

# Panasonic®

## Operating Instructions High Definition Plasma Display

---

Model No. **TH-65PHD7UY**

The illustration shown is an image.

Before connecting, operating or adjusting this product, please read these instructions completely. Please keep this manual for future reference.

**English**

	<b>CAUTION</b> <b>RISK OF ELECTRIC SHOCK</b> <b>DO NOT OPEN</b>	
<b>WARNING: To reduce the risk of electric shock, do not remove cover or back. No user-serviceable parts inside. Refer servicing to qualified service personnel.</b>		

The lightning flash with arrow-head within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

**WARNING: To prevent damage which may result in fire or shock hazard, do not expose this apparatus to rain or moisture. Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)**

**WARNING:** 1) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.  
2) Do not remove the grounding pin on the power plug. This apparatus is equipped with a three pin grounding-type power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.  
Do not defeat the purpose of the grounding plug.

# Important Safety Instructions

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments / accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- 15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected.

# Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt as well, and record the model number and serial number of your set in the space provided on the rear cover of these instructions.

# FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## **FCC Caution:**

To assure continued compliance and possible undesirable interference, the provided ferrite cores must be used when connecting this plasma display to video equipment; and maintain at least 40 cm spacing to other peripheral devices. Refer to instructions on page 10 and 11. Any changes or modifications not expressly approved by Matsushita Electric Corporation of America could cause harmful interference and would void the user's authority to operate this device.

### FCC Declaration of Conformity

Model No. TH-65PHD7UY

Responsible Party: Matsushita Electric Corporation of America  
One Panasonic Way, Secaucus, NJ 07094  
Contact Source: Panasonic Consumer Electronics Company  
1-888-843-9788  
email: [consumerproducts@panasonic.com](mailto:consumerproducts@panasonic.com)

## **CANADIAN NOTICE:**

This Class B digital apparatus complies with Canadian ICES-003.

## **Note:**

Do not allow a still picture to be displayed for an extended period, as this can cause permanent after-image to remain on the Plasma Display.

Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

## **Trademark Credits**

- VGA is a trademark of International Business Machines Corporation.
- Macintosh is a registered trademark of Apple Computer, USA.
- S-VGA is a registered trademark of the Video Electronics Standard Association.

Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.

# Safety Precautions

## WARNING

### ■ Setup

**Do not place the Plasma Display on sloped or unstable surfaces.**

- The Plasma Display may fall off or tip over.

**Do not place any objects on top of the Plasma Display.**

- If water spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult an Authorized Service Center.

**Do not cover the ventilation holes.**

- Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

**If using the pedestal (optional accessory), leave a space of 3 15/16" (10 cm) or more at the top, left and right, 2 3/8" (6 cm) or more at the bottom, and 2 3/4" (7 cm) or more at the rear. If using some other setting-up method, leave a space of 3 15/16" (10 cm) or more at the top, bottom, left and right, and 2 61/64" (7.5 cm) or more at the rear.**

**Avoid installing this product near electronic equipment that easily receives electromagnetic waves.**

- It may cause interference in image, sound, etc. In particular, keep video equipment away from this product.

### ■ AC Power Supply Cord

**The Plasma Display is designed to operate on 120 V AC, 50/60 Hz.**

**Securely insert the power cord plug as far as it will go.**

- If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket plate is loose, they should not be used.

**Do not handle the power cord plug with wet hands.**

- Doing so may cause electric shocks.

**Do not do anything that might damage the power cable. When disconnecting the power cable, hold the plug, not the cable.**

- Do not make any modifications, place heavy objects on, place near hot objects, heat, bend, twist or forcefully pull the power cable. Doing so may cause damage to the power cable which can cause fire or electric shock. If damage to the cable is suspected, have it repaired at an Authorized Service Center.

**If the Plasma Display will not be used for a long period of time, unplug the power cord from the wall outlet.**

### ■ If problems occur during use

**If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odor is detected from the Plasma Display, unplug the power cord immediately.**

- Continuous use of the Display under these conditions might cause fire or permanent damage to the unit. Have the Display evaluated at an Authorized Service Center. Services to the Display by any unauthorized personnel are strongly discouraged due to its high voltage dangerous nature.

**If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damaged, disconnect the power cord plug immediately.**

- A short may occur, which could cause fire. Contact an Authorized Service Center for any repairs that need to be made.

## CAUTION

**This Plasma Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.**

(All of the following accessories are manufactured by Matsushita Electric Industrial Co., Ltd.)

- Speakers ..... TY-SP65P7W-K
- Pedestal ..... TY-ST65-K
- Wall-hanging bracket (vertical) ..... TY-WK65PV7
- BNC Component Video Terminal Board ..... TY-42TM6A
- BNC Composite Video Terminal Board ..... TY-42TM6B
- RCA Component Video Terminal Board ..... TY-42TM6Z
- RCA Composite Video Terminal Board ..... TY-42TM6V
- RGB (Digital) Terminal Board ..... TY-42TM6D
- RGB Active Through Terminal Board ..... TY-42TM6G
- PC Input Terminal Board ..... TY-42TM6P
- Composite / Component Video Terminal Board ..... TY-42TM6Y
- SDI Terminal Board ..... TY-FB7SD
- HD-SDI Terminal Board ..... TY-FB7HD
- HDMI Terminal Board ..... TY-FB7HM
- Wireless Presentation Board ..... TY-FB7WPU

Always be sure to ask a qualified technician to carry out set-up.

### ■ When using the Plasma Display

**Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.**

- Top of the Plasma Display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries can happen if any body parts are brought too close. Placing any object near the top of the display could also result in heat damages to the object as well as to the Display if its ventilation holes are blocked.

**Be sure to disconnect all cables before moving the Plasma Display.**

- Moving the Display with its cables attached might damage the cables which, in turn, can cause fire or electric shock.

**Disconnect the power plug from the wall outlet as a safety precaution before carrying out any cleaning.**

- Electric shocks can result if this is not done.

**Clean the power cable regularly to prevent it from becoming dusty.**

- Built-up dust on the power cord plug can increase humidity which might damage the insulation and cause fire. Unplug the cord from the wall outlet and clean it with a dry cloth.

**This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.**

#### **Note:**

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent after-image to remain on the Plasma Display.

Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

### Requires two AA batteries.

1. Turn the transmitter face down.  
Press and slide off the battery cover.

2. Install the batteries as shown in the battery compartment.  
(Polarity + or – must match the markings in the compartment.)

3. Replace the cover and slide in reverse until the lock snaps.

### Helpful Hint:

For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

### ⚠ Precaution on battery use

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

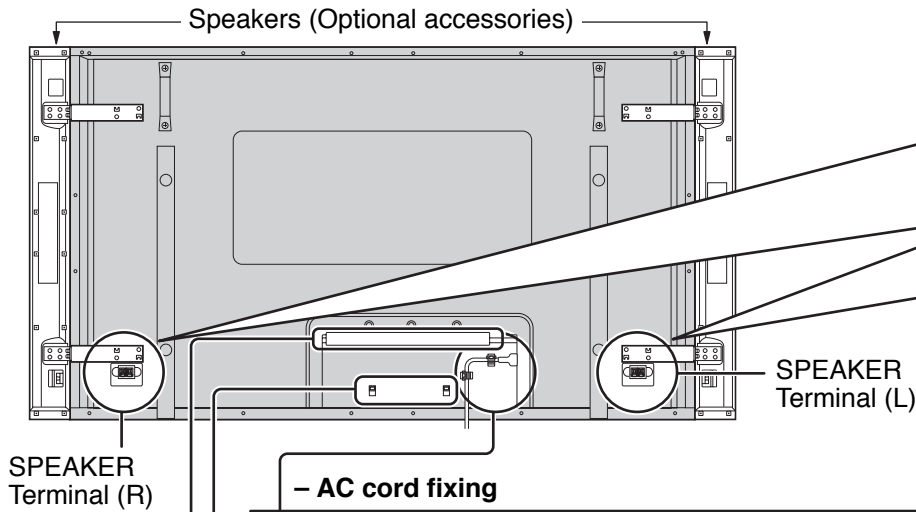

#### Observe the following precautions:

1. Batteries should always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when the remote control acts sporadically or stops operating the Plasma Display.

# Connections

When connecting the speakers, be sure to use only the optional accessory speakers. Refer to the speaker's Installation Manual for details on speaker installation.

## - AC cord fixing

## - Cable fixing bands

Secure any excess cables with bands as required.

Pass the attached cable fixing band through the clip as shown in the figure.

To secure cables connected to Terminals, wrap the cable fixing band around them then pass the pointed end through the locking block, as shown in the figure. **While ensuring there is sufficient slack in cables to minimize stress (especially in the power cord), firmly bind all cables with the supplied fixing band.**

Optional Terminal Board Insert Slot (covered)

AV Terminals (see page 12)

COMPONENT/RGB IN and Audio IN Terminals (see page 12)

From EXTERNAL monitor terminal on Computer (see page 10)

From SERIAL Terminal on Computer (see page 11)

**Note:** At factory shipment, Terminal boards are installed in SLOT 2 and SLOT 3.

## PC Input Terminals connection

### Installing the ferrite core (Small size)

### Installing the ferrite core (Large size)

### Notes:

- Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
- The display resolution is a maximum of 1,024 × 768 dots when the aspect mode is set to "NORMAL", and 1,366 × 768 dots when the aspect mode is set to "FULL". If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
- The PC input terminals are DDC1/2B-compatible. If the computer being connected is not DDC1/2B-compatible, you will need to make setting changes to the computer at the time of connection.
- Some PC models cannot be connected to the set.
- There is no need to use an adapter for computers with DOS/V compatible D-sub 15P terminal.
- The computer shown in the illustration is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.
- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Component Input is possible with the pin 1,2,3 of the D-sub 15P Connector.

### Signal Names for D-sub 15P Connector

Pin Layout for PC Input Terminal

Pin No.	Signal Name	Pin No.	Signal Name	Pin No.	Signal Name
①	R (P <sub>R</sub> /C <sub>R</sub> )	⑥	GND (Ground)	⑪	GND (Ground)
②	G(Y)	⑦	GND (Ground)	⑫	SDA
③	B(P <sub>B</sub> /C <sub>B</sub> )	⑧	GND (Ground)	⑬	HD/SYNC
④	GND (Ground)	⑨	NC (not connected)	⑭	VD
⑤	GND (Ground)	⑩	GND (Ground)	⑮	SCL

# SERIAL Terminals connection

The SERIAL terminal is used when the Plasma Display is controlled by a computer.

**Notes:**

- Use the RS-232C cable to connect the computer to the Plasma Display.
- The computer shown is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal.

The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

**Communication parameters**

Signal level	RS-232C compliant
Synchronization method	Asynchronous
Baud rate	9600 bps
Parity	None
Character length	8 bits
Stop bit	1 bit
Flow control	-

RS-232C Conversion cable	
D-sub 9-pin female	Details
②	R X D
③	T X D
⑤	GND
④ • ⑥	Non use
⑦	Shorted
⑧	
① • ⑨	NC

**Basic format for control data**

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

**Notes:**

- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- If an incorrect command is sent by mistake, this unit will send an "ER401" command back to the computer.

**Command**

Command	Parameter	Control details
PON	None	Power ON
POF	None	Power OFF
AVL	**	Volume 00 - 63
AMT	0	Audio MUTE OFF
	1	Audio MUTE ON
IMS	None	Input select (toggle)
	SL1	Slot1 input
	SL2	Slot2 input
	SL3	Slot3 input
	PC1	PC input
DAM	None	Screen mode select (toggle)
	NORM	NORMAL (4:3)
	ZOOM	ZOOM
	FULL	FULL
	JUST	JUST
	SELF	Panasonic AUTO

With the power off, this display responds to PON command only.

## AV & COMPONENT connection

**Notes:**

- Change the "COMPONENT/RGB-IN SELECT" setting in the "SET UP" menu to "COMPONENT". (see page 34)
- Additional equipment, cables and adapter plugs shown are not supplied with this set.

## RGB signal (R, G, B, HD, VD)

**Notes:**

- Change the "COMPONENT/RGB-IN SELECT" setting in the "SET UP" menu to "RGB". (see page 34)
- Additional equipment, cables and adapter plugs shown are not supplied with this set.

# Power ON / OFF

When the POWER is turned on for the first time, the LANGUAGE selection screen is displayed.

