Operating Instruction

Colour Television TX-68P82Z

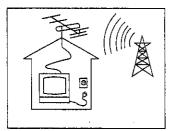

Please read the operating instructions completely before operating this set.

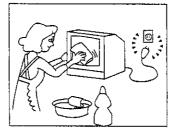

Dear Panasonic customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new colour television.

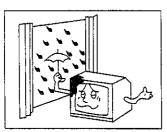

Safety Instructions

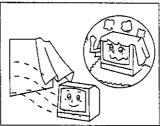

The TV set can be operated on AC SINGLE 230V, 50Hz.

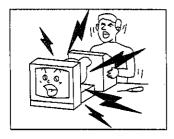

The cabinet and picture tube can be kept in good condition by simply wiping with a clean, soft cloth moistened with mild detergent and water. Do not use solutions containing benzol, petroleum or a chemical cloth. For safety, remove the plug from the wall outlet.

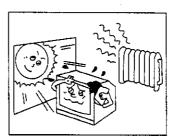

To prevent damage which may result in fire or electrical shock, do not expose the TV set to rain or excessive moisture.

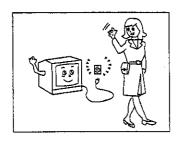

Adequate ventilation is essential to prevent failure of electrical components.

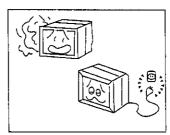

Do not remove the rear cover, as live parts are accessible when it is removed.

Avoid exposing the TV set to direct sunlight and other source of heat.

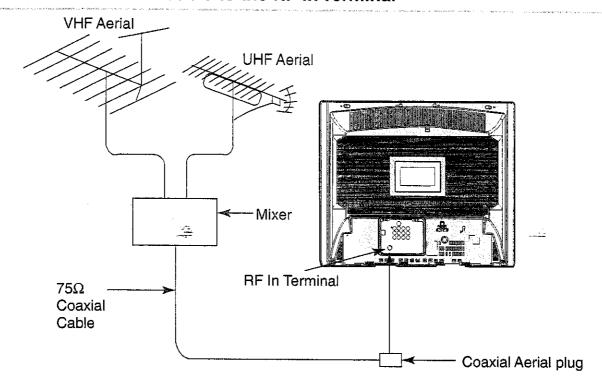

Remove the plug from the wall outlet (Power point) when the TV set is not used for a prolonged period of time.

Do not use this set if abnormal operation occurs. EX: smoke, odd sounds or smells, turn the power switch off and disconnect the AC power if you notice any unusual operation.

Before Operating This Set

Connect the Aerial Cable to the RF In Terminal

To obtain the best quality picture and sound, an external antenna, the correct cables (75 Ohm coaxial) and the correct terminating plug will be required.

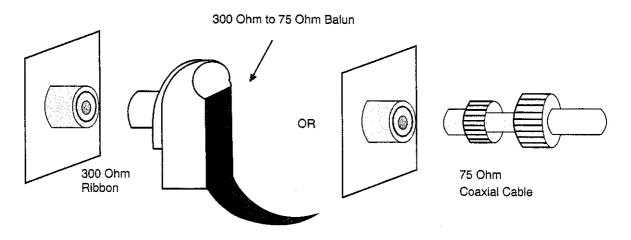

If a communal antenna system is used, you may require the correct connection cable and plugs between the wall antenna socket and your television receiver.

Your local Television Service Dealer may be able to assist you in obtaining the correct antenna system for your particular area and accessories required.

Any matters about antenna installation, upgrading of existing systems or accessories required, and the cost incurred, are the responsibility of the customer.

Note:

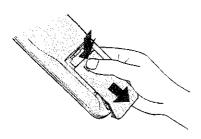

If your existing antenna system_uses 300 Ohm to 75 Ohm Balun, see Below.

Before Operating This Set

Battery Installation

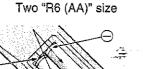

1.

Open the cover.

Apply slight downward pressure while pulling towards the bottom.

2.

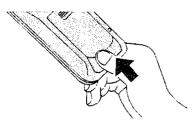

Batteries: Use two "R6 (AA)" size batteries.

Insert the batteries ensuring correct polarity.

This is identifiable by the "+" and "-" symbols on both the batteries and inside the battery compartment.

3.

Replace the cover.

Do not use rechargeable (Ni-Cd) batteries.

They are different in shape and performance and may fail to ensure correct operation.

▲ Battery Cautions

The incorrect use of batteries can cause electrolyte leakage which will corrode the Remote Control or cause the batteries to burst. -

Old Batteries

New Batteries

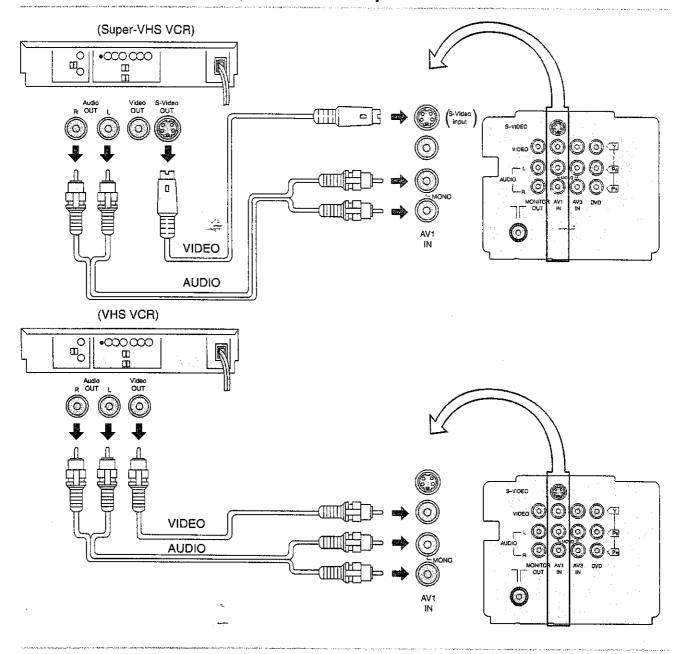

Replacement both batteries at the same time.

Don't mix battery types (alkaline with carbon zinc. etc.) Don't Recharge.

Geomagnetism Correction

Since a large picture tube has been used, blurring of colours and strange discolouration patches may occur depending on the direction the television faces. This is caused by a geomagnetic effect. For optimum viewing, it is necessary to adjust the TV placement.

Helpful Hint

- (1) If Geomagnetic changes still cause colour patches on the screen even after the TV is installed, turn the power off and turn back on again after about 30 minutes.
- (2) Adjustment for geomagnetic should be performed every time the location of the TV is changed.
- (3) In some cases colour patches will not be completely eliminated even after adjustment, particularly in ferro-concrete building and other structures susceptible to geomagnetic. In these cases adjust by changing the installation location.
