventing after-images)

SIDE BAR ADJUST

Do not display a picture in 4:3 mode for an extended period, as this can cause an after-image to remain on the side bars on either side of the display field.

To prevent the appearance of such an after-image, change the brightness of the side bars.

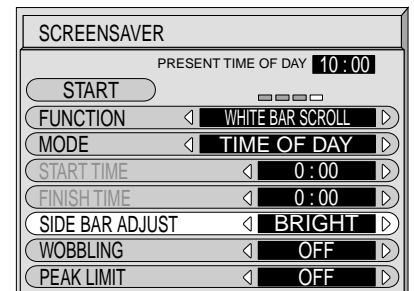

This function may be applicable to the non-picture area.

1 To display the SCREENSAVER screen.
(Refer to the previous page, operation guide steps 1 and 2)

2  Press to select the SIDE BAR ADJUST.
Press to select OFF, DARK, MID, BRIGHT.

3  Press to exit from SCREENSAVER.

Notes:

- Setting the side bar to bright mode for an extended period may result in occurrence of after-images.
- The side bar may flash (alternate black/white) depending on the picture being shown on the screen. In such an occurrence, use the Cinema mode.

Digital Zoom

This displays an enlargement of the designated part of the displayed image.

1 Display the "Operation Guide".

 Press to access Digital Zoom.

The "Operation Guide" will be displayed.

2 Select the area of the image to be enlarged.

 Press on the enlargement location to select.

The cursor will move.

3 Select the magnification required for the enlarged display.

 Each time this is pressed, the magnification factor changes. This is shown in the image being displayed.

4 Return to normal display (quit Digital Zoom).

 Press to exit from the Digital Zoom.

Notes:

- (1) When power goes OFF (including "Off Timer" operation), Digital Zoom terminates.
- (2) The Digital Zoom function cannot be selected while in the following operation states:
 - "Multi-screen" (MULTI DISPLAY).(see page 31)
 - "Multi-viewer" (Picture in Picture, Picture out Picture, Picture and Picture) operation. (see page 14)
- (3) While Digital Zoom is in operation, "Adjusting Picture Pos./Size" cannot be used.
- (4) For RGB/PC input signals, normal multi-display magnification is only available at the VGA, SVGA and XGA resolution.
- (5) The Digital Zoom capability is functional for the following component signals:
525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24sF, 750 (720) / 60p · 50p, 1250 (1080) / 50i
- (6) The Digital Zoom capability is functional for the following composite signals:
NTSC, PAL, SECAM

Reduces power consumption

- **POWER SAVE:** When this function is turned ON, luminous level of the plasma display is suppressed, so power consumption is reduced.
- **STANDBY SAVE:** When this function is turned ON, power consumption of the microcomputer is reduced during power supply standby (see page 13,14,15), so standby power of the set is reduced.
- **POWER MANAGEMENT:** The unit power supply is turned ON or OFF depending on whether or not there is a signal during PC input mode. This function is enabled when it is turned ON. (Only during input from PC(Mini D-sub) terminal)
- **AUTO POWER OFF:** Equipment power supply is turned OFF when there is no signal. When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop. This function is effective for input signals except input from PC (Mini D-sub) terminal.

Note:

"POWER MANAGEMENT" and "AUTO POWER OFF" are effective during normal viewing (one picture screen) only.

Customizing the Input labels

This function can change the label of the Input signal to be displayed.

Notes:

While selecting a Input signal through Optional Terminal Board connected to Slot 1 to Slot 3, the Input label will depend on each Optional Terminal Board.

INPUT LABELS for Slot 1 to Slot 3 and miniD-sub:

- [Slot1 Input] INPUT1/VIDEO1/COMPONENT1/RGB1/RGB1(digital)/PC1/DVD1/CATV1/VCR1/STB1
- [Slot2 Input] INPUT2/VIDEO2/COMPONENT2/RGB2/RGB2(digital)/PC2/DVD2/CATV2/VCR2/STB2
- [Slot3 Input] INPUT3/VIDEO3/COMPONENT3/RGB3/PC3/DVD3/CATV3/VCR3/STB3
- [PC (MiniD-sub) input] PC/COMPONENT/RGB/DVD/STB

Setup for MULTI DISPLAY

- ① By lining up Plasma Displays in groups of 4 or 9 as illustrated below, an enlarged picture may be displayed across all screens.
- ② For this mode of operation, each plasma display has to be set up with a DISPLAY number to determine its location.

group of 4 (2x2)

group of 9 (3x3)

How to setup MULTI DISPLAY

1

Press to display the SETUP menu screen.