From the second time on, language selection can be done from the setup menu. (see page 18)

Select the desired language using the ▲ or ▼ button and press the ACTION (■) button.

From the second time on, the screen shown below is displayed for a while (setting condition is an example).

# Basic Controls

## Main Power On / Off Switch

### Power Indicator

The Power Indicator will light.

- Power-OFF ... Indicator not illuminated (The unit will still consume some power as long as the power cord is still inserted into the wall outlet.)
- Standby  $\phi$  ..... Red
- Power-ON ..... Green
- DPMS ..... Orange (With PC input signal and during operation of PC's screensaver.)

### Remote control sensor

### C.A.T.S. sensor

#### Plasma C.A.T.S. (Contrast Automatic Tracking System)

Plasma C.A.T.S. automatically senses the ambient light conditions and adjusts the brightness and gradation accordingly, to optimise contrast.

(Effective when PICTURE MENU is set to AUTO.)

## Enter / Aspect button

(see page 16, 19)

### Volume Adjustment

Volume Up “+” Down “-”

When the menu screen is displayed:

“+”: press to move the cursor up

“-”: press to move the cursor down

(see page 16)

### MENU Screen ON / OFF

Each time the MENU button is pressed, the menu screen will switch. (see page 16)

### INPUT button

(INPUT1, INPUT2, INPUT3 and PC IN selection)

(see page 18)

## Status button

Press the “Status” button to display the current system status.

① Input label

② Aspect mode (see page 19)

③ Off timer

The off timer indicator is displayed only when the off timer has been set.

**N button** (see page 20, 22, 23, 24)

**PICTURE button** (see page 22)

**MULTI Window buttons** (see page 21)

### PC button

Press the “PC” input mode selection button to select the PC input mode.

This button is used to switch directly to PC input mode.

#### Note:

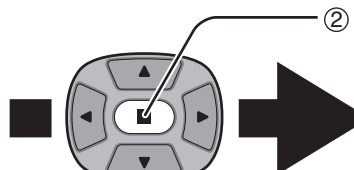

After-image (image lag) may occur on the plasma display panel when a still picture is kept on the panel for an extended period. The function that darkens the screen slightly is activated to prevent after-image (see page 39), this function is not the perfect solution to after-image.

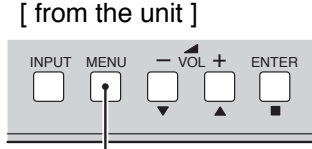

② Press to access each adjust screen.

[ from the unit ]

Press to return to next menu screen.

Press the R button to return to previous menu.

To SIGNAL screen for VIDEO (S VIDEO) (see page 34, 35)

SIGNAL [VIDEO]	
3D Y/C FILTER (NTSC)	ON

# Initial selections

## Selecting the input signal

Select the input signals to be connected by installing the optional Terminal Boards.

 Press to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

Input signals will change as follows:

→ INPUT1 → INPUT2 → INPUT3 → PC IN

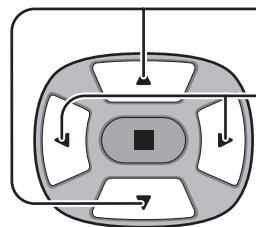

### Notes:

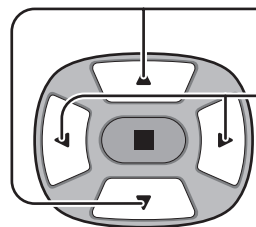

- Selecting is also possible by pressing the INPUT button on the unit.
- Input terminal will not be selected if the terminal board is not installed into the SLOT.
- Select to match the signals from the source connected to the component/RGB input terminals. (see page 34)
- In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.

## Selecting the On-Screen Menu Language

 Press to display the SET UP menu.

 Press to select OSD LANGUAGE.

 Press to select your preferred language.

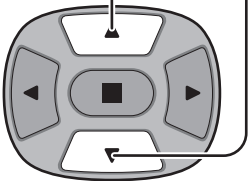

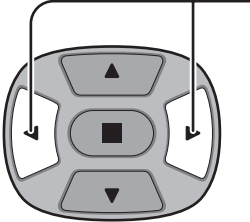

### ■ Selectable languages

- English(UK)
- Deutsch
- Français
- Italiano
- Español
- ENGLISH(US)
- 中文.....(Chinese)
- 日本語.....(Japanese)

# Adjusting PICTURE POSITION / SIZE

- 1  Press to display the PICTURE POS. /SIZE menu.
- 2  Press to select H-POS / H-SIZE / V-POS / V-SIZE / CLOCK PHASE.
- 3  Press to adjust POS. / SIZE.
- 4  Press to exit from adjust mode.

During "VIDEO (S VIDEO)",  
"COMPONENT" and "DVI" input signal.

During "RGB / PC" input signal.

## Notes:

- Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/DVI signals are memorized for each frequency.)
- If a "Cue" or "Rew" signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the PICTURE POS. / SIZE function.
- If adjusting the PICTURE V-POS / V-SIZE in Panasonic AUTO with FULL mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

**H-POS** Adjust the horizontal position.

**H-SIZE** Adjust the horizontal size.

**V-POS** Adjust the vertical position.

**V-SIZE** Adjust the vertical size.

**CLOCK PHASE** (RGB/PC in mode) Eliminate the flickering and distortion.

## Helpful Hint ( / **NORMALIZE** Normalization)

While the PICTURE POS. / SIZE display is active, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

# MULTI PIP

Press repeatedly.  
Each time pressing this button main picture and sub picture will be displayed as follows bellow.

Press to swap main picture and sub picture.

Press to select the input mode.  
Under main Picture and sub picture display, select the picture which you would like to change input modes.

Press to change input signal.

Press to move the sub picture.  
Each time the location of the sub picture will be moved.

**Notes:**

- This button is effective only in the picture in picture.
- The sub picture may be hidden by the on screen display, depending on its position.

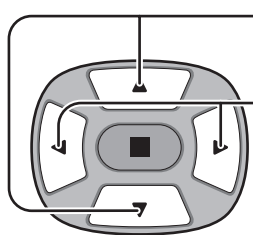

**Notes:**

- Sound output is from the main picture.
- In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.
- The main picture and sub picture are processed by different circuits, resulting in a slight difference in the clarity of the pictures. There may also be a difference in the picture quality of the sub picture depending on the type of signals displayed on the main picture and depending on the 2-picture display mode.
- Due to the small dimensions of the sub pictures used for the picture in picture and picture out picture displays, these sub pictures cannot be shown in detail.
- Two computer screen pictures are displayed in a simplified format, and it may not be possible to discern details on them satisfactorily.

# PICTURE Adjustments

**1**  Press to display the PICTURE menu.

**2** Select to adjust each item.

 Press to select the menu to adjust.  
 Select the desired level by looking at the picture behind the menu.

 Press to select "ON".  
 Press to enter Advanced Settings.

**ADVANCED SETTINGS ON**  
 Enables fine picture adjustment at a professional level (see next page).

**ADVANCED SETTINGS OFF**  
 Displays images with settings of the PICTURE menu.

Press the left ◀ or right ▶ button to switch between modes.

**AUTO**

Automatically selects the mode that best suits the brightness of the environment.

**STANDARD**

For viewing in standard (evening lighting) environments. This menu selects the normal levels of BRIGHTNESS and PICTURE.

**DYNAMIC**

For viewing in brighter environments. This menu selects higher than normal levels of BRIGHTNESS and PICTURE.

**CINEMA**

Ideal for movies.

**Note:**

If you would like to change the picture and color of the selected PICTURE menu to something else, adjust using the items in the PICTURE menu. (see next page)

Press the left ◀ or right ▶ button to switch between modes.

**COLOR MANAGEMENT ON**

Enables vivid colour adjustment automatically.

**Helpful Hint (  / **NORMALIZE Normalization** )**

While the "PICTURE" menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

Item	Effect	Adjustments
<b>PICTURE</b>	◀ Less ▶ More	Adjusts the proper picture contrast.
<b>BRIGHTNESS</b>	◀ Darker ▶ Brighter	Adjusts for easier viewing of dark pictures such as night scenes and black hair.
<b>COLOR</b>	◀ Less ▶ More	Adjusts color saturation.
<b>TINT</b>	◀ Reddish ▶ Greenish	Adjust for natural flesh tones.
<b>SHARPNESS</b>	◀ Less ▶ More	Adjusts picture sharpness.

**Notes:**

- “COLOR” and “TINT” settings cannot be adjusted for “RGB/PC” and “DVI” input signal.
- You can change the level of each function (PICTURE, BRIGHTNESS, COLOR, TINT, SHARPNESS) for each PICTURE MENU.
- The setting details for STANDARD, DYNAMIC and CINEMA respectively are memorized separately for each input mode (INPUT1, INPUT2, INPUT3 and PC IN).
- The “TINT” setting can be adjusted for NTSC signal only during “VIDEO (S VIDEO)” input signal.
- In PICTURE, there is nor a noticeable change even when contrast is increased with a bright picture or reduced with a dark picture.

## ADVANCED SETTINGS

Item	Effect	Details
<b>BLACK EXTENSION</b>	◀ Less ▶ More	Adjusts the dark shades of the image in gradation.
<b>INPUT LEVEL</b>	◀ Less ▶ More	Adjustment of parts which are extremely bright and hard to see. (This cannot be adjusted when the input signal is DVI.)
<b>W/B HIGH R</b>	◀ Less ▶ More	Adjusts the white balance for light red areas.
<b>W/B HIGH B</b>	◀ Less ▶ More	Adjusts the white balance for light blue areas.
<b>W/B LOW R</b>	◀ Less ▶ More	Adjusts the white balance for dark red areas.
<b>W/B LOW B</b>	◀ Less ▶ More	Adjusts the white balance for dark blue areas.
<b>GAMMA</b>	◀ Down ▶ Up	S CURVE ↔ 2.0 ↔ 2.2 ↔ 2.5
<b>AGC</b>	◀ OFF ▶ ON	Increases the brightness of dark signal automatically.

**Notes:**

- Carry out “W/B” adjustment as follows.
  1. Adjust the white balance of the bright sections using the “W/B HIGH R” and “W/B HIGH B” settings.
  2. Adjust the white balance of the dark sections using the “W/B LOW R” and “W/B LOW B” settings.
  3. Repeat steps 1 and 2 to adjust.
 Steps 1 and 2 affect each other’s settings, so repeat each step in turn to make the adjustment.
- The adjustment values are memorized separately for each input mode (INPUT1, INPUT2, INPUT3 and PC IN).
- The adjustment range values should be used as an adjustment reference.

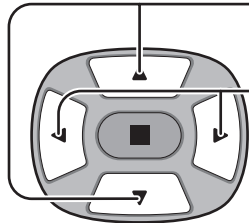

### Helpful Hint ( / **NORMALIZE** Normalization)

On the remote control unit, while the “ADVANCED SETTINGS” menu is displayed, if either the N button is pressed at any time or the ACTION (■) button is pressed during “NORMALIZE”, then all adjustment values are returned to the factory settings.

# SOUND Adjustment

**1**  Press to display the SOUND menu.

**2** Select to adjust each item.

 Press to select the menu to adjust.  
Select the desired level by listening to the sound.

**BASS**  
Adjusts low sounds

**TREBLE**  
Adjusts high sounds

**BALANCE**  
Adjusts left and right volumes

**SURROUND**  
Select ON or OFF

**STANDARD** Emits the original sound.

**AUTO** Automatically controls proper volume level.

## Notes:

- Press the SURROUND button to directly turn the surround effect ON and OFF. (see page 15)
- BASS, TREBLE and SURROUND settings are memorized separately for each AUDIO MENU (STANDARD, AUTO).

## Helpful Hint ( / **NORMALIZE** Normalization)

While the "SOUND" menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during "NORMALIZE", then all adjustment values are returned to the factory settings.

## MUTE

Useful when answering the phone or receiving unexpected visitors.

Press this button to mute the sound.  
Press again to reactivate sound. Sound is also reactivated when power is turned off or volume level is changed.

# Digital Zoom

This displays an enlargement of the designated part of the displayed image.