2

Press to select the MULTI DISPLAY SETUP.

Press to display the "MULTI DISPLAY SETUP" menu.

3

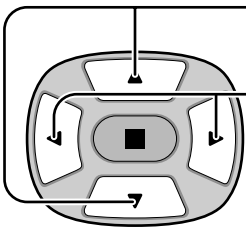

Press to select the MULTI DISPLAY SETUP.

Press to select "ON" or "OFF".

How to set the Display location number for each Plasma Display

4

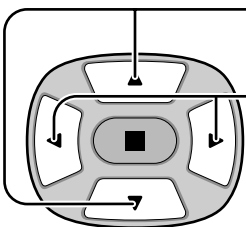

Press to select ARRANGEMENT (2nd step).

Press to select "2x2", "3x3".

5

Press to select LOCATION.

Press to select the required arrangement number. (A1-C3 : Refer to the following)

DISPLAY NUMBER locations for each arrangement.

(2x2)

A1	A2
B1	B2

(3x3)

A1	A2	A3
B1	B2	B3
C1	C2	C3

6

Press twice to exit from SETUP.

Notes:

- (1) For RGB/PC input signals, normal multi-display magnification is only available at the VGA, SVGA and XGA resolution.
- (2) The multi-display capability is functional for the following component signals:
525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24sF, 750 (720) / 60p · 50p, 1250 (1080) / 50i
- (3) The multi-display capability is functional for the following composite signals:
NTSC, PAL, SECAM
- (4) The MultiDisplay (multiskærmdisplay) function does not display certain input signals from the terminals of the installed option boards listed below:
 - Digital RGB input signals from the DVI terminal of RGB (Digital) Terminal Board (TY-42TM6D)

SET UP for Input Signals

COMPONENT/RGB IN SELECT

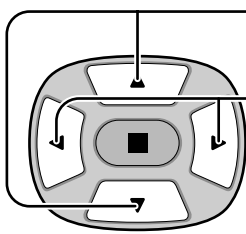

Select to match the signals from the source connected to the COMPONENT/RGB input terminals.

Y, P_B, P_R signals ⇨ "COMPONENT"

R, G, B, HD, VD signals ⇨ "RGB"

1  Press to display the SET UP menu screen.

2  Press to select the "COMPONENT/RGB IN SELECT".

 Press to select the desired mode.

 Press to exit from adjust mode.

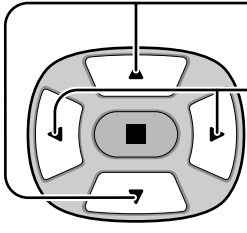

Note:

Selection may not be possible, depending on which optional board is installed.

3D Y/C FILTER – For NTSC Video images

Select "SIGNAL" from the "SET UP" menu during VIDEO (S VIDEO) input signal mode.

("SIGNAL [VIDEO]" menu is displayed.)

 Press to select the "3D Y/C FILTER (NTSC)".

 Press to set ON/OFF.

 Press to exit from adjust mode.

↓ Press  (ACTION) button

Note:

When ON, this setting only affects NTSC input signals.

COLOR SYSTEM / Panasonic AUTO

Select SIGNAL from the “SET UP” menu during VIDEO (S VIDEO) input signal mode. (“SIGNAL [VIDEO]” menu is displayed.)

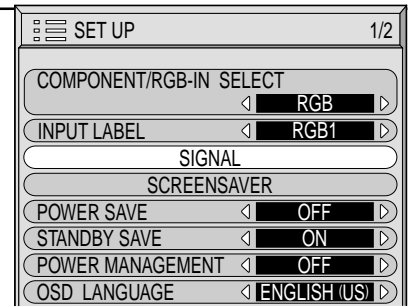

Press to select the “COLOR SYSTEM” or “Panasonic AUTO”.

Press to select each function.