## 1 Display the "Operation Guide".

**During Digital Zoom, only the following buttons can be operated.**

[Remote control]

[Unit]

## 2 Select the area of the image to be enlarged.

## 3 Select the magnification required for the enlarged display.

## 4 Return to normal display (quit Digital Zoom).

### Notes:

- When power goes OFF (including "Off Timer" operation), Digital Zoom terminates.
- The Digital Zoom function cannot be selected while in the following operation states:  
"Multi-screen" (MULTI DISPLAY).(see page 32)  
"Multi-viewer" (Picture in Picture, Picture out Picture, Picture and Picture) operation. (see page 21)
- While Digital Zoom is in operation, "Adjusting PICTURE POSITION/SIZE" cannot be used.
- The Digital Zoom capability is functional for the following component signals:  
525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF, 750 (720) / 60p · 50p, 1250 (1080) / 50i
- The Digital Zoom capability is functional for the following composite signals:  
NTSC, PAL, SECAM

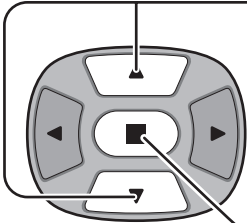

# PRESENT TIME SETUP / SET UP TIMER

The timer can switch the Plasma Display ON or OFF.

Before attempting Timer Set, confirm the PRESENT TIME OF DAY and adjust if necessary. Then set POWER ON TIME / POWER OFF TIME.

**1**  Press to display the SET UP menu.

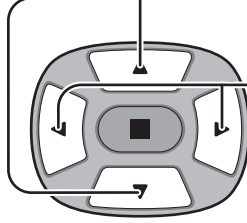

**2**  Press to select SET UP TIMER or PRESENT TIME SETUP.  
Press to display the SET UP TIMER screen or PRESENT TIME SETUP screen.

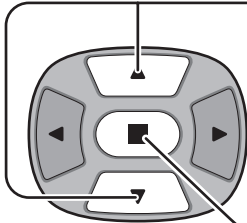

## PRESENT TIME SETUP

Display the PRESENT TIME SETUP screen.

To set up PRESENT TIME OF DAY, follow the procedure described below.

**1**  Press to select PRESENT TIME OF DAY.  
Press to set up PRESENT TIME OF DAY.  
▶ button: Forward  
◀ button: Back  
**Notes:**  
• Pressing “◀” or “▶” button once changes PRESENT TIME OF DAY 1minute.  
• Pressing “◀” or “▶” button continuously changes PRESENT TIME OF DAY by 15 minutes.

**2**  Press to select Set.  
Press to store PRESENT TIME SETUP.

**3**  Press to exit from PRESENT TIME SETUP.  
**Note:** Set cannot be selected unless PRESENT TIME OF DAY is set.

## SET UP TIMER

Display the SET UP TIMER SCREEN.

1

Press to select  
POWER ON TIME / POWER OFF TIME.

Press to set up POWER ON TIME /  
POWER OFF TIME.

▶ button: Forward

◀ button: Back

**Notes:**

- Pressing “◀” or “▶” button once changes POWER ON TIME / POWER OFF TIME 1minute.
- Pressing “◀” or “▶” button continuously changes POWER ON TIME / POWER OFF TIME by 15 minutes.

SET UP TIMER	
PRESENT TIME OF DAY 00:00	
POWER ON FUNCTION	OFF
POWER ON TIME	◀ 0.00 ▶
POWER OFF FUNCTION	OFF
POWER OFF TIME	◀ 0.00 ▶

2

Press to select POWER ON FUNCTION  
/ POWER OFF FUNCTION.

Press to select ON.

SET UP TIMER	
PRESENT TIME OF DAY 00:00	
POWER ON FUNCTION	◀ OFF ▶
POWER ON TIME	0.00
POWER OFF FUNCTION	◀ OFF ▶
POWER OFF TIME	0.00

3

Press twice to exit from SET UP.

**Note:**

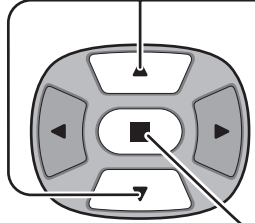

Timer function will not work unless “PRESENT TIME OF DAY” is set.

# SCREENSAVER (For preventing after-images)

Do not display a still picture, especially in 4:3 mode, for any length of time.  
If the display must remain on, a SCREENSAVER should be used.

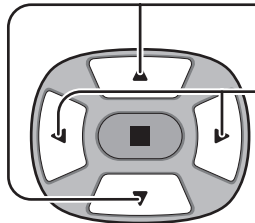

**1**  Press to display the SET UP menu.

**2**  Press to select the SCREENSAVER.  
Press to select the SCREENSAVER screen.

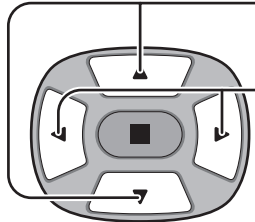

## 3 NEGATIVE / SCROLL selection

 Press to select the FUNCTION.  
Press to select the desired function.

WHITE BAR SCROLL ↔ NEGATIVE  
 WHITE BAR SCROLL : A white bar will scroll from left to right.  
 NEGATIVE : A negative image will be displayed on the screen.

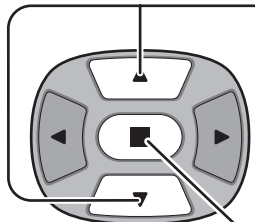

## 4 MODE selection

 Press to select the MODE.  
Press to select each mode items.

→ OFF  
 ↔ INTERVAL : Operates when SHOW DURATION and SAVER DURATION are set up and those times arrive.  
 ↔ TIME OF DAY : Operates when START TIME and FINISH TIME are set up and those times arrive.  
 → ON : Operates when START is selected and the ACTION (■) button is pressed.

## 5 START setting

 When the MODE is set to ON, press to select START.  
Press to start SCREENSAVER.

The menu screen will disappear and the SCREENSAVER will be activated. **To stop the SCREENSAVER under ON, press the R button.**

## Setup of SCREENSAVER Time

After selecting TIME OF DAY or INTERVAL, the relevant Time Setup will become available for selection and the Operating Time may be set. (Time cannot be set when "MODE" is "ON" or "OFF".)

SCREENSAVER	
PRESENT TIME OF DAY 00:00

**Note:** Timer function will not work unless "PRESENT TIME OF DAY" is set.

## Reduces screen after-image

These functions prevent the occurrence of an "after image" on the display when turned ON.

**WOBBLING:** Automatically shifts the display image at a dot level pitch (therefore unnoticeable to the eye) over time to prevent after image of sharper contour of image.

**PEAK LIMIT:** Suppresses image contrast (peak brightness).

**Note:** When a still picture is viewed for an extended time, the screen may become slightly darker. (see page 39)

**1** Press to display the SET UP menu.

**2** Press to select "SCREENSAVER".

**3** Press to display SCREENSAVER menu.

**3** Press to select "WOBBLING" or "PEAK LIMIT".

**3** Press to select "ON" or "OFF".

# SCREENSAVER (For preventing after-images )

## SIDE BAR ADJUST

Do not display a picture in 4:3 mode for an extended period, as this can cause an after-image to remain on the side bars on either side of the display field.

To reduce the risk of such an after-image, change the brightness of the side bars.

This function may be applicable to the non-picture area.

Display the SCREENSAVER screen.

(Refer to the previous page, operation guide steps 1 and 2)

1

Press to select the SIDE BAR ADJUST.

Press to select OFF, DARK, MID, BRIGHT.

> OFF <-> DARK <-> MID <-> BRIGHT <

SCREENSAVER	
PRESENT TIME OF DAY	00:00
START	
FUNCTION	WHITE BAR SCROLL
MODE	OFF
START TIME	6:15
FINISH TIME	12:30
SIDE BAR ADJUST	◀ BRIGHT ▶
WOBBLING	OFF
PEAK LIMIT	OFF

2

Press to exit from SCREENSAVER.

### Notes:

- To reduce the occurrence of after-images, set the SIDE BAR ADJUST to BRIGHT.
- The side bar may flash (alternate black/white) depending on the picture being shown on the screen. Using Cinema mode will reduce such flashing.

# Reduces power consumption

- **POWER SAVE:** When this function is turned ON, luminous level of the plasma display is suppressed, so power consumption is reduced.
- **STANDBY SAVE:** When this function is turned ON, power consumption of the microcomputer is reduced during power supply standby (see page 13-15), so standby power of the set is reduced.
- **POWER MANAGEMENT:** The unit power supply is turned ON or OFF depending on whether or not there is a signal during PC input mode. This function is enabled when it is turned ON. (Only during input from PC(Mini D-sub) terminal)
- **AUTO POWER OFF:** Equipment power supply is turned OFF when there is no signal. When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop. This function is effective for input signals except input from PC (Mini D-sub) terminal.

SET UP 1/2

**Notes:**

While selecting a Input signal through Optional Terminal Board connected to Slot 1 to Slot 3, the Input label will depend on each Optional Terminal Board.

INPUT LABELS for Slot 1 to Slot 3 and miniD-sub:

- [Slot1 Input] INPUT1/VIDEO1/COMPONENT1/RGB1/DIGITAL1/PC1/DVD1/CATV1/VCR1/STB1
- [Slot2 Input] INPUT2/VIDEO2/COMPONENT2/RGB2/DIGITAL2/PC2/DVD2/CATV2/VCR2/STB2
- [Slot3 Input] INPUT3/VIDEO3/COMPONENT3/RGB3/PC3/DVD3/CATV3/VCR3/STB3
- [PC (MiniD-sub) input] PC/COMPONENT/RGB/DVD/STB

# SET UP for MULTI DISPLAY

By lining up Plasma Displays in groups of 4, 9 or 16 as illustrated below, an enlarged picture may be displayed across all screens.

For this mode of operation, each plasma display has to be set up with a Display number to determine its location.

group of 4 (2 × 2)

group of 9 (3 × 3)

group of 16 (4 × 4)

## How to setup MULTI DISPLAY

1

Press to display the SET UP menu.

2

Press to select the MULTI DISPLAY SETUP.

Press to display the "MULTI DISPLAY SETUP" menu.

3

Press to select the MULTI DISPLAY SETUP.

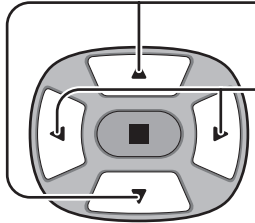

Press to select "ON" or "OFF".

## How to set the Display location number for each Plasma Display

**4**

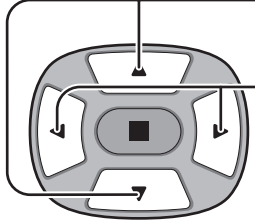

Press to select ARRANGEMENT (2nd step).

Press to select "2 × 2", "3 × 3", "4 × 4".

**5**

Press to select LOCATION.

Press to select the required arrangement number. (A1-D4 : Refer to the following)

**Display Number locations for each arrangement.**

( 2 × 2 )	( 3 × 3 )	( 4 × 4 )																													
<table border="1" style="margin: auto;"> <tr><td>A1</td><td>A2</td></tr> <tr><td>B1</td><td>B2</td></tr> </table>	A1	A2	B1	B2	<table border="1" style="margin: auto;"> <tr><td>A1</td><td>A2</td><td>A3</td></tr> <tr><td>B1</td><td>B2</td><td>B3</td></tr> <tr><td>C1</td><td>C2</td><td>C3</td></tr> </table>	A1	A2	A3	B1	B2	B3	C1	C2	C3	<table border="1" style="margin: auto;"> <tr><td>A1</td><td>A2</td><td>A3</td><td>A4</td></tr> <tr><td>B1</td><td>B2</td><td>B3</td><td>B4</td></tr> <tr><td>C1</td><td>C2</td><td>C3</td><td>C4</td></tr> <tr><td>D1</td><td>D2</td><td>D3</td><td>D4</td></tr> </table>	A1	A2	A3	A4	B1	B2	B3	B4	C1	C2	C3	C4	D1	D2	D3	D4

**6**

Press twice to exit from SET UP.

**Notes:**

- The multi-display capability is functional for the following component signals:  
525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF, 750 (720) / 60p · 50p, 1250 (1080) / 50i
- The multi-display capability is functional for the following composite signals:  
NTSC, PAL, SECAM
- The MultiDisplay function does not display certain input signals from the terminals of the installed option boards listed below:  
Digital RGB input signals from the DVI terminal of RGB (Digital) Terminal Board (TY-42TM6D)

# SET UP for Input Signals

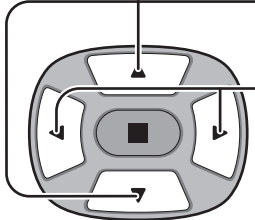

## COMPONENT / RGB IN SELECT

Select to match the signals from the source connected to the COMPONENT / RGB input terminals.