If the image becomes unstable:

With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

Press (ACTION) button

Mode	Function
COLOR SYSTEM	Set the color system to match the input signal. If set to “AUTO”, the color system is determined automatically. <div style="text-align: center;"> </div>
Panasonic AUTO (4:3)	Set to “NORMAL” to view 4:3 images in an unchanged format when Panasonic AUTO is selected. If you would like to view 4:3 images in Just format, set to “JUST”.

3:2 PULLDOWN

When ON, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second.

If the picture is not stable, turn the setting to OFF.

Select “SIGNAL” from the “SET UP” menu during VIDEO (S VIDEO) or COMPONENT input signal. (“SIGNAL [VIDEO]” or “SIGNAL [COMPONENT]” menu is displayed.)

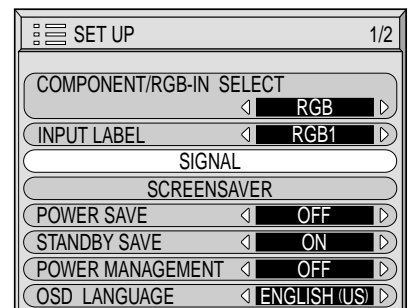

Press to select 3:2 PULLDOWN.

Press to set ON/OFF.

Press to exit from adjust mode.

Press (ACTION) button

Note:

When ON, this setting only affects the following signal input:

- NTSC / PAL signal input during “VIDEO (S VIDEO)” input signal.
- 525i(480i) signal input during “COMPONENT” input signal.

SYNC

Select SIGNAL from the "SET UP" menu during RGB input signal.

↓ Press (ACTION) button

Note:

Sync cannot be adjusted while a DVI signal is being applied.

Setting RGB sync signal

Confirm that the input is set to RGB INPUT (this setting is valid only for RGB INPUT signal).

- H & V: The H and V sync signals are input from the HD/VD connector.
- ON G: Uses a synchronized signal on the Video G signal, which is input from the G connector.
- CS: Uses a synchronized signal of Composite Sync input.

H-FREQ. (kHz)/V-FREQ. (Hz)

Displays the H (Horizontal)/V (Vertical) frequencies.

This display is valid only for RGB/PC and DVI input signal.

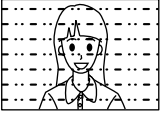

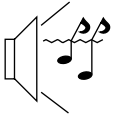

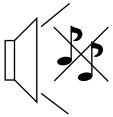

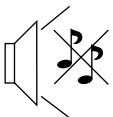

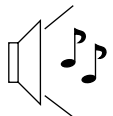

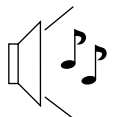

Display range:

- Horizontal 15 - 110 kHz
- Vertical 48 - 120 Hz

Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms		Checks
Picture	Sound	
 <p>Interference</p>	 <p>Noisy Sound</p>	Electrical Appliances Cars/Motorcycles Fluorescent light
 <p>Normal Picture</p>	 <p>No Sound</p>	Volume (Check whether the mute function has been activated on the remote control.)
 <p>No Picture</p>	 <p>No Sound</p>	Not plugged into AC outlet Not switched on PICTURE and BRIGHTNESS/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)
 <p>No Picture</p>	 <p>Normal Sound</p>	If a signal with a non-applicable color system format, or frequency is input, only the input terminal indication is displayed.
 <p>No Color</p>	 <p>Normal Sound</p>	Color controls set at minimum level. (see page 22, 23) COLOR SYSTEM (see page 34)

This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

Plasma Display panel

Symptoms	Check
Some parts of the screen do not light up.	The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.
 <p>After-images appear</p>	Do not allow a still picture to be displayed for an extended period, as this can cause a permanent after-image to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode. Note: The permanent after-image on the Plasma Display resulting from fixed image use is not an operating defect and as such is not covered by the Warranty. This product is not designed to display fixed images for extended periods of time.
[for TH-42PHD6, TH-50PHD6] Whirring sounds can be heard from the display unit.	The display unit is fitted with a cooling fan to dissipate heat generated during normal use. The whirring sound is caused by rotation of the fan and is not a malfunction.

VIDEO/COMPONENT/RGB/PC input signals

VIDEO input [Applicable when Multi Screen and Digital Zoom]

	Signal name	Horizontal frequency(kHz)	Vertical frequency(Hz)
1	NTSC	15.73	59.94