Y, P<sub>B</sub>, P<sub>R</sub> signals ⇔ "COMPONENT"

R, G, B, HD, VD signals ⇔ "RGB"

**1**  Press to display the SET UP menu.

**2**  Press to select the "COMPONENT / RGB-IN SELECT".  
Press to select the desired mode.  
COMPONENT ↔ RGB

**3**  Press to exit from adjust mode.

SET UP 1/2	
SIGNAL	
COMPONENT / RGB-IN SELECT	
	RGB

**Note:**

Selection may not be possible, depending on which optional board is installed.

## 3D Y/C FILTER – For NTSC AV images

Select "SIGNAL" from the "SET UP" menu during VIDEO (S VIDEO) input signal mode.

("SIGNAL [VIDEO]" menu is displayed.)

**1**  Press to select the "3D Y/C FILTER (NTSC)".  
Press to set ON / OFF.

**2**  Press to exit from adjust mode.

SET UP 1/2	
SIGNAL	
COMPONENT / RGB-IN SELECT	
	RGB
INPUT LABEL	PC
POWER SAVE	OFF
STANDBY SAVE	OFF
POWER MANAGEMENT	OFF
AUTO POWER OFF	OFF
OSD LANGUAGE	ENGLISH (US)

↓ Press ACTION (■) button

SIGNAL [VIDEO]	
3D Y/C FILTER (NTSC)	
	ON
COLOR SYSTEM	AUTO
3 : 2 PULLDOWN	OFF
Panasonic AUTO (4 : 3)	NORMAL
VIDEO NR	OFF

**Note:**

When ON, this setting only affects NTSC input signals.

## COLOR SYSTEM / Panasonic AUTO

Select SIGNAL from the “SET UP” menu during VIDEO (S VIDEO) input signal mode. (“SIGNAL [VIDEO]” menu is displayed.)

Press to select the “COLOR SYSTEM” or “Panasonic AUTO”.

Press to select each function.

### If the image becomes unstable:

With the system set to Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

Press ACTION (■) button

Mode	Function
<b>COLOR SYSTEM</b>	Set the color system to match the input signal. If set to “AUTO”, the color system is determined automatically.  <div style="border: 1px solid black; padding: 5px; display: inline-block;">                     &gt;AUTO&lt;&lt;&gt; PAL &lt;&lt;&gt; SECAM &lt;&lt;&gt; M.NTSC &lt;&lt;&gt; NTSC &lt;&lt;                 </div>
<b>Panasonic AUTO (4:3)</b>	Set to “NORMAL” to view 4:3 images in an unchanged format when Panasonic AUTO is selected. If you would like to view 4:3 images in Just format, set to “JUST”.

## 3:2 PULLDOWN / VIDEO NR

**3:2 PULLDOWN:** When ON, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second. If the picture is not stable, turn the setting to OFF.

### Note:

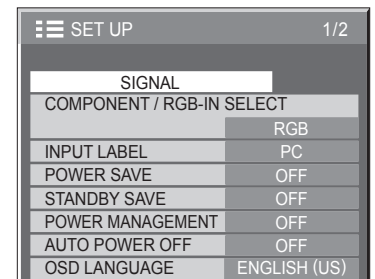

When ON, this setting only affects the following signal input:

- NTSC / PAL signal input during “VIDEO (S VIDEO)” input signal.
- 525i(480i) 625i(575i), 1125(1080)/60i signal input during “COMPONENT” input signal.

**VIDEO NR:** Automatically reduces unwanted picture noise.

### Note:

VIDEO NR cannot be adjusted while a PC signal is being applied.

Press ACTION (■) button

**1** Press to select 3:2 PULLDOWN or VIDEO NR.

Press to set ON/OFF.

**2**

Press to exit from adjust mode.

# SET UP for Input Signals

## SYNC

Select SIGNAL from the "SET UP" menu during RGB input signal.

SET UP 1/2	
SIGNAL	
COMPONENT / RGB-IN SELECT

## H-FREQ. (kHz) / V-FREQ. (Hz)

### Displays the H (Horizontal) / V (Vertical) frequencies.

This display is valid only for RGB/PC and DVI input signal.

Display range:

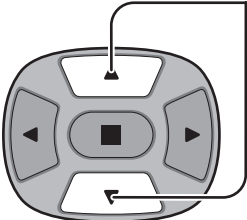

- Horizontal 15 - 110 kHz
- Vertical 48 - 120 Hz

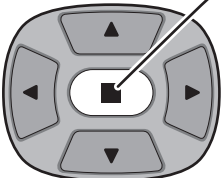

H-FREQ.	33.8 kHz
V-FREQ.	60.0 Hz

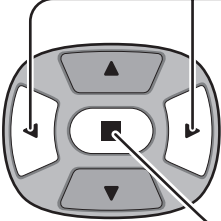

# Shipping condition

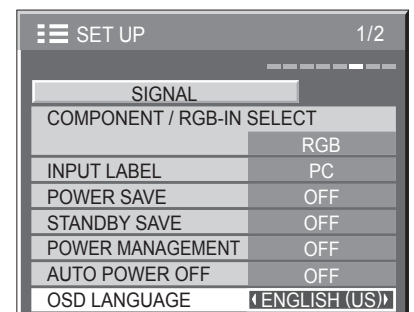

This function allows you to reset the unit to the factory setting.

**1**  Press to display the SET UP menu.

**2**  Press to select "OSD LANGUAGE".

**3**  Press and hold till the SHIPPING menu is displayed.

**4**  Press to select "YES".  
 Press to confirm.

[from the unit]

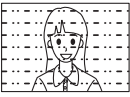

- 1 Press the MENU button till the Setup menu is displayed.
- 2 Press the Volume Up "+" or Down "-" button to select "OSD LANGUAGE".
- 3 Press and hold the ENTER button till the SHIPPING menu is displayed.
- 4 Press the Volume Up "+" or Down "-" button to select "YES".
- 5 Press the ENTER button.

**Note:**

Press the R button to return to SET UP menu when SHIPPING menu is displayed.

# Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms		Checks
Picture	Sound	
 Interference	 Noisy Sound	Electrical Appliances Cars / Motorcycles Fluorescent light
 Normal Picture	 No Sound	Volume (Check whether the mute function has been activated on the remote control.)
 No Picture	 No Sound	Not plugged into AC outlet Not switched on PICTURE and BRIGHTNESS/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)
 No Picture	 Normal Sound	If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.
 No Color	 Normal Sound	Color controls set at minimum level. (see page 22, 23) COLOR SYSTEM (see page 35)
No remote control operations can be performed.		Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)
A cracking sound is sometimes heard from the unit.		If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.
The top or bottom of the picture on the screen is cut off when I use the zoom function.		Adjust the position of the picture on the screen.
Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function.		When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.
I can hear sounds coming from inside the unit.		When the power is turned on, a sound of the display panel being driven may be heard: This is normal and not indicative of malfunctioning.
This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.		

---

## Plasma Display panel

Symptoms	Check
The screen darkens slightly when bright pictures with minimal movements are shown.	The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce after-image on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.
It takes a while for the picture to appear.	The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.
The edges of the images flicker.	Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.
The brightness on both sides of images in the 4:3 mode changes.	When viewing the side panels at the "BRIGHT" or "MID" setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.
Some parts of the screen do not light up.	The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.
After-images appear	<p>Do not allow a still picture to be displayed for an extended period, as this can cause a permanent after-image to remain on the Plasma Display.</p> <p>Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.</p> <p><b>Note:</b></p> <p>The permanent after-image on the Plasma Display resulting from fixed image use is not an operarmane v00793od, As shis is ncl mcturby on tWarrantpla6</p>
Whirring sounds can be heard from the display unit.	

# Maintenance

**The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.**

- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water to which a small amount of neutral detergent has been added, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

**If the cabinet becomes dirty, wipe it with a soft, dry cloth.**

- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

# VIDEO/COMPONENT/RGB/PC input signals

## VIDEO input [Applicable when Multi Screen and Digital Zoom]

	Signal name	Horizontal frequency(kHz)	Vertical frequency(Hz)
1	NTSC	15.73	59.94
2	PAL	15.63	50.00
3	PAL60	15.73	59.94
4	SECAM	15.63	50.00
5	Modified NTSC	15.73	59.94

## Applicable input signals for PC Input (D-sub 15P) (\* Mark)

	Signal name	Horizontal frequency (kHz)	Vertical frequency (Hz)	COMPONENT	RGB	PC	When Multi Screen and Digital Zoom
1	525 (480) / 60i	15.73	59.94	*	*	*	*
2	525 (480) / 60p	31.47	59.94	*	*	*1	*

37	1,066 × 600 @60 Hz	37.88	60.32		*	*	*
38	1,366 × 768 @60 Hz	48.36	60.00		*	*	*
39	Macintosh13" (640 × 480)	35.00	66.67		*	*	*
40	Macintosh16" (832 × 624)	49.72	74.54		*	*	*
41	Macintosh21" (1,152 × 870)	68.68	75.06		*	*	*

\*1: When selected the RGB format and 525p signal input to the D-sub terminal, it is recognized as VGA 60Hz signal.

\*2: When inputted VGA 60Hz format signal from the other than D-sub terminal, it is recognized as 525p signal.

**Note:** Signals without above specification may not be displayed properly.

# Specifications

		<b>TH-65PHD7UY</b>
<b>Power Source</b>	120 V AC, 50/60 Hz	
<b>Power Consumption</b>		
Maximum	695 W	
Stand-by condition	Save OFF 1.0 W, Save ON 0.8 W	
Power off condition	0.3 W	
<b>Plasma Display panel</b>	Drive method : AC type 65-inch, 16:9 aspect ratio	
Contrast Ratio	3000:1	
<b>Screen size</b>	1,434 mm (W) × 806 mm (H) × 1,645 mm (diagonal)	
(No.of pixels)	1,049,088 (1,366 (W) × 768 (H)) [4,098 × 768 dots]	
<b>Operating condition</b>		
Temperatuer	32 °F - 104 °F (0 °C - 40 °C)	
Humidity	20 % - 80 %	
<b>Applicable signals</b>		
Colour System	NTSC, PAL, PAL60, SECAM, Modified NTSC	
Scanning format	525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 750 (720) / 60p · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF ··· SMPTE274M, 1250 (1080) / 50i	
PC signals	XGA display VGA, SVGA, XGA, SXGA, UXGA ··· (compressed) Horizontal scanning frequency 15 - 110 kHz Vertical scanning frequency 48 - 120 Hz	
<b>Connection terminals</b>		
AV	VIDEO IN VIDEO OUT S VIDEO IN (MINI DIN 4PIN) AUDIO IN (RCA PIN JACK × 2)	1.0 Vp-p (75-ohm or high impedance) 1.0 Vp-p (low impedance) Y: 1 Vp-p (75-ohm), C: 0.286 Vp-p (75-ohm) 0.5 Vrms (high impedance)

PC	(HIGH-DENSITY D-SUB 15PIN)  Component Y : PB·PR / CB·CR:  AUDIO IN (M3 JACK)	R,G,B/0.7 Vp-p (75-ohm)  1.0 Vp-p (75-ohm) 0.7 Vp-p (75-ohm) HD, VD/1.0 - 5.0 Vp-p (high impedance) 0.5 Vrms (high impedance)
SERIAL	EXTERNAL CONTROL TERMINAL (D-SUB 9PIN)	RS-232C COMPATIBLE
SPEAKERS (8 Ω)	20 W [10 W + 10 W] (10 % THD)	
<b>Accessories Supplied</b>		
Remote Control Transmitter	EUR646529	
Batteries	2 × AA Size	
Fixing bands	(TMME203 or TMME187) × 2	
Ferrite core	J0KF00000018 × 1, J0KG00000054 × 2	
<b>Dimensions (W × H × D)</b>	61.2" (1,554 mm) × 36.4" (925 mm) × 3.9" (99 mm) (without handles)	
<b>Mass (weight)</b>		
main unit only	approx. 179.7 lbs	
with speakers	approx. 189.4 lbs	

**Note:**

Design and specifications are subject to change without notice. Mass and dimensions shown are approximate.

**Customer's Record**

The model number and serial number of this product can be found on its back cover. You should note this serial number in the space provided below and retain this book, plus your purchase receipt, as a permanent record of your purchase to aid in identification in the event of theft or loss, and for Warranty Service purposes.
